Re: Technical Memorandum Alderwood General Sewer Plan Amendment –
Expanded Urban Growth Area – April 2026
Alderwood Water & Wastewater District, Permit WA0020826

Dear John McClellan:

The Department of Ecology (Ecology) reviewed the above-referenced general sewer plan amendment, prepared by BHC Consultants, and submitted in an electronic format by Alderwood Water & Wastewater District on April 29, 2026. Ecology did not receive a hard copy submittal of the document.

Under the authority of RCW 90.48.110 and Chapter 173-240 WAC, Ecology hereby **approves** this general sewer plan amendment. Ecology limits its review and approval to assuring that the administrative and financial policies, operating practices, and preliminary engineering details described in the sections identified in the amendment are adequate to protect water quality. This approval does not imply that the contents of the report satisfy other applicable federal, state or local statutes, ordinances or regulations.

Construction of sewage facilities within the planning area must conform to the policies and general technical requirements described in this general sewer plan or in an approved amendment to this plan. As required by WAC 173-240-030, the Alderwood Water & Wastewater District must submit engineering reports and design documents (plans and specifications) to Ecology for review and approval prior to starting construction of projects identified in this plan.

If you have any questions concerning this approval, please contact Dexter Chan at dexc461@ecy.wa.gov or (206) 670-3281.

Sincerely,

A handwritten signature in dark ink that reads "Rachel McCrea". The signature is fluid and cursive, with a horizontal line drawn underneath it.

Rachel McCrea
Water Quality Section Manager
