Agreement No. PDB01-23

Validation Plan Amendment to the Progressive Design-Build Contract for the Arlington Operation Center Redevelopment Project

This Validation Plan Amendment to the Progressive Design-Build Contract ("Validation Plan Amendment") is entered into as of the date of the last party to sign, between Snohomish County ("County") and Cornerstone General Contractors, Inc. ("Design-Builder" or "DB") and amends the Progressive Design-Build Contract for Arlington Operations Center Redevelopment Project between County and Design-Builder dated December 13, 2023 ("Original Agreement").

The Original Agreement is amended to add the following exhibits:

- 1. **Exhibit G, Validation Phase Scope of Work**, attached hereto and by this reference made part of the Original Agreement.
- 2. **Exhibit H, Validation Phase Budget**, attached hereto and by this reference made part of the Original Agreement.

The Design-Builder's total fee for the work authorized in this Validation Plan Amendment shall not exceed \$722,160.00.

Except as expressly provided in this Validation Plan Amendment, all terms and conditions of the Original Agreement, shall remain in full force and effect.

Exhibit G Validation Phase Scope of Work

Amendment Summary

| Amount | \$722,160* (Not to Exceed, includes DB Fee) |
|-----------------------|---|
| Phase Completion Date | June 28th, 2024 (See Original Agreement, Attachment B, Project |
| _ | Estimated Schedule) |
| Scope of Work | Services to investigate site(s) conditions, validate goals and |
| (Validation Phase) | objectives, plan, conceptualize design, define project scope, and |
| | cost approach with various approved supporting activities. (see |
| | Detailed Scope Description below) |

Detailed Scope Description

Details for the tasks and scopes of the Validation Phase are as follows. The Design Builder ("DB") is responsible for all deliverables, resources, people, materials or similar, to complete the tasks for the stated not-to-exceed amount.

Task 1: Meetings

A. Weekly Project Progress Meetings

The DB will send meeting invites for **virtual meetings** to be held **each Tuesday from 1-2:30PM**, **unless otherwise agreed by the County**. The DB will be responsible for providing an agenda and reviewing materials **two (2) business days** prior to each progress meeting. Each distributed agenda will indicate the actions to be taken and requested input/feedback/decisions from the County, stakeholders, subject matter experts or similar. The DB can invoice for the Key Team Member time involved in planning, hosting, and managing weekly meetings. No other costs are anticipated with this item.

B. Other Meetings

The DB will also coordinate meetings with subject matter experts, authorities having jurisdiction (AHJs), County User Groups, Stakeholders or similar as needed during the Validation Phase. The DB will prepare a list of all entities, businesses, users, stakeholders or similar that will be engaged during validation. The DB can invoice for Key Team Member time involved in planning, hosting, and managing meetings. No other costs are anticipated with this item.

Task 2: Site Investigation and Current Conditions Assessment

The DB will itemize through a Critical Information List (CIL) all anticipated exploratory needs and investigations. The DB will conduct site investigation and current conditions assessment as needed to understand the requirements and options for development/redevelopment and use (e.g.,

PDB01-23 Exhibit G Page 1 of 7

survey, soil, existing documentation review, as-builts, etc.). The DB will investigate both the Arlington Operations and the Granite Falls sites. In accordance with the Contract Documents the DB shall prepare and baseline site conditions "report" that will be the basis of any changed conditions that may present during additional phases. The DB can invoice for studies, reports, or similar analysis produced by subject matter experts or subconsultants as provided in the Validation Proposal. Meeting time needed by Key Team Members directly associated with Task 2 can be invoiced under Task 2. Key Team Members time and subcontractor/SME cost are anticipated. No other expenses are anticipated with this item.

Task 3: Conceptual Design(s)

A. Site(s) Design

The DB, at a minimum, will provide initial or conceptual site design(s) for both Arlington Operations and Granite Falls. Arlington Operations will include a Master Plan outlining potential future phases of development and meet the requirements for the City of Arlington's Master Site Plan. Additionally, the DB will provide options and ideas for Arlington site remediation.

B. Building/Facility Design

The DB will provide a conceptual or schematic design for the Arlington Operations Center (building/facilities) that will include options for space, use, maintenance, and similar within the County's target budget. The initial Design will include **LEED** planning and identification of necessary elements contemplated/being planned for US Green Building Council certification.

C. Continuous Operations (design)

The DB will provide an initial or conceptual plan for continuous operations, which will, at a minimum, include options for temporary facilities and other identified potential "costs" of providing resources, infrastructure, etc. for County staff during construction.

The DB can invoice for Key Team Member time for design or meetings necessary to develop these conceptual or initial designs. No other costs are anticipated for this item.

Task 4: Project Work Plan, Schedule, and Cost Model

A. Project Schedule

The DB will develop an initial Project Schedule that will cover Phase 1 and Phase 2. The Project Schedule will be in a Gantt style Critical Path Method and format which will include, at minimum, project anticipated milestones, all tasks, and interconnectivities of both the DB, subcontractors, subconsultants, trade partners, vendors, AHJs and County to the extent that the activities are considered critical path.

B. Cost Model

PDB01-23 Exhibit G Page 2 of 7

The DB will develop an initial Project Cost Model which will be used to communicate all anticipated costs and expenditures related to and planning for a Guaranteed Maximum Price (GMP).

C. Project "Workbook"

The DB will develop and propose to the County a "master project tracking tool" that contains all critical project information, schedule, estimates and costs, work packages, subcontracting, procurement, and similar in one easy to access instrument that can be exchanged, opened, and commented by any Project Team member or Stakeholder. The County does not object to the use of the DB's project management software but will not be able to have separate licenses or similar for use so the DB should anticipate any tracking and reporting to be able to be converted to an excel spreadsheet or similar acceptable document format. The County does not have Bluebeam, AutoCAD or similar and is unable to obtain the use of such applications and software.

D. Initial Permitting Plan

During Validation the DB will prepare an initial permitting plan. The plan will include a list of all known and likely permits on the project. The plan will list the authority having jurisdiction, the anticipated process, time, cost. Permitting, being on critical path, will be integrated into the project schedule for continuous review.

E. Subcontracting, Procurement, and Diverse Business Inclusion Plan

The DB has presented a Subcontracting and Inclusion Plan. During Validation, the County and the DB will formally agree to this Plan and any affirmative efforts and inclusion strategies for the project. In addition, the County would like to see *procurement, buy-out, subcontracting, and diverse business inclusion tracking* all in the same "space." The DB and the County will agree together on the format. The County intends to discuss the subletting of all firms, companies, vendors, trade partners or similar on this Project and reserves the right to oversee or be involved in any procurement or buy-out, so the DB is requested to show a schedule and approach for any subcontractor, subconsultant, vendor or similar.

F. Risk Assessment

The DB shall prepare a project risk assessment in a format acceptable to the County. The Risk Assessment will include identified and anticipated risk items, possible mitigation strategies, and potential costs. The information will be used to form contingency within the GMP.

The DB can invoice for Key Team Member time for product development or meetings necessary to develop these conceptual or initial plans. No other costs are anticipated for this item.

Task 5: Reports and Phase 1 Proposal

A. Validation Report

PDB01-23 Exhibit G Page 3 of 7

The DB shall prepare a Validation Report which includes at least 1-2 options in all listed (above) task categories (excluding meetings) for the County to consider. The report should include an appendix with all reports, meeting minutes, agendas or similar work products obtained and used to present the County with options and recommendations. If the DB believes there is only one (1) viable option, then the DB should be prepared to explain the rationale and information obtained that led to that conclusion.

B. Phase 1 Proposal

With the Validation Report the DB shall propose a schedule, task list/workplan/deliverables, and cost for Phase 1 deliverables. The Phase 1 Proposal shall conform to the Scope of Services as required by Exhibit D of the Contract Documents. The Proposal shall be in a format acceptable to the owner and include all the DB and Key Team Members, DB team staff, subconsultants, and similar proposed to be included in Phase 1.

1. Exhibit D finalization

To prepare a proposal for Phase 1; Exhibit D – Scope of Services of the Contract Documents needs to be finalized. The DB must coordinate with the County for this task. At a minimum, the DB should provide the County with a working document with suggested edits and/or notes in the margins with suggested updates.

The DB can invoice for Key Team Member time for product development or meetings necessary to develop these conceptual or initial plans. No other costs are anticipated for this item.

ADDITIONAL ITEMS

Bond

A Payment and performance bond for the full amount of the Amendment is required. A Notice to Proceed for this phase shall not be issued until the County has received an original bond as required under *Section 11.2 of the Original Agreement*.

Prior to Work-On-Site

The DB will provide notice to the County prior to any work on either site, including, but not limited to, survey, testing and sampling, soil disturbance, use of heavy equipment or similar. All on-site activities must be coordinated with County Road and Bridge Operations. The DB should strive to provide a request to access the *Arlington Operations Site* 2 weeks' prior and should plan so there is a little to no disturbance to County operations. This may include performing site investigations during crew shift changes, after hours, or similar. The DB is responsible for any permits that may be required to perform such activities and to identify subcontractors and classified, trade labor to be used. Although not anticipated to be necessary, the County reserves the right to require an Apprentice Utilization Plan for those activities if such work becomes significant.

Invoicing

PDB01-23 Exhibit G Page 4 of 7

During the Validation Phase, the DB may invoice the County once per month. Unless otherwise agreed by both County and DB, invoices will be due on the 5th of the month for the previous months completed work. The DB will submit each invoice with an approved cover sheet that itemizes each task the allocated amount spent, left to spend and any overages anticipated, along with any backup documentation appropriate to detail the expenses and completed work. (See Attachment A for Example Coversheet) Backup could be, but not limited to, timesheets, subcontractor invoices, subconsultant invoices, and receipts for any pass-through costs. At a minimum, the DB will review the draft application for payment with the project team at the last weekly progress meeting of the month before it is submitted to the County for processing.

Diverse Business

During the Validation Phase, Design Build Team will work to meet the Diverse Business requirements and specified in the Contract Documents and outlined in Attachment C.
