

Sno Cty Meeting June 5th, 2024

- Name is Steven Hutt Monroe Wa and 73 years old
- Here to express concern over the use of binary exploding targets
- REVISE RECREATIONAL SHOOTING TO MAKE BINARY EXPLDING TARGETS ILLEGAL IN SNO CTY
- WATER CAN TURN BROWN
- DAMAGE FOUNDATIONS
- MAKE WINDOWS CRACK AND/OR BREAK
- CAUSE FIRE DAMAGE
- CAUSE WILDLIFE DAMAGE
- MANY STATES HAVE PROHIBIT THE USE OF BINARY EXPLODING TARGETS
- Examples of common binary explosives include Oxyliquit (liquid oxygen/combustible powder), ANFO (ammonium nitrate/fuel oil), Kinestik (ammonium nitrate/nitromethane), Tannerite and ammonal (ammonium nitrate/aluminum), and FIXOR (nitroethane/physical sensitizer).
- A mixture of lampblack and liquid oxygen was measured to have a detonation velocity of 3,000 m/s, and 4 to 12% more explosive power than dynamite. The long duration of the flame it produced, however, made it unsafe for use in the presence of explosive gases. Therefore, oxyliquits were mostly used in open quarries and strip mines.
- ANFO (/ˈænfou/ AN-foh)^[1] (or AN/FO, for **ammonium nitrate/fuel oil**) is a widely used bulk industrial high explosive. It consists of 94% porous prilled ammonium nitrate (NH_4NO_3) (AN), which acts as the oxidizing agent and absorbent for the fuel, and 6% number 2 fuel oil (FO).^[2]
- We used Kinestik as the explosive of choice. It came as powder in a plastic tube about the size of a stick of dynamite. To make it "hot" you just emptied the tube into a hard hat, mixed a red gel from a plastic packet in, shoved it back into the tube and inserted a blasting cap. To make it work we drilled holes into the rock to be blasted, inserted the pre-wired sticks, covered with earth and covered the hole with a cable spool end. Each stick had the equivalent blast power of about a quarter stick of dynamite.
- Tannerite is a brand of binary explosive targets used for firearms practice and sold in kit form. The targets consist of a combination of oxidizers and a fuel, primarily aluminum powder, supplied as two separate components that are mixed by the user ^[2]. Tannerite is relatively stable when subjected to forces less severe than a high-velocity bullet impact. It requires a high-velocity bullet impact to initiate a reaction, and it is designed to be non-flammable ^[2].
- Typically, one pound of Tannerite is considered to have roughly the same explosive power as about a quarter stick of dynamite. So, if you're looking to match the boom of a single stick of dynamite, you'd need around four pounds of Tannerite. Nov 23, 2021
- EXAMPLES OF EVENTS
- NOISE OF EXPLODING ITEMS
 - TANNERITE
 - GUN SHOOTING
 - FIREWORKS AT ILLEGAL TIMES AND WRONG DAYS
- April 21st 2015 - encroachment in the NGPA area
- Jan 20th, 2021 - Animal Dog Complaint filed by myself and another neighbor

- Todd Edward Beloit, age 57, of Monroe, Washington passed away on Saturday, April 16, 2022. Todd was the husband, father, grandfather, and good neighbor. We had discussions and he had his son Blake STOP his shooting. Todd was doing handyman/yardwork for two (2) elderly neighbors and things were good.
- Todd passed away and Blake went right back to his old habits
- August 6th, 2022 - gun shooting late at night
- June 25th, 2023 - fireworks and using an automatic weapon after 9:00 pm
- May 26th 2024 - gun shooting and exploding targets
- May 28th, 2024 - gun shooting and exploding targets
- May 31st, 2024 - gun shooting and exploding targets. After all the neighbors calling 911, Sgt Brad Dawes went to the homeowner residence and talked with them. Sgt Dawes did a GREAT JOB!! This was the 1st time Snohomish County sheriff's office has gone to the home at 25309 120th ST SE. Sgt Dawes took the time and called all of us who called 911. That was very nice follow-up. Please talk to Sgt Dawes about his conversation with Angela and Blake Beloit. Incident # 2024-72862
- June 1st, 2024 - gun shooting and exploding targets started at 9:03 pm
- June 2nd exploding target at 8:50 pm
- June 2nd exploding target at 6:18 pm and 8:50 pm
- June 3rd exploding target at 9:04 pm
- Very late and after sunset
- PLEASE WE ASK FOR YOUR HELP BEFORE THIS ESCALATES ANY FURTHER THAN IT IS CURRENTLY
- NEIGHBORS WITH YOUNG CHILDREN AND NEW BABY ARE EXTREMELY MAD. If anyone happens to know the address to our adjacent neighbors that feel the need to continually light off high powered fireworks or black powder rifles (possibly a freaking cannon) every night I would appreciate it. I intend to pay them a visit on behalf of my sleeping children.
- Private Nuisance Lawsuit (<https://www.findlaw.com/injury/torts-and-personal-injuries/private-nuisance.html>) may be a course of action to stop the explosions. It would mean hiring an attorney at some expense and demonstrating that this neighbor's actions are preventing us from enjoying our property and it is potentially harming us as well
- AHPO - ANTI-HARASSMENT PROTECTION ORDER TO BE FILED WITH EVERGREEN DISTRICT COURT
- A single act of violence or threat of violence directed at a specific person that seriously alarms, annoys, harasses, or is detrimental to such person, and that serves no legitimate or lawful purpose, which would cause a reasonable person to suffer substantial emotional distress, and must actually cause substantial emotional distress to the petitioner. A single threat of violence must include: (i) A malicious and intentional threat as described in RCW 9A.36.080(1)(c); or (ii) the presence of a firearm or other weapon
- PLEASE HELP US.
