Why would you like to serve on this board/commission? To make change for the future and help outline how we develop along with our goals. Thinking more about local sustainability and more community space. Planning and engineering aka solving problems is my passion and I

have always had the desire to help others. This opportunity will allow me to give back.

---

Please explain why you are a qualified candidate, including relevant professional experience, to serve on the board/commission. I have been working in Snohomish County for 7.5 years as a Civil Engineer, I manage permitting and development projects throughout Snohomish County for developers and single-family home owners. My daily job is applying county code to land development projects providing me with an understanding unique to Civil Engineers. I believe this provides me with the qualifications and understanding needed to help Snohomish County lead the way in planning how we develop as a community. I am someone who cares about the environment and how we develop so we can have a hopeful future filled with greenery and life. I am an active member of the Everett community through being the chapter co-chair of *Climate Reality Project-Snohomish County Chapter*, running “Everett Neighbors” Facebook page, being active in my “buy nothing” neighborhood group, attending events and meetings with different groups including the environmental community and SGI Buddhist community in Snohomish County.

---

In my professional career I currently manage 50-60 different projects, including standard Short Plat Development, Rural Cluster Short Plats, Conditional Use Permits, Single Family LDA, Commercial Developments, Boundary Line Adjustments , Mixed Use Development in local Cities and more. This provides me with an understanding and existing relationship with how the county is currently developing, hopefully allowing me to provide beneficial input and feedback on future plans and current proposals.
