services and any associated amendments, between Snohomish County and RedCloud Consulting, Inc., under SCC 3.04.140(8). Background: At present the County does not have an effective Enterprise Resource

Planning (ERP) solution that meets modern business needs for an enterprise the size of Snohomish County. A consultant is recommended to provide project planning support and advisory services for a comprehensive ERP system. The selection and implementation to replace the current Financial and Human Resources management systems, creating efficient business processes, and decreasing risk while managing the complexity of county operations is necessary. RedCloud Consulting, Inc. was selected to provide these consulting services in accordance with Snohomish County Code section 3.04.203. This process will take a large amount of time to implement and complete, expedited handling is requested.

Action Requested: For Council to consider the motion.
