

| Committee | Name | District | Why they want to serve |
|-----------|--------------------------|----------|---|
| Pro | Trudy Dana | 3 | I am the former Crime Prevention Officer for the Lynnwood Police, now retired. During my twenty years in that position, I began the Citizens Academy and Citizens Patrol programs that are emulated by law enforcement across the United States. I truly know the needs of law enforcement and am influential in Snohomish County. Members of the Lynnwood Police Citizens Patrol could possibly help spread the word about the importance of this funding. |
| | Kameon Quillen | 3 | Our community is seeing more violent crime than ever and there are not enough resources to address the needs. Cases are taking a few years to get through the courts due to lack of staff which means crime will continue until those responsible are held accountable. Innocent crime victims are having to wait for at least a year to have their cases charged which puts their safety at risk. This is not what Snohomish County needs. |
| Con | Steve Dana | 5 | How we pay for essential public services matters. The primary mission of county government is Criminal Justice related. The focus of the General Fund is Criminal Justice. I'm not in favor of creating a dedicated funding source for criminal justice so the general fund can divert public money to programs not serving the priorities of most county residents. At this point I don't even know if this funding sunsets or is permanent. |
| | Billye Brooks-Sebastiani | 1 | Would like to represent a large portion of our County that doesn't have all the tools to evaluate ballot issues and believe all sides of the issues should be presented in a thoughtful, honest way. I believe this issue surfaces at a time when our residents are burdened with information, some of which is not always accurate. My goal would be to seriously look at the details of the proposal and act accordingly. |
| | James D Kellett | 5 | I support our criminal justice system. However there are better ways for Snohomish County to fund this need rather than raise more taxes on an already stretched population. |
| | Kurt Hanke | 2 | Government needs to hear from citizens when it is going too far. Our state and county have continued to raise taxes despite very burdensome inflation. There seems to be no sympathy for the taxpayer and their plight at all. |
