

#3

John hadn't been in his basement for along time. He remembered that he had stored some old photos and family papers down there so he decided to go into the basement and look for them. When he was going through what he had stored he found a small water leak. The water from the leak hadn't reach anything of value yet, but if he hadn't found the leak he could have lost valuable papers and keepsakes.

My neighbor Mark hired an electrician. During the project the electrician found wires that had heated up and bare and were less than an inch from touching and causing a fire. The electrician fixed the damaged wires diverting a catastrophic event that could have killed everybody in Mark's house.

Mary's elderly mother developed a rash on one of her breasts. It didn't seem that it was that important. She had rashes and itches on other parts of her body. She just thought that it was part of getting old, but the rash continued to grow. Finally she went to her doctor for another issue and casually mentioned the rash to her doctor. He recognized the rash that it might be a type of cancer. The results of the biopsy confirmed his suspicion. The cancer had advanced to staged four. Mary's mother lived for another year and suffered many complications from the cancer spreading to other parts of her body.

Common sense and experience tell us that if situations are addressed early the chances are catastrophes and the damages that come with them will be lessened or even avoided all together. This is always the rule not the exception!

The propagandist will tell the listener, that common sense and experience is wrong. He will say, "Common sense and experience that tell us that if situations are addressed early the chances are catastrophes and the damages that come with them will be lessened or even avoided all together." is a lie.

To backup this claim the propagandist has to use convoluted logic and reasoning mixed with truths, half truths and lies. If this is what you are hearing then a propagandist is at work and has an ulterior motive to deceive and lie.

There is a campaign called CHOSE WISELY that is saying, “Early detection doesn't save lives.”

ELEMENTS OF PROPAGANDA

(1) Name Calling

Links person to negative symbol in hopes that the audience will reject the person or idea on the basis of that negative symbol; no evidence.

(2) Card Stacking

Use of statistics, often one sided manner. It is biased because it leaves out important information that is crucial to drawing an informed conclusion.

(3) Glittering Generalities

Name calling in reverse, seeks to make us approve and accept without examining evidence.

(4) Plain Folks

Appeals to regular people.

(5) Bandwagon

Tries to convince audience that everyone else is doing it so they should too.

Transfer

(6) Projecting positive or negative qualities onto a person to make the other seem more acceptable or discredit them.

(7) Fear

Disaster will result if the audience doesn't follow a particular course of action.

In 2009 I noticed an article in Readers Digest on screening tests. What got my attention was the article was written in super market tabloid style. It was laced with sensational statements and horror stories about medical test and procedures gone wrong. It was obvious a planted story. One doctor's name appeared several times in this story, Dr. Gilbert Welsh. I assumed that Dr. Welsh and his associates were the ones that had planted the story. I kept seeing these stories in the printed media, Newspapers, magazines, books and etc. The Consumer Reports printed a story on screening tests. DR. Welsh's name appeared as a consultant for the story, but also THE AMERICAN BOARD of INTERNAL MEDICINE's Choose wisely campaign was given as the source for the information contained in the article.

These were planted stories that contained all 7 of the elements of propaganda.

These stories are still being planted they still contain the elements of propaganda. They still have an agenda to promote fear and distrust of the medical profession its Doctors and their use of technology. The stories are disguised to be meant to inform patients about the tests and procedures when actually they are meant to influence their critical decisions concerning health and treatments of their patients

AARP printed a story, "10 medical tests to avoid."

<https://www.aarp.org/health/conditions-treatments/info-2014/choosing-wisely-medical-tests-to-avoid.html>

<https://www.aarp.org/health/conditions-treatments/info-2014/choosing-wisely-medical-tests-to-avoid.html>

Medical tests are tools that doctors use to diagnose symptoms so that the problem can be identified. To suggest to patients that they should not have these tests because they can be harmed in some way to influence their decisions and to doctors that they should not use these tests because they are too expensive is like taking your car to a mechanic because it is showing symptoms of something wrong and telling the mechanic that you want him to fix it, but he is only to use certain tool on your list of approved tools. To limit the test and procedures that are to be used by using propaganda techniques on the ELEMENTS OF PROPAGANDA LIST is immoral and unethical.

When a Doctor becomes a doctor they take an oath to serve humanity with their knowledge and skills to heal and lessen suffering. These oaths binds doctors activities not only to the examining room and their offices, but to their activities in public.

Here is a sample of the Doctor's oath, from **Association of American Physicians and Surgeons, Inc.**
A Voice for Private Physicians Since 1943
Omnia pro aegroto

<http://www.aapsonline.org/ethics/oaths.htm#weinstein>

ht tp://www.aapsonline.org/ethics/oaths.htm#weinstein

The Oath of the Healer by Louis Weinstein

“In the eyes of God and in the presence of my fellow students and teachers, I at this most solemn time in my life do freely take this Oath, whereby I shall pledge to myself and all others the manner in which I shall live the rest of my days.

I shall be ever grateful to my teachers who have planted the seeds of knowledge, which I shall nurture forever. I thank them for allowing me to see the importance of learning and realize that lifelong study is critically important to becoming a Healer.

I realize that on this day, I become a physician for all eternity. I shall strive to be a person of good will, high moral character, and impeccable conduct. I shall learn to love my fellow man as much as I have learned to love the art of healing.

I shall always act in the best interest of my patient and shall never allow personal reward to impact on my judgment. I shall always have the highest respect for human life and remember that it is wrong to terminate life in certain circumstances, permissible in some, and an act of supreme love in others. I shall never promise a cure, as only death is certain, and I shall understand that preserving health is as important as treating disease. When a patient for whom I have been caring dies, I shall have the strength to allow him or her to die with dignity and in peace.

I shall have as a major focus in my life the promoting of a better world in which to live. I shall strive to take a comprehensive approach to understanding all aspects of life. To become the Healer I wish to be, I must expand my thinking and practice from a system of episodic care to one of a preventive approach to the problems of mankind, including the social ills of malnutrition and poverty that plague the

world in which we live.

I am not a God and I cannot perform miracles. I am simply a person who has been given the rights and responsibilities to be a Healer. I pledge to myself and all who can hear me that this is what I shall become.”

Other oaths differ slightly, but still have the charge to doctors to serve humanity with all their mind, heart and soul.”

The doctors that are involved in the Choose Wisely Campaign of planting stories that are designed to interfere with the critical health decisions of doctors and patients by promoting fear and distrust of the medical profession and its technology in patients and limiting doctors from choosing advanced technology to diagnose and treat patients symptoms because of cost are in direct violation of the oath that they took when they became a doctor.

There is no conversations, just propaganda promoting fear and distrust of the medical profession and its tests and procedures. In the video “We're Choosing Wisely” you can be harmed is repeated over and over and over again. Please watch the video. Just search in Google “We're Choosing Wisely”

Thank you very much for your response. :)

Questions are raise about the American Board of Internal Medicine and its Choose Wisely Campaign.

(1) Why would a medical board made up of Medical doctors choose the low road of propaganda techniques to inform the public about the safety of medical tests and procedures, instead of straight forward information?

(2) Why would Doctors in the management of clinics allow their clinic to get involved with an organization that is using propaganda information to influence the decisions that run counter to the Hippocratic Oath that they swore too when they became doctors?

(3) Who beside their conscience are Doctors accountable to after taking the Hippocratic Oath?

There are other questions concerning the ethics and morality of this organization The American Board of Internal Medicine and it's Choose Wisely Campaign .

Notice of Plan's Decision Regarding a Grievance

Enrollee ID Number: 11282918400

Dear LESLIE MUTCHLER:

This letter is in response to your grievance (complaint) that you filed with us on 11/28/2018.

Based upon our review, the following information was researched and verified.

We have reviewed your letter received by Premiera Blue Cross on November 28, 2018. We thank you for taking the time to share with us your concerns regarding the Everett Clinic Nurse Case Management program. We also thank you for the detailed information provided with the letter. Your concerns regarding the Nurse Case Management has been conveyed to the Everett Clinic management, who appreciated being made aware of your concerns. We are happy to hear you have transferred your care to Swedish Medical Center and remain resolved to assist you with any issues you may encounter in receiving your primary care. Please do not hesitate to contact us at the number listed below to help address or assist you with any questions, comments, or concerns you may encounter with Swedish Medical Center.

Premera Blue Cross apologizes for any inconvenience this issue may have caused. Your concerns have been entered into our database tracking system. This information will be shared with the appropriate departments and it will be used to continually improve the quality of care and service we and our contracted providers provide to our members.

If you have any questions, please call Premiera Blue Cross at 888-850-8526. TTY users should call 711. We are open 8 a.m. to 8 p.m., seven days a week from October 1 through February 14; 8 a.m. to 8 p.m., Monday through Friday from February 15 through September 30.

Thank you for your concern.

Premera Blue Cross is an HMO plan with a Medicare contract. Enrollment with Premiera Blue Cross depends on contract renewal.

Dear A C L U:

In 2009 I noticed a story in Readers Digest against screening tests. The sure of the story seemed to be a Dr. Gilbert Welsh and his associates. What got my attention was the style that the story was written in as supper market tabloid style. I canceled my subscription to the Readers Digest.

Then Consumer Reports ran the same kind of story. Dr. Gilbert Welsh was names as a consultant along with the ABIM American Board Of Internal Medicine. I again I canceled my subscription to Consumer Reports.

AARP published a story, "Ten Medical tests that should be avoided. I was written in same supermarket tabloid style style. Again I canceled my subscription to AARP.

It was quit apparent that ABIM was planting these stories!
I complained to my clinic , EVERETT CLINIC and my insurance PREMIER.

I wrote this in my defense .

John hadn't been in his basement for along time. He remembered that he had stored some old photos and family papers down there so he decided to go into the basement and look for them. When he was going through what he had stored he found a small water leak. The water from the leak hadn't reach anything of value yet, but if he hadn't found the leak he could have lost valuable papers and keepsakes.

My neighbor Mark hired an electrician. During the project the electrician found wires that had heated up and bare and were less than an inch from touching and causing a fire. The electrician fixed the damaged wires diverting a catastrophic event that could have killed everybody in Mark's house.

Mary's elderly mother developed a rash on one of her breasts. It didn't seem that it was that important. She had rashes and itches on other parts of her body. She just thought that it was part of getting old, but the rash continued to grow. Finally she went to her doctor for another issue and casually mentioned the rash to her doctor. He recognized the rash that it might be a type of cancer.

The results of the biopsy confirmed his suspicion. The cancer had advanced to staged four. Mary's mother lived for another year and suffered many complications from the cancer spreading to other parts of her body.

Common sense and experience tell us that if situations are addressed early the chances are catastrophes and the damages that come with them will be lessened or even avoided all together. This is always the rule not the exception!

The propagandist will tell the listener, that common sense and experience is wrong. He will say, "Common sense and experience that tell us that if situations are addressed early the chances are catastrophes and the damages that come with them will be lessened or even avoided all together." is a lie.

To backup this claim the propagandist has to use convoluted logic and reasoning mixed with truths, half truths and lies. If this is what you are hearing then a propagandist is at work and has an ulterior motive to deceive and lie.

There is a campaign called CHOSE WISELY that is saying, "Early detection doesn't save lives."
