**MEMORANDUM**

**TO:** Inheriting Planner  
**FROM:** Ryan Medlen, Project Manager Priorem  
**DATE:** April 17, 2019  
**SUBJECT:** Accessory Apartment Code Update  
**FOLDER:** S:\Code Dev\Code Projects\Medlen\Accessory Apartments

**Dave Somers**  
*County Executive*

---

**The Project:** This briefing memo is to introduce you to the accessory apartment code and provide you with background information up until this point. The intent is to assist you in taking over the project and avoiding past mistakes.

**Background Information:** The code project is rooted in the need to make the accessory apartment code more practical and to explore options to allow accessory apartments outside the UGA. With some exceptions, County decision-makers are largely thought to be supportive of allowing accessory apartments on substandard lots, including in outside the UGA. There is case law that prevents this from being feasible. To summarize, Growth Management Hearings Board precedent implies that detached accessory apartments contribute toward density whereas attached accessory apartments do not. For this reason, the GMHB would prefer that detached accessory apartments only be permitted on lots 10 acres or larger whereas it is implied that attached accessory apartments are OK on substandard lots.

A version of accessory apartment code amendments were taken to Planning Commission for a briefing in November, 2018 and sent to the PA's Office for review. The PA rejected the code amendments on the basis of the GMHB precedent referenced above. They want to understand the change of circumstance that justifies, under the Growth Management Act, allowing accessory apartments on substandard lots outside the UGA.

The Planning Commission is highly opinionated on the matter. The briefing did not go well in that the discussion descended into fairly repetitive statements that were at times contradictory with the thoughts and comments of other commissioners or other comments from the same commissioner. No consensus was apparent. I would recommend a thorough review of the history of accessory apartments in Snohomish County and the current code requirements of accessory apartments ahead of introducing changes at a briefing. Merging the explanation of the new code amendments with a telling of the current language did not work well. Some of the negativity focused on the current requirements and their perception of these requirements being new.

**Current Issue:** The delay on this project is a result of the introduction of SB 5812 to the Washington State Legislature. The bill has undergone a series of amendments but will likely require the County to make some level of code amendments. Various versions have

included language of varying levels of significance to the substandard lot prohibition. The latest version states accessory apartments cannot be counted toward density inside an urban growth area and that no minimum lot size is permitted (with the implication that this lot size clause only applies to urban areas). One thought is that it seems to be inconsistent logic that accessory apartments do not contribute to density in urban areas, where they are more likely to be marketable as rental properties, but not outside the UGA. If this bill passes, it should be considered whether it implies a legal change of circumstance.

**Thoughts on  
Next Steps:**

Any allowance of accessory apartments on substandard lots outside the UGA is at a high-risk for appeals. There should also be consideration that any appeal may also challenge the County to amend the code to only allow detached accessory apartments on 10+ acre lots outside the UGA.

General thoughts on code amendments:

- An amendment to allow attached accessory apartments on substandard lots outside the UGA should be consistent with GMHB precedent.
- Eliminating the minimum square footage has been well received.
- The owner-occupancy requirement is understood to have limited enforcement abilities and majority management opinion has been to eliminate it. However, the theory of the owner-occupancy requirement was popular with the Planning Commission. Removing the owner-occupancy requirement will be a matter for debate.
- The maximum size will be seen as arbitrary no matter what you propose. Be mindful that accessory apartments are exempt from impact fees.
- Some on the Planning Commission were of the opinion that different types of accessory should have different maximum size (i.e. a basement accessory apartment should be allowed as the entire basement regardless of the size).

# PROJECT CHARTER

Accessory Dwelling Units

<b>Project Title:</b> Accessory Apartment Code Update		<b>Sponsor:</b> Mike McCrary, Deputy Director		<b>Project Manager:</b> Mitchell Brouse, Planner		
<b>Project Description:</b> This project is intended to update the sections of the UDC which pertain to accessory apartment permitting.				<b>Attachment(s):</b>		
<b>Why Is the Project Needed:</b> Accessory dwelling units are often considered a type of housing, which, if cited and regulated appropriately, helps localities achieve some the housing goals identified in the 2015 Comprehensive Plan and 2013 Housing Characteristics and Needs Report. Current UDC code requirements can make pursuing permitting for accessory apartments challenging and impossible for some properties, particularly in the rural zones. Updates to SCC 30.22, 30.28.010, and 30.23.235(3) could improve the usability and flexibility of the regulations, improve clarity, and make construction of accessory apartments more accessible throughout the county.						
<b>Amendment Brief:</b>						
Project Scope		Major Milestone	Target Due Date	Project Organization		
<ul style="list-style-type: none"> <li>Update SCC 30.22 to consider changing accessory apartments from an administrative conditional use to a permitted use in zones where a SFD is allowed.</li> <li>Consider eliminating, changing, or updating the prohibition on accessory apartments on substandard lots listed in SCC 30.23.235(3).</li> <li>Evaluate and consider changes to language in SCC 30.28.010 to simplify regulations, modernize language, and reorder to improve layperson understanding.</li> <li>Evaluate effectiveness of existing regulations.</li> <li>This request will require a SEPA determination including completion of the environmental checklist.</li> </ul>		Revised Project Charter Complete	Aug. 22, 2019	<b>Project Coordination</b> Ordinance development will be lead and coordinated by PDS Long Range Planning staff.	<b>PDS Project Team</b> <ul style="list-style-type: none"> <li>Mitchell Brouse, Planner</li> <li>Brandi Spores, Administrative Assistant</li> </ul>	
		Draft Ordinance Complete	Sept. 2019			
		PDS Review and Testing	Sept. 2019			
		Draft to PA for Review	Oct. 2019			
		Updated Draft	Nov. 2019	<b>Level of Commitment from the PA</b>		
		Planning Commission Briefing	Nov. 2019			
		Planning Commission Hearing	Nov.-Dec. 2019			
		ECAF Transmitted to Council	Dec. 2019-Jan. 2020	This is a proposed code amendment will require substantive involvement from the assigned PA, including consultation, review, and possible risk analysis. As such, it has been given a Tier 3 classification.		
		Council Briefing	TBD			
		Council Hearing	TBD			
Project Scope Change Requirements		Project Deliverables		Outreach Approach		
The scope of the project can be changed at the approval or request of the project sponsor.		<ul style="list-style-type: none"> <li>Project Charter</li> <li>Proposed Amendments and Ordinance</li> <li>SEPA Checklist</li> <li>Staff Report</li> <li>Department of Commerce notice of intent</li> <li>Summary Notice</li> <li>ECAF package for Council consideration</li> <li>Project Record</li> </ul>		<ul style="list-style-type: none"> <li>Planning Commission Hearing</li> <li>SEPA notice and comment period</li> <li>County Council Hearing</li> </ul>		
SOAP Compliance				Key Stakeholders		
The purpose of the Snohomish County Sustainable Operations Action Plan (SOAP) is to integrate sustainable practices that will reduce Snohomish County's carbon footprint. The scope of this project should not be in conflict with the goals of the SOAP.				<ul style="list-style-type: none"> <li>Snohomish County Residents</li> <li>Master Builders Association</li> <li>Snohomish County Permitting Division</li> <li>Tribes</li> <li>Environmental Community</li> <li>Agricultural Board</li> </ul>		

Policy Issues and Project Risks		
	<i>Policy Issue</i>	<i>Risk &amp; Possible Solutions</i>
1	Growth Management Act Compliance	While drafting regulations, care should be taken to ensure that updated code does not violate GMA. There is a perception that allowing accessory dwelling units in the rural area detracts from rural character by allowing urban scale development.
2	Urban vs. Rural/Resource	Should properties located in the rural areas have the same regulations as those properties within the UGAs? In either case, consideration of the specific characteristics of each area is necessary. New regulations should result in development that complies with the specific characteristics of the area.
3	Mobile Homes as Accessory Apartments	Mobile homes are currently allowed as accessory apartments on properties that are larger than 10 acres and located outside the UGAs.
4	Temporary Dwelling Units	SCC has provisions to allow a temporary dwelling units for a relative for up to one year. Consideration should be given into how changing accessory apartment regulations may or may not impact this portion of code and if updates are necessary.

Charter Review/Approval		Date
<b>Prepared By:</b>	Mitchell Brouse, Planner	
<b>Approved By:</b>	Mike McCrary, Deputy Director	

**ACCESSORY APARTMENT CODE UPDATE**

---

**BACKGROUND**

Various Snohomish County planning documents, including the 2015 General Policy Plan and 2013 Housing Characteristics and Needs Report, as well as other planning literature, identify accessory apartments as type of housing that can help diversify the housing stock, increase the supply of affordable and senior housing, better accommodate the shrinking average household size, and help decrease the housing shortage. As such, accessory dwellings units can contribute to achieving the local housing goals listed in the Comprehensive Plan, Countywide Planning Policies, and Multicounty Planning Policies.

This code project is intended to evaluate the role of accessory apartments in implementation of county policy and to update county code accordingly. In late 2018, code amendments were drafted, reviewed by the Prosecuting Attorney, and presented to the Planning Commission. The following is a brief summary of the code amendments proposed at that time:

- a. Change accessory apartments from an administrative conditional use to a permitted use in the rural, resource, and other zones.
- b. Remove the prohibition on accessory apartments on substandard lots.
- c. Remove the minimum accessory apartment size requirements. Simplify the maximum size determination by removing the calculation and setting the maximum size at 900 square feet.
- d. Remove the design and landscaping requirements for accessory apartments in the rural areas.
- e. Clarify language throughout to add clarity and improve usability.

After briefing the Planning Commission, the proposed amendments were tabled to await consideration of SB 5812 by the Washington State Legislature. If approved, it would have affected local regulation of accessory dwelling units. The proposed bill did not pass, and thus, this is an opportune time to reconsider updates to these sections of code.

---

**PROBLEM STATEMENT**

Existing code regarding accessory apartments is somewhat difficult for land owners to use and presents regulatory barriers for those seeking permits to construct accessory apartments, especially in the rural and resource zones. Between 2013 and the end of 2018, 70% of accessory apartment applications have been located in the rural areas and, while the regulations on paper are the same for both urban and rural areas, in practice, they restrict ADUs in the rural zones to a greater extent than in the urban zones. For example, because required lot sizes are larger in the rural and resource zones than the urban zones, the accessory apartment prohibition on substandard lots affects rural properties to a greater extent than urban properties.

Code updates that improve clarity, reduce regulatory barriers, and make it easier for land owners in the rural areas to obtain permits could be warranted. Updates could be pursued while maintaining protections on health, safety, and welfare, limiting sprawl, and protecting the character of rural areas.

---

**DESIRED OUTCOME**

The following are the primary goals of this code update project:

- a. Improve the clarity and usability of SCC sections that apply to the construction and use of accessory apartments.
- b. Reduce barriers to accessory apartment construction, with particular focus on the rural zones.

- c. Evaluate current accessory apartment development standards to ensure that they serve their intended purpose. Pursue updates to code if determined necessary by this analysis.
- 

## OVERVIEW OF EXISTING CODE

Development standards for accessory apartments are contained in SCC 30.28.010. Other applicable sections include the use tables (SCC 30.22), general development standards for substandard lots (SCC 30.23.235, and definitions (SCC 30.91A.040, 30.91A.050, and 30.91L.195). Appendix A contains full text of applicable code sections. The following is a summary of code that directly apply to accessory apartments:

- Accessory apartments are an administrative conditional use in all zones that single family dwellings are allowed.
  - Accessory apartments are prohibited on substandard lots.
  - Either the primary single family dwelling or the accessory apartment shall be owner occupied and the owner shall file and record a declaration of owner occupancy.
  - Accessory apartments shall be no smaller than 360 square feet. Maximum square footage of the accessory apartment is a percentage of the square footage of the primary dwelling. The percentage changes dependent on the size of the primary dwelling.
  - Attached accessory apartments shall preserve the architectural character of the single family dwelling. Only one main entrance allowed on the front of the building.
  - All accessory apartments shall comply with the setback and lot coverage requirements in the zone for which they are located and detached accessory apartments shall not extend beyond the front of the single family dwelling, unless they are appropriately screened, in residential, multiple-family, or commercial zones.
  - One off-street parking spot shall be provided.
- 

## GROWTH MANAGEMENT ACT (GMA) CONSIDERATIONS

The Growth Management Act (GMA) sets limits on development in an effort to avoid sprawl. As such, it prohibits urban development in areas that are identified as rural and resource, requiring that development policies in those areas maintain the “rural character” of the area. While “rural character” is not explicitly defined, the GMA, Growth Management Hearing Board (GMHB) decisions, and Supreme Court rulings provide a framework for determining rural character and how it interacts with accessory apartment regulations:

- The state legislature did not, in the GMA, specify a specific density threshold that can be used to differentiate between urban and rural, but it did provide a framework for making that determination.
  - Rural density is “not characterized by urban growth” and maintains consistency with “rural character.”
  - As such, rural densities can/should be determined, based on the specific characteristics of the area.
- In general, GMHB decisions indicate that development density over 1 dwelling unit per 5 acres is not considered rural. This bright line test has been used in a variety of GMHB opinions.
- Further, attached and detached accessory apartments are considered differently with regard to density. Detached units need to be considered in density calculations, while attached units, due to their close association with the primary dwelling, do not need to be considered.
- Despite GMHB decisions on rural densities, the Supreme Court of Washington stated in Thurston County v. WWGMHB that the GMHB does not have the authority to establish a bright line test and that the hearing board should make determinations about rural densities based on the specific attributes of the case.

**POLICY OPTIONS AND CONSIDERATIONS**

Growth Management Hearing Board decisions and the application of the GMA need to be analyzed to inform how accessory apartment regulations can be structured. With that in mind, care should be taken to ensure that regulations do not allow urban population densities in the rural areas. Further, it should be noted, and considered while making policy decisions, that impact fees do not apply to the development of accessory apartments. Tables 1 and 2, below, outline a two key policy decisions that will provide direction to the development of code amendments for accessory apartments and Table 3 outlines other code revisions that could be considered.

**TABLE 1: Policy Decision Number 1**

<b>Current Regulation</b>			
Accessory apartments (AA) are an administrative conditional use in all zones that allow single family dwellings (SFD).			
<b>Code Options</b>		<b>Key Considerations</b>	<b>Rationale</b>
<b>All Zones</b>			
1	Keep AAs an administrative conditional use in all zones that allow an SFD.	Maintain the similar application procedures as are currently in place.	Current code allows AAs on all standard lots as an administrative CUP, changing this may require evaluation of allowing AAs in some areas.
<b>Rural and Resource Zones</b>			
2	Change AAs to a permitted use in the rural and resource zones that allow an SFD.	<ul style="list-style-type: none"> <li>• Would setting a limit on the number of permits that can be issued for detached AAs be appropriate?</li> <li>• Should other regulations be crafted to ensure that all AAs are related to the primary structure?</li> </ul>	Attached AAs are generally not considered dwelling units for density calculations. Regulations for detached units should ensure that the AA is in close association with the primary dwelling, and findings should demonstrate that the resulting development meets the required “rural character”. E.g. San Juan County ADU regulations.
3	Change AAs to a permitted use in the rural and resource zones that allow SFDs. Allow only detached AAs in the rural area on lots that are 10 acres or larger and allow only attached AAs on lots of less than 10 acres.	Could be the cleanest method to ensure that accessory apartments are not used as a way to establish urban development in the rural areas, while maintaining the option for rural land owners to construct an AA.	Maintains a 5 acres per detached unit density, which is the threshold used by the GMHB. Allows attached units on all standard rural lots.
<b>Urban Zones</b>			
4	Change AAs to a permitted use in the urban zones that allow an SFD.	<ul style="list-style-type: none"> <li>• How are other regulations, such as parking and design, are enforced and reviewed if there is not a CUP process?</li> <li>• What is the value to public health, safety, and welfare of requiring a CUP?</li> </ul>	GPP Goal HO 3 is states that regulations should contribute as little as possible to housing costs. Additional permitting and time can contribute to costs.

**TABLE 2: Policy Decision Number 2**

<b>Current Regulation</b>		
Accessory apartments are prohibited on substandard lots in all zones.		
<b>Code Options</b>	<b>Key Considerations</b>	<b>Rationale</b>
1	Maintain the prohibition of AAs on substandard lots as it is currently included in code.	Because of required lot sizes, the prohibition on substandard lots affects properties in the rural areas to a greater extent than lots in the UGAs.
2	Maintain prohibition of AAs on substandard rural lots only.	Rural character needs to be maintained in the rural areas. Residential density is a part of that, and past decisions of the GMHB have indicated that 5 acres per dwelling unit constitutes rural densities.
3	Eliminate the prohibition to allow AAs on any substandard lot with a SFD.	Similar to considerations in policy decision 1, if this policy is pursued, findings should establish that the resulting development does not violate the GMA by allowing urban densities in the rural areas.
4	Eliminate the prohibition for attached AAs on substandard rural lots while maintaining a prohibition of detached units.	Allowing attached AAs on substandard lots will accommodate a variety of rural land owners, while maintaining the “rural character” of the area.
5	Eliminate the prohibition on attached AAs on substandard lots in both urban and rural areas while maintaining the prohibition on detached AAs on substandard lots in both urban and rural areas.	Similar to number 3 above, this option would allow attached AAs on all substandard lots.

**TABLE 3: Other Code Updates**

Desired Outcome	Primary Change	Details/Other Notes
Improve code clarity and usability.	Update definitions	One clear definition of “accessory apartment” with two simple definitions of “attached” and “detached”. The primary difference between the two is that they are either connected to a primary dwelling or not. Language should be clear and explicit as to what it means to be “attached”.
	Update and simplify accessory apartment maximum and minimum size restrictions listed in SCC 30.28.010(3).	a. Eliminate minimum size requirement; <b>AND</b> b. Update maximum size restrictions to a maximum square footage and percentage of the SFD, whichever is smaller. The combination will help ensure AAs are in close association with the primary SFD.
	Move parking requirements to SCC 30.26 General Development Standards - Parking.	This change will add consistency with the rest of the code, keeping all parking regulations in the same code section.
	Reorder and rewrite language as necessary to improve code flow and understandability.	
Remove regulatory barriers for accessory apartments in the rural area.	Exempt AAs in the rural zones from landscaping and design standards in SCC 30.28.10(4), 30.28.010(5), and 30.28.010(6).	Lots in the rural area are generally larger and often have a mix of building types without uniform neighborhood design. Design requirements are not as important in these cases.
Evaluate other regulations and consider changes that will add flexibility to the siting of attached and detached AAs.	Evaluate the need to maintain residency restrictions, which require one of the two units to be occupied by the owner.	Some jurisdictions are eliminating this requirement and allowing both the ADU and the primary residence to be renter occupied.
	Assess the parking requirements to determine if a reduction is appropriate.	Some jurisdictions are decreasing or eliminating parking requirements for ADUs. Additionally, GPP Policy HO 3.B.2 states that the county should consider reducing parking requirements where there is access to public transportation. It may be appropriate to have differing parking requirements in the rural and urban areas.
	Consider allowing reduced setbacks for detached AAs and providing exceptions from lot coverage requirements for AAs.	Particularly in the urban zones, where lots are smaller, setback and lot coverage regulations can create difficulty with siting AAs. Some other jurisdictions are loosening these requirements for ADUs while others are exempting them entirely.
	Consider allowing more than 1 AA on standard lots in the urban areas.	Similar to other options above, some jurisdictions are allowing more than one ADU per lot as a method of increasing density in single family neighborhoods, diversifying housing stock, and creating additional lower cost housing units.
Use AAs as a method to help achieve housing goals.	Do not allow AAs to be used as a vacation rental.	The City of Santa Cruz has done this. They state: “...the ADU is intended to provide long-term housing for a household member, family, or tenant.”

# EXECUTIVE SUMMARY

The advantages of a strong economy and beautiful natural environment have long drawn new residents to our region. New residents make our communities more vibrant and create more opportunity for all. Our advantages have also resulted in challenges. After decades of population growth, the pressures on our housing market are particularly visible.

The rate at which housing units are being constructed in Snohomish County is simply not keeping pace with our growth in population, and most of the housing coming online is unaffordable to those at moderate- or low-incomes. Today, a third of the households in Snohomish County are “cost burdened”—they pay more than thirty percent of their income on housing and utilities. These households exist at all income levels. A third of all Snohomish County households are low-income, which we define as households earning 60% or less of Area Median Income: housing affordable to these families will generally not be produced without some type of government intervention or subsidy.

Despite this, we see examples of progress. Local nonprofit and government housing agencies are creating and preserving housing affordable to low- and moderate-income households in several communities across Snohomish County. The state legislature has granted cities and counties more tools and revenue options to respond to the need for greater housing affordability. Partners are sharing ideas and experience all across our region. As local government acquires more knowledge and tools to respond to the challenge of housing affordability, the pressure for us to do so is growing.

The Snohomish County Housing Affordability Regional Taskforce (HART) was created by County Executive Dave Somers to bring together elected leaders from cities across Snohomish County and the County Council, on the belief that the housing affordability challenge before us is intensifying, and is best addressed collaboratively and proactively.

## HART'S MISSION

*Collaboratively develop a five-year action plan that identifies priorities for county and city governments to accelerate our collective ability to meet the housing affordability needs of all Snohomish County residents and set a foundation for continued success through 2050*

This report sets forth recommendations to our fellow city and county officials in Snohomish County in the form of a **Five-Year Housing Affordability Action Plan (Action Plan)**. The Action Plan includes what we believe are the most promising steps for local governments to pursue now and over the next few years.

## 2020 Early Action items include:

1. *Encouraging cities to enter into cooperation agreements with the Housing Authority of Snohomish County (HASCO) and Everett Housing Authority.*
2. *Implementing the state sales tax shift to local governments for up to 20 years to fund low-income housing authorized by HB 1406, and adopted by Legislature in 2019.*
3. *Lobbying for changes in state and federal law that will enable more consolidated and streamlined funding to support low-income housing.*
4. *Reviewing and considering recommendations from existing toolkits to engage communities around the issue of housing affordability.*
5. *Fostering community conversations about density.*
6. *Engaging private sector stakeholders – large employers, others – in helping to find solutions to our housing affordability challenge.*
7. *Confirming and supporting an ongoing structure for regional collaboration around production of housing affordable across the income spectrum.*
8. *Tracking progress on the Action Plan.*

HART began its work in May of 2019. The effort was informed by more than forty local partners who provided us with their insights and recommendations as to the ways local government can help support housing affordability across the income spectrum. Our Action Plan is a first step. HART plans to continue this work in 2020 and we want our Action Plan to evolve over time as we learn from future experience and consider new approaches and solutions.

The challenge of housing affordability is not about “other people.” It is a problem facing our own families and friends; our grown children trying to make it on their own; our neighbors; people we interact with every day as we shop, pick up our kids from school, take an aging parent to the doctor, or join in community events. The good news is there is ample evidence—real examples throughout Snohomish County, the Puget Sound, and nationally—that we can maintain and evolve vibrant, welcoming, livable, safe communities at the same time as we work to meet the housing affordability needs of all our residents.

Through collaboration among city and county government officials in Snohomish County, we can make progress on housing affordability. The problem is urgent and becoming more critical each year. We hope each City Council and the County Council will consider the items in our Action Plan and take steps in 2020 and each year thereafter to address this challenge and ensure a better future for our communities.

# INTRODUCTION

The advantages of a strong economy and beautiful natural environment have long drawn new residents to our region. New residents make our communities more vibrant and create more opportunity for all. Our advantages have also resulted in challenges. After decades of population growth, the pressures on our housing market are particularly visible. We have all seen lower priced housing in our communities torn down and replaced by higher priced development. Headlines about rapidly escalating home prices are a daily feature of life here. We wonder who can afford these high-priced homes and what happened to those families that moved out. We hear from our children's teacher, our bank teller, our local firefighters about how far they drive every morning to get to their jobs because the nearest home they can afford is many miles and half a dozen cities away.

Despite this, we see examples of progress. Local nonprofit and government housing agencies are creating and preserving housing affordable to low- and moderate-income households in several communities across Snohomish County. Many of our cities have implemented multi-family tax exemption programs to incentivize construction of new apartments, or have zoning in place to allow accessory dwelling units in single-family zones. The state legislature this year enacted new funding and other options as well as mandates for local government to respond to the housing challenge.

Partners are sharing ideas and experience all across our region. As local government acquires more knowledge and tools to respond to the challenge of housing affordability, the pressure for us to do so is growing. Local elected officials have long grappled with the challenges of growth. The State Growth Management Act<sup>2</sup> (GMA), enacted in 1990, charged local government to plan for addressing a variety of quality of life issues in the face of rapid population growth including: ensuring housing is available at a full range of affordability; preserving agricultural land and rural areas; providing open space and recreation opportunities; ensuring transportation system development is coordinated—and more.<sup>3</sup> Perhaps one of the most challenging goals of the GMA has been ensuring housing affordability. Population growth has exacerbated demand for housing and the housing supply pipeline has simply not kept pace. Making matters more challenging, local government efforts to respond to housing affordability challenges—whether by considering approval of new multi-family zones or permitting new housing projects affordable to those with very limited incomes—are often subject to strong pushback by community members.

The Snohomish County Housing Affordability Regional Taskforce (HART) was created by County Executive Dave Somers to bring together elected leaders from cities across Snohomish County and the County Council on the belief that the housing affordability challenge before us is intensifying and is best addressed collaboratively and proactively.

<sup>2</sup> Chapter 36.70A RCW.

<sup>3</sup> GMA's thirteen planning goals are set forth at RCW 36.70A.020.

Our mission is to *collaboratively develop a five-year action plan that identifies priorities for county and city governments to accelerate our collective ability to meet the housing affordability needs of all Snohomish County residents and set a foundation for continued success through 2050.*

A lack of housing affordability impacts residents *at all income* levels in Snohomish County. HART seeks to alleviate this challenge for *all residents*. We define housing affordability in a manner commonly used both regionally and nationally. Specifically, ***housing is considered affordable to a household if no more than 30% of that household's income is spent on housing costs including utilities.*** This is a simple metric, applicable at all household income levels.

A household is considered "**cost-burdened**" if it ***pays more than 30% of its income on housing and utilities.***

When we refer in this report to "**housing affordability**" we mean housing that can be rented or purchased by a household *without being cost-burdened*. This is a challenge for Snohomish County households across the entire income spectrum. But there are greater challenges for households at lower income levels: without direct government support or incentives, the private sector housing market is unable to deliver housing affordable to households making less than 60% or below of Area Median Income (AMI). Government incentives are needed in some markets to ensure creation of housing affordable to those making 80% or less of AMI.

In this report, when we refer to "**low-income housing**" we are referring to housing affordable to ***households at 60% or less of AMI.*** Fully **one-third** of households in Snohomish County are low-income by this definition.

This report sets forth recommendations to our fellow city and county officials in Snohomish County, in the form of a **Five-Year Housing Affordability Action Plan (Action Plan)**. The Action Plan includes what we believe are the most promising steps for local government action over the next few years. The Action Plan includes eight (8) "Early Action" items, and 37 other action items to support 5 framework goals. The Action Plan is presented in the body of this report and is summarized in **Attachment A**.

The Action Plan is the starting point for a much longer journey. It should evolve over time as we learn from our experiences and adapt to our community's needs. We are recommending annual reviews of progress and consideration of new ideas. The Action Plan is premised on the understanding that while each of our communities is unique, if we adopt a common commitment to promote housing affordability, we will collectively be better positioned to meet this challenge. We hope our Action Plan will spark increased engagement on housing affordability by every city council and the Snohomish County Council.

In the following sections, this report outlines HART's process, describes the housing affordability challenge, and the role of cities and the county in responding to that challenge. Finally, our Action Plan is presented.

# HART'S PROCESS

HART was launched by Snohomish County Executive Dave Somers in the spring of 2019. All mayors were invited to participate, as were representatives from the County Council, and Tribal nations. Ultimately, we had active participation from 14 of 20 cities, two County Councilmembers, and the County Executive.<sup>4</sup> Most members had a designated alternate, either another elected official or senior staff member. We elected Executive Somers and Lynnwood Mayor Nicola Smith to serve as HART's Co-Chairs. We were supported by a team of county staff and an independent facilitator. Our first meeting was on May 31, and we met eight times between May 2019 and January 2020.

HART's meetings were open to the public, and all our meeting agendas, minutes, and materials are posted online at <https://snohomishcountywa.gov/5422/HART>.

We provided a means for interested parties to provide written comments to HART (either at meetings or online); all comments received were shared with HART.

HART's process has provided each of us with additional education on the subject of housing affordability. We have heard from over forty partners, reviewed dozens of local, regional and national reports, and deliberated on over a hundred concepts to promote housing affordability. Although the voting members of HART are all elected officials or their representatives, we sought to maximize input from experts on housing affordability issues and we are deeply grateful for their commitment to sharing their knowledge and advice with us. They have greatly informed our thinking.

## Initial Work: Getting Grounded in the Data; Definitions and Process

At our first meeting on May 31, 2019, we quickly affirmed that housing affordability is an extremely important issue for nearly all our communities. We further identified **three core challenges** which became the foundation on which we built our work:

- What **policy and regulatory** actions will help?
- What **funding options** are available?
- How can we be more effective at **community outreach and engagement**?

<sup>4</sup> As the tribal governments did not elect to participate, our recommendations here are directed to County and city governments.

We affirmed that our mission statement is not limited to consideration of low-income housing (as defined above—housing affordable to households making 60% or less of AMI), rather, we wanted to identify recommendations supporting housing affordability *at all income levels, for all our residents*. As set forth above, housing is considered affordable to a household if that household pays no more than 30% of its income on housing including utilities.

Our first three meetings served to develop a common understanding of the housing affordability challenge in Snohomish County. We heard from many local partners including private for-profit developers, realtors, and nonprofit and governmental housing developers and operators. We asked them to share with us *what they need from local government to be successful*. These were informative presentations, highlighting many common themes. We also heard from local government planners about the primary activities of cities and the County in supporting housing affordability, including local accomplishments and challenges. Snohomish County staff provided HART with numerous reports on housing affordability, including taskforce reports from neighboring counties, toolkits, and reports from a variety of agencies.

We adopted rules to guide our process. Each member of HART had one vote. Our goal was to reach a collaborative consensus on what to recommend to our fellow local government officials. Under our rules, **recommendations** included in this report had to be supported by not less than **60% of us voting**, and **consensus support** required support of at least **75% or more** of us voting on an issue. This final report required the approval of 60% of us in number. We agreed that short minority statements could be submitted by any HART

members in strong opposition to any aspect of this report.

Our initial meetings generated over one hundred ideas to increase housing affordability in Snohomish County. The ideas came both from local stakeholder presentations and the reports from other agencies. Concepts were sorted into three categories, matching the three core challenges first identified:

- Policy and regulatory actions;
- funding options;
- outreach and community engagement.

Staff then created a “screening ballot” for us incorporating all the ideas on the table. The purpose of the ballot was to determine which ideas we collectively saw as most promising for further consideration.

We reviewed the screening ballot at our third meeting and each of us independently filled it out after the meeting.

We were asked to rate each concept on a scale of 1 to 5, with 5 being “potentially very promising, we should definitely explore further”; 3 being “open to exploring/neutral”; and 1 being “extremely problematic (politically and/or operationally), not a good use of time to explore further.”

## Next Phase: Narrowing and Framing; Engaging Partners

We reviewed the combined results of the initial screening ballot at our fourth meeting. Approximately half of the concepts reviewed (about fifty in total) received an overall average support rating of 3.5 or higher on a scale of one to five. We agreed to forward all of the highly rated ideas for further review. We also voted to add a handful of additional items that, while not highly rated in the screening exercise, were considered by a majority of us to be important to continue to explore. We agreed to create three stakeholder workgroups—one around each of the three core challenge areas. The workgroups were asked to provide us additional information on each of the highly rated concepts using a common briefing template. Our staff team reached out to a wide array of agencies and partners and asked for volunteers to serve on these stakeholder groups. We were gratified by the response: over forty individuals agreed to participate in the workgroups. HART also invited each workgroup to submit additional templates for ideas that they felt were important for us to consider but did not receive a high rating from HART members.

The briefing template used by the workgroups sought the following information for each concept in three pages or less:

- Potential impact on housing affordability challenge (high/medium/low)
- Ease of implementation (easy/moderate/difficult)
- Is the idea targeted to increase housing demand or supply?  
What income level(s) are assisted?
- Does the concept promote housing preservation or construction?
- Is it about advocacy or community engagement?
- Where, geographically, would the idea be most effectively applied?  
Countywide? Specific locations?
- Implementation steps, supporting tactics and strategies
- Community engagement considerations
- Suggested lead agency and key partners

The workgroups deliberated over the last half of the summer, from late July through early September. They combined similar ideas into single templates and incorporated a handful of new ideas into their work that we had not forwarded. They delivered 46 templates to us, over 150 pages in total. Many of the templates addressed multiple related concepts.

Each template is available online at [www.snohomishcountywa.gov/5425](http://www.snohomishcountywa.gov/5425) in the documents included in meeting number five. We highly commend the workgroups for the information they provided us and we encourage all our peers to review these briefings.<sup>6</sup>

Our fifth meeting was dedicated to hearing from the workgroups. The presentations focused on thematic priorities and were extremely helpful in shaping our thinking about the Action Plan. At this same meeting, we discussed and identified five proposed framework goals to shape the Action Plan. We were very fortunate to have the opportunity to then share our initial findings and these proposed framework goals with other local elected officials at the Snohomish County

<sup>6</sup> Most, but not all of the ideas briefed in the templates are included in the Action Plan.

Tomorrow (SCT) Annual Assembly on September 25<sup>th</sup> which was dedicated to the subject of housing affordability.

## Finishing up: Confirming the Action Plan items and reviewing this Report

Our sixth meeting focused on reviewing the input from SCT attendees. Comments received confirmed general support for our framework goals and offered many ideas for how to pursue these goals, several of which are included in our Action Plan. We then discussed in more detail the structure for the Action Plan and previewed a second screening ballot, which sought our recommendations as to:

- What concepts should remain in the 5-Year Action Plan and which should be removed?
- Are there “Early Action” items we should pursue in 2020?
- Are there proposals to call out for “Joint Action” pursuing either as a single, unified strategy, or in alignment through individual jurisdiction action?
- How strongly do we support each item?

We completed the second screening exercise independently. When we reconvened for the seventh meeting on November 7, 2019, we reviewed the combined results and, through an extended discussion and series of votes, made several adjustments to the list of items to be included in the Action Plan. We found that we

shared overwhelming support to retain nearly all the concepts under discussion in the Action Plan and agreed to consolidate closely related items where appropriate. We also identified a set of eight “Early Action” items we agreed should be launched in 2020.

There were three exceptions to this strong support, items on which we were divided: (1) supporting mandatory inclusionary zoning activity; (2) moving the urban growth boundary; and (3) exploring a regional housing levy. There were strong advocates on both sides of these three issues, particularly the last two. We want to describe briefly below the core points made in multiple HART meetings regarding moving the urban growth boundary and proposing a regional housing levy.

First, with respect to moving the urban growth boundary, several HART members believed that this would be an important step for housing affordability by making more land available for housing. On the other side, several members felt that such newly available land would likely be in areas at the outer edges of the urban area, would be converted to high end single-family homes, and would exacerbate the congestion on our roads as those homeowners would be likely to commute to far-away job centers.

The question of a regional housing levy also had strong support and opposition. There were members who observed that an additional property tax levy would add additional cost burden to all households and were not inclined to support exploring this type of tax measure. Others noted that they believed a levy was the biggest step the county residents could take to inject significant new funds into the construction of low-income housing, that levy proceeds could be highly leveraged by other dollars, and that we had identified relatively few funding measures in

the Action Plan. HART agrees that new funding is needed in order to be able to significantly expand the supply of low-income housing. The Action Plan includes recommendations to explore additional funding sources for low-income housing and to jointly advocate in support of additional funding from the state and federal government.

About a month before our eighth and final meeting, we were each sent a draft version of this report and the Action Plan for review and comment. Our last meeting confirmed direction to finalize this report and the Action Plan.

# THE CHALLENGE

## Conditions Impacting Housing Affordability in Snohomish County

Before presenting the Action Plan, it is important to outline the housing affordability challenge we face. This challenge is most simply explained through the basics of demand and supply and how the mismatch between them impacts housing affordability.

### Housing Affordability is Declining

What we have been experiencing for several years is the inability of the housing market to create housing units either in number or at a price that are affordable to most of the households in Snohomish County. As noted in the introduction to this report, we define housing affordability based on the percentage of income a household pays for housing costs including utilities. Housing is considered “affordable” if the household living in (or seeking to rent/buy) a home is paying no more than 30% of their income on housing costs including utilities. Those paying more than this 30% are “cost-burdened.” Households at all income levels may be cost-burdened, but for those with less income the trade-offs between paying for housing and other essentials—food, medicine, transportation—become more dire.

The U.S. Census Bureau estimates that ***in 2018, some 98,999 households in Snohomish County — thirty three percent (33%) of all households — were paying 30% or more of their income on housing costs.***<sup>7</sup> Households at lower income levels are much more likely to be “cost-burdened.” Despite considerable attention being drawn to housing issues, affordability has significantly worsened in recent years. Growth in income has greatly lagged the growth in housing costs. Data for Snohomish County from 2010 and 2017 illustrates this, as shown in the table below:

<b>Snohomish County, WA</b>			
	<b>2010</b>	<b>2017</b>	<b>% Increase</b>
<b>2-bedroom apartment rent</b>	\$ 901	\$ 1,347	49.5%
<b>Average single-family home price</b>	\$400,000	\$544,449	36%
<b>Median household income</b>	\$ 66,300	\$ 78,020	17.7%

Rent Reasonableness Survey, Dupree and Scott;  
U.S. Census Bureau American Community Survey 2013-2017

<sup>7</sup> U.S. Census Bureau, American Community Survey, Table S2503, 2018 1-Year Estimate

Renters are particularly impacted by the housing affordability challenge. Renters in our county tend to be of lower income than homeowners: 48.2% of renters (versus 29.5% of homeowners) made less than \$75,000 in household income in the last year.<sup>8</sup> As a result, renters on average experience a higher incidence of being cost-burdened than home-owners. An estimated 95,045 Snohomish County households are renters—a third of all households in the County.<sup>9</sup> In 2019, fair market rent for a two-bedroom apartment averaged \$1,899 per month in Snohomish County. To afford that and pay no more than 30% of their income on housing and utilities, a household would need to make \$36.52 an hour, or \$75,960 a year. **This means that nearly half (48.2%) of all households in Snohomish County cannot afford an average two-bedroom apartment offered at fair market rent.** Those making minimum wage (\$12/hr.) would need to work three full-time jobs to afford an average two-bedroom apartment in Snohomish County.

The challenge goes beyond our neighbors making minimum wage. Residents in most types of occupations struggle with housing costs in Snohomish County. Bank tellers, retail clerks, firefighters or police officers, construction workers, community and social service workers, to name a few, typically cannot afford a two-bedroom apartment in Snohomish County without spending more than 30% of their income towards housing. In fact, out of the total 25 occupation categories reviewed by the U.S. Census Bureau, only five (5) of them had median annual earnings high enough to afford a 2-bedroom apartment in Snohomish County:

- architecture and engineering;
- computer and mathematical jobs;
- health diagnosing and treating practitioners;
- management occupations;
- life, physical and social science occupations.<sup>10</sup>

We know that the cost of single-family homes varies significantly across the County:

- Mukilteo, Edmonds, and Mill Creek consistently had the highest single-family home sale prices in the County over the last 20 years, in 2019 ranging from \$791,250 in Mukilteo to \$653,677 in Mill Creek.
- At the other end of the spectrum, Granite Falls, Arlington, Stanwood, and Marysville have had the least expensive housing in recent years of all cities in the County. In Granite Falls, single-family home sale price averaged \$308,663 in 2019.<sup>11</sup>

While there may be greater affordability in some areas, there are typically longer commutes attendant with those more affordable homes. In addition, as noted above, few households can afford the average price of a single-family home today in Snohomish County.

<sup>8</sup> U.S. Census Bureau. American Community Survey, Table S2506, 2013-2017 5-Year Estimates.

<sup>9</sup> November 2019 data. <https://reports.nlihc.org/oor/washington>

<sup>10</sup> U.S. Census Bureau. American Community Survey, Table S2412, 2013-2017 5-Year Estimates

<sup>11</sup> Snohomish County Assessor's Office.

What we are consistently seeing is that the private housing market does not create housing units affordable to those making less than 60% of AMI without direct government support, and that government incentives are needed in our housing market at higher income levels, up to 80% of AMI. The costs of construction materials, labor, land acquisition, and permitting are simply too high to pencil out at lower per unit prices that will be affordable to these households. As noted above, households at 60% of AMI or below comprise *one third of all households* in the County. While we are concerned about ensuring housing is affordable to *all residents*, those at the lower income levels are particularly dependent on local, state, and federal government action to directly fund or otherwise provide incentives in support of private developers and nonprofit housing agencies.

The chart shown in **Figure 1** below displays current data on housing demand by level of income. In addition to showing the dramatically greater need for housing at lower price points, this chart tells us that **for no household to spend more than 30% of their income towards housing, Snohomish County would need 127,215 additional housing units by 2040—more than 6,300 new units each year.**

In comparison, in the last *three years*, 7,938 housing units have come online in Snohomish County, at a rate of about 2,650 per year. Housing would need to be built at slightly more than double the current rate to meet the projected housing affordability needs. These new housing units also need to be affordable to households across the income spectrum. The vast majority of cost-burdened households today have incomes of 80% of AMI and below. We note that the projected need of 127,215 additional housing units is based on a rough straight-line calculation on current conditions, and we hope that with additional effort both our data inputs, and the results, can improve.

**Figure 1: Snohomish County Cost-burdened Household Projections\***

## Low-Income Housing is Being Lost to Redevelopment and Resale

Another important part of the housing supply challenge is the significant, ongoing loss of existing low-income housing due to redevelopment or resale, typically of multi-family complexes. With housing demand as strong as it is, multi-family housing owners find it profitable to sell to investors, who logically look to maximize their profit by increasing rents or tearing down existing housing and rebuilding. The Joint Center for Housing Studies at Harvard University published a national study looking at a variety of housing trends. It found that there has been a **50-67% decline in low rent housing in Snohomish County between 2011 and 2017**.<sup>1</sup> Community partners presented several troubling examples of these situations in Snohomish County to HART.

Maintaining existing housing is significantly cheaper than building new housing. In terms of least cost options to promote housing affordability, preservation of low-income housing should be a major focus for action.

## Housing Demand Driven Primarily by Population Growth

There are several factors impacting housing demand, including population growth, household size, incomes, credit, transportation access, and populations with special needs.<sup>12</sup> The most significant of these factors is population growth. Snohomish County has seen a dramatic increase in population in recent years and this promises to accelerate over the next twenty years. In addition to new residents moving here from outside Washington, we are seeing population growth from those pushed out of King County and elsewhere in Puget Sound looking for housing that is more affordable.

Between 2010 and 2019, the County experienced a 14.77% increase in population.<sup>13</sup> Between 2020 and 2040, the population is expected to grow an additional 26%, from an estimated 818,700 in 2019 to a forecast population of 1,058,113 in 2040.<sup>14</sup>

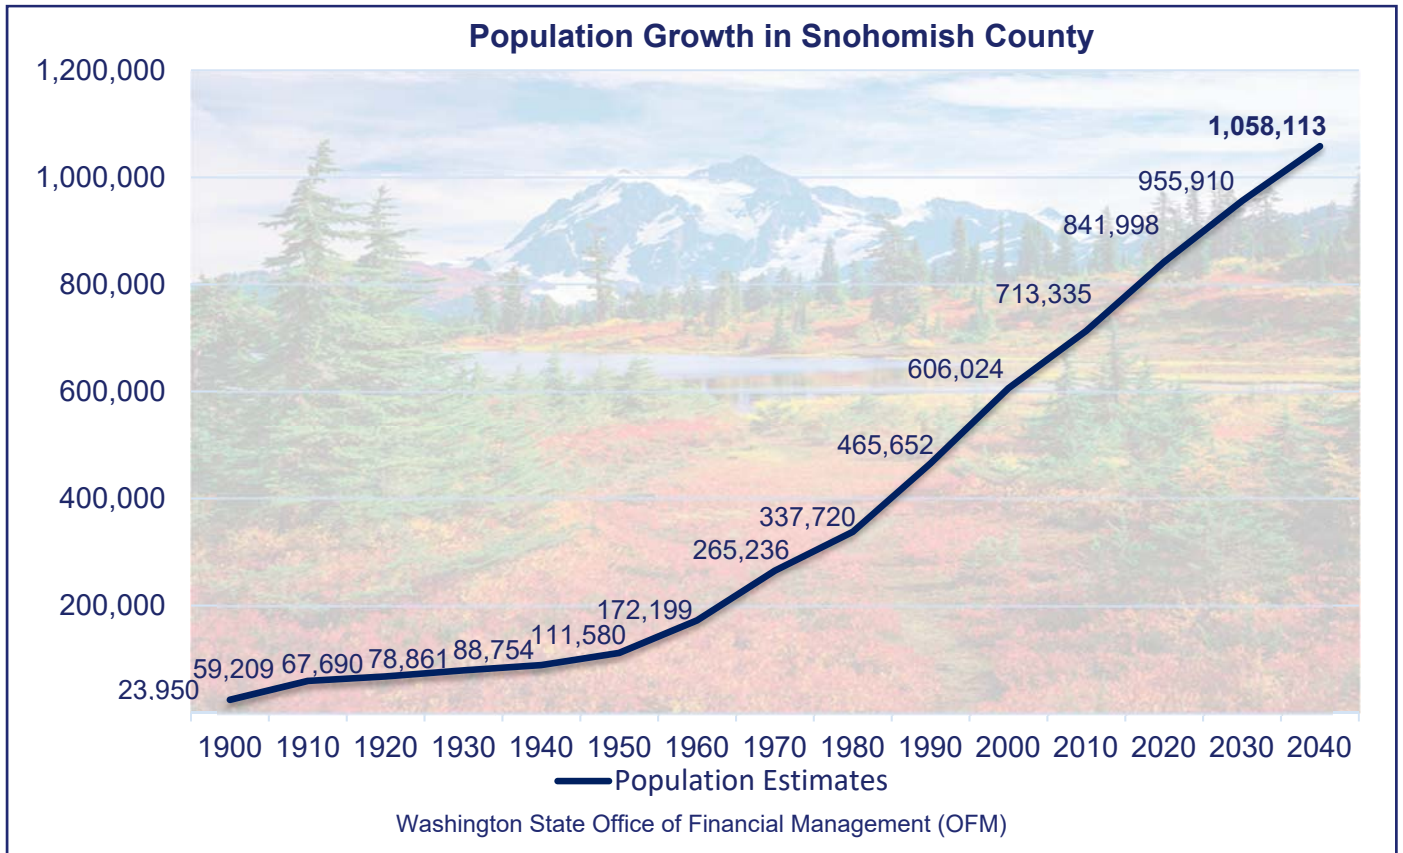

\*Figure 1: Snohomish County Cost-burdened Household Projections. U.S. Housing and Urban Development Comprehensive Housing Affordability Strategy Data, 2012-2016 estimates; OFM Growth Management Act population projections for counties, medium series. Image from Freepik.

<sup>13</sup> Washington State Office of Financial Management (OFM). 2019 Population Trends. Retrieved from [https://www.ofm.wa.gov/sites/default/files/public/dataresearch/pop/april1/ofm\\_april1\\_poptrends.pdf](https://www.ofm.wa.gov/sites/default/files/public/dataresearch/pop/april1/ofm_april1_poptrends.pdf)

<sup>14</sup> Ibid.

Household size also impacts the number of housing units needed to serve the population. Nearly a quarter of the County population current lives alone, slightly less than the national or statewide average.<sup>15</sup>

**1 in 4**

<sup>15</sup> U.S. Census Bureau, American Community Survey, Table S1101, 2013-2017 5-Year Estimates.

Of course, not all households have the same purchasing power when it comes to housing or other needs. Household Area Median Income (AMI) in Snohomish County in 2017 was \$78,020.<sup>16</sup> Nearly 20% of Snohomish County households made less than \$35,000 a year. In all, about a third of all households are at 60% of AMI or below. About the same number — 36% — have incomes in excess of \$100,000 a year.

### 2017 Household Income Snohomish County, WA

Household Income	% of Households at this income level
Less than \$10,000	4.30%
\$10,000 to \$14,999	2.70%
\$15,000 to \$24,999	6.20%
\$25,000 to \$34,999	6.50%
\$35,000 to \$49,999	10.60%
\$50,000 to \$74,999	17.90%
\$75,000 to \$99,999	15.60%
\$100,000 to \$149,999	20.10%
\$150,000 to \$199,999	9.00%
\$200,000 or more	7.30%

Census Bureau Table S1901, 2013-2017  
ACS 5-Year Estimates

To meet our goal of ensuring housing affordability for *all residents* we need to promote housing construction at *all price points*. But as noted, the private housing market, is simply not able without interventions from government or other actors, to produce units affordable to those at 60% of AMI or below.

**This means that *about one-third of Snohomish County households are in need of housing that will not be produced without governmental or nonprofit interventions of some sort.***

## Housing Supply is Not Keeping Pace with Population Growth

Factors impacting the number of housing units coming on or offline each year include the availability of land, zoning, the cost of construction, and capacity of the housing construction sector.<sup>17</sup>

The rate at which housing units are being constructed in Snohomish County is not keeping pace with our growth in population. In the last two years (2016-2018), the number of units added was 61% less than the growth of households in Snohomish County.<sup>18</sup> The supply gap looks less extreme over the longer term, but still is significant: in the 2010-2018 period overall, the number of housing units added was 7% less than the number of added households. During the prior decade, between 2001 and 2009, 4% fewer housing units were added as compared to the growth in the number of households.<sup>19</sup>

<sup>16</sup> U.S. Census Bureau, American Community Survey, Table S1901, 2013-2017 5-Year Estimates.

<sup>17</sup> Puget Sound Regional Council. (June 2018). Vision 2050. Retrieved from

[https://www.psrc.org/sites/default/files/vision\\_2050\\_housing\\_background\\_paper.pdf](https://www.psrc.org/sites/default/files/vision_2050_housing_background_paper.pdf)

<sup>18</sup> Office of Financial Management.

<sup>19</sup> Ibid.

Statewide, housing construction began to decline precipitously at the onset of the recession in 2007 and did not pick up again until 2013.<sup>20</sup> We have still not built our way out of that shortfall, which has contributed to the number of cost-burdened households.<sup>21</sup>

We have experienced a shortage of housing for sale for nearly a decade in Snohomish County. A representative from the Master Builders Association of King and Snohomish County (MBAKS) met with us, and shared that MBAKS considers a healthy real estate market—in terms of balancing supply and demand—to have about four to six months of inventory for sale at any point in time. Multiple Listing Service (MLS) data for Snohomish County from 2012-2017 indicates a steady downward trend here: there was slightly less than four months availability in 2012 and 0.6 months availability in 2017. This number has improved somewhat since 2017—in September 2019, MLS reported 1.72 months of inventory in Snohomish County<sup>22</sup>—but still falls short of the MBA’s definition of “healthy.” Some real estate professionals fear that this chronic shortage of housing may be our “new normal.”<sup>23</sup>

## The “Missing Middle”

Our existing housing supply is skewed toward single-family homes which are affordable to fewer households than other types of housing. The 2017 U.S. census reported Snohomish County’s inventory of housing that year was composed of 65% single-family detached homes, 30% multi-family, 5% manufactured homes. We do not have countywide statistics to tell us the types of new housing being built across all jurisdictions combined (or the price point of that housing), but in unincorporated Snohomish County in 2017, 70.5% of all housing permits issued were for single-family homes.<sup>24</sup>

We are not seeing sufficient growth of “missing middle” housing. “Middle” housing includes housing of various types other than single-family homes: duplexes, townhomes, and smaller scale multifamily. With appropriate zoning in place, and in some cases additional incentives, the private sector housing market will produce this type of housing. This housing tends to be more affordable than single-family homes.

<sup>20</sup> OFM; Puget Sound Regional Council. (June 2018). Vision 2050: Housing Background Paper. Retrieved from [https://www.psrc.org/sites/default/files/vision\\_2050\\_housing\\_background\\_paper.pdf](https://www.psrc.org/sites/default/files/vision_2050_housing_background_paper.pdf)

<sup>21</sup> Cost-burdened households are those that spend 30% or more of their income on housing (including utilities). There are cost-burdened households at all income levels.

<sup>23</sup> Seattle Post Intelligencer. Zosha Millman. (November 2019). Northwest Real Estate Experts: Inventory Shortages the ‘New Normal.’ Retrieved from <https://www.seattlepi.com/realestate/article/Northwest-real-estate-Inventory-Seattle-home-price-14829873.php>

<sup>24</sup> Washington State Employment Security Department. (May 2019). Snohomish County Profile. Retrieved from <https://esd.wa.gov/labormarketinfo/county-profiles/snohomish>

As noted by the Puget Sound Regional Council:

*“Middle” housing can help promote housing diversity, give people greater housing choices, and produce urban densities that support walkable communities, local retail and commercial services, and efficient public transit. Yet availability of these housing options is often few and far in between in many communities, hence the term “missing middle” housing.<sup>1</sup>*

The average single-family home price in Snohomish County in 2019 was \$544,559. The Washington State Office of Financial Management (OFM) estimates that the 2017 area median income in Snohomish County was \$81,779, somewhat higher than the U.S. Census Bureau estimate of \$78,020.<sup>25</sup> Applying either data point, the vast majority of households in Snohomish County cannot afford a single-family home with an average price of \$544,559. Assuming a 3.64% interest rate for a 30-year fixed loan and a 10 percent down payment, the monthly mortgage payment would be approximately \$3,129—amounting to 46-48 percent of the household median income in Snohomish County, which is well above the cost-burdened threshold. A household would need to earn at least \$125,160 annually to afford this payment without spending more than 30% of their income on housing.<sup>26</sup> Facilitating construction of middle housing is a key way we can advance both affordability and home ownership in Snohomish County.

## Social Equity Implications

Rapidly rising housing costs result in displacement of households with lower incomes to areas farther from job centers which are typically less well served by services and transportation systems. As a result of both historic and current practices, communities of color and historically under-served communities are disproportionately impacted by these trends. While we are seeking to improve affordability for all residents, it is important to be mindful of this aspect of our housing affordability challenge.

# WHERE DO WE GO FROM HERE?

## Local Government's Role on Addressing Housing Affordability

Where do we, as local government officials, best direct our energies in response to the housing affordability challenge? Cities and counties are not permitted by state law to own or operate housing; we rely on partners in the private, nonprofit, and public sectors to create new housing and to operate housing for households with very low-incomes and/or those with special needs. That said, local government is a critical part of the housing affordability equation. Cities and counties have broad authority to implement an array of actions that can positively or negatively impact housing affordability. Our capabilities track directly to the three core challenges we have identified, and around which HART has focused its work:

- Policy and Regulatory Actions

Cities and the county can promote the creation of more housing units through regulatory policy, primarily changes in zoning. We can adjust regulatory policy and rules to reduce the cost of new housing construction by revising permit requirements and fees. We can take steps in support of preservation of existing low-income housing by identifying housing at risk of redevelopment and working with public or nonprofit partners to purchase the housing and thereby decouple it from market pressures.

- Funding

We can provide direct funding support to nonprofit housing providers, for capital or operating costs. We can advocate for more support for these providers from the federal and state government.

- Community Outreach and Engagement

We can engage with residents and community members around the options for how growth is accommodated in our communities. We can also seek to engage more private sector partners in this housing challenge.

Importantly under state law, local government can deploy a broader array of strategies in support of the low-income housing, both in terms of providing direct funding and targeted policy/regulatory actions, than it can for market rate housing.

## Framework Goals for the Action Plan

What we *choose to do* in support of housing affordability should be based on the goals we are trying to achieve and an understanding of the housing market. As noted, our mission is to identify actions that can help us accelerate our ability to meet the housing affordability needs of *all county residents* and set a foundation for continued success through 2050. Building from the three core challenges, HART has identified five framework goals in support of this mission.

Our first three framework goals are ***goals to increase housing affordability at all income levels:***

### GOAL 1

Promote greater housing growth and diversity of housing types and improve job/housing connections

Because of our broader authority to intervene in housing affordable to households with lower incomes, we divide this goal into two sub-goals:

#### SUB-GOAL A

Promotion of greater housing growth and diversity of housing types and job/housing connections at all income levels

#### SUB-GOAL B

Promotion of greater housing growth and diversity of housing types and job/housing connections affordable to households at or below 60% of Area Median Income

## GOAL 2

**Identify and preserve existing low-income housing at risk of rapid rent escalation or redevelopment, balancing this with the need for more density**

There has been a dramatic loss of the most affordable units of housing in Snohomish County in recent years. Preserving remaining housing affordable to households with lower incomes is much less expensive than building new housing. That said, we are mindful that creating large numbers of new housing units will require redevelopment and infill. These competing demands must be balanced.

## GOAL 3

**Increase housing density along transit corridors and/or in job centers, while also working to create additional housing across the entire county**

There are dual benefits from locating housing near transit and job centers in that we both house people and reduce the strain on our congested roads. We realize as well that the need is such that more housing must be built across the county.

Our last two framework goals relate to ***how we want to work together*** to achieve these goals. We have all experienced the challenge of implementing land use changes in our communities. Rezoning for more housing units per acre, or to allow different housing types can be challenging conversations. We can learn from one another about how to engage effectively around these difficult issues, as well as what policy and regulatory changes are more or less productive. Every community is different, but we don't need to re-create the wheel when we are trying to act in alignment: model ordinances and programs can be particularly helpful. In sum, we believe regional collaboration around housing issues will make it easier for each of us to be successful as we tailor programs to meet local conditions and needs.

## GOAL 4

**Develop and implement outreach and education programs for use countywide and by individual cities to raise awareness of housing affordability challenges and support for action**

There is no substitute or shortcut for effective public engagement around difficult issues. There are toolkits that provide samples of best practices in engagement on housing issues that we can each utilize and refine. We believe that effective engagement of residents and partners is necessary to help find the best path ahead for each city and community around the issue of housing affordability.

## GOAL 5

**Track our progress and support ongoing regional collaborations**

Improving housing affordability is an evolving challenge that will continue for the foreseeable future. The more we can engage on this challenge together, learn from each other, partner together, and leverage our successes, the easier will be our journey. We need to track what we are doing and what effect it is having. Are we making progress or losing ground? Existing data sets can be improved. For example, we currently have no easy way to track differing rents by each city. We should take the opportunity to learn from each other and build from that knowledge to be more successful.

HART's Five-Year Housing Affordability Action Plan, presented in the next section of this report, is built around these five framework goals. In addition to eight "Early Action" items we will pursue in 2020, HART has identified 37 action items (two items appear twice, in support of different goals, for a total of 35 different items).

# THE PURPOSE OF THE FIVE-YEAR ACTION PLAN

We strongly encourage cities and the County to consider implementing the strategies in the Action Plan presented below. The strategies are not the only ideas that could be pursued, but after much deliberation, these are the strategies we collectively now endorse. The majority of these strategies are policy and regulatory actions that cities and the County could implement which would reduce the cost of housing construction. Some strategies involve changes to zoning codes that can increase the number of units that can be produced. Other strategies would reduce the tax or fee burden on construction, primarily for low-income housing.

A handful of strategies identify new local funds that could be applied to support low-income housing construction and operation. We acknowledge that the lack of funding supports for low-income housing remains a substantial barrier to progress on our mission and we have not been able to reach consensus on specific funding tools adequate to this task. We are recommending continued effort here through two strategies: the first calls for identifying and promoting additional sources of funding generally; the second involves advocacy for additional funding from the state and federal governments.

How much housing will our Action Plan create? Frankly, we do not know. We are dependent on housing partners—public, nonprofit, and private—to actually build housing. We have not gone through a detailed exercise to estimate the number of housing units that may be created if all our recommendations are adopted by all jurisdictions. We know we are unlikely to see the progress we would like in the area of low-income housing without significant additional funding being identified. That said, we believe the strategies identified in the Action Plan, if broadly implemented, can facilitate creation of significant additional housing affordable to households across the income spectrum.

Publication of the Action Plan is a first step and much work remains ahead of us. HART will continue work on framework Goals 4 and 5 in 2020 through several Early Action items. We expect that because of that work, we will identify additional strategies in support of those two goals. We want to check-in periodically to see what is being accomplished by cities and the County, and consider adjustments to the Action Plan. We will continue to seek input from partners as to what is most effective, and to learn as we go. We hope the Five-Year Action Plan will be a living document that will evolve over time based on our collective experience.

# HART'S FIVE-YEAR HOUSING AFFORDABILITY ACTION PLAN

HART's recommendations to all Snohomish County cities and Snohomish County government for responding to our housing affordability challenges are presented below. The Action Plan is based on **five framework goals**; three that focus on increasing housing affordability and two that focus on how we propose to work together.

“**Early Action**” items that HART members will begin working on in early 2020 are presented first. These are followed by the **Framework Goals** with supporting **strategies** for each framework goal. The strategies are divided into two types: **policy and regulatory strategies** and **funding strategies**.

The Action Plan also identifies several “**Joint Action**” items, which are items we recommend be pursued either through a single countywide unified strategy/action, or by alignment of actions across individual jurisdictions. “Joint Action” items are indicated as follows:

indicates actions that we recommend be pursued in a **unified**, countywide approach.

indicates actions we see as best pursued by individual jurisdictions but with **alignment** in our approach.

## Early Action Items

### 1. Encourage cities to enter into cooperation agreements with the Housing Authority of Snohomish County (HASCO) and Everett Housing Authority.

- *Only two cities currently have such agreements: Lynnwood and Snohomish. Snohomish County government and Everett also have equivalent terms in place. Cooperation agreements simply authorize a Housing Authority to operate within a jurisdiction. The agreements require no financial commitments by a city and do not impact local zoning authority. These agreements can facilitate quicker action to preserve affordable multifamily developments put up for sale, or to acquire real property suitable for low-income housing.*
- **2020 Leadership:**                     .

### 2. Implement the state sales tax shift to local governments for up to 20 years to fund low-income housing as authorized by HB 1406, as authorized by Legislature in 2019.

- *Nearly all cities as well as the County have taken initial steps to secure the state sales tax monies moving forward into 2020 and beyond. The goal in 2020 is to share information on how jurisdictions plan to apply these funds.*
- **2020 Leadership:**                     .

**3. Lobby for changes in state and federal law that will enable more consolidated and streamlined funding to support low-income housing.**

- *The magnitude of our low-income housing needs will require additional funding from state and federal government. Working together, we can more effectively advocate for these funds.*
- **2020 Leadership:** \_\_\_\_\_.

**4. Review and consider recommendations from existing toolkits to engage communities around the issue of housing affordability.**

- *Effective education and outreach is critical to build understanding and support for the strategies we identify in this plan to increase housing affordability. Toolkits for this purpose from the Association of Washington Cities and the British Columbia Housing Authority have been shared with us. We are asking that these toolkits be reviewed and discussed by all cities and the County. We hope these toolkits can be adapted for local and regional use and provide guidance on constructive community engagement around our housing affordability challenges.*
- **2020 Leadership:** \_\_\_\_\_.

**5. Foster community conversations about density.**

- *We encourage all cities and the County to initiate discussions with residents about the housing affordability challenge. Increasing density is a foundational tool to increase housing affordability, and community engagement around options here is an essential starting point.*
- **2020 Leadership:** \_\_\_\_\_.

**6. Engage private sector partners – large employers, others – in helping to finding solutions to our housing affordability challenge.**

- *Employers have a stake in housing affordability. We believe the private sector can be important partners in efforts to improve housing affordability. We plan to reach out to large employers in the County in 2020 to see how they may be willing to work with us to address this challenge.*
- **2020 Leadership:** \_\_\_\_\_.

**7. Confirm and support an ongoing structure for regional collaboration around production of housing affordable across the income spectrum.**

- *While HART is committed to meeting in 2020 in furtherance of our Five-Year Action Plan, it may be that another group is best positioned to support this work in the future. We will make a recommendation on this in 2020.*
- **2020 Leadership:** HART.

**8. Tracking progress on the Plan.**

- *We want to share information about what cities and the County are doing in furtherance of the Action Plan and improve our data collection to measure our progress. We anticipate creation of an inter-jurisdictional staff workgroup to propose targeted and improved means of data collection.*
- **2020 Leadership:** HART.

## Five-Year Action Items

Beyond the eight Early Action Items, HART has identified 37 strategies (two appear twice, in support of different goals). Strategies are not presented in prioritized order. Please see Supplemental Report [\[weblink\]](#) for additional information regarding each strategy.

**GOAL 1:** Promote greater housing growth and diversity of housing types at all levels of affordability and improve job/housing connections

**SUB-GOAL A:** Promote greater housing growth and diversity of housing types and job/housing connections at all levels of affordability

## Policy and Regulatory Strategies:

### 1.A.1 Establish specific housing affordability goals in city and county comprehensive plans and provide more accurate information into the development of those plans.

- *The County and cities will be working on updates to existing comprehensive plans to be completed by 2023, as required by state law. We hope the work of HART will inform those updates.*

### 1.A.2 Ensure adequate Buildable Land Supply for housing.

- *The state Growth Management Act requires the County and cities periodically assess the adequacy of buildable land supply based on population and zoning. Our work confirms the importance of this effort.*

### 1.A.3 Increase SEPA<sup>33</sup> categorical exemption thresholds for housing developments.

- *This action item can reduce the process time and cost for housing developers. Many protections offered through SEPA processes are assured through other existing regulations, and the vast majority of SEPA reviews are findings of non-significance. The SEPA process can add months of time and risk to housing development projects. Some types of exemptions may require additional state legislation, but cities and counties are encouraged to review what can be accomplished within existing laws and move together in alignment here for maximum impact.*

<sup>33</sup> State Environmental Policy Act CH. 43.21C RCW.

**1.A.4 Facilitate more efficient deal assembly and development timelines / promote cost-effectiveness through consolidation, coordination, and simplification.**

- ➡ • *A wide array of tactics could be deployed to make the permitting process quicker and easier for housing developers. The more these processes and requirements are in alignment across jurisdictional boundaries, the easier it is for developers to work in multiple jurisdictions. Local governments are encouraged to look for these opportunities within their existing land use and permitting codes, and work in alignment with one another on these types of code changes.*

**1.A.5 Remove barriers by reducing construction costs and delays and expedite the permit process.**

- ➡ • *As the local land-use authority, cities and the County have considerable control over development permitting processes. Delays in permit processes cost developers money. We see opportunities here for alignment across jurisdictional boundaries.*

**1.A.6 Increase housing variety allowed at a range of affordability levels both in single-family zones, in areas with connections to jobs, and along transit corridors, including consideration of zoning for duplex, triplex, 4-plex, courtyard apartments, etc.**

- *When local zoning allows a greater variety of housing types, it makes it possible to create more units per acre — facilitating increased supply of housing — as well as reduce per unit costs. Particular importance should be given to increasing zoned residential capacity near jobs and/or transit corridors to reduce pressure on the transportation system as our population grows.*

## **Funding Strategies:**

**1.A.7 Apply for state planning grants to develop housing elements of local comprehensive plans in connection with increasing density as authorized by HB1923 and adopted by the State Legislature in 2019. Apply alone or with other cities.**

- ➡ • *The State Legislature in 2019 authorized new funds for planning grants which may be very helpful as jurisdictions look to update local plans in response to housing affordability challenges.*

### 1.A.8 Implement Multi-Family Property Tax Exemption programs at local and county level.<sup>34</sup>

- *The Multi-Family Property Tax Exemption (MFTE) program has been in place in Washington for decades and is available to all cities. Most cities in the County have implemented an MFTE program of some sort. Generally, MFTE provides a time-limited exemption from local property tax for developers as an incentive to build multi-family housing; depending on the time period involved, the deferral can be targeted to housing affordable to lower income multi-family housing, or to all multi-family housing. Jurisdictions are encouraged to review their programs to see if they can be revised or expanded to strengthen the incentives for multi-family housing development.*

### 1.A.9 Encourage banking and insurance industry support for condominium projects as homeownership solution.

- *Multi-family home ownership is generally less expensive than single-family home ownership. With recent changes in state law, condominium construction becomes less problematic, assuming financing can be secured: knowing there is public support for this type of development may make financing support more likely. Local zoning to allow condominium developments is also needed.*

**SUB-GOAL B:** Promote greater housing growth and diversity of housing types and job/housing connections for homes affordable to households at or below 60% AMI

## Policy and Regulatory Strategies:

### 1.B.1 Prioritize *affordability* and *accessibility* within a half mile walkshed of existing and planned frequent transit service, with particular priority near high-capacity transit stations. Require some amount of low-income housing in development near transit hubs.

- *Low-income housing must be paired with affordable, accessible, safe, and equitable transportation. Households with lower incomes may not have ready access to private transportation, so housing that is walkable to transit options or within the ADA three-quarter mile boundary is particularly important. Cities on transit corridors could increase impact by working together on these ideas; however, every city and the County can consider ways to implement this strategy. Transit agencies are key partners.*

<sup>34</sup> This strategy can be targeted to support housing at all income levels, or just lower income housing; see funding strategy 1.B.9.

### **1.B.2 Revise local zoning to encourage Accessory Dwelling Units (ADU).**

- *ADUs are a low-cost housing option, wherein an additional housing unit is built on an existing single-family lot, for example, over a free-standing garage, or in a separate structure behind the existing home. Many cities currently allow ADUs. They are most viable in urban areas with sewer systems in place. This strategy involves revising zoning to allow one or two ADUs on single-family lots. Reducing requirements associated with residency, lot size, parking, setbacks and architectural requirements may significantly increase the likelihood of ADUs being built.*

### **1.B.3 Encourage cities and the County to proactively develop programs for facilitating the granting of density bonuses for development on church-owned properties (implementing HB 1377, as authorized by Legislature in 2019).**

- *State legislation passed in 2019 requires cities to offer density bonuses to churches and other religious organizations seeking to develop their property for low-income housing. This strategy proposes cities facilitate these types of projects by being prepared in advance, so that projects may move ahead more quickly.*

### **1.B.4 Reduce short plat threshold for low-income housing projects.**

- *This can have a high impact on facilitating development of low-income housing by reducing land costs. The typical rule allowing short plats for up to 4 lots can be changed through a local administrative process to allow short plats for up to 9 lots. An even broader approach would be to change the threshold for all housing projects, not just low-income housing.*

### **1.B.5 Implement inclusionary zoning incentives to encourage developers to produce low-income housing.**

- *Zoning incentives for low-income housing can take a number of forms, all essentially intended to reduce the cost of construction by allowing more housing units on a parcel of land than would otherwise be permitted. Allowing greater building heights, smaller setbacks, greater floor area ratio, or less open space or parking (see below) in exchange for including low-income housing units in a multi-family development are all potential components of this strategy.*

### 1.B.6 Reduce parking requirements for low-income housing developments.

- *The cost of building structured parking or reserving a substantial portion of a project site for parking can significantly increase the per-unit cost and/or reduce the number of units that can be built. Recent state legislation (E2SHB 1923) requires a reduction of parking requirements for projects serving households at 50% or less of Area Median Income within 0.25 miles of frequent transit service. Cities and the County are encouraged to consider broader reductions of parking requirements in connection with low-income housing developments.*

## Funding Strategies:

### 1.B.7 Study funding mechanisms and pursue joint advocacy efforts.

- *Creation of housing affordable to those at or below 60% of Area Median Income will typically not be provided without governmental intervention and/or subsidy of some type. These projects often involve securing and leveraging multiple funding sources; even a small amount of funding from a local jurisdiction can be leveraged to secure other resources. Without significant new federal, state, regional, and/or local funding contributions, we can expect limited progress in building more low-income housing. HART recognizes that we must continue to consider ways in which we can inject additional funds into the construction and operation of low-income housing.*

### 1.B.8 Provide surplus and under-utilized publicly owned property for low-income housing.

- *Finding and purchasing land is a major challenge in the construction of all housing. It is typically 10 to 20 percent of the cost of a project. Donating real property, or offering discounted long term leases for developers of low-income housing, can be a particularly effective way to make such projects viable. Jurisdictions are encouraged to survey their existing real estate holdings and determine if any properties may be declared surplus and made available for low-income housing development.*

### 1.B.9 Implement Multi-Family Property Tax Exemption (MFTE) programs at local and county level.

- *This strategy, first discussed above at Strategy 1.A.8, can be applied to any multi-family housing development (up to 8 year exemptions), but under state law longer term exemptions (12 years) can be provided for low-income housing developments. This can be a particularly effective way of reducing costs of construction and operation of such housing. Jurisdictions are encouraged to examine their existing MFTE programs to increase the incentives provided for construction of low-income housing and extend the term of years for which such housing is required to remain affordable.*

### 1.B.10 Waive or reduce fees and charges for low-income housing projects.

- *Local impact fees and charges can add thousands of dollars per unit cost of construction. Waiving or reducing city- or County-imposed fees does reduce local revenue, but can be a significant support in financing more units of low-income housing. Fees to be considered here include any locally-imposed impact fees, mitigation fees, or utility connection charges.*

### 1.B.11 Establish a county growth fund for low-income housing by setting aside a portion of new construction property taxes.

- *This is one of the few “new money” proposals in our Action Plan. The impact would be much greater if all jurisdictions supported a single fund, rather than implement the concept city-by-city. The basic idea is for each jurisdiction to agree to set aside an agreed upon portion of new construction property tax receipts. In 2016, new construction property tax receipts totaled \$15 million in Snohomish County; a 10% set aside would have created \$1.5 million in funding for low-income housing. An agreed upon process would need to be developed for how such funds were both committed and then allocated.*

### 1.B.12 Expand supports for low-income renters and people with disabilities; fund operating costs for housing service providers.

- *All operators of low-income and special needs housing who spoke to HART identified the need for ongoing operating funds for these projects as a major challenge. Simply being able to construct a project or buy an existing property for low-income or special needs housing is only the first step: supports must be in place to provide ongoing supportive services to residents to ensure long-term stability. A variety of funding sources have been suggested to HART for these purposes, including new state or federal funds, expansion of low-income housing tax credits, or other direct public funding.*

### 1.B.13 Support creation of Community Land Trusts (CLT).

- *CLTs are a means to ensure permanent affordability remains in place on investments in housing included in these trusts. CLTs are typically formed as nonprofit corporations who own land and lease homesites; the homes are more affordable because land purchase is not involved. In exchange, the rate of return that the homeowner can receive on resale is capped to ensure the property remains affordable under successive owners. There is a start-up CLT in Snohomish County and CLTs operate in nearby counties. CLTs can be implemented at a city-by-city level or more broadly, but larger scale efforts will be more sustainable. The key government action is to require permanent affordability in connection with a donation or investment.*

### 1.B.14 Implement policy/zoning changes to increase Snohomish County/city projects' competitiveness for state and federal funding.

- *State and federal grant programs are the major sources of funding for low-income housing. It is important that we be as competitive as possible for these dollars. A number of helpful zoning changes have been identified by partners as actions local government can take and/or specify in applications, including: ensuring that multi-family (MF) zoning is allowed in a jurisdiction, particularly near transit; designating community revitalization areas; allowing early learning facilities in MF zones; and allowing modular housing.*

### 1.B.15 Target federal CDBG (Community Development Block Grant) and HOME (HOME Investment Partnerships Program) funds for low-income housing creation and rental assistance.

- *These federal funds are jointly administered for all cities and the County except Marysville and Everett which have their own funding and policy processes. The allocation of these funds is largely directed by federal formulas. HOME funds are critical to construction of low-income housing units. Generally, new housing construction is not eligible for CDBG funding, with some exceptions. Because allocation formulas are set by federal law, this item is anticipated to have low additional impact.*

### 1.B.16 Advocate for expansion of funding of the state public works trust fund.

- *The state public works trust fund is a revolving loan fund for cities, counties, and special purpose districts. Loans from these funds could be critical in enabling construction of new housing in some of Snohomish County's smaller cities that have sewer and water system moratoriums.*

## GOAL 2: Identify and preserve existing housing at risk of rapid rent escalation or redevelopment, balancing this with the need for more density

### Policy and Regulatory Strategies:

#### 2.1 **Protect communities of color, historically underserved communities, and low-income communities from displacement by gentrification.**

- *As a result of location or real estate market trends, we often see existing housing for underserved communities being prime for redevelopment. Anti-displacement strategies, and increasing household choice for these residents are important strategies. At its core, anti-displacement strategies involve purchasing housing and decoupling it from market pressures. Other funding supports, discussed below at Strategy 2.4 are also important.*

### Funding Strategies:

#### 2.2 **Establish short term acquisition revolving loan fund to enable rapid response to preserve low-income housing developments when they are put on the market.**

- *Both public and private donations could be used to establish such a fund, which could have a high impact in preserving low-income housing at risk of conversion, particularly if potential government or nonprofit owners are unable to fully secure purchase funds quickly. This type of tool could be used to preserve housing affordable at lower income levels, whether multi-family or mobile home developments.*

#### 2.3 **Increase investments in communities of color, historically underserved communities, and low-income communities by developing programs and policies that serve individuals and families at risk of displacement.**

- *This is a companion to Strategy 2.1. To the extent these communities live on lower cost property, they are often at higher risk of redevelopment — and loss of both their community and their affordable homes. There are a number of related strategies here including community land trusts, cooperation agreements with the Housing Authority of Snohomish County, and other funding mechanisms to facilitate purchase of low-income housing at risk of redevelopment.*

**2.4 Provide low-income homeowners with low-interest/deferred payment to repair homes and/or fund home repair programs for households with lower incomes.**

- *HART members find this strategy conceptually promising, but we understand that it can be very difficult to implement such programs; the Housing Authority of Snohomish County (HASCO) recently terminated their home repair loan program due to the administrative challenges and costs as compared to other types of assistance. Due to administrative effort required, this may be better suited to larger scale efforts.*

**Goal 3: Increase housing density along transit corridors and/or in job centers, while acknowledging that additional housing is needed across the entire County**

## **Policy and Regulatory Strategies:**

**3.1 Prioritize affordability and accessibility within half a mile walkshed of existing and planned frequent transit service, placing particular priority on high-capacity transit stations. Require some amount of low-income housing in development near transit hubs.**

- *This item is also presented above as Strategy 1.B.1—promoting construction of housing affordable to households at or below 60% of Area Median Income.*

**3.2 Increase variety of housing types allowed at a range of affordability along transit corridors through increasing zone density and providing incentives to include low-income units.**

- *This strategy is similar to Strategies 1.B.1 and 3.1—but with the focus on all income levels. The more housing we can develop near major transit access, the more potential relief we provide to our transportation system. Perhaps one positive aspect of being one of the last areas to see the light rail investment from Sound Transit is that we can act now to acquire property along these future corridors before it hits peak pricing. We have time to coordinate across jurisdictions and thoughtfully ensure more zoned capacity is available where it will be most helpful.*

**3.3 Reduce parking requirements for multi-family projects located near transit.**

- *As noted above, reducing parking requirements can significantly reduce the cost per unit of housing. There is particular logic for considering this change in zoning where residents are more able to use mass transit to meet their needs.*

**3.4 Increase Snohomish County/City projects' competitiveness for state and federal funding by ensuring multi-family zoning near transit.**

- *This strategy is related to Strategy 1.B.14 above. Jurisdictions which have multi-family zoning near transit will be more competitive for federal and state low-income housing funding support.*

## Funding Strategies:

**3.5 Maximize resources available for Transit Oriented Development (TOD) in the near term.**

- *“Resources” in this context can mean staffing, legislation, policy, or funding. Aligning all types of resources to promote development around transit can reduce the need for single occupancy vehicles. Coordinating locally with Sound Transit and housing developers on this strategy is key to facilitate construction of affordable TOD.*

**Goal 4:** Implement outreach and education programs, countywide and within individual jurisdictions, to raise awareness of housing affordability challenges and support for action

## Policy and Regulatory Strategies:

**4.1 Engage communities of color, historically underserved communities, and low-income communities in affordable housing development and policy decision.**

- *These communities are often most in need of low-income housing and most vulnerable to having their existing housing redeveloped or subject to significant rent increases. Cities and housing agencies should use a race and social equity lens and/or racial equity toolkit when making policy decisions regarding low-income housing. Community-based policy development is consistent with the overall philosophy that as elected officials we are here to understand and promote the needs of our residents.*

#### 4.2 Expand engagement of non-governmental partners to support efforts to build and site more affordable housing.

- *While local government can do a lot to address our housing affordability challenges, we cannot resolve the housing challenge alone. To accomplish our goals here we must both continue and expand our engagement with partners. For example, we have seen large employers in other counties and other states become major funding partners with local government agencies on the issue of affordable housing. Can we do something similar in Snohomish County? This strategy calls for exploring the possibilities.*

### GOAL 5: Track our progress and support ongoing regional collaborations

- *Two of our eight “Early Action” items are built around this goal. HART plans to spend time in 2020 to identify the key data we want to track and to create multi-jurisdictional workgroups to pursue and refine that data. We also plan to identify an ongoing “home” for this Action Plan, as it evolves over time and we continue to track our progress.*

# CONCLUSION

In recent years, we have seen a significant decrease of housing affordability in Snohomish County. Housing production is not keeping pace with the needs of our growing population—either in terms of housing units created or the cost of those units. Fully one-third—33%—of Snohomish County households are “cost-burdened,” spending more than 30% of their income on housing costs including utilities. These households are at all income levels. But the challenge is greater when we look at the needs of our low-income neighbors. Without funding supports from government or nonprofit organizations, or other governmental incentives, the private housing market is generally unable to produce units affordable to those households with incomes of 60% of Area Median Income or below. Currently, approximately one-third of Snohomish County households are in need of housing that cannot be produced without governmental or nonprofit interventions.

As members of HART, we are committed to ensuring progress in improving housing affordability in Snohomish County. Local government is a necessary partner for making significant progress on housing affordability. Because cities and counties are not authorized by law to either own or operate housing, we need to work in partnership with housing developers (both for-profit and nonprofit); local housing authorities; state and federal funders; housing advocates; local special needs and low-income housing operators; and other community advocates to accomplish our housing affordability goals. In addition, we believe we can benefit from bringing new partners to this cause from the private sector.

Over the course of this effort, we heard from many partners in the housing industry. They helped us to understand and prioritize among the many actions we can take to support this work. Some of these requests are relatively simple to address; others are very difficult. Our Five-Year Housing Affordability Action Plan identifies 5 framework goals, 8 Early Action items that are to be pursued this year, and 37 supporting strategies to be completed in future years. We acknowledge that the Action Plan is simply the first step. Much work lies ahead, and we want our Action Plan to evolve over time as we learn from future experience and consider new approaches and solutions.

The challenge of housing affordability is not about “other people.” It is a problem facing our own families and friends; our grown children trying to make it on their own; our neighbors; people we interact with every day as we shop, pick up our kids from school, take an aging parent to the doctor, or join in community events. The good news is there is ample evidence—real examples throughout Snohomish County, the Puget Sound, and nationally—that we can maintain and evolve vibrant, welcoming, livable, safe communities at the same time as we work to meet the housing affordability needs of all our residents.

With the support of our fellow city and county government officials in Snohomish County, we can make progress on housing affordability. The problem is urgent, and becoming more critical each year. We hope each City Council and the County Council will consider the items in our Action Plan and take steps in 2020 and each year thereafter to address this challenge and ensure better future for our communities.

# APPENDIX

## Attachment A:

### Summary of the Snohomish County Housing Affordability Taskforce (HART) Five-Year Housing Affordability Action Plan

HART's recommendations to all Snohomish County cities and Snohomish County government for responding to our housing affordability challenges are presented below. The Action Plan is based on **five framework goals**; three that focus on increasing housing affordability, and two goals that focus on how we propose to work together.

**“Early Action”** – Items that HART and its members will begin working on in early 2020 are presented first, followed by the **Framework Goals** with supporting **strategies** for each Goal. The strategies are divided into two types: **policy and regulatory strategies** and **funding strategies**.

**“Joint Action”** – Items we recommend involve a countywide unified strategy/action, or alignment of individual jurisdiction action—are indicated as follows:

indicates actions that we recommend be pursued in a **unified**, countywide approach.

indicates actions we see as best pursued by individual jurisdictions but with **alignment** in our approach.

## Early Action Items

**Early Action Items** are strategies that HART and its members will begin working on in early 2020.

1. **Encouraging cities to enter into cooperation agreements with the Housing Authority of Snohomish County (HASCO) and Everett Housing Authority.**
2. **Implementing the state sales tax shift to local governments for up to 20 years to fund low-income housing authorized by HB 1406, as authorized by Legislature in 2019.**
3. **Lobbying for changes in state and federal law that will enable more consolidated and streamlined funding to support low-income housing.**
4. **Reviewing and consider recommendations from existing toolkits to engage communities around the issue of housing affordability.**
5. **Fostering community conversations about density.**
6. **Engaging private sector stakeholders – large employers, others – in helping to finding solutions to our housing affordability challenge.**
7. **Confirming and support an ongoing structure for regional collaboration around production of housing affordable across the income spectrum.**
8. **Tracking progress on the Action Plan.**

## Five-Year Action Items

NOTE: Strategies are not presented in prioritized order. Please see Supplemental Report [weblink] for additional information regarding each strategy.

**GOAL 1:** Promote greater housing growth and diversity of housing types at all levels of affordability and improve job/housing connections

**SUB-GOAL A:** Promote greater housing growth and diversity of housing types and job/housing connections at all levels of affordability

### Policy and Regulatory Strategies:

- 1.A.1  Establish specific housing affordability goals in city and county comprehensive plans and provide more accurate information into the development of those plans.
- 1.A.2  Ensure adequate Buildable Land Supply for housing.
- 1.A.3  Increase SEPA<sup>35</sup> categorical exemption thresholds for housing developments.
- 1.A.4  Facilitate more efficient deal assembly and development timelines / promote cost-effectiveness through consolidation, coordination, and simplification.
- 1.A.5  Remove barriers by reducing construction costs and delays and expedite the permit process.
- 1.A.6 Increase housing variety allowed at a range of affordability levels both in single-family zones, in areas with connections to jobs, and along transit corridors, including consideration of zoning for duplex, triplex, 4-plex, courtyard apartments, etc.

### Funding Strategies:

- 1.A.7  Apply for state planning grants to develop housing elements of local comprehensive plans in connection with increasing density as authorized by HB1923 and adopted by Legislature in 2019. Apply alone or with other cities.
- 1.A.8 Implement Multi-Family Property Tax Exemption (MFTE) programs at local and county level.<sup>36</sup>
- 1.A.9 Encourage banking and insurance industry support for condominium projects as homeownership solution.

<sup>35</sup> State Environmental Policy Act CH. 43.21C RCW.

<sup>36</sup> This strategy can be targeted to support housing at all income levels, or just lower income housing; see funding strategy 1.B.9.

**SUB-GOAL B:** Promote greater housing growth and diversity of housing types and job/housing connections for homes affordable to households at or below 60% AMI

## Policy and Regulatory Strategies:

- 1.B.1 **Prioritize *affordability* and accessibility within a half mile walkshed of existing and planned frequent transit service, with particular priority near high-capacity transit stations. Require some amount of low-income housing in development near transit hubs.**
- 1.B.2 **Revise local zoning to encourage Accessory Dwelling Units (ADU).**
- 1.B.3 **Encourage cities and the County to proactively develop programs for facilitating the granting of density bonuses for development on church-owned properties (implementing HB 1377, as authorized by Legislature in 2019).**
- 1.B.4 **Reduce short plat threshold for low-income housing projects.**
- 1.B.5 **Implement inclusionary zoning incentives to encourage developers to produce low-income housing.**
- 1.B.6 **Reduce parking requirements for low-income housing developments.**

## Funding Strategies:

- 1.B.7  **Study funding mechanisms and pursue joint advocacy efforts.**
- 1.B.8 **Provide surplus and under-utilized publicly owned property for low-income housing.**
- 1.B.9 **Implement Multi-Family Property Tax Exemption (MFTE) programs at local and county level.**
- 1.B.10 **Waive or reduce fees and charges for low-income housing projects.**
- 1.B.11  **Establish a county growth fund for low-income housing by setting aside a portion of new construction property taxes.**
- 1.B.12 **Expand supports for low-income renters and people with disabilities; fund operating costs for housing service providers.**
- 1.B.13 **Support creation of Community Land Trusts (CLT).**
- 1.B.14 **Implement policy/zoning changes to increase Snohomish County/city projects' competitiveness for state and federal funding.**
- 1.B.15 **Target federal CDBG (Community Development Block Grant) and HOME (HOME Investment Partnerships Program) funds for low-income housing creation and rental assistance.**
- 1.B.16  **Advocate for expansion of funding of the state public works trust fund.**

## GOAL 2: Identify and preserve existing housing at risk of rapid rent escalation or redevelopment, balancing this with the need for more density

### Policy and Regulatory Strategies:

- 2.1 Protect communities of color, historically underserved communities, and low-income communities from displacement by gentrification.

### Funding Strategies:

- 2.2 Establish short term acquisition revolving loan fund to enable rapid response to preserve low-income housing developments when they are put on the market.
- 2.3 Increase investments in communities of color, historically underserved communities, and low-income communities by developing programs and policies that serve individuals and families at risk of displacement.
- 2.4 Provide low-income homeowners with low-interest/deferred payment to repair homes and/or fund home repair programs for households with lower incomes.

## Goal 3: Increase housing density along transit corridors and/or in job centers, while also working to create additional housing across the entire county

### Policy and Regulatory Strategies:

- 3.1 Prioritize affordability and accessibility within half a mile walkshed of existing and planned frequent transit service, placing particular priority on high-capacity transit stations. Require some amount of low-income housing in development near transit hubs.
- 3.2 Increase variety of housing types allowed at a range of affordability along transit corridors through increasing zone density and providing incentives to include low-income units.
- 3.3 Reduce parking requirements for multi-family projects located near transit.
- 3.4 Increase Snohomish County/city projects' competitiveness for state and federal funding by ensuring multi-family zoning near transit.

### Funding Strategies:

- 3.5 Maximize resources available for Transit Oriented Development (TOD) in the near term.

**Goal 4:** Implement outreach and education programs, countywide and within individual jurisdictions, to raise awareness of housing affordability challenges and support for action

### Policy and Regulatory Strategies:

- 4.1 **Engage communities of color, historically underserved communities, and low-income communities in affordable housing development and policy decision.**
- 4.2 **Expand engagement of non-governmental partners to support efforts to build and site more affordable housing.**

### **GOAL 5:** Track our progress and support ongoing regional collaborations

Two of our eight “Early Action” items are built around this goal. HART plans to spend time in 2020 to identify the key data we want to track and to create multi-jurisdictional workgroups to pursue and refine that data. We also plan to identify an ongoing “home” for this Action Plan, as it evolves over time and we continue to track our progress.

## Attachment B<sup>30</sup>:

# Many Types of Households Struggle with Housing Costs

Fair Market Rent for a two-bedroom apartment in Snohomish County was \$1,899 during 2019

## Snohomish County's

### Housing Affordability Regional Task Force's Mission:

Collaboratively develop a five-year action plan that identifies priorities for county and city governments to accelerate collective ability to meet the housing affordability needs of all Snohomish County residents and set a foundation for continued success through 2050.

Goals to increase housing affordability at all income levels

Promote greater housing growth and diversity of housing types at all levels of affordability and improve jobs/housing connection

Identify and preserve existing housing at risk of rapid rent escalation or redevelopment balancing this with the need for more density

Increase housing density on transit corridors and/or in job centers, while also working to create additional housing across the entire county

### Snohomish County Cost-Burdened Household Projections

	0-30% AMI	31-50% AMI	51-80% AMI	81-100% AMI	100% AMI	Total
<b>Current Need</b>	29,425	23,955	17,955	9,465	10,285	91,085
<b>Growth to 2040</b>	11,672	9,502	7,122	3,754	4,080	36,130
<b>Subtotal</b>	<b>41,097</b>	<b>33,457</b>	<b>25,077</b>	<b>13,219</b>	<b>14,365</b>	<b>127,215</b>

### Goals for moving HART forward together

Implement outreach and education programs for use countywide and by individual jurisdictions to raise awareness of housing affordability challenges and support for action

Track progress and support ongoing regional collaborations

# Regional Housing Needs Assessment – Current & Future Housing Needs

**GMPB • November 19, 2020**

# Components of the Strategy

# Recap of Findings Shared at October Meeting

# Rent and home values have risen dramatically over the past decade

## Median Home Value & Rent

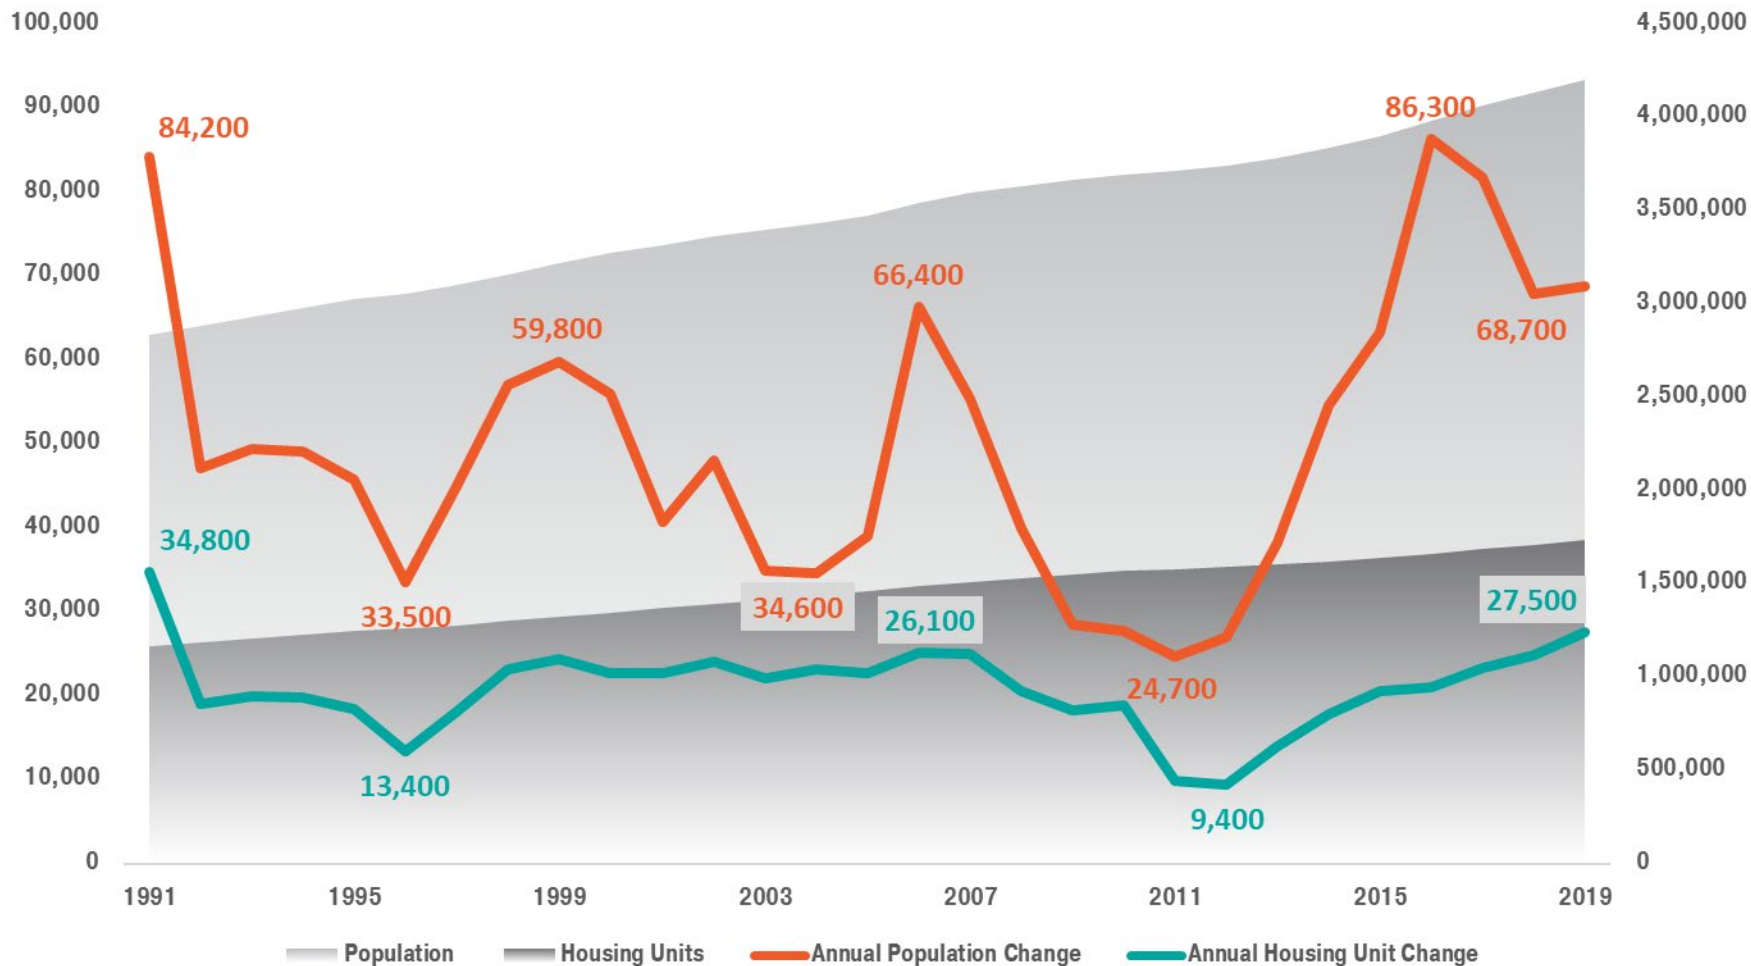

From 2010 to 2018, rents increased 53% and home values increased 67%

# Population growth outpaced housing production for several years

## Annual Population & Housing Unit Trends

From 2010 to 2019, the region added **3 new residents** for every **1 new housing unit**

# Housing production slowed in the last decade

## Decennial Housing Production

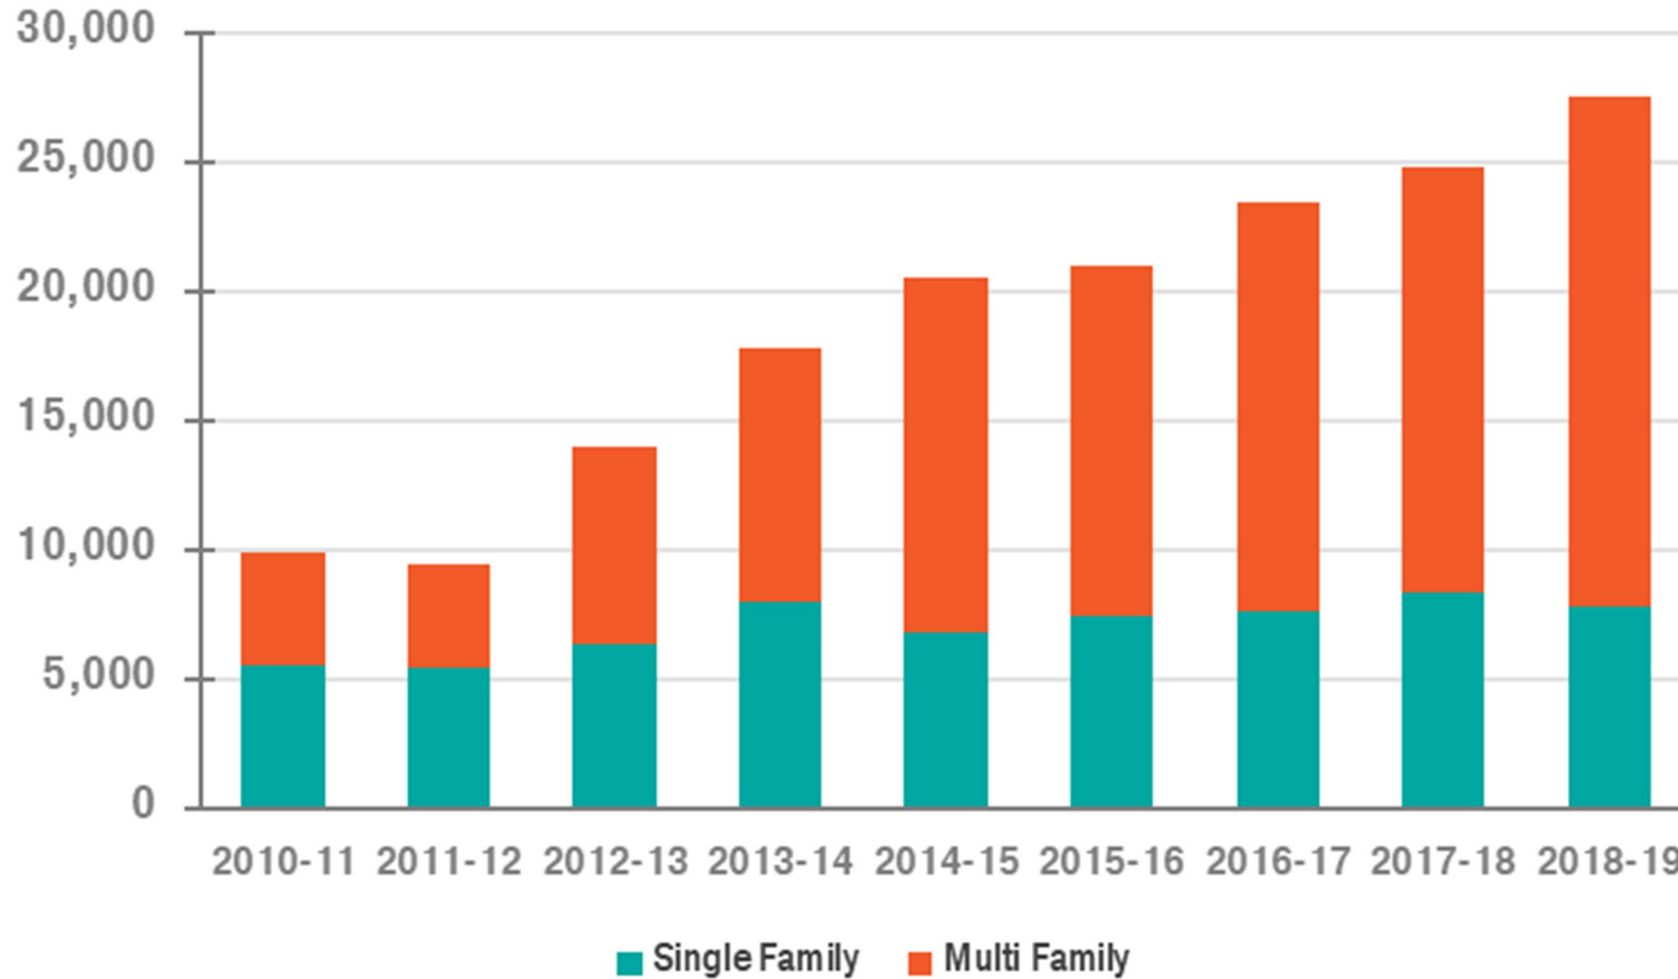

Source: OFM

# Housing production is mostly Multi-Family

## Housing Production by Unit Type

Since 2010, over **124,000 multi-family units** have been added to the region

Source: OFM

# Over 2/3 of Households Don't Include Children

Nearly 2/3 of households are comprised of related people (family households)

Close to 1 in 3 households have children under the age of 18

Over 1 in 3 households include a person over the age of 60

# There is a critical need for more housing across the region

- Housing prices have **risen at an unprecedented rate** over the past decade.
- Strong population and job growth have led to an **increased demand** for housing.
- **One in three households** with less than \$50,000 in income is **severely cost burdened**, spending the majority of their income on housing costs.
- There are substantial disparities between white and person of color households, underscoring the ongoing effects of **systemic racism in housing**.

# Overview of Housing Needs Analysis

**Purpose:** To identify trends and areas where policy interventions are most needed as well as the number of housing units necessary to meet the housing needs of the current and projected population.

## Assess Need in Multiple Ways

- **Supply** – Housing units needed to accommodate projected population, as well as current gap
- **Affordability: Income Level Analysis** – Housing units needed at income thresholds for projected households
- **Affordability: Cost Burden Analysis** – Housing units needed to ensure households do not pay more than 30% of income on housing costs

**How many housing units  
are needed to meet current  
and future demand?**

# Rapid growth and lagging housing production has created a gap in housing needed now

## Annual Population Change vs. Housing Need vs. Actual Housing Change

Cumulative Current Gap:  
~48,000

Cumulative current housing gap =  
Actual housing constructed 2010-2020

Estimated 2010-2020 housing need

Source: OFM

# Understanding housing needed for future population growth

*How many new housing units are needed for population growth in the future?*

VISION forecast population for  
2017-2050

x

Average household size  
Vacancy rate  
Population in group quarters

=

888,000 new housing units needed

Update for growth from 2017-2020

**810,000 new housing units  
needed**

# Between 2020 and 2050 the region needs 810,000 additional housing units to accommodate future growth

King County – 418,000 units

Kitsap County – 43,000 units

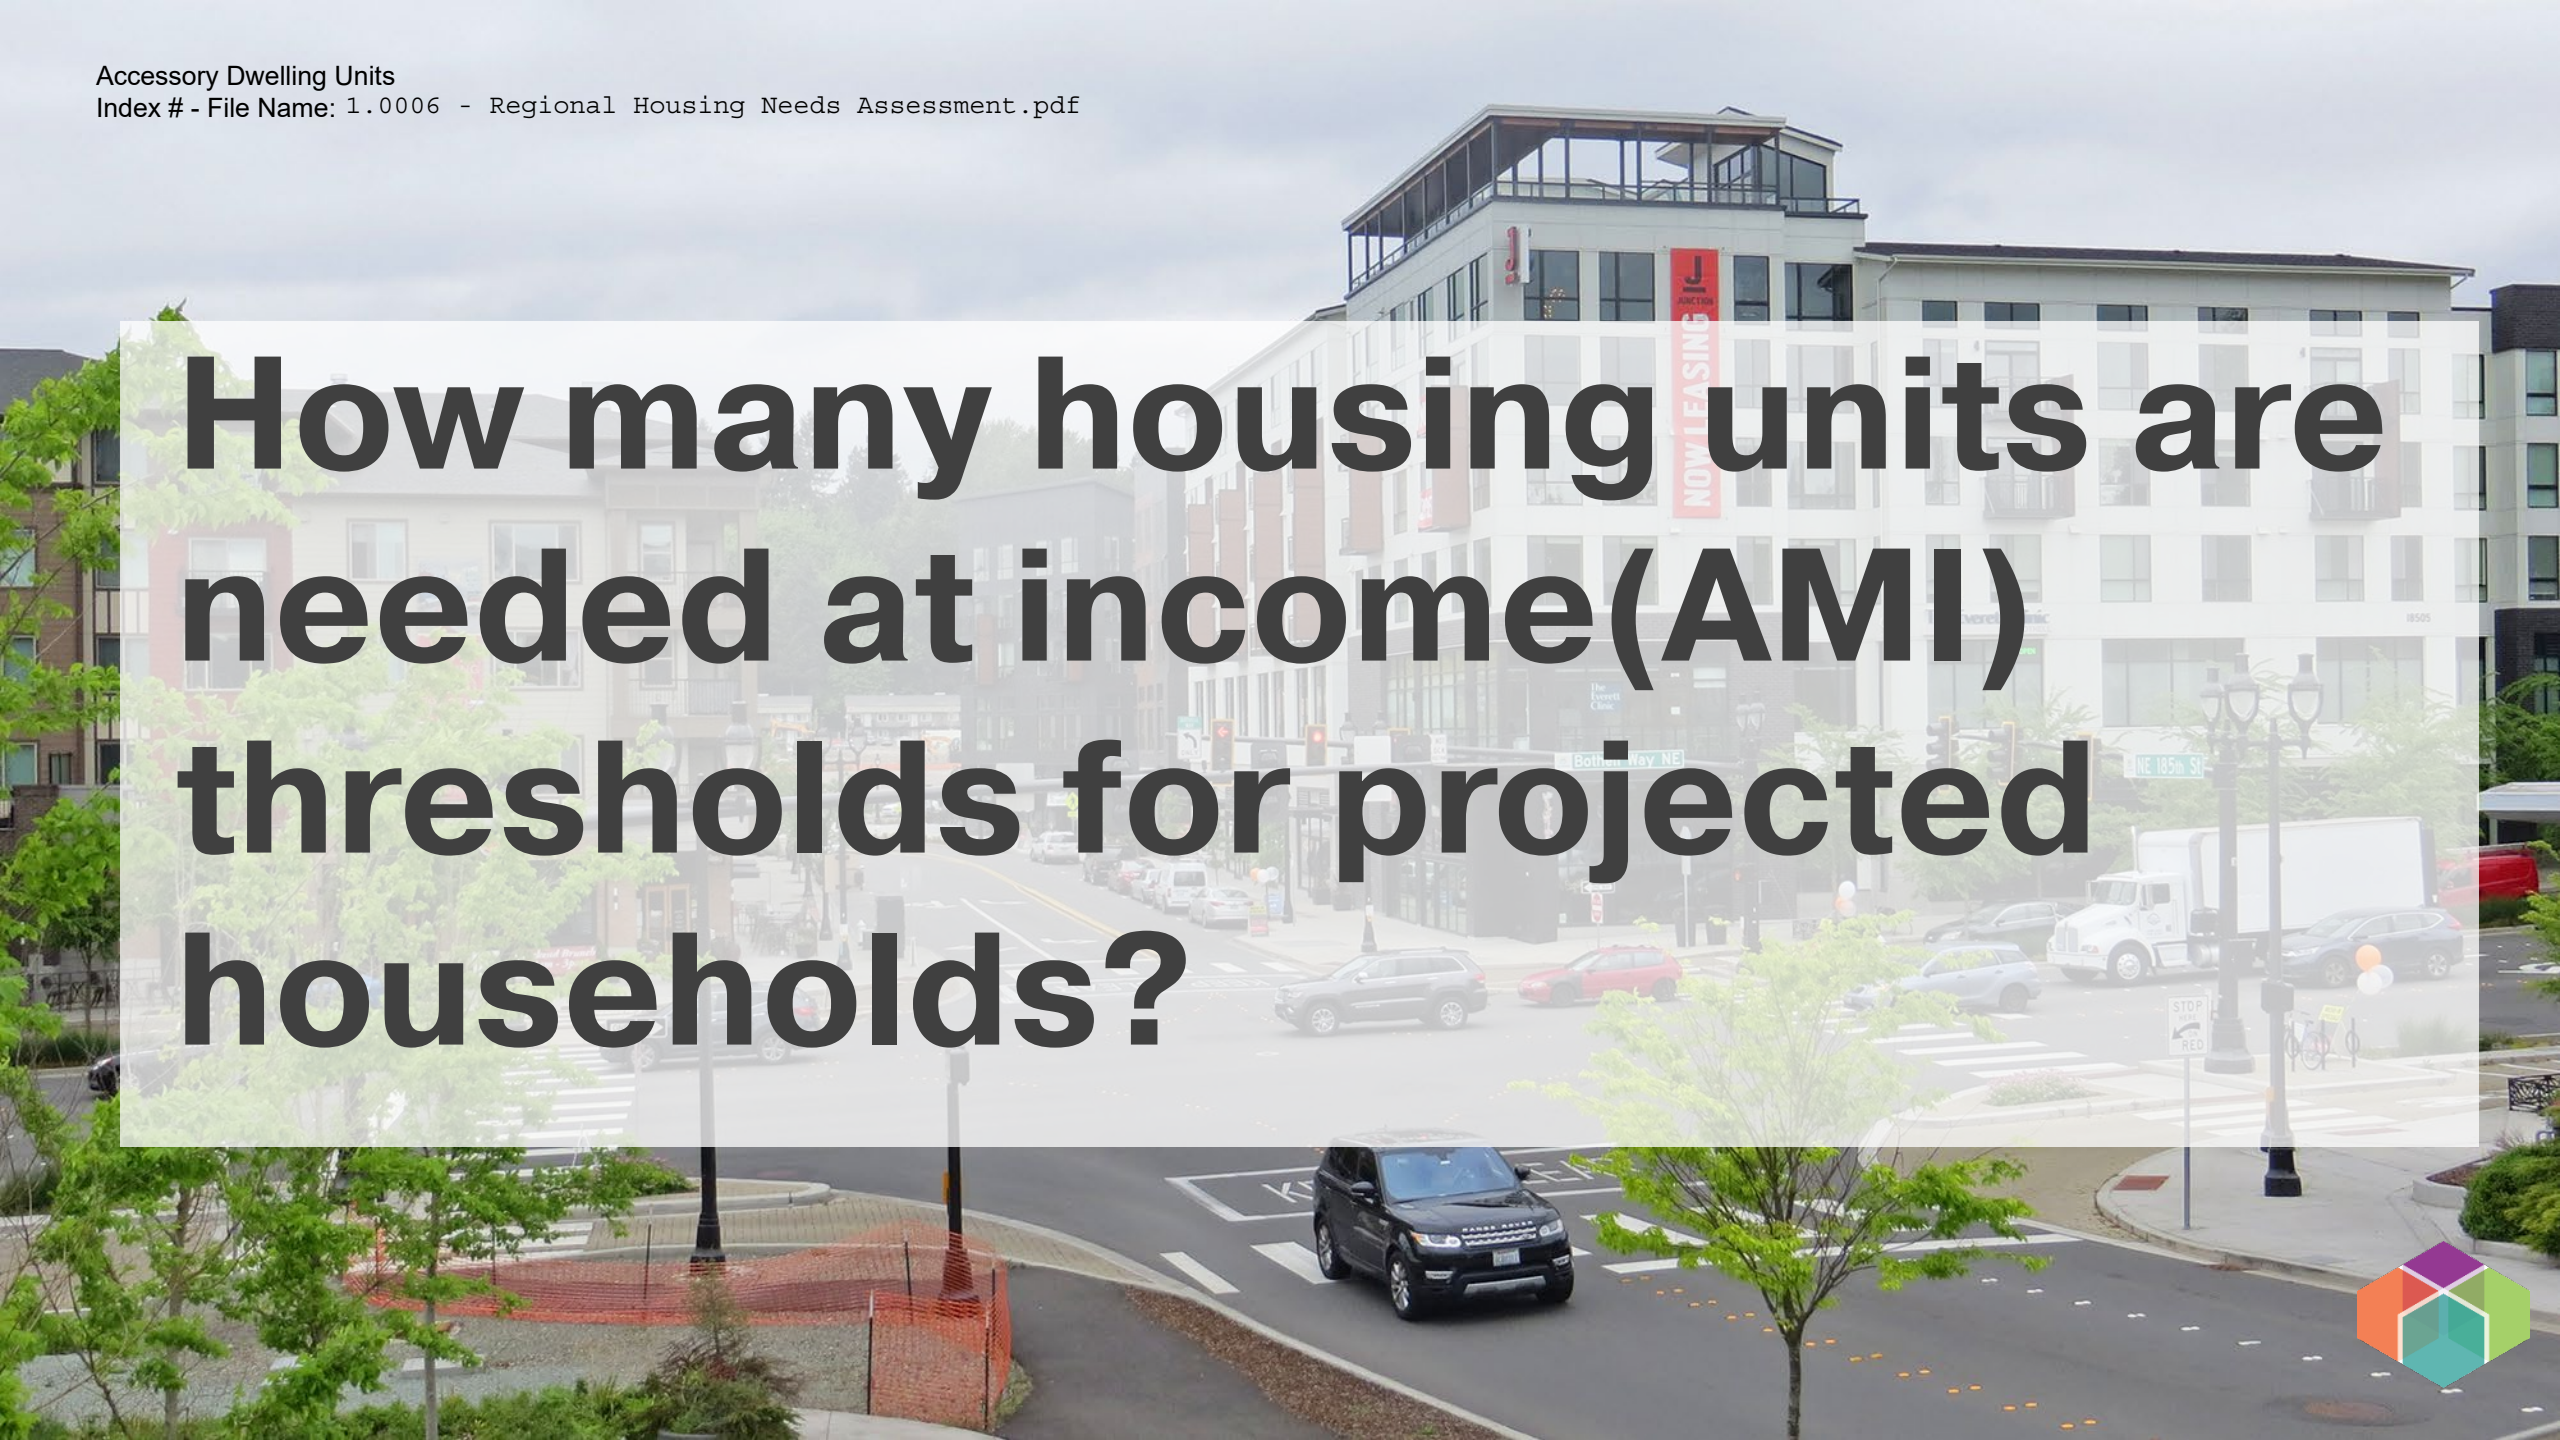

Pierce County – 161,000 units

Snohomish County – 187,000 Units

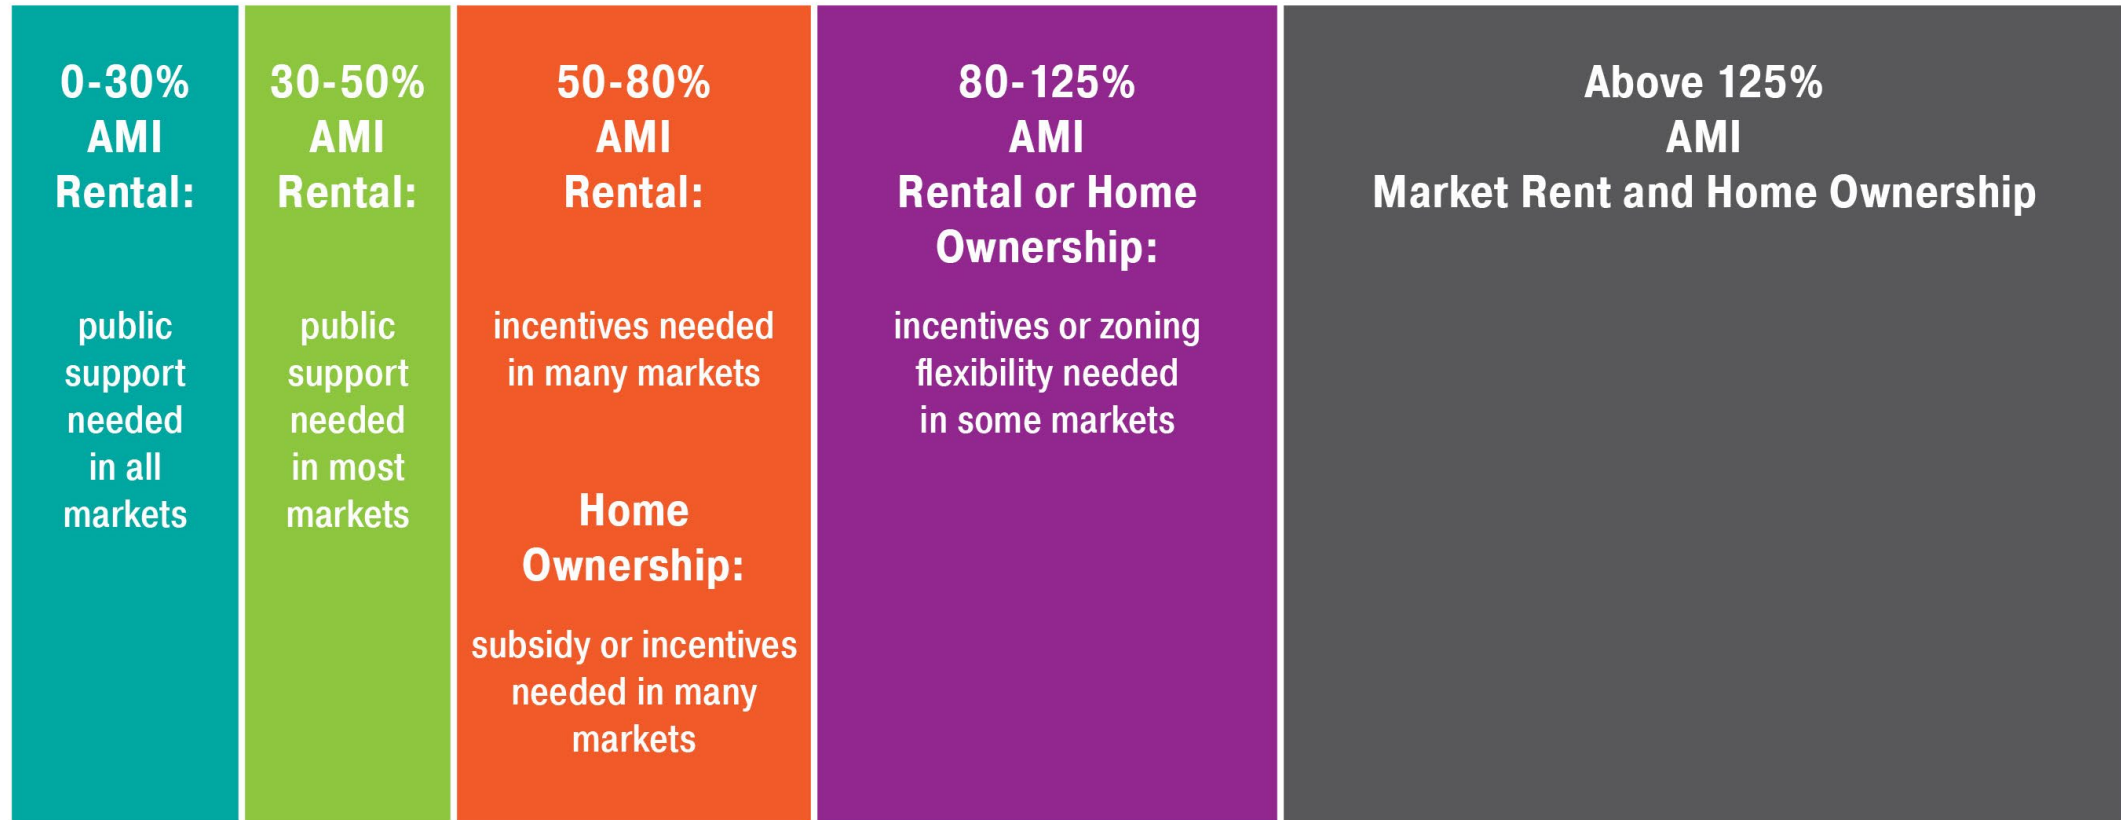

**How many housing units are needed at income (AMI) thresholds for projected households?**

# Different approaches for different needs

## Lower housing costs require greater public intervention

# Over one-third of future units will need to be affordable to moderate and low-income households

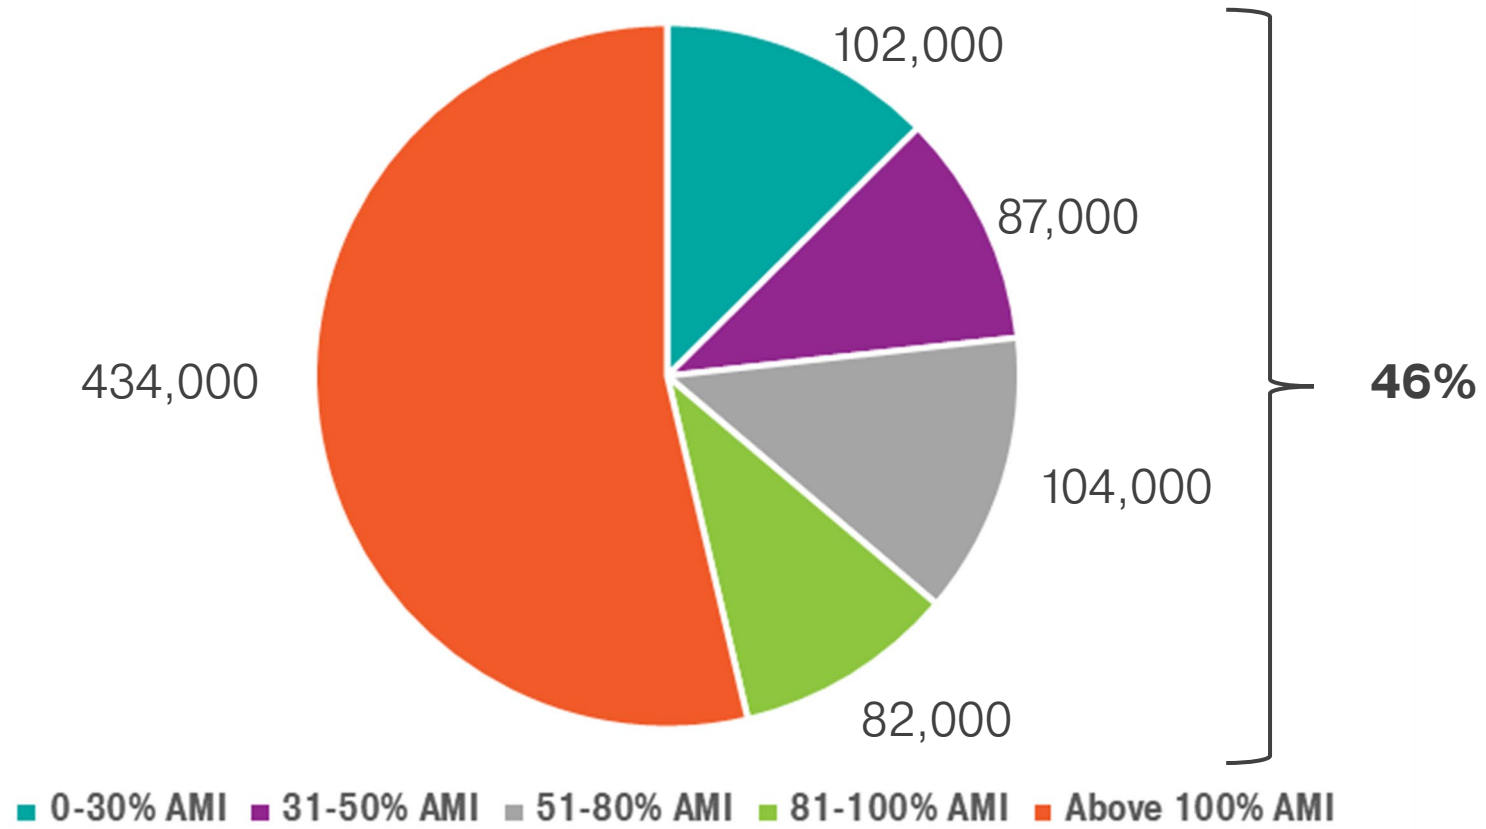

Total Housing Units Needed by Income Segment, 2020-2050

	King County		Kitsap County		Pierce County		Snohomish County	
	# Units	% of Units	# Units	% of Units	# Units	% of Units	# Units	% of Units
0-80% AMI	148,000	35%	16,000	37%	60,000	37%	69,000	37%
Above 80% AMI	270,000	65%	27,000	63%	101,000	63%	117,000	63%
<b>Total</b>	<b>418,000</b>		<b>43,000</b>		<b>161,000</b>		<b>186,000</b>	

# Close to 1 in 2 new housing units will require some level of incentive or subsidy to meet affordability needs

## Total Housing Units Needed by Income Segment, 2020-2050

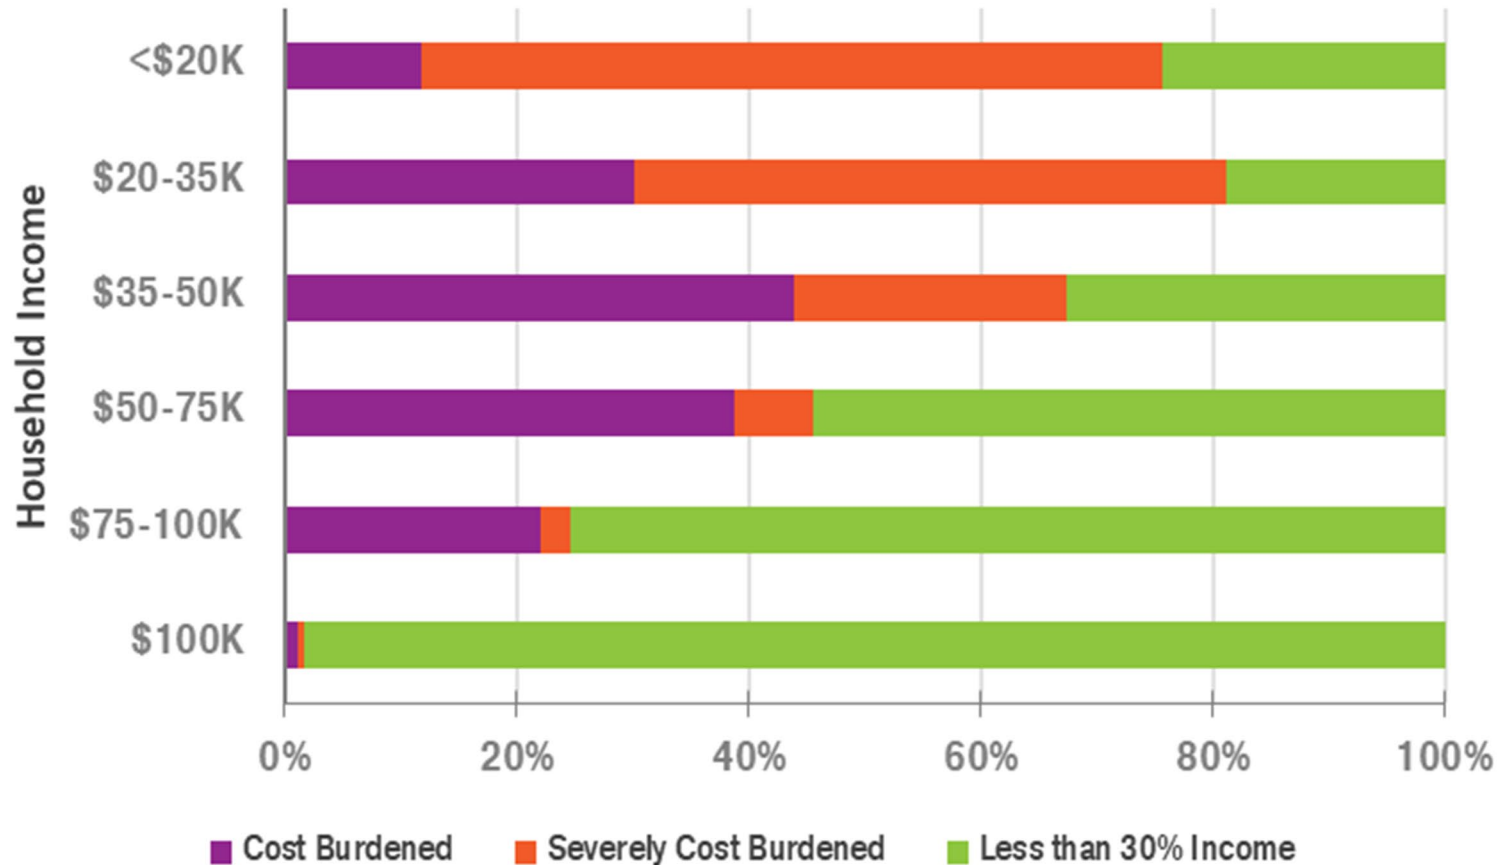

**How many housing units are needed to ensure households do not pay more than 30% of income on housing costs?**

# More than 1/3 of moderate-income households spend the majority of their income on housing

## Cost Burdened Households

# Calculating Housing Need by Cost Burden

# More than 580,000 units are needed to eliminate *current and future* cost burden

**Current Need**

**283,000** units

**Future Need**

**303,000** units

+

=

**Total Need**

**586,000** new units

# More than 280,000 units are needed to eliminate *current* cost burden

## Current Housing Need

Household by Type	Estimated Homes Required
15,000 people experiencing homelessness	12,000
497,000 cost burdened households	271,000

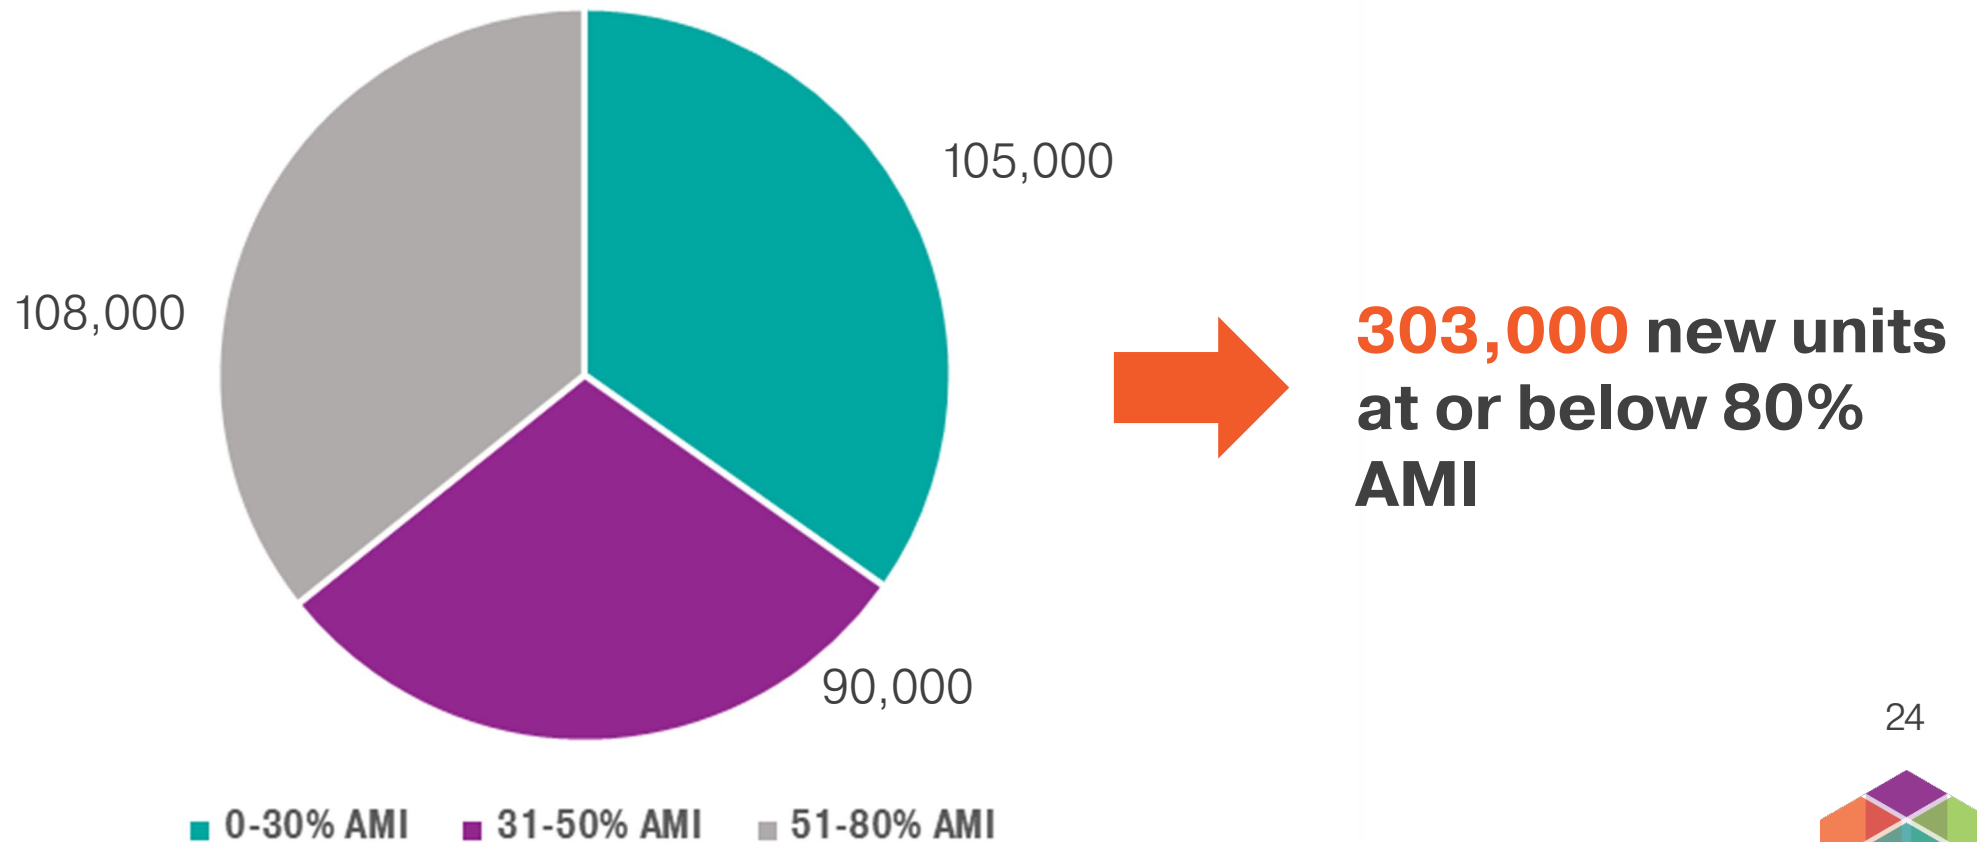

**57%** of units at or below 30% AMI and to address unhoused people

**283,000** housing units now

# More than 300,000 units are needed to eliminate *future* cost burden

## Housing Units Required to Avoid Future Cost Burden, 2017-2050

Source: CHAS, Point in Time Counts

# Meeting current and future housing need is a major challenge

- **810,000** housing units needed by 2050
- **303,000** new affordable housing units will be needed to for growth of families at or below 80% AMI
- About **2/3 of new housing** needs to be affordable to fully address current and future housing needs
- Implications for housing size, type, and job and transit access

# Question for the board

- Are there any aspects of housing not covered by the presentation – or identified as forthcoming findings – that would be helpful to address in preparation for future strategy discussions?

# Next Steps

- Additional findings from needs assessment and draft report available late 2020
- PSRC boards and committees will begin discussing potential strategies to address the gaps identified in the RHNA in 2021

## **ACKNOWLEDGMENTS**

The authors would like to acknowledge fellow members of the American Planning Association staff who worked on this project. William R. Klein, Director of Research, supervised the project, and Stuart Meck and Jim Hecimovich provided valuable comments and editing on early drafts. We acknowledge the substantial information contributed to the development of this publication by Patrick H. Hare, whose planning firm has played a key role in developing accessory dwelling units in the United States, and by Leo Baldwin, former housing coordinator for AARP.

We are grateful for the assistance provided by state and local officials who gave us important comments on drafts, particularly Barbara Foresti, Program Specialist, Department of Housing and Community Affairs, Montgomery County, Maryland; Terry Sedik, Planning Director, Daly City, California; Holly Gadbow, Senior Planner, Department of Community, Trade, and Economic Development, State of Washington; and Camilla Cleary, Housing Analyst, Department of Housing and Community Development, State of California.

Thanks are also extended to the internal reviewers at AARP: DaCosta Mason, Roy Green, and Don Redfoot. Monique Einhorn, Research Analyst with the Public Policy Institute, took over editorial coordination from Kristin Moag, formerly with the Public Policy Institute. Finally, the authors would like to express their appreciation for the constructive comments and guidance provided throughout this project by George Gaberlavage of the Public Policy Institute.

## FOREWORD

Accessory dwelling units (ADUs) are independent housing units created within single-family homes or on their lots. These units can be a valuable addition to a community's housing stock. ADUs have the potential to assist older homeowners in maintaining their independence by providing additional income to offset property taxes and the costs of home maintenance and repair. Other potential benefits include companionship, the opportunity to negotiate for home maintenance or personal services in return for reduced rents, and increased personal security. ADUs also offer a cost-effective means of increasing the supply of affordable rental housing in a community without changing the character of a neighborhood or requiring construction of new infrastructure such as roads, sewers, and schools. Zoning ordinances that prohibit ADUs or make it extremely difficult for homeowners to create them are the principal obstacle to the wider availability of this housing option.

The Public Policy Institute of AARP asked the American Planning Association (APA) to develop model legislation (a state statute and a local ordinance) that would assist AARP volunteer leaders and other interested citizens, planners, and government officials in evaluating potential changes to state laws and local zoning ordinances to encourage the wider availability of ADUs. The APA is the nation's leading source of information on planning and zoning practices. Rodney L. Cobb, APA's Staff Attorney and Editor of *Land Use Law* and *Zoning Digest*, was the principal investigator for this project. He was assisted by Scott Dvorak, Research Associate, and other members of APA's research department. The authors have drawn heavily from the experiences of states and localities in developing the model legislation. As a result, many of the provisions incorporated in the model legislation have been tested in different communities and proven successful in actual practice.

The model legislation is intended to serve as a guide for communities that want to make the benefits of ADUs available to households of all ages, not just older persons. It has been drafted to meet the needs of a wide variety of communities. Optional provisions, including those that are attractive even to very cautious communities, are incorporated in the model local zoning ordinance to provide as many choices as possible for jurisdictions to consider. The materials presented here indicate that ADUs can be a cost-effective solution for meeting myriad housing needs without engendering the negative impacts sometimes associated with other forms of affordable housing development. It is our hope that the model legislation will prove to be a valuable reference for communities seeking to increase the housing choices available to their residents.

George J. Gaberlavage

Public Policy Institute

## EXECUTIVE SUMMARY

### Background

Accessory dwelling units (ADUs) are independent housing units created within single-family homes or on their lots. They have the potential to assist older homeowners in maintaining their independence by providing additional income to offset property taxes and maintenance and repair costs. Other potential benefits to older homeowners include companionship, the opportunity to negotiate for home maintenance or personal services in return for reduced rents, and increased personal security. ADUs also offer a cost-effective means of increasing the supply of affordable rental housing in a community without changing the character of a neighborhood or requiring construction of new infrastructure (roads, sewers, schools, etc.) to serve development. Zoning ordinances that prohibit ADUs or make it extremely difficult for homeowners to create them are the principal obstacles to the wider availability of this housing option.

### Purpose

The purpose of this report is to present model legislation for both states and local jurisdictions to use to develop their own regulations on creating ADUs. Drawing on the experience of communities that have incorporated ADUs into their zoning practices, the report reviews and evaluates potential options for changes in state laws and local zoning ordinances to increase the availability of ADUs.

### Methodology

A search was conducted to collect and review existing literature on ADUs, including all state ADU legislation, local ADU ordinances, and ADU court cases. In addition, a mailing went out to some 1,600 planning agencies and consultants who subscribe to the American Planning Association's *Zoning News*, requesting copies of local ADU ordinances and information on ADU policies and regulations. (These activities took place in 1996 and 1997, with an additional review conducted in 1999 of ADU state legislation and court cases.) The researchers then analyzed the 50 local ADU ordinances and other materials collected in response to the mailing. A series of follow-up interviews with state and local officials and ADU experts were then conducted to develop further information on the key ADU issues raised by the analysis. To obtain a broad national perspective, these interviews were conducted with officials in a variety of regions and states. The Model State Accessory Dwelling Unit Act and the Model Accessory Dwelling Unit Ordinance were then drafted. Several state and local officials interviewed earlier subsequently reviewed the draft model legislation to assess its utility and feasibility in light of actual administrative practice and community experience.

## **Principal Findings**

Regulatory barriers can be most effectively removed by adoption of a state ADU act and by encouraging localities to adopt ADU ordinances. Many communities that initially allowed limited ADU development found the experience positive enough to broaden the scope for ADUs.

## **Conclusion**

Reductions in the size of American households, along with changes in their composition and economic circumstances, warrant consideration of zoning policies that encourage the more efficient use of the nation's infrastructure and supply of single-family homes to meet current and future housing needs. States and localities are also seeking ways to assure the independence and security of older residents with a minimum of public investment. ADUs provide a potential resource for addressing these issues by making more effective use of existing housing stock and providing older homeowners with a potential source of income to maintain their independence.

## INTRODUCTION

Across the United States, communities are struggling to meet the nation's growing and changing housing needs. Three factors — changing demographics, changing economics, and changing community goals — have converged to make innovative solutions to housing issues a policy necessity.

- **Changing demographics.**  
American families are growing in number but shrinking in size. People are living longer, more people are staying single longer, and married couples are having fewer children. The housing stock has not kept up with this change in family demographics. In some communities, the need for housing, especially for people with special physical and financial needs, has become acute. Underused space in single-family houses is one of the nation's largest untapped housing resources.
- **Changing economics.**  
Not only is family size changing, but so are the economic circumstances of families. As the population ages, many older people find themselves living in their family homes alone. They may need additional income to pay for health care services, cover home maintenance costs, or make mortgage payments. Others may want a family member or a caretaker to live nearby, while maintaining privacy for both parties.
- **Changing community goals.**  
Many communities have recognized the need to stabilize or increase population densities in certain areas in order to maintain the existing public infrastructure, services, and tax base. In addition, many communities have sought to concentrate population density in specific areas in order to encourage public transit service and reduce urban sprawl. These communities do not, however, necessarily want their single-family neighborhoods to become structurally more dense.

One approach to meeting these needs is to allow or even encourage the development of accessory dwelling units (ADUs). ADUs are constructed as either apartments or cottages, and the term "ADU" is used in this publication to include both types of accessory units. The relationship of the ADU to the single-family home, or "the principal dwelling unit," determines the type of ADU. An *accessory apartment* is built within the principal dwelling unit, whereas an *attached accessory cottage* is physically connected to that dwelling unit. A *detached accessory cottage* is located on the same lot as the principal dwelling unit but is not physically connected.

ADUs offer the potential for assisting older homeowners and others in maintaining their independence while increasing the supply of affordable rental housing within a community. Income from an ADU can offset rising property taxes, maintenance and repair costs, and other housing expenses that are often a burden for older homeowners. ADUs can also make it easier for households with children to afford the housing they need. In some situations, an ADU may

provide enough additional income so that a family can afford to buy a house in a preferred neighborhood that is safer, has better schools, or is closer to work.

Currently, ADUs are not a widely available housing option in the United States. Local zoning ordinances that prohibit ADUs or make it difficult for homeowners to create them are the principal obstacle. Although the impacts on neighborhoods from developing ADUs are minimal compared to those of other types of affordable housing, residents are often concerned about ADUs' compatibility with neighborhood character and design, the impact on parking, and the effects on property values and community services (see Sidebar A).

Yet, what today is called an accessory dwelling unit was once a rather typical housing arrangement. ADUs were relatively common before World War II. Many accessory units were created by middle-aged and older persons, often widows, seeking to take in roomers or boarders after their children moved out. Following the war, however, the explosive growth of the suburbs was guided by zoning ordinances that focused almost exclusively on the housing needs of the traditional nuclear family, and most communities prohibited ADUs.

Ironically, those same suburban homes were frequently constructed with unfinished space, so that homeowners could modify their living space as their needs changed. Many of these suburban homes have had additions and modifications — bedrooms, finished basements, and recreation rooms to accommodate growing families — over the past 50 years.

Current zoning ordinances, however, often maintain rigid prohibitions against ADUs. These ordinances now limit the expansion and modification options of homeowners and prevent communities from making effective use of their current housing stock to meet the changing needs of families. For older persons living in the suburbs today, the inability to continue to adapt their homes to suit their needs may mean they cannot “age in place.” Yet, consumer preference surveys conducted by AARP consistently indicate that 80 percent or more of older households would like to remain in their current homes.

In addition, a recent AARP housing preference survey of persons 50 and older indicated that over one-third of the respondents (36 percent) would consider modifying their home to include an ADU in the event they needed assistance as they grew older. The potential for construction of ADUs by older homeowners is significant. The latest American Housing Survey (1997) revealed that some 16.5 million older households (age 65 and older) own their homes, and single-family detached homes make up 88 percent of these units. This survey indicates that these homes could accommodate accessory units. Single-family detached dwellings among homeowners age 65 and older (including mobile homes) had a median area of 1,665 square feet.

In fact, though ADUs are illegal in many U.S. communities, some homeowners create them anyway. Since creating an accessory apartment does not require any changes to the outside of the dwelling, an illegal unit is not likely to draw the attention of local officials. Overall, ADUs are an important part of annual additions to the nation's housing stock; it is estimated that between 65,000 and 300,000 such units are created each year (Howe 1990, 70).

**Sidebar A. DALY CITY, CALIFORNIA**

In 1979, Daly City officials, like many civic leaders in the San Francisco Bay area, were concerned about the lack of affordable housing. To help remedy the problem, city officials offered to acquire land and build a public housing project. After a hearing with 400 residents, many of them protesters, the project did not go forward. City officials were still searching for answers to the affordable housing problem when the California legislature passed a law in 1982 pushing local governments to adopt ADU regulations. In 1983, Daly City passed its own ADU ordinance, citing three reasons: to help meet housing needs, to conform to the state legislation, and to legalize illegal ADUs that posed health and safety hazards to residents.

Before launching its ADU program, Daly City officials were worried that too many ADUs might cause nuisances, parking problems, and demands too great for existing community services. The city established a number of requirements to meet these concerns. Because small lots dominate the city's neighborhoods, only accessory apartments, not detached units, were allowed in residential zones. Four parking spaces were required on premises with an ADU, with two being for the principal unit. These spaces, however, could be accommodated with tandem parking (one car in front of another in driveways) and could be located in any area of the yard. Daly City also limited the maximum size of an accessory apartment to 25 percent of the living area of the principal dwelling unit.

A further city requirement that owners occupy the premises has proven critical to preventing nuisances. Officials reasoned that with the ADU owners on the premises, many nuisances that tenants might otherwise create would not be tolerated. Although realtors have tried to repeal the owner-occupancy requirement, Daly City officials have made it clear that an owner's presence on premises with an ADU is a must.

A cornerstone of Daly City's ADU program is its Project Homesafe, which received an award from the California League of Cities as an innovative community development program. This project was initiated by the city in 1992 to rid neighborhoods of fire and structural risks posed by illegal ADUs that did not conform to building and electrical codes. Out of an estimated 5,000 illegal units, 1,055 have been legalized, meaning that many safety hazards have been eliminated.

In addition to legalizing existing ADUs, the city's efforts have led to the creation of 288 new legal units. Early in its ADU program, the city sowed the seeds of success in fostering new units by minimizing applicant fees and red tape. It charges only \$100 for ADU application fees, which is even less than the fee required to add a bedroom to a house. To cut red tape, the city designed a process that takes about 20 minutes. An applicant describes the particulars of his proposal and may then obtain a preliminary approval. A hearing is not required. Permits are permanent, and conditions (like the owner-occupancy requirement) are recorded in the title to the property in order to notify subsequent owners of the conditions. The city also promotes new ADUs with a low-interest loan program for low-income owners who agree to install ADUs and to lease the units only to other low-income persons for a period of at least five years.

Other advantages of Daly City's ADU program are at the human level — in its social benefits. Many senior citizens who were empty nesters living on fixed incomes were able to create accessory apartments, live in them, and rent out the remainder of their homes to persons who often became part of their extended family. One homeowner with Alzheimer's was able to trade ADU quarters for medical services from an ADU tenant, a nurse, who was also delighted by the arrangement. The city's young citizens have gained from ADUs because Bay Area housing costs are quite high and one viable option for them is to rent an ADU. For some laid-off blue-collar residents, ADU rental income has actually allowed them to keep their homes.

The model legislation contained in this publication authorizes and provides guidelines for all forms of accessory units. The *model state act* provides the justification and authorization for ADUs and establishes rules that local officials must follow in adopting a local ADU ordinance. The *model local ordinance* offers provisions that local officials can include in their existing zoning ordinance to specify what a homeowner must do to obtain a permit to build an ADU. The model local ordinance is intended to be implemented in tandem with the model state act.

Resources searched or consulted to develop the model acts include all existing American state ADU legislation, model ADU ordinances, and ADU court cases. These sources are noted in parentheses in the text of the model legislation, and a complete reference list appears at the end of the document.

### The Model State Act on Accessory Dwelling Units

The model state act sets the terms for what communities can and cannot do in regulating ADUs via local ordinances. It consists of five sections:

1. General Provisions

Section 1 establishes as state policy the encouragement of ADUs in a manner that enhances residential neighborhoods. This section incorporates the act's findings, purposes, and definitions of terms.

2. Regulatory Authority

Section 2 authorizes localities to adopt ADU ordinances and specifies the powers they may exercise in regulating ADUs. This section authorizes local governments to allow ADUs in single-family or multi-family zoning districts; to require that either the ADU or the principal dwelling unit be owner-occupied; to impose standards with regard to parking, height, setback, lot coverage, architectural review, and other considerations; to define the application procedure for creating ADUs; and to set maximum and minimum sizes for attached and detached ADUs.

3. Limiting Regulatory Authority

Section 3 prohibits localities from regulating ADUs in ways that violate the intent of the act. This section requires localities to justify bans on ADUs, exempts ADUs from growth-limitation measures, and establishes guidelines for parking requirements and fees that localities may impose.

4. Default Provisions

Section 4 establishes procedures and standards for obtaining a permit to create an ADU if a locality does not adopt an ADU ordinance. This section prohibits localities that do not have an ordinance in place from imposing standards beyond those in the state law. Section 4 also requires publication of a quarterly notice indicating the availability of the public official responsible for processing ADU permits.

5. State's Role in ADU Policies

Section 5 presents the option of giving the state a stronger role in encouraging ADUs. This section authorizes state review and certification of local ADU ordinances, collection of data on local ADU efforts, preparations of a State Annual Report that would make recommendations to the legislature and governor for improving the ADU act, and creation of a State Advisory Board on ADU policies.

Italicized notes are included in the text to assist readers in understanding various provisions of the act. Some of the explanations refer to the related model ADU local ordinance, which is designed to complement the model state act.

The Model Local Ordinance on Accessory Dwelling Units

The model local ordinance is designed to implement the policies of the model state ADU act. It will also help guide communities in drafting their ADU ordinances, even if the state does not have legislation governing ADUs. It attempts to balance the need to specify clear, rigorous standards that protect the community with the need to avoid requirements so onerous that no one will apply to install an ADU.

The ADU ordinance specifies what a homeowner must do to get a permit to build or create an ADU. Typically, a community adopts an ADU ordinance as an amendment to its zoning ordinance. (Some local governments refer to zoning regulations as “codes” or “bylaws” or “unified development regulations.”)

The provisions of the model local ADU ordinance are organized into the following three categories:

1. General Provisions

Section 1 establishes that the purpose of the ordinance is to promote and encourage the creation of legal ADUs in a manner that enhances residential neighborhoods. Section 2 provides a definition of terms.

2. Permits: Eligibility and Application

Sections 3 through 6 inform homeowners of the steps they must take to obtain, keep valid, and renew an ADU permit. In addition, these sections specify what types of proposed ADUs (apartments, attached or detached cottages) are eligible for permits in various zoning districts.

3. Standards

Sections 7 through 23 specify standards that a homeowner's application must meet before a permit to build or create an ADU is approved. These standards address the issues of lots (Sections 7 through 9), occupants (Sections 10 and 11), building standards (Sections 12 through 19), parking and traffic (Section 20), public health (Section 21), density limits (Section 22), and legalizing illegal and nonconforming ADUs (Section 23).

In the model local ordinance, the duplication of general zoning provisions is avoided because communities typically adopt an ADU ordinance as part of their general zoning ordinance or code. For this reason, the model local ADU ordinance does not contain provisions setting up zones or laying out application and enforcement procedures, and it does not provide routine definitions of basic zoning ordinances (such as definitions of “permit” or “lot”). It is assumed that the general zoning ordinance of which this model local ordinance will become part provides that all building construction is subject to the range of other typical community laws — e.g., building codes, fire codes, electrical codes, and housing codes.

The model local ADU ordinance presents options for dealing with key ADU issues. These options acknowledge that conditions vary in different communities. They are evaluated as “optimal,” “favorable,” or “minimal” (see below), based on their potential to increase the availability of ADUs in a community. For each option, a commentary is provided about the issues involved. Some comments are predicated on the assumption that the model local ordinance is adopted in a state that has already enacted a state accessory dwelling unit law.

1. Optimal

Provisions labeled “optimal” provide the fewest restrictions on the development of ADUs;

2. Favorable

Provisions labeled “favorable” address the concerns of the legislative body and neighbors while imposing relatively modest requirements for the installation of ADUs;

3. Minimal

Provisions labeled minimal address the concerns of the legislative body and neighbors but in a manner that is likely to reduce the potential incentives for homeowners to create ADUs.

Sorting among these provisions will allow policymakers and community members to draft ordinances that reflect their desires and concerns. Historically, communities have tended to adopt somewhat strict standards in the beginning and then to amend their ordinances with standards that more readily encourage homeowners to develop ADUs (Hare 1989, 17-18). The research conducted for this report indicates that the fear of negative impacts is greatly diminished as local officials and neighbors have the opportunity to see firsthand the benefits of ADUs for citizens. Given this experience, many communities may become interested in increasing the number of ADUs (see Sidebar B).

**Sidebar B. MONTGOMERY COUNTY, MARYLAND**

Like many rapidly developing suburban counties, this area outside of Washington, DC has experienced a tremendous increase in the cost of housing. With this increase in cost comes more restricted access to housing for people of low and moderate incomes. To address this problem, the county established a committee in 1983 to study how to use the existing housing stock more efficiently. One of the study results was the adoption of an accessory apartment ordinance in 1984. Since then, more than 600 special-exception applications have been submitted for accessory apartments. By 1996, the county had about 400 legal accessory apartments; since 1989, more than 360 affidavits of compliance for registered units have been filed for rent-free units used by relatives or in-home workers.

To ensure acceptance of the original ordinance, the county was very careful about establishing the criteria under which it would allow accessory apartments. The ordinance has since been amended seven times for various reasons, including allowing ADUs in cellars, reducing lot-size minimums, requiring the posting of signs when a house with an accessory apartment has been sold and the new owner intends to maintain the accessory apartment, and eliminating the requirement for an annual status report to the county council. The county found that requiring a minimum lot size is a good idea; however, the minimum lot did not need to be as large as officials initially thought.

As in any community, residents were concerned with neighborhood quality, particularly property values and parking. Montgomery County addresses these issues by requiring two off-street parking spaces or proof of adequate on-street parking and by limiting the number of accessory apartments approved in any one neighborhood. Officials have not established a hard-and-fast rule for accessory apartment spacing, but it has used a guide of no more than two units on any one block. The county also requires that owners occupy the premises.

In order to ensure the success of its accessory unit program, the county published a guidebook in 1991 designed to assist applicants seeking permits for accessory apartments. The book details who is allowed to construct an accessory apartment, the information needed to obtain a permit, and what to expect during the application process. The Montgomery County accessory apartment program started with thorough research backing up the need for this type of housing, followed by an ordinance that addressed the main concerns of residents but could be amended as needed. The county government supported the ordinance by publishing guides to getting accessory apartments approved and by maintaining on staff a program specialist responsible for coordinating the program and assisting the public.

## MODEL STATE ACT ON ACCESSORY DWELLING UNITS

### 1. General Provisions.

#### A. Findings.

The Legislature finds and declares that:

- i. There is a large and growing unmet need for affordable housing to shelter the State's population. (Cal. Stats. 1982, ch. 1440 Section 1);
- ii. The State's existing housing resources, particularly single-family dwelling units, are vastly underutilized due in large part to the changes in social patterns. The improved use of this state's existing housing resources offers an innovative and cost-effective solution to the State's housing crisis (Cal. Stats. 1982, ch. 1440 Section 1);
- iii. The State can play an important role in increasing the use of existing housing resources and in reducing the barriers to the provision of affordable housing (Cal. Stats. 1982, ch. 1440 Section 1);
- iv. Typical installation rates of accessory dwelling units (ADUs) are low, rarely exceeding one ADU per 1,000 single-family homes per year (Hare 1989, 1); and
- v. There are many benefits associated with the creation of legal ADUs on single-family lots (Cal. Stats. 1982, ch. 1440 Section 1). These benefits include:
  - (1) Providing a cost-effective means of accommodating development by making better use of existing infrastructure and reducing the need to provide new infrastructure (Cal. Stats. 1982, ch. 1440 Section 1);
  - (2) Increasing the supply of affordable housing without government subsidies (MRSCW 1995, 9);
  - (3) Benefiting older homeowners, single parents, young home buyers, and the disabled (Hare 1989, Report I, 3);
  - (4) Integrating affordable housing more uniformly in the community (MRSCW 1995, 9);
  - (5) Providing homeowners with extra income to help meet rising home ownership costs (MRSCW 1995, 12);
  - (6) Providing a means for adult children to give care and support to a parent in a semi-independent living arrangement (MRSCW 1995, 12);
  - (7) Reducing the incidence of housing deterioration and community blight by preventing absentee ownership of properties (Verrips 1983, 70);
  - (8) ADUs in owner occupied single-family homes foster better housing maintenance and neighborhood stability (MRSCW 1995, 12; ERA 1987, 30);
  - (9) Residential neighborhoods can accommodate a meaningful number of ADUs without significant negative impacts because these areas were typically designed for households with more persons than are occupying these areas (Verrips 1983, iv);

- (10) ADUs provide the opportunity for increased security and companionship for older and other homeowners who fear crime and personal accidents (MRSCW 1995, 13; Cal. Stats. 1982, ch. 1440 Section 1);
- (11) ADUs help meet growth management goals by creating more housing opportunities within existing urban areas (MRSCW 1995, 12);
- (12) ADUs enhance job opportunities for individuals by providing housing nearer to employment centers and public transportation; and ADUs can enhance the local property tax base (Goldman and Hodges 1983, 7).

B. Purposes and Intent.

It is the policy of the State to promote and encourage the creation of ADUs in a manner that enhances residential neighborhoods in order for the people of the State to meet their housing needs and to realize the benefits of ADUs.

C. Definitions.

*Note: We have defined both accessory apartments and cottages to guide communities in adopting ADU ordinances and because this model state act (Section 5.C.) requires municipalities to give the state statistics that distinguish between accessory apartments and accessory cottages. If a state is adopting a statute that does not require this distinction and record keeping, the state may use “second unit,” as in the California statutes. We prefer the wording of “accessory” over “second” relative to these units in this model statute because the word “second” may unnecessarily have negative connotations for adjacent single-family homeowners.*

- i. “Accessory” means that the ADU serves single-family dwelling purposes, rather than meaning that an ADU must necessarily be subordinate to or smaller than the principal dwelling unit on a single-family lot.

*Note: The traditional legal meaning for “accessory” is that an accessory use of any type must be subordinate to a principal use. Because of this traditional meaning, we have defined “accessory” relative to ADUs to ensure that, if a community so desires, the ADU may be larger than the principal unit and the owner may live in either unit. In other words, this definition helps avoid a court ruling that the “accessory” dwelling unit must be smaller than the principal unit and must be occupied by a tenant rather than the owner of the principal unit. Letting the owner live in either unit is important because a major benefit of ADUs is income for homeowners, allowing them to maintain their homes or to “age in place.” Some homeowners prefer to live in the smaller unit, usually the ADU, in order to maximize their income from the rent-producing unit. In addition, this definition supports Section 10 of the model local ordinance, which permits the owner-resident to live in either the principal dwelling unit or the ADU.*

- ii. “Accessory cottage” means a type of ADU that is a house built or placed permanently on the same lot as a single-family house. An accessory cottage may be attached or detached from the house but is not built within the existing house.
- iii. “Accessory apartment” is a type of ADU that is created by converting part of, or adding on to an existing detached single-family home or row house, or by building a separate unit into a new single-family home.
- iv. “Accessory dwelling unit” (ADU) is the general term for accessory apartments and cottages. It means a residential living unit that provides complete independent living facilities for one or more persons. It shall include permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the single-family dwelling it accompanies (adapted from Cal. Gov’t Code Section 65852.2(I)(4)).
- v. “Default provisions” means the standards of Section 4 of this Act that a community must apply if it has no local ADU ordinance.
- vi. “Dwelling unit” means a residential living unit that provides complete independent living facilities for one or more persons. It shall include permanent provisions for living, sleeping, eating, cooking, and sanitation.
- vii. “Living area,” means the interior habitable area of a dwelling unit, including basements and attics, but does not include a garage or any accessory structure (Cal. Gov’t Code Section 65852.2(I)(1)).

*Note: This definition is used in a default-provision standard of this model state act (Section 4.F.v.) that limits the floor area of an ADU to not more than 40 percent of the living area of the existing residence.*

- viii. “Municipality” means a general-purpose local government created by general law or a charter, including a city, county, or village.

*Note: In some states, this definition should include towns, townships, and boroughs.*

- ix. “Owner-occupant” means an owner who has legal residency on the premises of a dwelling unit that contains an ADU, who resides in the home at least six months of the year, and whose portion of the dwelling is not occupied when the owner is not present.

## 2. General Regulatory Authority.

Municipalities may, by adopting a municipal ordinance, exercise the authorities granted in this Section of the Act.

*Note: The major issue in this section is whether local governments will be mandated to adopt an ADU ordinance. As discussed in the introduction, this model state act does not mandate adoption of an ordinance by a municipality. However, section A below is recommended because it, along with the remainder of the act, strongly encourages communities to adopt ADU regulations.*

A. Ordinance Adoption.

Any municipality may, by ordinance certified by the State pursuant to this Act, provide for the creation of ADUs in single-family and multi-family residential zones (see similar provisions in Cal. Gov't Code Section 65852.2(a) and Haw. Rev. Stat. Section 46-4(c)).

B. Criteria for Determining Areas.

Municipalities may designate areas within the jurisdiction where accessory units may be permitted. The designation of areas may be based on criteria that may include, but are not limited to, the adequacy of water and sewer services and the impact of ADUs on traffic flow (adapted from Cal. Gov't Code Section 65852.2(a)(1)).

*Note: At times, communities exclude ADUs from various neighborhoods without a reason related to the physical community, such as adequacy of certain services. Section 2.B. of the model state act guides local governments to consider these service factors as a basis for determining the appropriate areas for ADUs.*

C. Approval Process.

Municipalities may establish a process for the issuance of a permit or a conditional use permit for ADUs (adapted from Cal. Gov't Code Section 65852.2(a)(4)).

*Note: Section C deals with whether a community must allow ADUs by right, simply by making application, or must go through a conditional use permit process that often involves a hearing. Adopting a conditional permit process typically gives communities more control over ADUs than if the units are allowed by right. For more discussion of the issues related to the approval process, see the note in Section 4 of the model local ordinance.*

D. Imposing Standards.

Municipalities may impose standards on ADUs that include, but are not limited to, parking, height, setback, lot coverage, architectural review, and maximum size of unit (adapted from Cal. Gov't Code Section 65852.2(a)(2)).

*Note: This section clarifies that a municipality, in approving an application to create a legal ADU, may impose conditions related to the factors discussed above.*

E. Requiring Owner Occupancy.

Based on the finding of this act, that premises with owner-occupants are better maintained, the legislature declares that a municipal regulation requiring properties with ADUs to be owner occupied, either in the accessory unit or the principal unit, prevents deterioration of neighborhoods and is a regulation substantially related to land-use impact. Such a requirement is, therefore, a regulation of land use rather than a regulation of the user of land.

*Note: Courts may rule that a community has no zoning authority to require that a site with an ADU be occupied by the owner, on the basis that this regulates the land user rather than the land use (Ziegler 1995, 56A-8). However, on July 29, 1996, a California appeals court issued the only published court decision (issued by a court higher than a trial court) addressing the owner-occupancy requirement in the context of ADUs. In the case of Sounhein v. City of San Dimas, 55 Cal. Rptr. 2d 290, the court heard a claim by homeowners that the city's owner-occupancy requirement imposed on their ADU permit was invalid; even if it were not invalid, it applied only to the "applicant" and not subsequent owners. But the court upheld the owner occupancy requirement as a "character of the property as owner-occupied" and further ruled that the requirement applies to all subsequent owners of the premises. *Id.* at 296. Such a condition attaches to the land, the court explained, in order to fulfill the legislative purposes in imposing the condition. *Id.* The purposes of the owner-occupancy requirement, the court noted, are to discourage speculation in residential properties that can make housing less affordable, to prevent the disadvantages of absentee ownership, and to preserve residential neighborhood character. The Sounhein case means that the owner-occupancy requirement for ADUs has now been directly addressed and upheld by a state court.*

*In Section 2.E., the state legislature gives municipalities the specific authority to require owner occupancy on the basis that it encourages maintenance of the dwellings and premises.*

F. Less Restrictive Provisions.

This Act does not limit the authority of municipalities to adopt less restrictive requirements for the creation of ADUs (adapted from Cal. Gov't Code Section 65852.2(e)).

*Note: This section clarifies that the model state act generally does not cut back on a community's power to adopt provisions that are less restrictive than those in the model state act. For example, Section 3.D. of the model state act limits how many parking spaces may be required for each ADU. However, section 2.F. allows a community to be less restrictive if it so desires. For example, it may not require any parking spaces to be provided for a new ADU. Emphasizing that local ordinances may be less restrictive than the model state act allows communities to be less restrictive on ADUs if they witness their benefits and become more comfortable with the idea of ADUs in single-family zoning districts.*

G. Maximum or Minimum Size.

A municipality may establish minimum and maximum unit size requirements for both attached and detached ADUs (adapted from Cal. Gov't Code Section 65852.2(d)).

*Note: The size of ADUs can raise the concerns of neighbors that the units are either too large or too small (see the model local ordinance, Section 17, for more on these issues). This section of the model state act makes it clear that a community adopting its own ADU ordinance may set limits on how large or small an ADU can be. Communities not adopting their own ordinances cannot set maximum or minimum size on attached or detached ADUs. (Maximum size limits are set by the default provisions.) In other words, for communities that want to set their own standards on ADU sizes, this section gives them incentives to adopt their own ordinances.*

#### H. Use, Density, and Plan Consistency Rules.

Municipalities may provide that ADUs do not exceed the allowable density for the lot upon which the ADU is located, and that ADUs are a residential use that is consistent with the existing community plan and zoning designation for the lot (adapted from Cal. Gov't Code Section 65852.2(a)(3)).

*Note: An issue for ADUs is whether they are inconsistent with existing residential zoning, zoning density standards, and community plans. Section 2.H. authorizes communities to accommodate ADUs by stating — in the appropriate local documents (ordinances, or plans) — that the units are harmonious with local plan policies and density concerns. This is a perfectly reasonable assumption, since family size is shrinking in the U.S. and much of the space in homes and infrastructure in residential neighborhoods was originally designed for larger families and is now underused.*

### 3. Limiting Regulatory Authority.

#### A. Noninterference by Other Law.

No municipality may develop, amend, or interpret other codes or regulations, such as building codes or special taxing district provisions, in ways that interfere with the intent of this Act.

*Note: At times, neighbors' fears and misperceptions about ADUs can put political pressure on local elected officials to use their powers to veto homeowners' plans to develop ADUs. A wide variety of local government actions and regulations can be used for this purpose. While it is likely that only a small percentage of municipalities would misuse their powers against ADUs, this section makes it illegal for them to do so.*

#### B. Exemption from Growth-Limitation Measures.

ADUs shall not be considered in the application of any local ordinance, policy, or program to limit residential growth (adapted from Cal. Gov't Code Section 65852.2(a)(5)).

*Note: If this provision is not included in a statute, a community could adopt an ordinance allowing the creation of ADUs only to have the units banned because of existing growth limit measures, such as moratoria or quotas on*

*building permits. These latter growth control measures should not apply to ADUs because they can be accommodated within the present infrastructure capacities of existing residential neighborhoods.*

C. Prohibiting ADUs.

No municipality shall adopt an ordinance that totally prohibits ADUs within single-family or multi-family zoned areas unless the same:

- i. Contains findings acknowledging that it may limit housing opportunities of the region;
- ii. Contains findings that the ban is justified because of specific adverse impacts on the public health, safety, and welfare that would result from allowing ADUs within single-family and multi-family zoned areas;
- iii. Bases the latter findings on technical reports of studies of the municipality;
- iv. Explains why such units cannot be accommodated within the present utility and service capacities of existing single-family neighborhoods; and
- v. Is certified by the State Housing Office as conforming to this Act, in the same procedure defined in Section 5. Until certification of any such ordinance, applications for approval shall be subject to the default provisions of this Act. (adapted from Cal. Gov't Code Section 65852.2(c)).

*Note: Because the general policy of the statute is to encourage the development of ADUs, this section requires communities to justify any ban on them. Few communities in California banned these units following adoption of its ADU law in 1982 (CDHCD 1987, VIII-13). However, this section is stronger than the California law and makes it more difficult for a community to ban ADUs. Although, under California law, a ban on ADUs must be accompanied by specific findings, it does not have to be based on a technical report of a study of the community, as is required by this section. In addition, unlike the California law, this section requires that the state Office of Housing must certify an ordinance banning ADUs.*

D. Parking Requirements.

Parking requirements for ADUs shall not exceed one parking space per unit or per bedroom, whichever is greater. Additional parking may be required, provided that a finding is made that the additional parking requirements are directly related to the use of the ADU and are consistent with existing neighborhood standards applicable to existing dwellings. Off-street parking shall be permitted in required residential yards, setback areas, or through tandem parking (adapted from Cal. Gov't Code Section 65852.2(e)).

*Note: This section prevents communities from requiring more parking than is reasonable, and it applies to communities with and without ADU ordinances (see Section 20 of the model local ordinance for more discussion on parking).*

E. Fees.

Fees for permitting construction of ADUs shall not exceed 30 percent of the fees that would be charged for creation of a single-family home in areas with similar zoning.

*Note: This provision addresses the fact that high fees can be major disincentives to homeowners seeking to develop ADUs (see the note in Section 5 of the model local ordinance).*

4. Default Provisions.

A municipality without an adopted state-certified ADU ordinance that receives an application for a permit for an ADU on or after [the effective date of the Act] shall accept the application and approve or disapprove the application pursuant to the default provisions of this Section 4 of the Act, unless it adopts a certified ordinance in accordance with this Act within [120] days after receiving the application.

*Note: This provision tells municipalities how to process their first application to create an ADU if they do not have an ordinance that conforms to this model state act. It also gives communities the option of quickly adopting their own ordinance and getting state certification if the community prefers its own provisions rather than the model state act's default provisions. This will encourage communities to adopt their own ADU rules.*

A. Only Basis for Denial.

No other local ordinance, policy, or regulation shall be the basis for the denial of a building permit or a use permit under Section 4 of the Act (Cal. Gov't Code Section 65852.2(b)(2)).

*Note: This provision prevents a community without an ADU ordinance from excluding an ADU on the basis of any other measure. While this section says that no other rules shall be applied (except those that apply to other residences), the next section prevents a local government from applying the default provision's standards in a stricter fashion.*

B. Maximum Without Local Ordinance.

The default provisions of this Section 4 establish the maximum standards that municipalities shall use to evaluate proposed ADUs on lots zoned for residential use that contain an existing single-family dwelling. No additional standards, other than those provided in this section, shall be used or imposed, except that a municipality may require lots or parcels of land with an ADU to be owner occupied (adapted from Cal. Gov't Code Section 65852.2(b)(2)).

C. No Changes Necessary.

No changes in zoning ordinances or other ordinances or any changes in the general plan shall be required to implement the default provisions of this Act. Any municipality may amend its zoning ordinance or general plan to incorporate the policies, procedures, or other provisions applicable to the creation of ADUs if these provisions are consistent with the limitations of the default provisions (adapted from Cal. Gov't Code Section 65852.2(b)(4)).

*Note: A community is subject to the default provisions of this model state act if it does not have an ADU ordinance of its own. But if a community without an ADU ordinance wants to amend a comprehensive plan or other ordinance, this provision allows it to do so if the amendment is consistent with the default provisions.*

D. Accommodating Units.

An ADU that conforms to the requirements of the default provisions shall not be considered to exceed the allowable density for the lot upon which it is located and shall be deemed a residential use consistent with the existing general plan and zoning designations for the lot. ADUs shall not be considered in the application of any local ordinance, policy, or program to limit residential growth (adapted from Cal. Gov't Code Section 65852.2(b)(5)).

*Note: This provision is designed to protect ADUs from other local laws. If a community adopts its own ordinance, it may require more land area for an ADU. But if the community has no ADU ordinance and is therefore subject to the default provisions of this model state act, it cannot require an ADU to be on a lot larger than the minimum lot size for the zoning district. This is another example of how a community may gain more control over ADUs by adopting its own ADU regulations.*

E. Public Notice of Public Official.

On the first Monday of each yearly quarter, each municipality of the state that has not adopted state-certified ADU regulations shall publish in the general newspaper of greatest frequency and circulation the name, title, address, and hours of availability of the public official who is responsible for processing applications for permission to develop ADUs under the default provisions of this Act.

F. Standards.

Every municipality shall grant a permit or special use or a conditional use permit for the creation of an ADU if the unit complies with all provisions of this Section 4, including the following standards (adapted from Cal. Gov't Code Section 65852.2(b)(1)):

- i. The proposed ADU is not intended for sale and may be rented (adapted from Cal. Gov't Code Section 65852.2(b)(1)(A));

*Note: The issue that this standard addresses is whether the homeowner can sell only the ADU to another person while still owning the principal home and lot. By preventing the sale of the ADU, this standard is designed to prevent the creation of dual ownership of two buildings on, or from, one single-family lot (see the discussion of this issue in Section 18 of the model local ordinance).*

- ii. The lot proposed to contain the ADU is zoned for single-family or multi-family use (adapted from Cal. Gov't Code Section 65852.2(b)(1)(B));

*Note: This standard addresses the issue of whether ADUs will be built in commercial and industrial land zoning districts. Essentially, this standard, by allowing ADUs only on land zoned for residential uses, prevents occupants of ADUs from suffering the impacts of commercial and industrial land uses.*

- iii. The lot proposed for an ADU contains an existing single-family dwelling (adapted from Cal. Gov't Code Section 65852.2(b)(1)(C));

*Note: In dealing with ADUs, communities must decide if they will be allowed in new units or only in existing ones. This standard clarifies that under the default provisions, ADUs cannot be built simultaneously with, or before, a new dwelling unit (see also the discussion of similar issues in the model local ordinance, Sections 7, 13, and 14).*

- iv. The ADU is either attached to the existing dwelling and located within the living area of the existing dwelling or detached from the existing dwelling and located on the same lot as the existing dwelling (adapted from Cal. Gov't Code Section 65852.2(b)(1)(D));

*Note: This section allows unattached ADUs. Many communities do not want such ADUs in their residential neighborhoods (see the discussion in the model local ordinance, Section 3, Authorization for ADUs by Zoning District). For that reason, this provision may encourage some local governments to push for adoption of a local ADU ordinance that leaves out this provision.*

- v. The floor area of an attached ADU shall not exceed 40 percent of the living area of the existing residence (adapted from Cal. Gov't Code Section 65852.2(b)(1)(E));

*Note: In the California default provisions, the increase in floor area was limited to 30 percent. For the issues related to this provision, see the model local ordinance, Section 17.*

- vi. The total area of floor space for a detached ADU shall not exceed 1,200 square feet (Cal. Gov't Code Section 65852.2(b)(1)(F));

*Note: See the discussion of maximum ADU size in the model local ordinance, Section 17.*

- vii. Requirements relating to height, setback, lot coverage, architectural review, site plan review, fees, charges, and other zoning requirements generally applicable to residential construction in the zone in which the property is located are applicable to any ADU (Cal. Gov't Code Section 65852.2 (b)(1)(G));

*Note: This section allows a local government to apply other residential construction rules to ADUs. Politics as well as practicality justifies this section — that is, exempting ADUs from standards applied to residential construction could create opposition from neighbors and local elected officials. Although the model state act limits the laws that can be applied to ADUs, this section clarifies that residential construction standards do apply to ADUs.*

- viii. Local building code requirements that apply to detached dwellings, as appropriate, are to be applied to an ADU; and
- ix. Approval by the local health officer where a private sewage disposal system is being used, if required (Cal. Gov't Code Section 65852.2(b)(1)(I)).

*Note: For a discussion of the public health issues related to this provision, see the model local ordinance, Section 21.*

## 5. State's Role in ADU Policies.

### A. Required Municipal Ordinance Submission.

A municipality shall submit a copy of the ordinances adopted pursuant to Section 2 or Section 3.C. to the Office of Housing within 60 days after adoption (adapted from Cal. Gov't Code Section 65852.2(h)).

*Note: This section is optional for states that do not want to give themselves a strong role related to ADUs. In this section, communities are required to submit their ADU ordinances to the state whether they are regulating (Section 2) or banning ADUs (Section 3.C.).*

*In addition to submitting ordinances after they are adopted, municipalities are required (under Section 5.B.) to present proposed ADU ordinances prior to adoption for the state's review. Submitting the ADU ordinance is the initial step that allows the state to play its role in the remaining sections of this model state act.*

### B. State Certification of ADU Ordinances.

A municipality shall submit the zoning ordinance, amendments to a certified ordinance, or an ordinance banning ADUs 30 days prior to final approval of such ordinance or amendment to the State Office of Housing for an opinion on whether the ordinance conforms to this statute. This submission must include the municipality's date of planned final approval. The Office of Housing may notify other relevant agencies so that they may also comment on whether or not the municipality's draft ordinance conforms to the statute. The Office of Housing shall notify the municipality prior to its planned date of final approval of its opinion as to conformity of the ordinance to this statute. If, in the opinion of the Office of Housing, the ordinance and/or amendments reviewed do not conform to this statute, the Office of Housing shall notify the local jurisdiction of actions that must be taken to bring the ordinance(s) and/or amendments into conformity.

The jurisdiction must bring its ordinance into conformity, as recommended by the Office of Housing pursuant to the prior section, within 90 days of notification of nonconformance by the Office. If the municipality has not brought its ordinance into conformity within the 90-day period, the Office of Housing will notify the jurisdiction that it must automatically accept and process applications for ADUs under the default regulations of this Act until conformity is certified by the Office of Housing. Prior to any certification by the Office of Housing, any applications submitted under the default regulations of this Act shall be processed fully and solely under those regulations.

Amendments to a municipality's ordinance certified by the Office must be submitted and certified in the same manner and procedure as the initial proposed ordinance pursuant to this section.

C. Municipal Annual Reports to State.

Each municipality shall report annually to the Office of Housing the following statistics, on a form to be provided by the Office of Housing, the number of:

- i. Single-family structures in the jurisdiction;
- ii. Single-family structures in single-family residential zones and in multi-family residential zones in which accessory units are permitted;
- iii. Illegal accessory apartments or accessory cottages, attached and unattached, known or estimated to be in the jurisdiction;
- iv. Applications to legalize illegal accessory apartments submitted to the jurisdiction and the results of processing these applications;
- v. Legal accessory apartments and accessory cottages, attached and unattached, in the jurisdiction;
- vi. Applications for new accessory units accepted for processing;
- vii. Applications approved and/or permits issued by size, number of bedrooms, and area location;
- viii. Applications disapproved, with reasons categorized by requirements not met; and
- ix. Complaints against legal ADUs, with the complaints categorized by the perceived impacts, such as parking, aesthetics, or traffic.

D. State Annual Report.

The Office of Housing shall prepare an annual report to the Governor and the legislature from the annual reports from the municipalities, including the installation rates of ADUs and recommendations, if any, for amending the Act or other implementation measures necessary for developing ADUs as affordable housing. The annual report shall include any recommendations from the State Advisory Board on ADU policies.

E. State Advisory Board on ADU Policies.

i. Creation.

The Office of Housing shall establish an Advisory Board to monitor implementation of

the Act and to recommend amendments to the Act or model local ordinance provisions to the Office of Housing.

ii. Composition.

The Advisory Board shall be appointed by the Director of the Office of Housing in consultation with the legislature and Governor and shall include one representative from each of the following groups: remodelers, mortgage bankers, real estate agents, new home builders, first-time home buyers, home health care agencies, local permitting agencies, and organizations for the disabled, older persons, and neighborhoods.

iii. Duties.

The Advisory Board's duties shall include, but not be limited to, preparing an annual commentary on the report prepared by the Office of Housing on accessory units. The Board's commentary shall contain recommendations for furthering the purposes of the legislation and will be published and circulated with the Office of Housing's annual report.

*Note: This section of the model state act is optional. It gives the state the role of encouraging ADUs and reviewing local efforts to accommodate them. This role includes action by a state agency — the Office of Housing. The model state act recommends that state Offices of Housing certify local ordinances as conforming to the statute, analyze data from annual municipal reports (Section 5.C.), and provide recommendations to the legislature and Governor for promoting ADUs.*

*One shortcoming of Washington State's ADU statute was that it did not provide a way for the state to assess how the statute was working at the local level (Hope 1996). This shortcoming is typical of existing ADU legislation. The optional monitoring provision here would require communities to report specific ADU data to the State Housing Office (Section 5.C., which applies to all communities within a state) and to obtain ADU policy recommendations from a State Advisory Board (Section 5.E.). With the benefit of the community data and the advisory board recommendations, the Office of Housing would prepare an annual report proposing new or amended policies to the state legislature and Governor (Section 5.D.). This optional monitoring mechanism would assist the state in assessing the law's success. Because it allows well-informed policy adjustment to be made, it should help ensure the ultimate success of the state ADU policies. The authors, however, recognize that some states would be unwilling or unable to afford such a monitoring program. Omission of these provisions, giving the state this monitoring role, would not be fatal to the purposes of the model state act.*

## MODEL LOCAL ORDINANCE ON ACCESSORY DWELLING UNITS

### I. General Provisions.

#### 1. Purpose and Intent.

*Note: In this section of the ordinance, a community makes clear what it is trying to achieve in adopting the ordinance. This information may help in defending the ordinance in a court case or in informing citizens as to how the ordinance will benefit and protect their interests. In spite of the advantages this section can provide, communities have typically omitted it in their ADU ordinances.*

*If a community has no purposes that are different from those of the model state act, it may simply want to reference that act's findings (Section 1) and its purposes and intent (Section 2). We highly recommend that a community adopting an ADU ordinance copy the information in Section 1 of the model state act and present these findings (particularly the benefits of ADUs) to citizens at public hearings. In addition, the local legislative body would be wise to adopt, if this is not part of its ordinance, Section 1 of the model state act, including the benefits, into the record of its minutes when it adopts the ADU ordinance. Afterward, the public official administering the ADU ordinance can make this information available to persons inquiring about ADU permits.*

*If a community has public purposes that are different from those in the model state act, those purposes should be specified in the ordinance (after consulting legal counsel that they are not inconsistent with the purpose of state ADU legislation). For example, some communities use ADUs to help rehabilitate rundown areas containing large older houses; others intend for only certain groups to benefit from ADUs, such as the disabled, older persons, or family members. The model local ADU ordinance presents options (optimal, favorable, or minimal) to meet varying conditions and concerns in different communities. (See Introduction to Model State Act on Accessory Dwelling Units and the Model Local Ordinance on Accessory Dwelling Units.) We have provided a minimal option that targets only certain populations as beneficiaries of ADUs. (See the note accompanying Section 11 below related to limiting the occupants of ADUs.)*

**[Optimal provision]** It is the policy of [name of local government] to promote and encourage the creation of legal ADUs in a manner that enhances residential neighborhoods and helps residents meet their housing needs and realize the benefits of ADUs.

**[Favorable provision]** None

*[Minimal provision]* It is the policy of [name of local government] to promote and encourage the creation of legal ADUs in a manner that enhances residential neighborhoods in order that persons [name target groups, such as older persons] can meet their housing needs and realize the benefits of ADUs.

## 2. Definitions.

*Note: Terms in an ordinance that should be defined are those that the public may not be familiar with and those that vary from the ordinary definitions in Webster's dictionary. Since the model local ordinance must be consistent with the model state act, the latter's definitions of accessory, accessory dwelling unit, accessory apartment, accessory cottage, living area, and owner-occupant should be included in this model local ordinance. A community may simply incorporate these definitions by reference to the model state act, as we have done here to save space. However, users of an ordinance (e.g., applicants for a permit) are inconvenienced by such a practice since most do not have easy access to state laws. Therefore, it is better to repeat the model state act's definitions in the ordinance. In addition to the definitions in the model state act, the ordinance adds a definition for Zoning Administrator. Note that, because the ADU ordinance is part of a local zoning ordinance, the definitions of the zoning ordinance will apply to the ADU ordinance.*

“Zoning Administrator” means the local official who is responsible for processing and approving or denying applications to develop or legalize ADUs.

*Note: As discussed in Section 4 below, this model local ordinance assumes that the community Zoning Administrator has the authority to act on applications for ADUs. However, if the approval process, as discussed in Section 4 below, is the one used for a conditional use permit, the planning commission, a board of zoning adjustment, or another local body may be responsible for acting on ADU applications.*

## II. Permits: Eligibility and Application.

### 3. Authorization for ADUs by Zoning District.

*Note: This section addresses allowing ADUs in specific types of zoning districts (or zones). Neighbors' fears about harmful impacts of ADUs result in some communities banning ADUs or only allowing them in one zone, while other communities are more liberal. In a 1995 survey of 150 communities in the Province of British Columbia, for example, 46 allowed ADUs only in two-family zones, 41 allowed them in single- and two-family zones, 10 allowed them only in single-family zones, and 42 prohibited ADUs (BCMHRSC 1995, 5).*

*The model state act allows communities to designate areas where ADUs are permitted and sets out the types of criteria for determining those areas (See sections 2A and 2B). In addition, the Act allows communities to locate ADUs in any single-family or multi-family zones.*

*These statutory provisions give communities wide discretion in permitting ADUs in many types of residential zoning districts. But in using this discretion, communities must make some key decisions about the capacities of various types of residential zones to absorb ADUs. Certainly, not all types of residential zones are equal in this regard. The desirability of locating ADUs in the major types of residential zones is discussed below.*

*Multi-family zones. These zones are distinguished by multi-family structures that not only have common walls between dwelling units but also are atop one another. The typical principal units are apartments or condominiums in multi-story structures. ADUs are seldom, if ever, allowed in these zones because they tend to have less potential than do single-family zones for accommodating ADUs in terms of available parking, infrastructure, and unused housing space.*

*Clustered single-family zones. These zones contain single-family dwelling units that have common walls but are not atop one another. These zones may be called low-density, multi-family zones or higher density, single-family zones, and they have as principal units row houses, townhouses, or clustered single-family dwelling units. Siting ADUs in these zones is also difficult for several reasons. Parking is often inadequate in areas with townhouses, row houses, or clustered single-family units. In addition, building and fire codes often require bedrooms to have a window for exterior emergency exits by occupants. For this reason, common walls shared by dwelling units greatly reduce the potential to locate accessory apartments in zones with these types of principal units.*

*Single-family zones. These zones contain one single-family dwelling unit per lot and provide the greatest opportunities for siting all types of ADUs. Even in these zones, however, neighbors' concerns about property values and aesthetics often cause communities to ban detached accessory cottages or to allow them only on larger lots. Detached units are more expensive to build (MRSCW 1995, 34) and are usually a relatively small portion of the total number of ADUs in a community. One of the reasons that accessory apartments outnumber detached units is because illegal detached ADUs are impossible to hide. In towns with a preponderance of small lots (such as Daly City, California), not allowing detached ADUs is appropriate (MRSCW 1995, 34). Attached cottages are allowed in more communities than are detached cottages.*

*None of the three model provisions allow ADUs in multi-family zones as described above. The optimal provision allows all types of ADUs in single-family zones with one principal unit per lot, but only accessory apartments in zones with single-family units sharing common walls. In the latter zones, apartments are allowed only if the applicant provides proof that the ADU conforms to fire and building code requirements. The favorable provision does not permit ADUs in zones with dwelling units that have walls in common, but in other single-family zones (districts with one dwelling unit per lot), accessory apartments and attached cottages may be built.*

*The favorable provision also allows detached accessory cottages in the one-unit-per-lot zones if a specified minimum lot size is met. (This authority is not extended in the favorable provision to other types of residential zones, even if that minimum lot size happens to be met by an individual applicant, because the parking problems in those zones would not strike a balance between the neighbors' concerns and those of ADU developers.) In the minimal provision, accessory apartments are authorized only in zones with one home per lot, and accessory cottages are not allowed in any zones.*

*In adapting the model provisions to a local zoning ordinance, a community will substitute its zoning district names (or abbreviations) for the model provisions' descriptions of zoning districts. For example, a community labeling its one-unit-per-lot zone as "Single-Family Residential Zone (SFR)" will substitute that for "zoning districts designed primarily to permit single-family homes on individual lots" in these model provisions. Similarly, "Townhouse Residential Zone (TR)" may be substituted for "zoning districts designed primarily for single-family homes with walls attached to other single family homes."*

**[Optimal provision]** ADUs are allowed in zoning districts designed primarily to permit single-family dwelling units on individual lots. Accessory apartments may be located in zoning districts designed primarily for single-family dwelling units with walls attached to other single family homes when applicants provide written evidence from the proper fire and building officials that the proposed ADU conforms to building and fire code regulations.

**[Favorable provision]** An accessory apartment or an attached accessory cottage may be permitted in any residential zone designed primarily to permit single-family dwelling units on individual lots. A detached accessory cottage may be located in this same zone on a lot with a minimum lot size of [specify minimum size].

**[Minimal provision]** An accessory apartment may be allowed in zoning districts designed primarily to permit single-family dwelling units on individual lots.

#### 4. Approval Process.

*Note: A lengthy and burdensome application process will discourage homeowners from developing ADUs (Gellen 1985, 185; MRSCW 1995, 28). An application procedure that involves a public hearing means a loss of privacy (Gellen 1985, 185) and added time to reach a final decision on the permit (Hare 1989, 20). One study noted that application periods ranged from one day to six months (CSS 1991, 22). Advocates of ADUs argue that requiring a conditional use permit for an ADU is unfair when ADUs typically have less impact than single-family residences that are allowed by right. Neighbors, on the other hand, may prefer the conditional use permit process so they can collectively voice their concerns before local decision makers.*

*The two basic options available to a community are to allow ADUs through the conditional use permit (sometimes called special exception, special permit, or special land use) or to allow them by right in the zoning district. "By right" means that the process involves filling out an application and presenting it to a local building official or Zoning Administrator, who will check to see that it meets the requirements of the ordinance. No hearing or discretionary decision is involved. The conditional use permit process, however, involves a hearing preceded by public notice. The "by right" approach has the advantage of being fast and less public for ADU applicants. Of course, if there is a great deal of political resistance to adopting an ADU ordinance, the reassurance that ADUs will be subject to the conditional use process, with hearings, can persuade law makers to adopt an ordinance. Communities that are new to the process may choose the latter approach.*

*This model local ordinance is written with a Zoning Administrator making the decision to issue an ADU permit. If a community wants to use a conditional use approach, the provisions of this ordinance are easily convertible by substituting, in the place of the Zoning Administrator, the name of the local body that makes decisions on conditional use permits. The type of local body varies but is often a planning commission, a zoning commission, or a zoning board of appeals.*

*The favorable provision below is designed to speed up permit processing. A hearing will not be necessary in every case. A neighbor can choose to meet with an applicant and the building official to review the application. However, if a neighbor has serious concerns, a hearing can be conducted after the neighbor requests one in writing. Several sources have recommended this provision, which can eliminate the need for a public hearing (Hare 1989, 21; CSS 1991, 55). Another option would be to notify at least 10 adjacent property owners to check for possible objections. If none were raised, the application would not be processed via the conditional use permit procedure (CSS 1991, 55).*

*The optimal provision allows ADUs by right without a hearing, and the minimal provision is to make ADU applicants go through the conditional use permit process with a hearing. The full procedure for a conditional use process is not given in this section because the local zoning ordinance (of which the ADU is a part) will provide those procedures, which are often specified in the state zoning enabling act.*

*In choosing a procedure for ADUs, it is important to keep in mind that even ADUs allowed by right are subject to standards in the ordinance. The trend in Washington State communities that have recently adopted ADU ordinances is to allow them by right, subject to ordinance criteria (MRSCW 1995, 27).*

**[Optimal provision]** One ADU is permitted per residentially zoned lot, provided the Zoning Administrator first approves the proposed ADU as complying with the standards of this ordinance.

**[Favorable provision]** One ADU is permitted per residentially zoned lot, provided the Zoning Administrator first approves the proposed ADU as complying with the standards of this ordinance, unless a property owner requests in writing that the application be processed via a conditional use permit procedure. Within five days after receiving a completed application for approval of an ADU, the Zoning Administrator shall notify by mail all property owners within 300 feet of the property proposed for an ADU. The notice to the property owners shall inform the owners that they may, at any time within 30 days of the date of mailing of the notice, in writing to the Zoning Administrator either demand and have a meeting with the applicant and the Zoning Administrator to review the application, or can cause the application to be processed with conditional use permit procedures. Within the same 30-day period, the Zoning Administrator shall meet simultaneously with an applicant and owners who have properly demanded meetings to review the application. If either the applicant or the Zoning Administrator fails to meet with such an owner, the owner may demand in writing to the Zoning Administrator that the application be processed via the conditional use permit procedure.

**[Minimal provision]** One ADU is permitted per residentially zoned lot by conditional use permit if the proposed ADU conforms to the standards of this ordinance.

## 5. Application Fees and Information.

*Note: Other difficulties for homeowners contemplating installing an ADU are permit fees, complicated applications, and multiple-stop approval processes. Application fees associated with a hearing can also be much higher than are application fees unrelated to hearings. A 1989 study of 47 communities found that in the 10 communities with the greatest installation rates for ADUs, none had fees higher than \$2,000 (Hare 1989, 15). The same study revealed that in the County of Los Angeles, an applicant paid a \$3,000 fee that was nonrefundable for an ADU, and the permit was denied (Hare 1989, 21).*

*The model state act (Section 3.E.) does not allow the fees for ADUs to be higher than 30 percent of the application fee for a single-family residence. This section levels the playing field for ADUs. The optimal provision is consistent with the model state act, limiting the ADU fees to 30 percent of the fees for a house, but the favorable provision does not conform to the act because it allows communities to charge equal fees for ADUs and other dwelling units.*

**[Optimal provision]** Application fees for ADUs shall not be more than 30 percent of the application fees for a single-family dwelling unit. The information required on applications for creating or legalizing ADUs shall be the same information that is required to construct a single-family dwelling unit.

**[Favorable provision]** Application fees and application information required for ADUs shall be less than or equal to those required to construct a single-family dwelling unit.

**[Minimal provision]** None

#### 6. Permit Renewal (Monitoring).

*Note: In order to make sure that an ADU continues to comply with the conditions that were a part of the permit as originally issued, some communities issue temporary permits and require periodic permit renewal. For example, in a survey of 50 communities with ADU ordinances, 14 percent issued temporary permits (APA 1996). While requiring permit renewal and inspections has the advantage of making neighbors feel more comfortable with ADUs, it increases administrative costs related to an ordinance. More significantly, this requirement discourages the creation of ADUs for reasons similar to those of limiting groups of eligible occupants, as discussed in the introduction to the model state act ("Avoiding Policies that Deter New ADUs"). Bankers and the homeowners who actually have a financial stake are more nervous about temporary permits.*

*For this reason, we have written optimal and favorable provisions to provide permanent permits. The optimal provision requires the ADU owner to file an annual statement that the ADU complies with the local ordinance. The favorable provision states that the permit expires if the ADU no longer conforms to the ordinance and that a complaint by a neighbor can cause a hearing to determine conformance to the ordinance. But the permit issued for an ADU under the minimal provision is only a temporary one and must be renewed. This provision is waived, however, if there are no complaints of violations made to the Zoning Administrator. Communities that want to apply a more strict provision can remove that portion of the provision that allows the ADU owner to have the permit renewal waived if no complaints are filed.*

**[Optimal provision]** The owner of an ADU shall, on the first day of every year [or specify intervals in number of years], sign and file written statements with the Zoning Administrator that the ADU complies with the municipal zoning code.

**[Favorable provision]** A certificate of occupancy [or permit] issued for an ADU shall expire if the ADU does not conform to the municipal zoning code. If a complaint is made to the Zoning Administrator by a landowner within 300 feet of the ADU, the Zoning Administrator shall cause a hearing to be held within 60 days after the date of the complaint to determine if the ADU violates the municipal zoning code. Fifteen days prior to the public hearing, the Zoning Administrator shall notify all property owners within 300 feet of the site of the ADU of the hearing. Revocation of a permit by the Zoning Administrator must be based on an inspection of the ADU premises and a written record of the Zoning Administrator's findings at the hearing.

**[Minimal provision]** Permits for ADUs shall be issued for a period not longer than five years and must be renewed at the end of the first term of issuance and every such period thereafter. Temporary permits for ADUs do not have to be renewed if, during the time period since the date of the last renewal or waived renewal date, no complaints of violations of the municipal zoning code by the ADU are filed with the Zoning Administrator. Renewal of temporary permits requires inspection of the ADU premises by the Zoning Administrator.

### III. Standards.

#### 7. Lot Standards - Occupied by Dwelling Unit.

*Note: Can a permit be issued for developing an ADU on a lot that is not already occupied by a dwelling unit? This section addresses whether an ADU can be designed and built simultaneously with the construction of a new residence. This question springs from a community's general reluctance to convert a single-family zone into a duplex zone. Many local ordinances, such as the default provisions of the model state act (Section 4.F. iii.), allow ADUs only on lots that already have dwellings. This is common (APA 1996). Some local governments, however, have begun to allow new houses to be constructed with ADUs (MRSCW 1995, 47). Communities adopting their own ordinance under the model state act can allow ADUs in, or with, new residences. Proponents of ADUs have emphasized that ADUs built in new houses are less expensive "with designs that more effectively address exterior appearance and parking issues" (MRSCW 1995, 47).*

*For the latter reason, our optimal provision allows ADUs to be designed and built in or related to new dwellings. The optimal option allows all types of ADUs to be developed related to new homes.*

*Accessory apartments, rather than either attached or detached accessory cottages, are generally more acceptable as a type of ADU built in relation to*

*new residences. Consequently, in the favorable provision only accessory apartments are allowed to be built related to new homes. The minimal provision requires lots to have an existing dwelling in order to be eligible for an ADU permit.*

*If a community does allow ADUs in new houses, as per Section 7, it would be contradictory to base eligibility for an ADU on the age of the principal dwelling or how long it has been owned. (See Sections 13 and 14 concerning standards for principal dwelling units.)*

**[Optimal provision]** An ADU may be incorporated in either an existing or a new dwelling unit (W OCD 1994, Section A.7.).

**[Favorable provision]** An accessory apartment may be incorporated in either an existing or a new dwelling unit.

**[Minimal provision]** The lot proposed for an ADU shall contain an existing single-family dwelling unit (adapted from Cal. Gov't Code Section 65852.2(b)(1)(C)).

#### 8. Lot Standards - Minimum Size.

*Note: This section addresses the lot sizes required for ADU installation. This requirement is often excessive and can greatly diminish the number of ADUs in a community. In a survey of 50 ordinances, the minimum lot size requirement varied from 4,500 square feet to one acre (APA 1996). One community allows detached ADUs only on lots that are 1.5 times the minimum lot size of the zoning district (Orange County, Fla., Zoning Code Sec. 38-1426 (f)(4)). Some communities have the same minimum lot-size requirements for all ADUs. When the requirements are not the same, greater lot sizes are required for detached units than for accessory apartments. The model state act (Section 2.H.) allows communities to exempt ADUs from lot density requirements.*

*The provisions below require the minimum lot size of the underlying zoning district for all types of ADUs, with two exceptions. First, the optimal provision allows ADU apartments to be on lots that are a specified number of square feet — presumably smaller than the zoning district's minimum lot size. One proponent of ADUs argues that minimum lot sizes may disqualify older homeowners, and others with homes on small lots, from installing ADUs and receiving their benefits (MRSCW 1995, 45). For this reason, the optimal provision below requires that the minimum lot size be met only for accessory cottages, while lots that are a specified size may contain dwellings with accessory apartments.*

*Second, in the minimal provision, communities must specify the minimum number of square feet of lot size that is eligible for detached ADUs. Some*

*communities may want this minimum lot size to be more than the minimum lot area required in the zoning district because neighbors are sometimes concerned about overcrowding and the impact of detached ADUs on property values and aesthetics.*

*Other approaches to dealing with the density of ADUs per land area are mentioned in the note to Section 22 below.*

**[Optimal provision]** ADUs may be developed on lots meeting the minimum lot size for the respective zoning district, except that accessory apartments may be on lots that are [specify number of square feet].

**[Favorable provision]** ADUs may be developed on lots meeting the minimum lot size for the respective zoning district.

**[Minimal provision]** ADUs may be developed on lots meeting the minimum lot size for the respective zoning district, except that detached accessory cottages may be developed only if the lot size is [specify number of square feet] or more.

#### 9. Lot Standards - Setback and Lot Coverage.

*Note: ADUs are generally subject to setback and coverage requirements of zoning ordinances. For this reason, this model ADU ordinance, similar to the Washington model (W OCD 1994), does not separately address this issue. These issues are highly related to aesthetic concerns covered in sections below.*

#### 10. Occupancy Standards - Owner of Premises.

*Note: Some neighbors are concerned that allowing ADUs will cause deterioration of neighborhood properties because landlord speculators will buy up houses with ADUs and rent out both units (MRSCW 1995, 28). The fear is that tenants will not maintain the units. A popular way to allay these fears is to require the owner of the lot to reside on the premises — the majority of ADU ordinances contain this requirement (APA 1996). There is evidence that owner occupancy does lead to better maintenance of the premises (Verrips 1983, 70). Not surprisingly, neighbors tend to want the adjacent premises with ADUs to be owner occupied (Town of Babylon, New York 1979, 2). In order for owner occupancy to be most effective in fulfilling the purposes of ADUs, it is important to allow the owner to live in either unit (see the discussion in Section 1.C i. of the model state act, the definition of “Accessory”). Communities often allow homeowners to reside in either the principal unit or the ADU (APA 1996).*

*The optimal option includes both aspects of owner occupancy — requiring owner occupancy and allowing it in either unit — because both tend to*

*facilitate the development of new ADUs. For communities that may not feel comfortable allowing the owner to live in either unit, the minimal provision requires the owner to reside in the principal dwelling unit. No favorable provision is recommended.*

*Many communities monitor ADUs to ensure that the owner still lives on the premises. A variety of methods are used to do this monitoring (see Section 6), including registration of occupants, certification of occupancy, and annual licensing of rental units with annual inspections.*

*Other communities require ADU owners to record the requirements of the ADU ordinance as deed restrictions, particularly the owner-occupancy requirement. The deed restrictions accompany the title of the property and give notice to all subsequent buyers of the occupancy requirement. Both the optimal and favorable provisions below require this registration.*

*Various provisions of the model also address the issue of owner occupancy. Those provisions allow and support the requirement that the owner live in the larger or smaller unit (see the discussion in Section 2.E. of the model state act; also see Section 1.A.v. (7) — findings about benefits of owner occupancy — and the definitions of “Accessory” and “Owner-Occupant”). If a community adopts this ordinance but does not have a statute echoing these provisions of the model state act, it may want, with the advice of counsel, to include versions of those provisions in its zoning ordinance.*

**[Optimal provision]** A lot or parcel of land containing an ADU shall be occupied by the owner of the premises, and the owner may live in either the ADU or the principal dwelling unit. Within 30 days of securing approval for construction of an ADU, the owner shall record against the deed to the subject property, a deed restriction running in favor of the municipality limiting occupancy of either the principal dwelling unit or the ADU to the owner of the property. Proof that such a restriction has been recorded shall be provided to the Zoning Administrator prior to issuance of the occupancy permit for the ADU (adapted from WOCDC 1994, Application Procedures).

**[Favorable provision]** None

**[Minimal provision]** A principal dwelling unit on a lot or parcel of land containing an ADU shall be occupied by the owner of the premises. Within 30 days of securing approval for construction of an ADU, the owner shall record against the deed to the subject property, a deed restriction running in favor of the municipality limiting occupancy of either the principal dwelling unit or the ADU to the owner of the property. Proof that such a restriction has been recorded shall be provided to the Zoning Administrator prior to issuance of the occupancy permit for the ADU (adapted from WOCDC 1994, Application Procedures).

## 11. Occupancy Standards for ADUs.

*Note: Limiting eligible occupants of ADUs can keep the number of installations of ADUs down. In a 1996 survey of 50 ADU regulations, 18 percent of the communities limited occupancy of ADUs to persons who were elderly, disabled, or related to the owner (APA 1996). Requiring the occupant to be a relative of homeowner is the most frequent limitation.*

*Although these policies can have good intentions (e.g., to provide care for the special needs of the owner or occupant), the limitations can discourage investors in ADUs and can cause enforcement problems for communities. In fact, the trend in ADU regulations is away from these types of regulations (MRSCW 1995, 35). A more reasonable and legally defensible approach to occupancy limitations may be requiring a minimum number of square feet of living area of the ADU per person. But in our view, the optimal option is not to have an occupancy standard.*

*Some communities, however, may insist on this type of limitation; we have provided a favorable provision that, like one county ordinance, limits occupancy only during the ADU's first three years (Orange County, Fla., Zoning Code Section 38-1426 C (2) a). The community may define the number of persons and characteristics of persons who are eligible occupants (e.g., relatives, older persons, or disabled persons). The three-year limit may serve to encourage investments in ADUs since the owner will be certain of a greater pool of potential occupants after that time.*

*Finally, we have provided a minimal option that allows the locality to limit the occupancy of an ADU to a specified group. While we do not recommend adoption of such a provision, its inclusion may be the only way to obtain passage of an ordinance. In these cases, it should be viewed as a transitional phase allowing the locality to gain experience with ADUs and leading to further liberalization of the ordinance.*

*Prior to adopting a provision limiting the occupancy of ADUs, a community should obtain a legal opinion as to whether such a restriction violates the federal Fair Housing Act (42 U.S.C.A. Sec. 3601). Among the groups protected from housing discrimination by this federal law are families with children under 18 years of age.*

*As previously mentioned, the favorable and minimal options limit the number of occupants. In a recent survey of ADU ordinances, the limitations on the number of persons ranged from two to five, with some communities requiring occupancy by families (APA 1996). The most common limitation on the number of persons occupying an ADU was less than three.*

**[Optimal provision]** None

**[Favorable provision]** During the first three years after the issuance of a permit for an ADU, the occupants of the ADU shall be limited to [specify] in number and persons who are [specify eligibility criteria].

**[Minimal provision]** The occupants of the ADU shall be limited to [specify] in number and persons who are [specify eligibility criteria].

## 12. Principal Dwelling Unit Building Standards - Minimum Floor Area.

*Note: Some communities do not want smaller houses to have a related ADU because the ADU may be dominant and inconsistent with the single-family character of a neighborhood. Communities sometimes set a minimum size for the principal dwelling unit as an eligibility requirement for constructing an ADU. While a recent survey of 50 ordinances did not reveal any communities that took this approach (APA 1996), the survey did find that communities often regulate the relative sizes of the ADU and the principal unit by setting maximums on ADUs in terms of percentage of the living space of the principal dwelling or a maximum floor area size for the ADU, or both. Setting a minimum size on principal units as an eligibility requirement for an ADU is not recommended; it is better to deal with the issue of consistency with single-family character by limiting the size of the ADU in terms of a percentage of the principal dwelling unit (See Section 17 below.)*

## 13. Principal Dwelling Unit Building Standards - Age.

*Note: This section addresses the question of how soon an ADU can be installed after the principal dwelling is constructed. The discussion assumes that the ADU being built is an accessory apartment. Accessory cottages built with new houses would create the greatest amount of political resistance (more than accessory apartments), raising concerns about the single-family zone being converted to a duplex zone.*

*Regulations that require houses to be a certain age before becoming eligible for an ADU are adopted out of homeowners' concern that too many ADUs will overwhelm the neighborhood. The specific concern is that houses will be designed and marketed with ADUs if new houses can have them. ADUs should not be allowed in new houses, opponents say, because the intent behind them is to use the existing housing stock (MRSCW 1995, 47). To address this issue, communities sometimes set limits on how quickly ADUs can be built, based on the age of the principal dwelling units. (Even more rarely, communities use ADUs to revitalize only older neighborhoods and require the principal dwelling to be built before a certain date, such as 1976. (See Hamden, Conn., Zoning Regulations (1996) and Hare 1981, 14).*

*An age limitation on the principal dwelling unit will reduce the number of ADUs developed, and the optimal provision allows buildings of any age to be eligible for an ADU. The favorable provision would not permit ADUs in buildings completed in the last three years. As a minimal provision, the principal dwelling unit is eligible for an ADU after it is a specified number of years old. The age required for the principal dwelling unit is generally from two to five years (APA 1996). If a community does allow ADUs in new houses, as in Section 7, it would, of course, be contradictory to base eligibility for an ADU on the age of the principal dwelling or how long it has been owned, as in some provisions in Sections 13 and 14.*

**[Optimal provision]** An ADU may be developed in either an existing or a new dwelling unit (WOCD 1994, Sec. A.7.).

**[Favorable provision]** An ADU may be developed in a dwelling unit that has been completed for at least three years.

**[Minimal provision]** An ADU may be developed in a dwelling unit that has been completed for at least [specify] years.

#### 14. Principal Dwelling Unit Building Standards - Term of Ownership.

*Note: Requirements concerning the term of ownership are similar to those regarding the age of the principal dwelling. They deal with the question of how long the principal dwelling must be owned by the current owner before an ADU can be constructed. Neighbors can raise the concern that speculators will buy houses simply to install an ADU. Advocates for ADUs point out that term of ownership requirements bar first-time buyers from using ADU rental income to defray house mortgage or maintenance costs (MRSCW 1995, 48). Also, requiring that the principal dwelling or the ADU be owner occupied is an effective protection against speculation. As with restrictions on the age of the principal dwelling, we do not recommend term-of-ownership requirements. Requiring home ownership for a specified number of years is the minimal provision.*

**[Optimal provision]** An ADU may be developed in either an existing or a new dwelling unit (WOCD 1994, Sec. A.7.).

**[Favorable provision]** None

**[Minimal provision]** An ADU may be developed in a dwelling unit that has been owned at least [specify] years by its current owner.

## 15. ADU Building Standards - Architectural Design and Types of Structures.

*Note: This section and the remaining sections on building standards govern the appearance of accessory cottages. Homeowners adjacent to ADUs are sometimes concerned that ADUs will erode the single-family charm of their neighborhood, and ADU ordinances commonly address many appearance issues (APA 1996), such as type of structure, architectural design, maximum size, minimum size, and whether the ADU is subordinate to the principal unit.*

*This section specifically deals with the type of structure (mobile home, site-built dwelling, or manufactured housing) that can be used as an ADU. It also addresses whether the ADU must be architecturally consistent with the principal unit and whether it must be consistent in appearance with a site-built single-family residence. The optimal provision maximizes the opportunities for ADUs by allowing any type of structure to be an ADU if that structure is allowed as a principal unit in the zoning district. No other appearance requirements are placed on ADUs in the optimal provision. The favorable provision is more restrictive by allowing manufactured houses to be ADUs only if they are allowed in the zone and are consistent with the appearance of a single-family residence. The minimal provision adds to the favorable provision the requirement that the ADU must be consistent with the building type of the principal dwelling unit.*

**[Optimal provision]** A mobile home or manufactured dwelling unit may be used as an ADU in any zone in which dwelling units are permitted (adapted from WOCDC 1994, Section 9).

**[Favorable provision]** A manufactured dwelling unit may be used as an ADU in any zone where that type of structure is permitted if the appearance of the same remains that of a site-built, single-family dwelling unit (WOCDC 1994, Section 9).

**[Minimal provision]** A manufactured dwelling unit may be used as an ADU in any zone where that type of structure is permitted if the proposed ADU is consistent with the building type of the principal unit and the appearance of the ADU remains that of a site-built, single-family dwelling unit (WOCDC 1994, Section 9).

## 16. ADU Building Standards - Orientation of Entrance.

*Note: Many ADU regulations focus on the entrance of the ADU as an aesthetic concern. Most communities discourage or prohibit entrances from being constructed on the front of principal buildings. Thus, entrances and particularly stairways are limited to side or rear yards. When a front entrance is required for physical or cost reasons, communities often demand that the front entrance to the principal dwelling must double as the entrance to both units. The options below vary in how strictly entrances and stairways are regulated. The optimal provision requires ADU entrances to be less visible than principal dwelling unit entrances, and stairways may not be on the front*

*of the principal dwelling unit. The favorable and minimal provisions are similar, in that both require ADU entrances not to be visible from the street view and limit ADU stairways to the rear of principal dwelling units. While the favorable provision allows ADUs to share a front entryway with the principal dwelling unit, the minimal provision does not.*

**[Optimal provision]** If the ADU's primary entrance is not the same as that for the principal dwelling unit, it shall be less visible from the street view of the principal dwelling than the main entrance of the principal dwelling unit (adapted from WOCDC 1994, Section A.10.), and the ADU's stairways may not be constructed on the front of the principal dwelling unit.

**[Favorable provision]** The ADU's primary entrance shall be not visible from the street view of the principal dwelling, and the ADU's stairways may not be constructed on the front or side of a principal dwelling unit.

**[Minimal provision]** No entrance for an ADU shall be permitted on, or, from the front of a principal dwelling unit; the ADU's primary entrance shall be not be visible from the street view of the principal dwelling unit; and the ADU's stairways may not be constructed on the front or side of a principal dwelling unit.

#### 17. ADU Building Standards - Size.

*Note: This section deals with a number of issues related to the size of the ADU. The intentions of communities in setting size limitations are commonly to require the ADU to be subordinate to the principal dwelling unit, to control neighborhood density, and to control visual impacts.*

*The standards of this section set minimums on the ADU square footage and maximums on the total square footage and number of bedrooms of the ADU. A common minimum size requirement for an ADU is 300 square feet; a frequent maximum on number of bedrooms is two; and the maximum size for ADUs falls in the range of 600 to 1,200 square feet, with 800 square feet occurring most often as a maximum size (APA 1996).*

*This model local ordinance does not directly require the ADU to be subordinate to the principal unit but does so indirectly by setting the maximum floor space of the ADU as a percentage of the living area of the principal unit. Advocates for ADUs point out that less affluent homeowners in smaller houses may not qualify to build an ADU if their house is too small (MRSCW 1995, 30). For example, if the ADU may not be larger than 30 percent of the living area of the principal unit but may not be smaller than 300 square feet, a homeowner with a living area of only 900 square feet could not have an ADU (270 square feet is 30 percent of 900 square feet and less than the minimum required size of 300 square feet). For this reason, the favorable and minimal provisions below raise the maximum percentage to 40 percent of the living space of the principal unit. Such a maximum percentage*

*is not unusual (APA 1996). Communities wanting to be more strict than the minimal option can change the percentage after determining that greater limitations are needed to protect the public interest. The maximum size of an ADU in the optimal provision is 1,200 square feet and 800 square feet in the minimal provision. (The maximum ADU size allowed in a recent survey of 50 ADU ordinances was 1,200 square feet [APA 1996].)*

*No alternative is listed as the optimal option. Size can be limited by other regulations. The Uniform Building Code (Sections 1207 and 1208), for example, contains a minimum size for efficiency units. Similarly, lot coverage maximums and minimum lot sizes limit the size of accessory cottages. Health codes can also limit the number of bedrooms in an ADU.*

**[Optimal provision]** None

**[Favorable provision]** In no case shall an ADU be more than 40 percent of the living area of a principal dwelling unit, nor more than 1,200 square feet, nor less than 300 square feet, nor have more than two bedrooms (adapted from WOCD 1994, Section A.8.).

**[Minimal provision]** In no case shall an ADU be more than 40 percent of the living area of a principal dwelling unit, nor more than 800 square feet, nor less than 300 square feet, nor have more than two bedrooms (adapted from WOCD 1994, Section A.8.).

#### 18. ADU Building Standards - Not Intended for Sale.

*Note: An argument of opponents to ADUs is that the owners will eventually sell them off as condominiums. While this can create double owner occupancy of the premises, it can also result in the premises being occupied only by tenants. Thus, the opponents are concerned that the premises will not be as well maintained as owner-occupied premises. Opponents also warn that turning some ADUs into condominiums makes their fear of a neighborhood of duplexes a reality. The California ADU statute has a “not intended for sale” standard (Cal. Gov’t Code Section 65852.2(b)(1)(A)), and communities occasionally impose similar requirements (APA 1996).*

*One concern, however, is that if a community voids an ADU permit because the ADU has been sold for a condominium, a court may reverse the community action on the basis that zoning can regulate land use but not types of land ownership (Ziegler 1995, 56A-11 and 56A-12). Before adopting this standard, legal counsel should be consulted because courts are also reluctant to uphold regulations that may limit property owners’ ability to sell their land. Since this standard basically addresses the concerns of neighbors, it is listed below as a minimal option.*

**[Optimal provision]** None

**[Favorable provision]** None

**[Minimal provision]** The ADU shall not be intended for sale and may be rented (adapted from Cal. Gov't Code Section 65852.2(b)(1)(A)).

#### 19. ADU Building Standards - Screening and Orientation.

*Note: Privacy is at the heart of neighbors' fears about being overrun by ADUs. This standard protects neighbors' privacy by giving the permit issuer a number of factors to consider, and the ADU homeowner a variety of options, that can be used to honor any adjacent landowner's privacy. While it could be argued that this standard balances the neighbors' and the ADU owners' interests, many owners are likely to view it as inconvenient or even onerous. Such a standard is relatively rare and is listed as a minimal option because it focuses more on the neighbors' concern over the visual or privacy impacts of ADUs.*

**[Optimal provision]** None

**[Favorable provision]** None

**[Minimal provision]** The orientation of the proposed ADU shall, to the maximum extent practical, maintain the privacy of residents in adjoining dwellings as determined by the physical characteristics surrounding the ADU, including landscape screening, fencing, and window and door placement (adapted from City of Olympia, Washington, Unified Development Code, Section 18.04.060 1.b. 1995).

#### 20. Parking and Traffic.

*Note: Because of the average drop in household size, traffic is not generally a problem with ADUs. Most neighborhoods that house ADUs were designed for families that would generate more traffic than today's actual occupancy levels (Verrips 1983, iv; Gellen 1985, 151-152). For this reason, we recommend no standards for controlling traffic. Communities that are concerned about traffic may want to deal with it under density controls, as discussed in Section 22 below.*

*The issue of parking, however, is more complicated. Parking standards are one of the most frequent concerns (Hope 1996), and one expert views parking as the most difficult issue (Hare 1989, 24). Not surprisingly, communities tend to require too many parking spaces, making parking requirements one of the major obstacles to increasing the number of new ADUs (CHCD 1989, VIII-13). For example, in a 1996 survey of local ADU ordinances (APA 1996), 4 of the 50 surveyed communities required up to three spaces per ADU. But in*

*suburban communities where hilly terrain does not limit parking on sites or streets, ADUs will not cause parking problems (Verrips 1983, 83).*

*In addition, there is a reluctance in many communities to allow tandem parking (one vehicle in front of the other in a driveway) and to allow parking in setback areas even when that is a normal practice in a neighborhood. Advocates of ADUs emphasize that single-family homes with teenagers can generate as much or more traffic, and the need for parking is often minimal as ADUs are frequently occupied by “empty nesters” and single persons who have fewer cars or no car (MRSCW 1995, 38 and 39).*

*The controversy over parking illustrates that communities vary tremendously in terms of physical conditions and parking norms. These norms vary from cars being invisible to cars being ubiquitous, including tandem parking, parking on sideyard parking pads, and curbside parking (Gellen 1989, 172). Neighbors often vary in how much curbside parking they think can be allowed before they see the neighborhood streets as overcrowded. Because neighborhoods have different standards, a performance approach is needed, allowing flexibility rather than a set rule that ignores the variety of circumstances (Gellen 1989, 172).*

*The optimal provision limits the number of spaces that can be required, while the favorable provision allows a flexible approach because more than one parking space may be required under certain conditions. Both of these options are consistent with the model state act, whereas the minimal provision is not. The minimal option is required by some communities. However, it focuses on neighbors’ concerns and creates difficulties for owners of ADUs because it does not allow parking in setbacks, tandem parking, or on-street parking. In addition, this requirement may be more onerous than parking requirements for the principal dwelling unit. (An assumption related to these standards is that there is only one ADU per principal dwelling unit.)*

**[Optimal provision]** One parking space is required per ADU if:

- a. the same requirement exists for the principal dwelling unit;
- b. no other parking spaces are available in side or rear yards, by tandem parking, or on-street parking; or
- c. the use of the ADU will create the need for an additional parking space.

**[Favorable provision]** One parking space is required per ADU.

- a. Additional parking may be required, provided that:
  1. the Zoning Administrator finds that the additional parking requirements are directly related to the use of the ADU; and
  2. the total number of parking spaces required for an ADU does not exceed the number of spaces required for a principal dwelling unit.

- b. The Zoning Administrator may permit off-street parking in setback areas or through tandem parking if the off-street parking:
  1. would not block access by emergency vehicles to the principal dwelling unit or ADU; and
  2. is permitted and occurs in the neighborhood (adapted from Cal. Gov't Code Section 65852.2(e)).

**[Minimal provision]** Two off-street parking spaces are required for each ADU.

## 21. Public Health.

*Note: The adequacy of water and sewer service to ADUs is generally not an issue because ADUs, rather than creating undue burdens, usually result in more efficient use of these services (MRSCW 1995, 50). Nevertheless, an ADU ordinance standard for water and sewer services should exist if current services are near capacity or ADUs add more bedrooms to the principal dwelling unit. Public health issues are generally addressed through regulations other than zoning, but an ordinance standard can require the homeowner developing the ADU to provide proof of conformance to public health regulations. We consider this standard to be necessary for the benefit of ADU owners and the neighbors. All three options contain this requirement.*

*The minimal option contains an additional requirement. Because of aesthetic concerns, communities sometimes require only one electrical and one water meter per principal dwelling unit. Three communities were found to have this requirement in a recent study of 50 ADU ordinances (APA 1996). Minimizing the meters on the exterior of a building is designed to support the owner-occupancy requirement and to maintain the appearance of single-family rather than two-family houses (MRCSW 1995, 50).*

**[Optimal provision]** Applicants for ADU permits must supply the Zoning Administrator with certification by the municipal health official that the water supply and sewage disposal facilities are adequate for the projected number of residents (adapted from WOCDC 1994, Section A. 2.).

**[Favorable provision]** [Same as optimal provision]

**[Minimal provision]** Applicants for ADU permits must supply the Zoning Administrator with certification by the municipal health official that the water supply and sewage disposal facilities are adequate for the projected number of residents. In addition, only one electrical and one water meter shall be allowed to serve the principal dwelling unit and the ADU (latter sentence adapted from Edmonds, Washington, Community Development Code, Section 20.21.030 C. 1996).

## 22. Density Limits.

*Note: Restrictions on density are designed to reduce the number of ADUs in order to minimize their projected effects on the neighborhood. Density controls may also be put in place to avoid an accumulation of ADUs in the same area or to distribute ADUs evenly through an area (MRSCW 1995, 46).*

*A wide range of methods are used to limit density of ADUs, including:*

- quotas on the total number of ADU permits before an ADU ordinance is repealed;*
- quotas on the number of permits issued before an ADU ordinance is reviewed;*
- periodic reviews of ADU ordinances to evaluate the number of permits issued;*
- limitations on the number of ADUs per area (e.g., by block or census tract);*
- restrictions on the number of ADUs as a percentage of the residences in an area;*  
*and*
- spacing requirements between ADUs.*

*Advocates of ADUs may argue, however, that density rules reduce the number of ADUs unjustifiably. When the infrastructure in single-family neighborhoods is underutilized, why is it fair to say “no” to one homeowner applying to create an ADU simply because another homeowner in the area has already installed an one? Justifying the density control may be even harder if the homeowner with the ADU permit originally installed it illegally and now is issued the permit to legalize wrongdoing.*

*But density controls may be an essential political tool in some communities. Guarantees that neighborhoods will not be overrun by ADUs may increase support for an ADU ordinance in a community. For this reason, density controls are suggested as the minimal provision. Density limits for ADUs are not recommended as optimal options because the controls are hard to justify.*

*The favorable provision calls for annual reporting. This reporting can trigger a reconsideration of the ordinance if density thresholds are exceeded. This option is considered favorable because its effect, rather than vetoing an application for an ADU, is to cause a review of the ordinance for amendments to the ADU ordinance. We want to emphasize that this review calls for “amendments” rather than repeal of the ordinance.*

***[Optimal provision]*** None

***[Favorable provision]*** The Zoning Administrator shall report annually to the municipal legislative body the number of units established, the geographic distribution of the units, the average size of the units, the number and type of complaints, and completed enforcement actions. The municipal legislative body shall reassess this ordinance for amendments every [specify number] years or sooner if records show that 20 percent of the single-family

structures within any census tract or citywide have ADUs (adapted from Tacoma, Wash., Municipal Code, Section 13.06(B)(8) (1996) in MRSCW 1995, 58).

[*Minimal provision* - choose one of the following four options] No applications for ADUs may be accepted in census tracts or areas if granting the permit would cause the percentage of single-family units with ADUs of any single-family zone in one census tract to exceed 20 percent (adapted from Seattle, Washington, Section 23.44.025, Seattle Municipal Code in MRSCW 1995, 46).

[or]

A permit for an ADU may be issued if not more than 10 percent of the existing single-family units within 1,000 feet of the proposed ADU contain existing ADUs (adapted from South Windsor, Connecticut, Section 4.7.1.g., Zoning Ordinance 1990).

[or]

A permit for an ADU may be issued if not more than [specify number] permits have been issued for ADUs over the three-year period since the adoption of these regulations (adapted from Hamden, Connecticut, Section 701 m., Zoning Regulations 1996).

[or]

The Zoning Administrator may issue a permit for an ADU if the total number of permits has not exceeded [specify number]. When this number is exceeded, the Zoning Administrator shall report to the municipal legislative body that the number is exceeded, and that body shall review the ADU ordinance for its continuance, amendment, or repeal.

### 23. Legalizing ADUs.

*Note: An illegal ADU is one that was installed without obtaining the required permits from the local government. Some ADUs may have existed prior to any ordinance making them illegal. Those ADUs can become legal, nonconforming ADUs if they initially conformed to all public laws. However, ADUs installed after zoning regulations were adopted are illegal unless permits were obtained from the local government. After permits are available for ADUs, illegal ADUs may actually be encouraged by harsh regulations, excessive fees, and tedious application procedures. Illegal ADUs are quite common because of the pressure for affordable housing and the reluctance of many communities to legalize ADUs.*

*A goal of some communities that are more familiar with these issues is to legalize the illegal ADUs for safety reasons. But many ADU owners strongly resist legalization out of their fear of higher property taxes, legal sanctions, income taxes on rental income, the costs of conforming to local codes, and the possibility that code inspectors will discover a variety of code violations*

*(Gellen 1985, 187-191). For these reasons, programs to accommodate illegal ADUs have not been very successful (Gellen 1985, 188). In addition, most communities have limited budgets for enforcing ADU regulations, meaning that code enforcement relies on specific complaints. Thus, most communities simply ignore illegal ADUs.*

*A variety of approaches, however, are available to deal with illegal ADUs. First, we recommend not having harsh regulations, lengthy application processes, or high fees that will create even more illegal ADUs. In addition, the model ordinance includes the following approaches: amnesty periods from enforcement, long time periods to comply with regulations, an exemption from all but safety regulations, and the threat of stiff penalties after all else has failed. While there appears to be no optimal or even favorable provision for a community living with numerous illegal ADUs, we do suggest a minimal provision below that includes several of the above options.*

*Some benefits accrue to communities that legalize illegal ADUs. If illegal units are tolerated, the risk is increased that other people will be encouraged to have illegal units. In this instance, it can be quite important for community leaders to make the statement through their ADU regulation that they are committed to the public interest by requiring owners of illegal ADUs to come forward and legalize their units. Furthermore, legalizing the illegal ADUs provides the opportunity to correct dangerous safety hazards (such as inadequate electrical wiring). With these benefits in mind, we suggest the minimal provision for legalizing ADUs below.*

***[Optimal provision]*** None

***[Favorable provision]*** None

***[Minimal provision]*** Any existing illegal ADU will not be subject to any enforcement action if an application to legalize the ADU is submitted within [specify number] months of the adoption of these regulations (adapted from a 1995 draft of Village of Scarsdale, New York, Zoning Code 1995).

[or]

Owners of illegal ADUs shall be guilty of a misdemeanor and subject to a penalty of [specify the maximum allowed by law]. Any existing illegal ADU will not be subject to any enforcement action if:

1. The ADU owner applies for a permit to legalize the illegal ADU permit within [specify] months of the adoption of these regulations;
2. The ADU complies with the minimum requirements of the Uniform Building Code, Section 1208, within [specify] months of the date of applying for a permit under this Section (adapted from Mercer Island, Washington, Section 19.04.0607(D); MRSCW 1995, 45);
3. The ADU complies with the minimum housing code standards within [specify] months of the date of applying for a permit under this Section of the ordinance (adapted from Tacoma, Washington, Section 13.06.196(C)(11) Code, MRSCW 1995, 44); and
4. The ADU owner supplies the Zoning Administrator with certification by the municipal health official that the water supply and sewage disposal facilities are adequate for the ADU (adapted from WOCD 1994, Section A.2.).

# Accessory Dwellings

A one-stop source about accessory dwelling units, multigenerational homes, laneway houses, ADUs, granny flats, in-law units...

## Do accessory dwelling units serve older persons? (Or, who lives in, and owns, ADUs?)

[This is part 8 of a 13-part series about ADU research and policy. [Read the series intro and table of contents.](#)]

**You can't really say when ADUs were "invented,"** since having a second small dwelling on a piece of property seems to be an idea as old and natural as the idea of housing itself. Just look at the carriage-house apartments you see in big old houses in Seattle, at farm properties where "new" and "old" structures house different generations or branches of the family, and at family compounds all over Africa and Asia.

If that's too exotic or déclassé for you, look at Thomas Jefferson's Monticello, where, as [Lester Walker](#) has documented in his book about tiny houses, a small, clever house was Jefferson's residence as the big place was being built. This house later became part of one of Monticello's extended wings.

**So ADUs are as old as the hills, and as American as apple pie.**

However, the current era of ADU advocacy started about three decades ago, when there was a lot of concern for how the “elderly,” perhaps better known as older persons, would be housed. Programs like “Double Unit Opportunity” reasoned that a retiring person who built an ADU might then have two kinds of resources:

- a place to live suited to their needs, possibly with family nearby;
- a place to rent out, providing much-needed income;
- or possibly both.

This concept was supported by an opinion poll showing that most aging people wanted to stay in their homes as they aged. AARP supported ADUs with the writing of a model code.

How has that turned out? Is there evidence that ADUs are providing retirement residences and/or financial security for seniors?

**The answer to this one is a little complicated.** To sum up, the statistics *currently* show that ADUs aren’t special when it comes to supporting or housing seniors. However, there are strong suggestions this will change in the future.

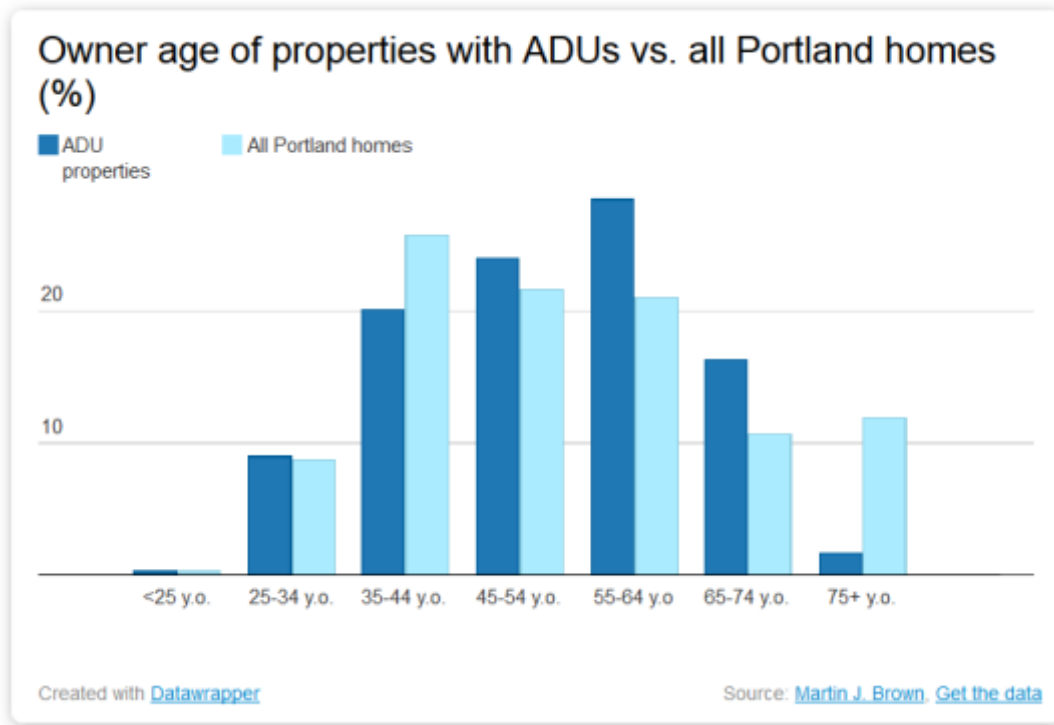

It all relates to how ADUs are developed and owned. As you hopefully know, an ADU is, by definition, not a legally separate asset. It is not like a condo or an RV that can be bought or sold on its own. Rather, the person who owns the property and the “main house” also owns the ADU. Because most ADUs in Portland have been created recently, at this point in time the homeowner that created the ADU is usually still the owner. Make sense so far?

Now one of the things early studies of ADUs, such as a “Double Unit Opportunity” (doesn’t that sound like something from a fortune cookie?) discovered was that people of retirement age (65+) were extremely *unlikely* to build ADUs. Instead, it was younger people, usually 35-55, that were willing to

Accessory Dwelling Units

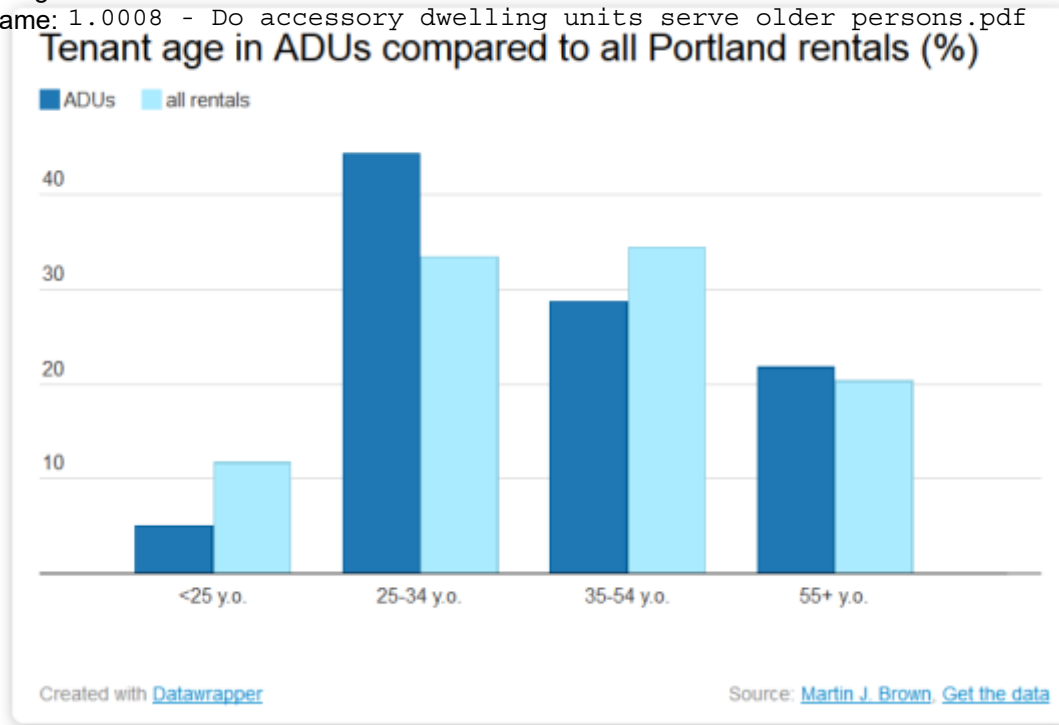

take on the considerable labor and risk of creating a second dwelling. This pattern is evident when I compare the age distribution of Portland ADU owners to the age distribution of Portland homeowners in general:

The shapes for the two groups are pretty similar, but there are some curious differences in the highest age classes. ADU owners are equally as likely as the typical Portland homeowner to be 55 or more: 47% of ADU owners are in that age class, vs. 44% for home in general, a difference that is not significant ([see my research paper for statistical details](#)). ADU owners are slightly less likely than the typical Portland homeowner to be 65 or more: 18% of ADU owners are in that age class, vs. 22% of Portland homeowners. Very few ADUs are owned by the most senior seniors, those 75+, as you might expect, because the oldest homeowners don't tend to build ADUs.

However, ADU owners are slightly more likely than general Portland homeowners to be 55-74 years old. **In other words, ADUs are popular among those who are *getting* old, but who aren't in the highest age categories (e.g. 75+) yet.**

Now, who is living in the ADUs these people have created? I made a similar comparison of the ages of ADU tenants to Portland tenants in general.

Again, the age distribution of people living in ADUs is generally similar to those in all Portland rentals. The biggest difference is in the 25-34 age group, which is more common in ADUs than in general rentals.

**Looking at these numbers, it's tempting to say that ADUs are just "more of the same,"** housing that has no special qualities for older persons. Currently in Portland, ADUs don't house older persons at greater rates than standard rentals, and they are not owned by older persons at higher rates than other kinds of properties.

**However, this doesn't take into account people's intentions.** Examine the personal commentary of practically anyone who has created an ADU, and you'll see that the homeowner-developers behind ADUs practically always have long-term plans that stretch into retirement. For example, one respondent to the DEQ's survey of Oregon ADU owners wrote,

"We rent [our ADU] to a young family member and might live in the little house when we retire, renting the main house to supplement our income."

For two examples of this idea, on different ends of the cost spectrum, look at [Jane Doe's](#) and [Bruce Nelson's](#) projects.

Moreover, families that have multiple generations living in one place with the help of an ADU generally seem to be really happy with it.

"My favorite feature of my SDU is proximity to my grandkids,"

said Dennis Martin in our profile of his project.

These ideas are so common in personal anecdotes about ADUs (see the dozens of examples in our case studies) that I think the current shape of the ownership and tenant age distributions are an accident of timing. In particular, the shapes of those graphs are the result of two facts: a) it is typically middle-aged people who create ADUs; and b) only in the past 5 or 10 years has creating ADUs been a popular development option in Portland.

**ADUs might not be created very often by retired people, but certainly people who own ADUs will be able to use and own them as they retire.** The comments in our case studies suggest that ADUs are a vital part of family plans for the older persons in their lives, and for their future selves. As a consequence, I think the ADU age-ownership distribution will look quite different ten years from now.

So don't worry, grandma — if there's an ADU in the family, when the time comes it will be there for you.

## Do ADUs cause neighborhood parking problems?

[This is part 7 of a 13-part series on accessory dwelling unit research and policy. [Read the series intro and table of contents.](#)]

When planners and city councilors float the idea of loosening rules about ADUs, one fear comes up more than any other: **ADUs will harm parking conditions**, opponents say. For example:

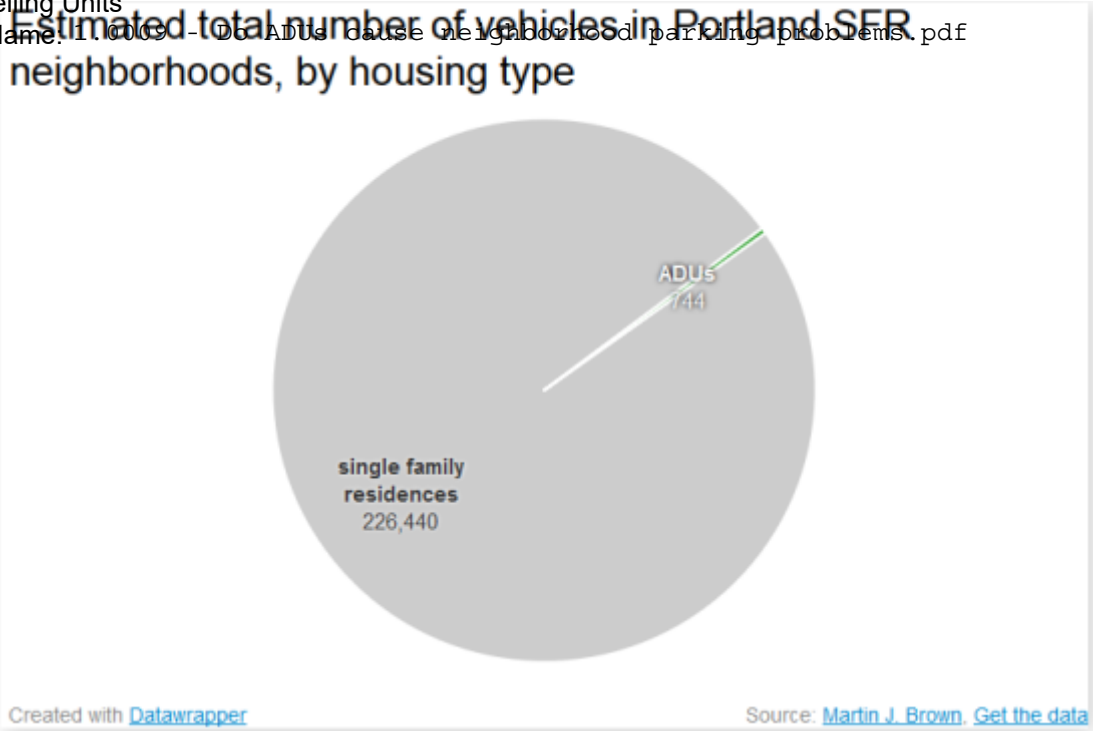

- [Parking concerns helped nix an ADU proposal in Raleigh, North Carolina](#), according to the *News & Observer*.
- [The Laurelhurst Community Club's letter to Seattle city councilors](#), advocating strong restrictions on ADU development, worries extensively about the effect on parking, and goes beyond requiring dedicated spaces to object to converting garages and "tandem parking."
- ["The \[Austin Neighborhoods Council's\] chief quibble with the proposal is the reduction of parking requirements for the new line of ADUs,"](#) writes the *Austin Chronicle*.

The Austin example is particularly interesting, because the news piece makes it sound like the neighborhood advocates are pretty open to the idea of ADUs, having seen some of the possible benefits. But parking is the sticking point.

Cars are clearly a special, emotional subject. They are, for better or worse, central to the typical American lifestyle. Is use of cars really threatened by ADUs? What is the evidence?

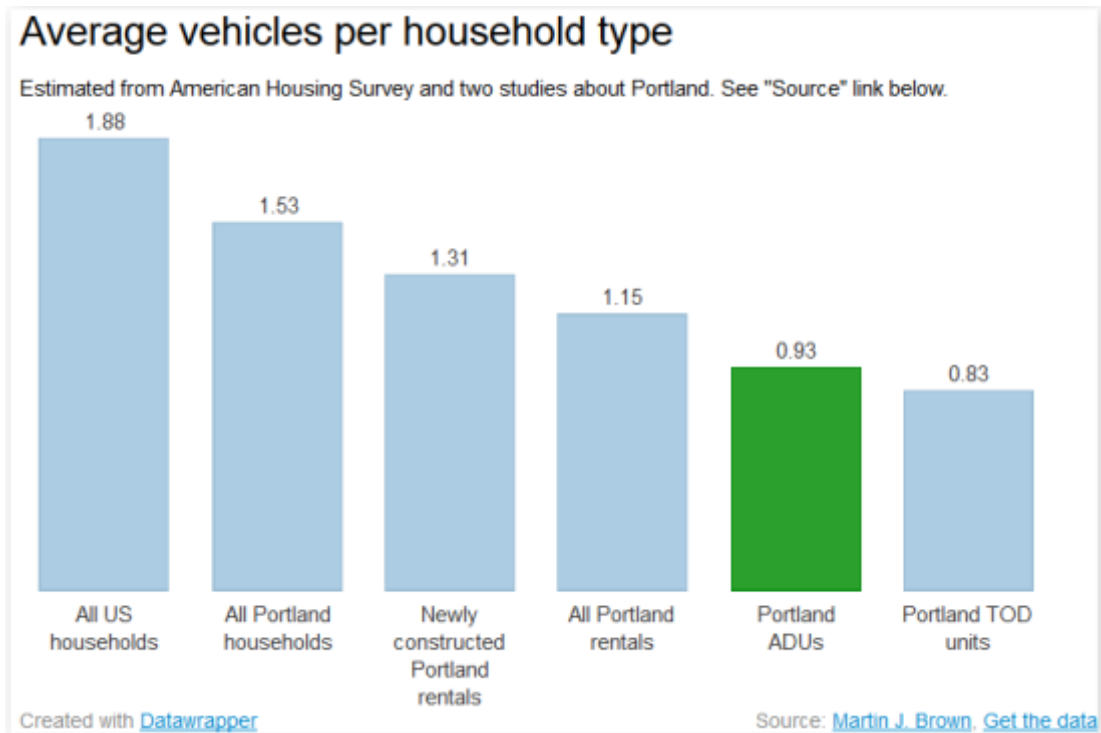

Like practically everything having to do with ADUs, [up until recently there basically was no evidence](#). ADUs were simply too rare for any effect to have been studied. For example, in Portland, Oregon, widely considered to be the leader in ADU development in the US, the number of ADUs was only about 800 in 2013, in comparison to about 148,000 single-family-residence (SFR) properties where ADUs could be allowed.

That rarity, in itself, provides most of the answer. Any effect of ADUs on the total number of cars in an urban area, even one like Portland where ADUs are being developed at a "rapid" pace, is going to be quite small. Here I've used Census statistics and results from the [Oregon DEQ's survey of ADU owners](#) to estimate how many cars ADUs contributed to Portland in 2013, compared to SFR's:

As you can see, ADUs contribute an insignificant sliver, 744 out of several hundred thousand. The number of ADU-related cars that are parked on the street is even smaller, since — even though Portland doesn't require dedicated parking for ADUs — about half of ADU-related cars are parked off-street.

That sliver is even smaller than it might be, because ADUs don't tend to come with as many cars as other types of housing. Here I've estimated the average number of cars per household in various kinds of housing, using statistics from the American Housing Survey and the DEQ survey mentioned above, as well as a study of "transit oriented developments" (TODs) in Portland.

## Accessory Dwelling Units

Index # - File Name: 1.0009 - Do ADUs cause neighborhood parking problems.pdf

As you can see, the average American household has 1.88 vehicles associated with it. Portland is a little bit less car-oriented, with an overall average of 1.53. If you limit the examination to newly constructed Portland rentals (the best comparable for ADUs), the number is 1.31. ADUs themselves are less than half the American average at 0.93. The only form on the graph that beats ADUs is Portland “TODs” — large apartment blocks built on transit lines, with limited offstreet parking.

Curiously, TODs have caused an uproar among (usually-liberal) Portland residents near SE Division street, where TODs are concentrated. People say they have trouble parking. Meanwhile Portland’s 800 (probably 1000 by now) ADUs have caused no organized protest. It’s probably because ADUs are dispersed, so much that it can be hard to notice them.

I find this to be a fascinating contrast, because it shows that *how* development happens has a big impact on how people feel. Good development might be a reasonable alternative to zero development — which is a standard some people stick to when they feel their neighborhood is threatened.

“The last thing we need is more building and more density.”

wrote Columbia, Missouri, resident Raeona Nichols when ADUs were being debated in that town.

Zero development, as Ms. Nichols advocates, probably would prevent parking conditions from changing substantially. But is it realistic?

I think not. It seems impossible to hold anything as organic as a neighborhood in static state. Even without ADUs, neighborhoods will change as demographics, the economy, and other factors change. In a desirable town, population will increase, and some kind of increase in density will happen whether laws allow it or not. An increase in population inevitably means an increase in vehicles.

**The question isn’t so much “to densify or not?” but “how to densify?”**

Back in Raleigh, where efforts to allow ADUs failed, the *News & Observer* writes:

“Councilman Bonner Gaylord cast the lone vote against scrapping the [ADU] plan. He’s argued that they’d create a useful tool for growth. ‘This is the time to take the bold step forward,’ [Gaylord] said. ‘We know that we’re running out of land ... and how to densify is going to be a problem for the next 20 years.’”

**Whether ADUs are a good or bad policy for community development, there is absolutely no evidence they cause parking problems.** Because ADUs are extremely rare (Portland, the nation’s ADU “leader,” has them on less than 1% of eligible lots), and because ADU households have fewer cars than other households, *ADUs should have virtually no effect on parking conditions on a citywide basis.*

Now if there were *dense concentrations* of ADUs — for example, a city block where every single house had an ADU — there might be a noticeable effect on parking conditions. But that day is a long, long, long way off. Meanwhile, it is possible that ADUs could provide other civic benefits. Is it worth going without those benefits to “rein in” that tiny sliver of parking spaces?

—

*next week: Do ADUs serve the elderly?*

I can't see the other comments – but parking is a sticking point here in austin as was noted. even with one required off-street space for the adu, there are complaints and comparisons to “stealth dorms”. I think the parking issue is a stand-in for something else

## Highlights:

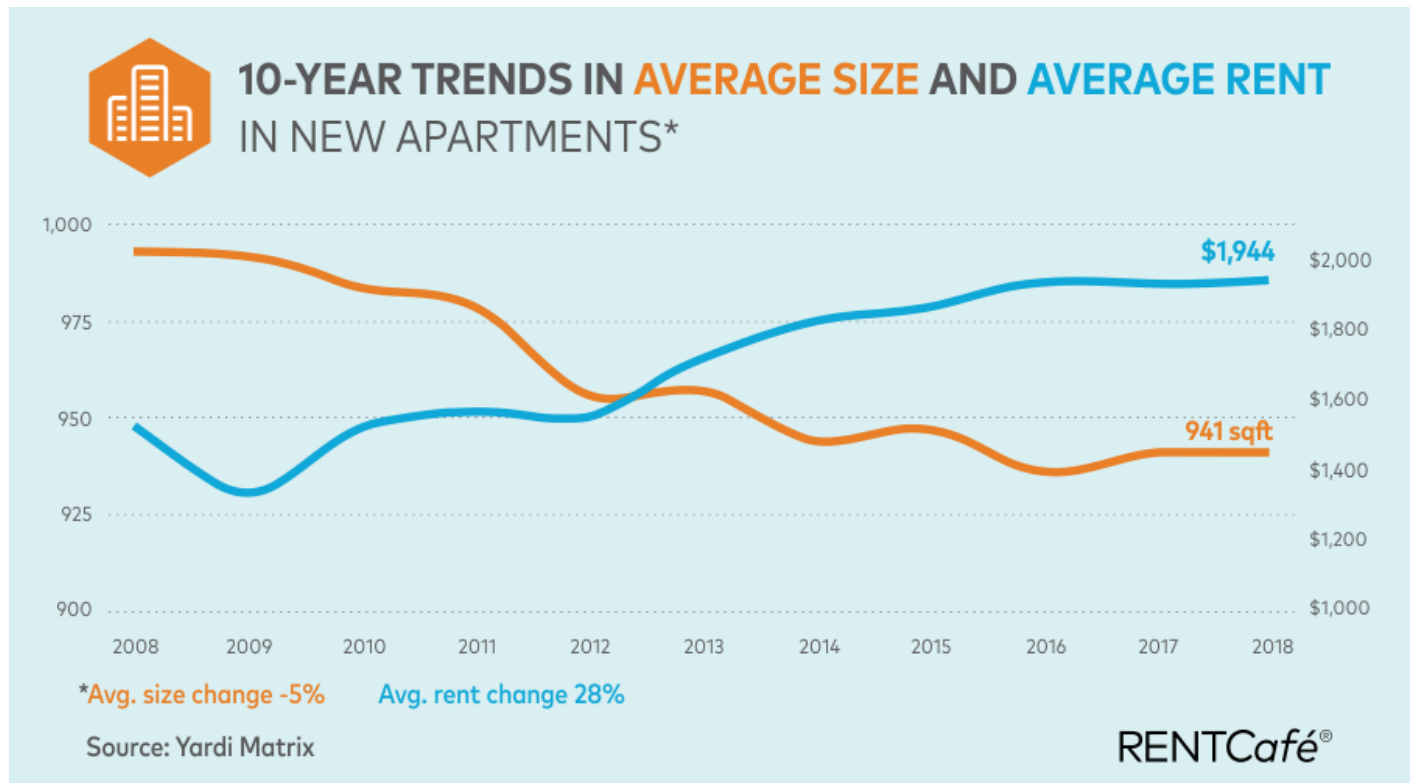

- *The average size of new apartments in the U.S. in 2018 is 941 square feet, 5 percent smaller than ten years ago, with studio apartments shrinking the most, by more than 10 percent; meanwhile, overall rents have increased by 28% over the same period of time.*
- *The average size of apartments regardless of year built is 882 square feet, with the largest apartments in the Southeast boasting 975 square feet of living space and the smallest in California, measuring 837 square feet.*
- *Seattle has the tiniest apartments in the country, with an average size of 711 square feet, Manhattan and Chicago the second smallest rentals, 733 square feet, while Tallahassee, FL offers the most spacious rentals in the U.S., 1,038 square feet on average.*

As rental apartments have been growing in both popularity and price over the past decade, their floor plans have been slowly shrinking in size. The average size of a new apartment completed in 2018 in the U.S. is 941 square feet, 52 sqft less than the size of an apartment built ten years ago, according to our newest analysis of apartment sizes using Yardi Matrix data (<https://www.yardimatrix.com/>).

## Accessory Dwelling Units

Change in renters' living habits are literally redrawing floor plans. The largest share of apartment

Index #9 File Name: living habits are literally redrawing floor plans. The largest share of apartment dwellers, millennials prefer living in locations close to restaurants and entertainment (<https://www.rentcafe.com/blog/apartmentliving/lifestyle-apartmentliving/u-s-zip-codes-that-are-millennial-strongholds/>) rather than having a large kitchen or living room to cook or entertain at home. But the rising interest in smaller living spaces (<https://www.strawhomes.com/blog/2018/11/20/demand-for-smaller-condos-in-canada-vancouver-and-toronto/>) is equally motivated by price, as the need to save on rent sparks demand for smaller units. Unfortunately, renters are paying much more for less. **The average rent in newly-built apartments in the U.S. has increased by 28% compared to 10 years ago, while their size has gotten 5% smaller.**

## Floor plans of all unit types are shrinking

Studio apartments — the symbol of downtown living — have been cut down the most. The average studio apartment is 10% smaller than 10 years ago, reduced from 573 sqft in 2008 to 514 sqft this year. Contrary to the growing interest in smaller units, studio apartments continue to represent a small piece of the rental market, only 5% nationally of all apartments (<https://www.rentcafe.com/blog/rental-market/real-estate-news/3-6-million-fewer-families-kids-home-compared-10-years-ago/>). One-bedroom rental units make up the largest chunk of the national apartment stock (43%) and their floor plans have decreased by 4% over the last decade, while two-bedroom apartments have seen the least change in size, down by only 0.5% on average.

## AVERAGE SIZE OF NEW APARTMENTS IN THE U.S.

Year Built	All	Studio	1 Bed	2 Bed
2008	993	573	790	1,132
2009	992	600	796	1,133
2010	984	614	787	1,147
2011	979	511	762	1,109
2012	956	493	752	1,092
2013	957	525	757	1,108
2014	944	536	751	1,113
2015	947	515	752	1,122
2016	936	503	752	1,121
2017	941	497	752	1,136
2018	941	514	757	1,138
<b>2018 vs. 2008</b>	<b>-5.2%</b>	<b>-10.3%</b>	<b>-4.2%</b>	<b>0.5%</b>

Source: Yardi Matrix

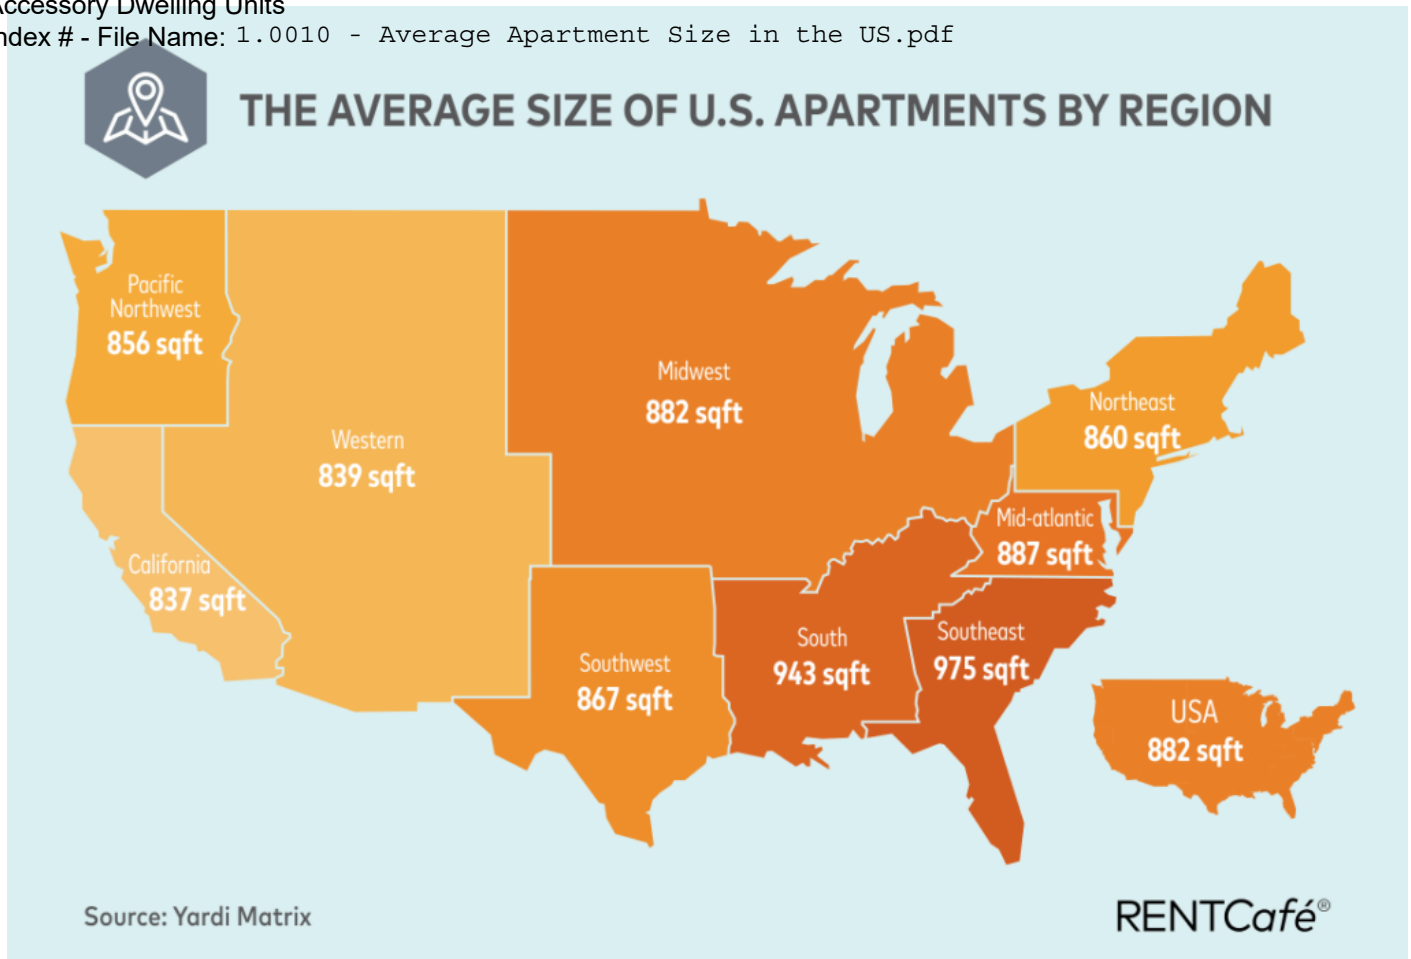

RENTCafé®

Overall, the average rental apartment size in the U.S. is 882 square feet, regardless of the year of completion. The average U.S. studio apartment has a square footage of 472 sqft, the size of a one-bedroom apartment is 714 sqft, while a two-bedroom apartment has an average living space of 1,006 sqft.

## APARTMENT SIZE BY REGION

### The largest apartments are in the SE, the smallest in CA

Rental apartments look very different from one region to another in terms of how spacious they are. **The largest rental units in the U.S. are located in the Southeastern region**, with a typical floor plan measuring 975 sqft, followed by apartments in the **South**, which are 943 sqft in size. The smallest apartments are, surprisingly, not in the Northeast (if you're automatically thinking New York), but rather in California. Renters in the Golden State make do with 837 sqft, on average, about 138 sqft less space than what renters in the Southeast are used to. Apartments in the Western region are the second smallest, measuring 893 sqft, on average.

In terms of 10-year changes, apartments in California saw the biggest downsizing, 12%. The average Californian apartment is now 116 sqft smaller than 10 years ago, from 974 sqft to 858 sqft. New apartments in the Pacific Northwestern region offer the least elbow room, just 805 sqft, having gotten 10% smaller since 10 years ago. The Southeastern region continues to splurge in size, with the average new apartment sized at 1,007 sqft in 2018, more than 200 sqft larger than Washington and Oregon state rentals. The only region where apartments are constant in size is the Midwest, where the 10-year change is a 1% increase in the average apartment size.

## CHANGE IN NEW APARTMENT SIZE BY REGION

Region	Average Size (sqft) New Apartments 2008	Average Size (sqft) New Apartments 2018	10-Year Change
California	974	858	-12%
Northeast	1,048	945	-10%
Pacific Northwest	890	805	-10%
South	1,022	931	-9%
Western	1,011	938	-7%
Mid-Atlantic	951	886	-7%
Southwest	975	930	-5%
Southeast	1,049	1,007	-4%
Midwest	934	947	1%

## APARTMENT SIZE BY CITY

### Tallahassee and Seattle apartments are at opposite ends of the charts

We ranked the top 100 cities with the largest rental stock in the country by the average size of their rental apartments. Given that the Southeast has the largest apartments, it's not surprising that the top cities with the biggest rentals are in that area. **Tallahassee, FL** (<https://www.rentcafe.com/apartments-for-rent/us/fl/tallahassee/>) offers its renters the most generous apartment size in the country, with an average square footage of 1,038 sqft across all apartments regardless of the year built. Moreover, the average floorplan of a new apartment built in the state capital in 2018 is a lavish 1,200 sqft, unchanged from ten years ago.

**Atlanta** (<https://www.rentcafe.com/apartments-for-rent/us/ga/atlanta/>) and three of its suburbs take 4 of the top 10 spots for cities with the largest rental apartments in the nation. The second most spacious apartments in the U.S. are in Marietta, GA (<https://www.rentcafe.com/apartments-for-rent/us/ga/marietta/>), boasting an average size of 1,025 sqft. Decatur, GA (<https://www.rentcafe.com/apartments-for-rent/us/ga/decatour/>) is fourth with 1,000 sqft, Norcross, GA (<https://www.rentcafe.com/apartments-for-rent/us/ga/norcross/>) is sixth, with an average apartment size of 991 sqft. Apartments in Columbia, SC are the third largest in the U.S., with an average living space of 1,006 sqft. Large-size apartments tend to be more common in lower cost, sprawled cities or suburban areas than in high-cost dense urban areas.

It's rare that New York is not first in something real estate related. With an average size of 711 sqft, **Seattle** apartments (<https://www.rentcafe.com/apartments-for-rent/us/wa/seattle/>) offer 20 sqft less than an average Manhattan rental, 171 sqft less space than the national average apartment of 882 sqft, and a whole 327 less square feet than apartments in Tallahassee. **Manhattan** and **Chicago** (<https://www.rentcafe.com/apartments-for-rent/us/il/chicago/>) are tied in second place, with apartments measuring 733 sqft on average, 149 sqft below the national average. Rental apartments in Washington, DC (<https://www.rentcafe.com/apartments-for-rent/us/dc/washington/>) and San Francisco, CA (<https://www.rentcafe.com/apartments-for-rent/us/ca/san-francisco/>) wrap up the top 5 of the nation's tiniest apartments. Other firm believers in "less is more" are Los Angeles, Phoenix

Accessory Dwelling Units

(https://www.rentcafe.com/apartments-for-rent/us/az/phoenix/), Detroit, Minneapolis

Index # - File Name: 1-06-us-average-apartment-size-in-the-us.pdf

(https://www.rentcafe.com/apartments-for-rent/us/mn/minneapolis/), and Cleveland, with apartments below 800 sq feet in size.

See the full list of apartment sizes by unit type in 100 U.S. cities.

## Apartments in Detroit saw the biggest reduction in size since 2008

Accessory Dwelling Units

Apartment in Detroit

Index # File Name

Apartment in Detroit have suffered the biggest cuts in size in the last ten years. The average size of a new apartment in Motor City in 2018 is 27% smaller than ten years ago, 720 sqft today compared to 988 sqft a decade ago. New apartments built in Phoenix this year are on average 871 sqft, 19% smaller than they were in 2008. Los Angeles apartments (<https://www.rentcafe.com/apartments-for-rent/us/ca/los-angeles/>), Boston apartments (<https://www.rentcafe.com/apartments-for-rent/us/ma/boston/>), and Irvine, CA apartments (<https://www.rentcafe.com/apartments-for-rent/us/ca/irvine/>) are also in the top 5 in terms of size reduction.

Rental apartments in Lubbock, TX, on the other hand, have seen a sizeable increase in space over the last decade, up 19%. Apartments built in Lubbock in 2018 average as much as 1,326 sq ft in size. New rentals in Lewisville, TX are only 891 sqft, an increase of 17% over 2008. Although rentals in San Francisco and Manhattan are among the smallest in the nation, they have been increasing in size in recent years, up by 13% and 12%, respectively, compared to 10 years prior. The newest apartments in San Francisco opened this year have an average size of 840 sqft. Newly-completed Manhattan apartments are on average 802 sq ft in size. Baltimore and Miami apartments (<https://www.rentcafe.com/apartments-for-rent/us/fl/miami/>) have each gained 9% in size on average. New apartments in Baltimore measure 871 sq ft on average, this year, while those in Miami 834 sqft.

## Ten-year changes in apartment rents and sizes

A few cities have seen dramatic changes in rents and size in opposite directions over the past decade. As Denver (<https://www.rentcafe.com/apartments-for-rent/us/co/denver/>) became one of the hottest rental markets in the country, apartment rents jumped 84% in the last 10 years, while the average size of apartments decreased by 11%. Nearby Colorado Springs saw a similar path, with rents up 66% and rental sizes down 6%. Another hot market, Seattle saw rent prices increase by 74% in 10 years, while the size of apartments increased by 4%. Renting in tech valley San Jose, CA today is 63% more expensive than a decade ago, while new apartments in the area are 4% smaller.

*\*Ten-year historical rent data not available in cities not listed.*

## Atlanta boasts the largest one-bedroom and two-bedroom floor plans in the U.S.

The largest studio apartments are in Irvine, CA, with an average floor plan of 586 sqft. Renters searching for a spacious one-bedroom rental will find the largest ones in Atlanta, GA, with 786 sqft of living space. Atlanta also offers the largest two-bedroom apartments, at 1,124 sqft, on average.

The tiniest studio apartments in the country are in **Reno, NV**, offering just 349 sqft of living space, on average, so tiny they could qualify as micro-apartments in other parts of the country. Then there are places where the size-standard of rental apartments is low by definition. **Tucson, AZ** is such a place. It has the smallest one-bedroom apartments in the U.S., measuring just 595 sqft, as well as the smallest two-bedroom apartments, which have an average size of 906 sqft.

## Methodology

This report was compiled by RentCafe.com (<https://www.rentcafe.com/>), a nationwide apartment search website that enables renters to easily find apartments and houses for rent throughout the United States. The apartment size and rent data were provided by Yardi Matrix (<https://www.yardimatrix.com/>), a RENTCafé sister company specialized in apartment market intelligence, providing up-to-date information on large-scale multi-family properties of 50 units or more in over 130 U.S. markets.

Unit types are categorized by the number of bedrooms (zero, one, two) as defined by Yardi Matrix. (<https://www.yardimatrix.com/About-Us/Our-Methods/How-We-Define-The-Apartment-Supply/Unit-Types>) The regions included in this report coincide with Yardi Matrix's market boundaries (<https://www.yardimatrix.com/Markets>) and may be different from regional boundaries as defined by other sources.

Accessory Dwelling Units

Rankings are based on the top 100 U.S. cities with the largest stock of apartments (sometimes referred to as "largest cities for renters") located in multi-family buildings of 50 units or more. To ensure a relevant sample size, we excluded cities where the number of units completed in one year was below 300 units. In the rare instances where no apartment data was available for 2018, the data for 2017 was used instead. Similarly, where no apartment data was available for 2008, data for 2009 was used instead. New York City data is available for the Manhattan borough only.

## WHY ACCESSORY DWELLING UNITS?

Across the United States, communities are experiencing challenges in building the housing they need to maintain affordability and accommodate future growth. Accessory dwelling units (ADUs), or separate small dwellings embedded within single-family residential properties, are an effective solution due to their low cost and immediate feasibility, with homeowners building in their own backyards.<sup>1</sup> In fact, California researchers suggest that such small-scale infill development could account for as much as half of new development capacity in coming decades.<sup>2</sup> Many cities and states have recently passed legislation easing zoning and permitting regulations for ADUs, most notably Senate Bill 1069/Assembly Bill 2299 in California, signed into law on January 1, 2017.<sup>3</sup>

Despite government attempts to reduce barriers, a widespread surge of ADU construction has not materialized.<sup>4</sup> The ADU market remains stalled. To find out why, this study looks at three cities in the Pacific Northwest of the United States and Canada that have seen a spike in construction in recent years: Portland, Seattle, and Vancouver. Each city has adopted a set of zoning reforms, sometimes in combination with financial incentives and outreach programs, to spur ADU construction. Due to these changes as well as the acceleration of the housing crisis in each city, ADUs have begun blossoming.

Based on a homeowner survey and stakeholder interviews, this report tells the story of successful ADU implementation in the three cities, to help policymakers enact more effective reforms. Homeowners in these cities have embraced ADUs because of the flexibility these units provide, with the ability to use the space as housing or office, for rental income or a friend/family member in need, depending on the circumstances. Because construction costs are relatively low, the housing produced is generally affordable: the majority of new ADUs are leased for below-market rents. Many homeowners experienced barriers in terms of zoning, permitting, or finance, but solutions emerged, often due to city actions.

The report begins with a brief review of previous research on barriers to identify the gaps in our knowledge. It then describes the context for ADUs in the three cities, including the policies each implemented to spur more construction. Next, the report turns to the survey methods and results. A conclusion suggests policy approaches to spur more ADU construction. Most prominent among them are efforts to make loans for ADU projects more accessible to more homeowners. This would be a difficult undertaking but one with a likely high payoff. In addition, providing city-approved manuals detailing the regulatory, design, and project management processes for ADU projects for homeowners, coupled with technical assistance and promotional efforts would also likely help boost production.

## UNDERSTANDING THE BARRIERS TO ADUS

Several factors clearly deter homeowners from constructing ADUs. Most prominent are the zoning and permitting barriers, including the building and lot regulations and permitting fees. These not only can make building an ADU physically infeasible, but also can constitute a psychological barrier for homeowners who already have minor code violations or face neighbor opposition with regard to new construction. Lack of capital is another challenge, with lenders hesitant to develop loan products tailored to this housing type. At a most basic level, homeowners—and even contractors—lack experience with the overall process, and can be too intimidated to even start.

Zoning laws put in place since the post-World War II housing boom have largely restricted ADU development in many US contexts.<sup>5</sup> Historically, even when states like California have taken specific steps to undo restrictive zoning practices, local governments continued to impose burdensome regulatory requirements and delay enactment of local laws.<sup>6</sup> Restrictions on parking, lot size, and setbacks can render ADU construction prohibitively expensive or impossible on many lots.<sup>7</sup> Beyond specific zoning practices, neighborhood group opposition to increased density can deter policymakers from allowing ADUs.<sup>8</sup> Yet, organized efforts to reverse regulatory barriers have increased, beginning with the American Association of Retired Persons, which wrote a model state law in 2000, and are now apparent in websites like [accessorydwellings.org](http://accessorydwellings.org).<sup>9</sup>

Many studies have explored financial barriers, including high upfront costs and the inability to access loans.<sup>10</sup> A study of Oregon ADU owners found that most owners actually built theirs out of cash savings.<sup>11</sup> Developers may not see adding an ADU as providing enough of a profit margin.<sup>12</sup> Structural challenges also make borrowing for an ADU difficult. Most lending institutions do not allow appraisals to factor in the expected rental income from an ADU to estimate market value of a residential property. Because of this and other factors, homes with ADUs were found in one study to be undervalued by up to 9.8%.<sup>13</sup>

Another barrier can be the experience level of the ADU developer. Those building ADUs tend to be homeowners unfamiliar with real estate and construction and see building an ADU as a major and risky project.<sup>14</sup> Navigating zoning and building codes could be a barrier for those not experienced with development, or concerned about city inspectors flagging unrelated code violations on their lot.<sup>15</sup>

The greater variety and prevalence of rental housing in Canada raise questions about how the institutional context may shape construction. For example, secondary suites (to use a Canadian term largely equivalent to attached ADUs)—both legal and illegal—have long been an important supply of rental housing across cities, towns, and rural areas.<sup>16</sup> In order to encourage the upgrading of units to meet building, fire and safety standards, many local governments have developed popular programs that provide inter-

ADU in Portland, photo credit: Tom Hudson's ADU, <http://www.accessorydwellings.org>.

est-free loans and forgivable grants.<sup>17</sup> Because the National Model Construction Codes provide the basis for provincial codes, regulations tend to be similar across municipalities, a streamlining that may aid developers.<sup>18</sup>

In addition to these regulatory and financial barriers, other contextual factors may affect how many ADUs get built. For instance, in some regions, ADUs are already part of the landscape, whether because of the architectural vernacular (in places where in-law units have commonly been built), cultural practices of multigenerational living, or high housing demand from immigrants, students, and other groups facing rental housing shortages (many living in unpermitted dwellings). In others, such as planned subdivisions or common interest developments managed by owners' associations, ADUs are rare or nonexistent. Likewise, a region's topography and amount of buildable land can shape ADU construction patterns; one obvious example is San Francisco, which has seen considerable backyard living due in part to its constrained geography.

What can cities do to spur implementation? A few case studies provide examples. The Austin Community Design and Development Center provides design and planning assistance to low- and moderate-income households and also partners with another venture to help build and manage ADUs on people's properties.<sup>19</sup> The City of Santa Cruz is often cited as a model for implementation, due to its multi-pronged approach to encouraging ADU construction via an ADU manual, architectural prototypes, loan fund, fee waivers, and community workshops.<sup>20</sup> Most recently, a local Habitat for Humanity branch has created the pilot My House My Home program to assist with ADU construction, allowing seniors to age in place.<sup>21</sup> However, no studies to date have identified which interventions work best to spur production. A deeper look at the success stories in the Pacific Northwest can help other cities devise successful ADU reforms.

## STORIES OF SUCCESS: PORTLAND, SEATTLE, AND VANCOUVER

As cities around the country try to ramp up ADU production, many look to the three large cities considered North American ADU leaders: Portland, Seattle, and Vancouver. The three share a regional ecological context (often called “Cascadia”) and hot housing markets: in all three cities, housing prices have increased in recent decades, particularly the past five years (Figure 1). As described next, interviews with local experts helped identify key factors behind the success in each city. For a description of ADU regulations in each city, please see Appendix A.

Figure 1. Percent Change in Housing Prices (2000=100).

Sources: House Price Index, Federal Housing Finance Authority (Seattle and Portland); House Price Index, Teranet and National Bank of Canada (Vancouver); Consumer Price Index, US Bureau of Labor Statistics.

## PORTLAND

ADU in Portland, photo credit: Kristy Lakin's ADU, <http://www.accessorydwellings.org>.

In the U.S., Portland, Oregon stands out for its success in enabling ADU construction. The city has seen a boom in ADU building in recent years: almost 2,000 ADU permits have been issued since 2010 (Figure 2).<sup>22</sup>

Portland's success can be attributed to a combination of regulatory, financial, and social factors:

- **Regulatory:** Portland stands out as one of the most progressive cities in the U.S. in terms of having permissive ADU regulations. The city has no owner occupancy requirement, no design review, a by-right process, and fee waivers.
- **Financial:** in 2010 the city waived one time System Development Charges (SDC) fees based on the new or increased use of a property (impact fees for parks, sewers, water, and streets that average 7% of the total cost of a new home)—a critical step to paving the way to more ADU production.<sup>23</sup>
- **Social:** in 2008 and 2009, green building advocates joined forces with ADU advocates to host bike tours and additional educational events. This educational push by the two different constituencies has gone a long way in increasing awareness and popularity of ADUs.<sup>24</sup>

*The importance of the system development charge waiver from the City of Portland for ADU's cannot be overstated. On my ~\$30k project, SDC's would have amounted to \$10-15k, making the project impossible.*  
—Portland homeowner

Figure 2. ADU permitting and reforms in Portland.

In addition to its hot housing market, Portland also features a supportive demographic in its aging population: Portland ADUs may be particularly well suited to serve older persons since they are disproportionately owned by 55-64 year olds.<sup>25</sup>

Portland advocates continue to push for more reforms. Advocates are currently working to bring back a loan product called 80/20 loans that had been available before the mortgage crisis. These loans made it possible to take out a second mortgage based on the improvement value of the new ADU. Another idea in the works is to develop a financing program similar to the property-assessed clean energy (PACE) model, which allows governments to finance the up-front cost of energy improvements, subject to repayment by the property owners.

## SEATTLE

Likewise, Seattle has experienced a growth spurt in ADU permitting and construction (Figure 3). However, this is perhaps due less to zoning reforms than to a hot housing market and an ongoing public discussion about potential policy reforms.

Seattle has allowed attached ADUs since the mid-1990s and detached ADUs (DADUs) since 2006 (Figure 3). From 2006 to 2009 a pilot program allowed DADUs to be constructed in specific areas. It went very well, leading the city to extend the program across Seattle in 2010. Until 2014, production was consistent but slow, but as the city began to study options to increase production, permit activity increased. After the city released this study and prompted further public discussion, even bolder changes were proposed, including removing parking requirements, changing owner occupancy requirements, and allowing both attached and detached ADUs.<sup>26</sup>

Seattle ADU, photo credit: City of Seattle.

To date, most ADU applications have come from wealthier homeowners, due in part to the escalating cost of construction (as much as \$250-300 per square foot). Still, city staff argue that because even new ADUs typically rent for less than conventional housing units, they provide a relatively affordable option in Seattle's expensive neighborhoods.

Jumpstarting the Market for ADUs

Figure 3. ADU permitting and reforms in Seattle.

Seattle ADUs, photo credit: City of Seattle.

## VANCOUVER

In Vancouver, the context for ADU construction was set by a decades-long battle over secondary suites. Secondary suites are basement or ground-floor apartments in single-family houses. Originally encouraged during World War II to alleviate housing shortages, secondary suites, many of which were not built to code, were subsequently considered a nuisance and made illegal; for three decades, the Council repeatedly passed legislation to improve enforcement. In the 1980s, Vancouver finally made it legal to house secondary suites in half of the city's single-family zones, and in 2004, permitted secondary suites citywide. A 2009 study found that there were at least 25,000 suites in Vancouver, most providing relatively affordable housing within less expensive homes.<sup>27</sup> Although the City has attempted to create a path to legalize secondary suites, the majority (with the exception of recently constructed units) remain illegal. Legal secondary suites are now often included in new single-family homes: between 2010 and 2015, 1,937 of the single-family homes built had secondary suites.<sup>28</sup>

Secondary suite in Vancouver, photo credit: Karen Chapple.

In the context of a hot housing market and a lack of vacant land, a new movement also began supporting new legislation to build laneway houses, or small detached houses built on single family lots facing the alley (or the “lane” in Canadian parlance). Vancouver’s urban form—with its grid layout, alleys intersecting many blocks, and deep residential lots (typically 33’ x 122’)—have made laneway dwellings possible. Support also came from the 2006 Vancouver Eco-Density Initiative, a city-led push to reduce greenhouse gas emissions, reuse infrastructure, and foster new green systems through more dense land use. The Council adopted laneway house regulations for the two largest single-family home districts in 2010, and then passed amendments allowing the dwellings citywide in 2013 (Figure 4). This last set of reforms permitted extra floor area (up to 940 square feet), eliminated the garage requirement (replacing it with an external parking pad), and allowed ministerial approval. There is no owner occupancy requirement for Vancouver’s laneway houses. Notably, institutions like Vancity, a local financial co-operative, provide loan products that are appropriate for laneway dwellings, for instance by allowing homeowners to count rental revenue as part of their income.

Figure 4. ADU (laneway housing) permitting and reforms in Vancouver.

Vancouver’s design context—the lanes and walkability of the city—as well as its high housing prices clearly contribute to the spurt in ADU construction. However, another key to its success has been the proactive and ongoing efforts by the city to provide technical assistance to homeowners and to amend ordinances to make it easier for homeowners to build. Careful design guidelines ensure that the new laneway houses will not intrude on the neighbors: decks and balconies are oriented to the lane, the upper floor has just 60% of the floor area of the main floor, there is a 16’ separation from the main house, and a 3’ landscaped setback at the lane. At present, there is more demand than the city can accommodate, and permitting is considerably backlogged.

Laneway house in Vancouver, photo credit: Karen Chapple.

## THE ROLE OF ADU REFORM

These three cases illustrate how ADU reform in a hot housing market can allow this dwelling type to play a major role in a city's mix of housing options. In Portland, Seattle, and Vancouver, ADUs accounted for only 3.0%, 0.8%, and 0.6%, respectively, of issued housing permits in 2009. In 2015, following key reforms in all three cities, this share had risen to 10.9%, 2.1%, and 6.3%, respectively.<sup>29</sup>

Similar cities that have only recently enacted zoning reforms demonstrate slower progress. Like the Cascadia cities reviewed in this report, both Salt Lake City, Utah and Austin, Texas have hot housing markets.<sup>30</sup> Yet, in Salt Lake City, only one ADU had been permitted in the city since September 2012 when the City Council adopted an ordinance permitting ADUs as of September 2015. The city is currently considering regulatory changes to requirements related to location, permit limit, building height, maximum square footage, lot area, and parking to jumpstart the market.<sup>31, 32</sup>

In Austin, the number of building permits issued was sluggish for many years, with practically no ADU permits issued until 2007, when the number of permits jumped to 32. In November 2015, the City Council approved a series of reforms that accelerated the number of permits to a projected 387 in 2017. It is important to note that there are at least a couple of additional factors that may contribute to this increase in permits: a) Austin is not landlocked—its city limits are still expanding outward, and b) Austin also has some very large infill tracts inside its city limits with new home building, including ADUs.

## SURVEY METHODOLOGY

This study surveyed homeowners in Portland, Seattle, and Vancouver who had built ADUs (or recently purchased a property with a new ADU). After obtaining a list of addresses in each city that had received a permit to build an ADU in the recent past, we sent postcards inviting homeowners to respond to our online survey instrument to a random sample of addresses. We sent three rounds of postcards to each home (for more details, see Appendix B). Of a total of 1,837 addresses contacted, we obtained 414 responses, for a 23% response rate, including an estimated 37% in Seattle, 26% in Portland, and 11% in Vancouver.<sup>33</sup> Of those, 71% completed the full survey.<sup>34</sup>

The sampling methodology created some bias. Most importantly, our sample only includes those who have successfully navigated the ADU construction process, from design to permitting to construction and occupancy. Thus, we were not able to obtain the views of those who had tried to build an ADU but failed. As a result, the report findings likely underreport the extent of the barriers homeowners face. In addition, there was likely some response bias as the homeowners most interested in responding to the survey were those with either a positive or negative experience. Finally, because we sent the postcard to the main address, rather than the ADU address, we may have inadvertently undersampled homeowner respondents who now live in the ADU.

## ADUS IN THE SURVEY: WHAT DO THEY LOOK LIKE, HOW WERE THEY BUILT, AND HOW ARE THEY USED?

In this section, we report some of the basic characteristics of the ADUs from the three cities and how their owners use them. Given that we only surveyed properties that had been granted ADU permits, most (77%) of our survey respondents reported having completed their ADUs, while 20% still had an ADU under construction, and the remainder had not yet begun construction. The ADU development and construction process was fresh in the minds of most of our respondents, since 87% had completed their project within the last five years and fully 27% had completed or were planning to complete theirs in 2017. (See Figure B1 in the Appendix B for the full breakdown by year completed.)

### Physical characteristics

Most (67 percent) of the ADUs in our sample are detached from the main building on the property (Table 1). We believe this reflects the greater propensity for homeowners with detached ADUs to seek construction permits, given that their ADUs are more likely to attract attention from code enforcement. Among detached ADUs, by far the most common type is a freestanding cottage (56%), while most of the rest are freestanding garages (25%) or converted garages (18%). Among attached ADUs, by far the most common configuration is a converted basement (65%), perhaps because it tends to be comparatively inexpensive to execute.

ADU Type	Share
Detached	67%
Stand-alone detached unit	56%
Apartment above or beside a new freestanding garage	18%
Freestanding garage converted to an apartment	18%
Apartment above or beside an existing freestanding garage	7%
Other	33%
Attached	65%
Part or all of basement converted to an apartment	12%
Attached garage converted to an apartment	11%
Attached addition to house	9%
Rooms inside main part of house converted to an apartment	4%
Other	
<b>Total</b>	<b>100%</b>

Table 1. ADU types among survey respondents (n = 265)

*Permit design restrictions did not allow me to add 200 additional square feet with additional garage space below despite having lot size and total developable square foot allowance on property - this would have helped the economics tremendously.*  
—Vancouver homeowner

*I think laneway houses should only be considered where there is good public transit. My neighbourhood has that and so we don't have as many two and three car households.*  
—Vancouver homeowner

As is typical for ADUs in general, most of the units in our sample are quite small; the majority of the ADUs we sampled were one bedrooms (52%) and most of the rest efficiency units (29%). Only 19% have two or more bedrooms. Very few of the 244 respondents, 5%, reported having more than one bathroom. While units in the sample ranged from as small as 220 to as large as 1,575 square feet, for the most part they are clustered between those extremes, with an average reported size of 631 square feet and a standard deviation of 237 square feet. Almost all, or 97%, of the respondents reported that their units adhered to the full definition of an ADU by including kitchens.

Most ADUs in the sample include at least some off-street parking spaces: 24% have one, 34% have two, and 17% have three or more. Only 12% of ADUs report including no off-street parking. Given the small sizes (detailed below) of ADU occupant households, these results suggest that it is unlikely that the recent wave of ADU construction in the three cities is materially contributing to on-street parking congestion.

### Cost characteristics

The average ADU in our sample cost its owner approximately \$156,000 to build, albeit with a considerable standard deviation of approximately \$120,000.<sup>35</sup> This total cost figure varies considerably by city, with almost double the cost per square foot in Vancouver as in Portland, and Seattle in-between (Figure 5). These costs are comparable to the square foot costs for multifamily construction.<sup>36</sup> However, it should be noted that ADU costs do not generally include land costs, owner profit, or underground parking structures. They also have much lower carrying costs because the duration of construction is so much shorter.

Construction labor (33%) and materials (34%), which vary little by city, are the two biggest cost components of the average ADU project (Table 2), shares that are not terribly dissimilar from commercial-scale real estate developments. Architecture and engineering are a little on the high side at about 8%, though this is not surprising given that ADUs are small projects. City permits account for about 8%, and utility connections about 5% (slightly less in Vancouver). Thirteen percent of costs fall into the “other” category, likely due to variations in how respondents interpreted the various categories. On the whole, these figures suggest that the opportunity for cities to reduce costs is probably quite limited beyond further relaxing land use restrictions that inhibit certain efficient types of construction, such as taller ADUs. Permit and utility connection waivers might help on the margins, but according to our figures would not yield a radical reduction in costs in the average case.

Figure 5. Reported Average ADU Project Cost Per Square Foot.  
 Note: error bars indicate one standard deviation above and below mean.

## Development team composition

Respondents (n=203) reported a variety of project delivery mechanisms to get their ADUs constructed. A design-build contractor was used in 25% of cases, while a traditional architect-contractor team was more common (40%). In 16% of cases, only a contractor (not doing design work) was involved in the project—presumably stock plans were used in these circumstances. These results suggest that homeowners are using a variety of teams to meet their goals, which could include simplicity (design-build), thoroughness (architect-contractor), and desire to economize on design costs (contractor only), depending on homeowners' individual preferences.

*This ADU was the first one for the builder so it was a learning process for all of us in various stages of ADU journey. (builder, site contractor, main home owners, and myself (a family member living in ADU)).*  
—Seattle homeowner

## Current or intended use of the ADU

A majority (51%) of our respondents reported that their ADUs are used as a current or intended primary residence, with a further 9% reporting they are used as extra space for main house residents (Figure 6). Thus 60% of ADUs are or will be used for the purposes of permanent housing, as compared to 12% for short term rentals. Several respondents commented that the planned use of the ADU for rental income made it possible for them to purchase the entire property. Our data therefore do not support the argument, sometimes brought up during public debates, that increased ADU production will not contribute to long-term housing for local residents because they will mostly be used for tourist rentals.

*"The cost of housing in Vancouver is astronomical. Most of the people that I know who have built laneway houses have done so to allow family members to have a place to live in the neighbourhood where they grew up."*  
—Vancouver homeowner

Cost component share	Average share of project budget
Construction labor	33%
Construction materials	34%
Architecture & engineering	8%
City permits	8%

Note: Actual total of these reported components differs slightly from 100% due to rounding.

Figure 6. Current use of ADU (n=255).

## Rental characteristics

The average ADU in our survey that was rented to a tenant garnered \$1,298 in monthly rent, with a considerable standard deviation of \$632. Surprisingly, the per-square foot rents do not differ significantly across the three cities (Figure 7). As is well-known from previous studies of ADUs, most ADU occupant households are small, consisting of either one person (57%) or two people (36%). Only 7% of cases have a different household composition.

*Overall we are very happy that the city of Seattle allows ADUs both for financial reasons and for the fact that an elderly family member is able to live nearby.*  
—Seattle homeowner

Figure 7. Average Reported Monthly Rent, \$/square foot (leased ADUs).  
Note: error bars indicate one standard deviation above and below mean.

In instances where there is someone living in the ADU, in a plurality of cases (46%) the ADU is rented by someone with an arms'-length relationship to the homeowner. Most of the remainder of cases consist of tenants that either receive or might be expected to receive favorable treatment from the landlord because of their relationship: a friend or family member staying for free (17%) or a friend or family member paying rent (12%).<sup>37</sup>

The majority of ADUs rent for below market rates whether rented at arm's length or not, and thus may be considered a form of affordable housing. Overall, 58% of homeowners report renting below the market rate, with only about 40% of these ADUs occupied by family or friends.

Homeowners with ADUs rented to tenants reported increasing the rent only once every 24 months or less often (or never) in 30% of cases, while 40% reported increasing rent every 7 to 12 months. Thus, we see that depending on individual circumstances and specific landlords, in a substantial number of cases renting an ADU can be a bargain over time from the tenant's point of view.

*We needed a housing option for my mother who is 68 now and in good health. Building an ADU was by far the least expensive option for us to own a dwelling for her. In addition, we've been surprised about the added benefits and flexibility the ADU has added.*  
—Portland homeowner

## CHALLENGES AND OPPORTUNITIES

In this section we report on results from the survey that shed light on challenges and opportunities in ADU development.

### Motivation for building ADUs

By far the two most common reasons respondents cited for deciding to build ADUs are extra income from a long-term rental (38%) and creating living space for a household member or helper (28%). Both short-term rentals and the desire for flexible future were cited at 11% apiece.<sup>38</sup> All other reasons add up to only 12%. Collectively, these results suggest that homeowners have a variety of motivations and that a substantial minority enter into the ADU development process with the expectation of the use of their ADUs changing over time. This suggests to us that public sector efforts to micromanage the uses in ADUs may be counterproductive for the goal of maximizing production.

The top three factors cited by respondents that led them to “pull the trigger” on initiating an ADU project (206 top three responses drawn from n=86 separate respondents) were, in descending order, easing of land use rules (42%), obtaining enough money to begin (19%), and learning about ADUs through an educational website, event, or tour (15%) (Figure 8). Among those who were asked a follow-up question after citing easing of land use rules as a factor (87 top three responses from n=42 separate respondents), by far the two most consequential were minimum lot size (n=37%) and allowable floor area (n=29%). Notably, it was in Seattle, which has yet to enact significant zoning reforms, that many respondents indicated a need to ease zoning rules.

Figure 8. Most important factors leading to the decision to build an ADU.

These results suggest that, as suspected, the easing of some land use restrictions on ADUs in the three cities have done a great deal to motivate ADU production. Further easing could help still more, particularly with respect to minimum lot size and maximum ADU size. At least some of those concerned about obtaining enough money to begin an ADU project could be encouraged through innovative financing products (discussed further below). Finally, the fact that websites, events, and tours promoting ADUs were almost tied for second as a

*We invited the neighbors to tour our ADU when finished.*  
 —Seattle homeowner

triggering factor for the ADU “build” decision suggests that these efforts have a high “bang for buck” ratio: they cost relatively little but can have a surprisingly large impact. Indeed, a prominent ADU builder and activist in Portland told us that promotional activities have been instrumental in accelerating ADU production in that city. Something as basic as informing members of the public that ADUs exist and that they are a viable option for many homeowners, it would seem, is surprisingly important.

### Biggest challenges faced by homeowners who successfully built an ADU

Of all the mentions of challenges faced by survey respondents in developing their ADU (i.e. those challenges that appeared in the top 3), by far the most common were obtaining a loan (34% of mentions) and paying for the cost of construction (18%). Almost 5% of respondents were turned down for loan finance on their first attempt, though most were able to overcome this problem by turning to another financial institution or product. Though opportunities to reduce cost of construction through public policy may be limited, these results confirm that interventions in the lending market for ADUs may have a significant impact on increasing ADU production.

*I LOVE my ADU. All of my neighbors love it, too. It is very cute and fits right into its setting behind our 1916 house. I was the 83 person in Seattle to get the permit to build a Backyard Cottage . The Seattle guide to building a backyard cottage is a very good resource.*  
 —Seattle homeowner

Figure 9. Source of Financing for ADU Development (n=210).

Note: Categories are mutually exclusive. "Borrowed against equity in existing property" and "Borrowed against expected future value of ADU" are sources of financing that in many cases were combined with other sources.

*It has been 15 years since we completed our ADU. I am disappointed in how it has affected the appraised value of our property. Appraisers can't find similar properties for comps and they do not consider the added value of the income in valuing the property.*  
 —Portland homeowner

## Financing source

To finance their ADU project, 30% of respondents used only their own cash. An additional 15% drew entirely on other personal resources such as credit cards (Figure 9). Among the remainder, 40% of respondents reported borrowing against the existing equity in their property in some way, such as via a Home Equity Line of Credit (HELOC) or a cash-out refinance. A paltry 4% reported borrowing, at least in part, against the future expected value of the unbuilt ADU to help finance its construction.

These results are, to us, a strong indication of a market failure. The low development costs and comparatively high rents obtained by ADUs ought to make it possible, in many cases, for homeowners to borrow against the future value of an unbuilt ADU, but this does not appear to be happening often.

Of the lending on ADU projects that does occur, locally-focused lenders seem to be disproportionately important. Of the 91 respondents who reported getting a loan of some type and who indicated what type of institution made the loan, 60% reported borrowing either from a credit union or a local or regional bank. Only 34% reported receiving a loan from a national bank. This suggests that efforts to encourage or create innovative financing products to ease ADU financing might most productively focus on partnerships with locally-focused lending institutions that already understand the local real estate market in general and ADUs in particular. Indeed, our interviewees suggested that some local and regional lenders, such as Vancity in Vancouver and Umpqua Bank in Portland, have already been instrumental in innovating ADU lending programs and practices.

**Financing is critical. With changing bank requirements for income, it seems anybody without a high-paying job is out of the running for an ADU. For example [t]he soon to retire or retired couple with a house almost paid off would not qualify for a refinance.**

**Neighbors! Many were supportive but a few objected to the city and made up spurious complaints which the city had to come out and inspect, though we were never cited as in violation of anything.**  
—Seattle homeowner

**On the whole, I can see the value in work being inspected, but the permitting process isn't something I'd ever hope to go through again. Next time I build a small house it'll be on wheels.**  
—Seattle homeowner

**Working with the City of Portland was a MAJOR pain. First acquiring information, then going through the multitude of steps. Information seemed to change as the project went along. It was SUPER frustrating.**  
—Portland homeowner

## Permit problems and project duration

Only 19% of respondents (n=209) reported being turned down for a permit. By far the largest number of those—almost half—overcame the setback by making design changes. On the other hand, 70% of respondents (n=200) experienced unanticipated events that led to delays and cost increases to the project. The most common issues (n=139 reported issues from 133 separate responses) are issues with the permitting process (36%), poor professional assistance (22%), and existing infrastructural problems (16%). From this we surmise that most homeowners enter into the ADU permitting process with a high probability of ultimate success—with the possible exception of Seattle, where respondents detailed having to overcome a variety of challenges with permitting. However, anything that could make the permitting process more transparent and predictable would likely be helpful. Such efforts could arise either from within local government, or via technical assistance provided by outside entities, such as architectural design and project management services provided at low cost by students under faculty supervision at local universities.

Even with a large majority of respondents reporting delays, ADU projects are still strikingly fast when compared to other types of real estate development. multifamily development projects, for example, routinely take three or more years from conception to opening. The equivalent time span for our respondents for their ADU projects (n=197) was 18 months or less in 83% of cases, and six months or less in just under a quarter. These “lean” schedules are driven by short construction phases, which take less than a year in 83% of cases and less than six months in 45%. Efforts to reduce these time periods might, therefore, achieve comparably little. However, better predictability in the development and permitting process would probably be quite helpful in avoiding delays. After all, delays may not faze a professional developer but are often aggravating and discouraging for everyday homeowners seeking to add an ADU to their properties.

*I have discovered that our local building codes and inspection regime add significant cost without, in many cases, adding significant value in terms of function or safety.  
—Seattle homeowner*

## Desired resources for aiding ADU development

When asked what resources they wished they had had while developing their ADUs, respondents (n=157) gave a variety of answers. The following responses (aside from “not applicable”) accounted for at least 60% of the total: professionals with ADU knowledge (24%); an easy-to-understand and comprehensive guide through the entire process (20%); better assistance from city government (15%); and better financing options (10%). The first desired resource, professionals with ADU knowledge, ought to begin to resolve as ADU production spreads and increases. Easy-to-understand and comprehensive guides through the entire process would be relatively easy and comparatively cheap for cities to produce, requiring perhaps several thousand dollars. As discussed earlier, intervening in the market for financing ADUs would likely be highly productive, but also would require a great deal of effort and lie at least partly out of cities’ purview. Thus, among these responses, the city-produced guide to the ADU development process stands out as truly “low hanging fruit” for municipalities interested in boosting their ADU production.

## CONCLUSION AND POLICY IMPLICATIONS

Despite the push for ADU reforms, prior to this study little was known about the extent to which they succeed at jumpstarting the ADU market. This survey of homeowners describes the unique role that ADUs play in hot housing markets, and how zoning reforms in particular have spurred construction. ADU owners in Portland, Seattle, and Vancouver value their ADUs as small and flexible spaces that can be built relatively quickly. Though built for a variety of purposes, the majority are actually affordable housing.

Three factors are key to the success of ADU implementation. First, in cities that have reformed their zoning regulations (particularly minimum lot size and floor area) production has jumped. Also important are minimizing design review and easing owner occupancy requirements. In general, homeowners appear to greatly value the ability to use an ADU flexibly—an ADU could be rented to a stranger today, used to house an aging parent tomorrow, and rented nightly to out-of-town visitors sometime later. For this reason, local governments need to resist the inevitable pressures to unduly restrict not only how they are built, but how they are used after they are built. If homeowners lack the confidence that a new ADU can be used in the way they see fit at the time they need it, fewer of them will commit the considerable financial and logistical resources to build one.

Second, waiving fees such as permit or utility connection fees can spur homeowners to build—but aside from such waivers it will be difficult to reduce construction costs for ADUs. ADUs are already likely the cheapest way to add housing units to a built-up neighborhood. This is not only because they are small, but also because they use a cheap, efficient form of construction, they can be built quickly, and, of course, because their land costs are zero.

Finally, cities that take steps to educate homeowners (for instance, via ADU manuals and prototype plans), as well as providing technical assistance, will likely see a payoff for relatively minimal cost and effort. A big part of winning hearts and minds in the battle for more ADUs is simply raising awareness. Local governments can play a catalytic role in publicizing the possibility for homeowners. Ideally, civil society groups will then pick up the mantle in promoting ADUs, advocating for better policies, and disseminating information that helps homeowners otherwise intimidated by the permitting, design, and construction processes. Along the way, the dominant narrative about ADUs can shift from their burdens and impacts to their benefits and even cultural cachet. We learned that this is exactly what has occurred in Portland over the past decade.

To date, no city has developed a comprehensive and fully effective approach to assisting homeowners with financing ADUs. As a result, aside from homebuilders, only the most affluent homeowners, who can tap into savings, are building ADUs. The robust growth in ADU construction seen in Portland and Vancouver and, to a lesser extent, Seattle, can accelerate further, reach a wider constituency, and spread to other large cities once new lending practices emerge that allow homeowners to borrow against the future value of the asset they seek to build on their own properties. These innovative financing models stand the best chance of success if local governments collaborate with lending institutions, particularly locally-focused ones such as credit unions, to bring them into being. If and when this “Holy Grail” of lending is achieved, the ADU market will truly be jumpstarted.

## NOTES

1. In certain densely-built urban regions, such as Los Angeles, opportunities may exist to incrementally add ADU-like units to residential properties that already include more than one home, such as duplexes or triplexes. However, in the vast majority of the metropolitan areas of the United States, including in the Pacific Northwest cities that we study, most urban territory is zoned for single-family housing only. This means that most opportunities for adding ADUs will come from single-family lots, and that is what we focus on in this study.

29. Portland ADU permit figures from "The Ascent of ADUs in Portland," February 27, 2017, [accessorydwellings.org](https://accessorydwellings.org) (URL <https://accessorydwellings.org/2017/02/27/the-ascension-of-adus-in-portland/>). Seattle and Vancouver ADU permit figures obtained from staff from each city. Note that Vancouver figures are likely an undercount as they only include laneway houses and infill homes (ADU-like units allowed on certain properties as part of a historic preservation strategy), and do not include secondary suites, for which annual issued permits totals are not maintained by the city. Overall Portland and Seattle building permit figures are from the Building Permits Survey of the US Census. Vancouver overall building permit figures are from BC (British Columbia) Stats.
30. Between 2011 and 2017, housing prices have increased by 42% in Salt Lake City, from \$193,758 to \$259,908, while in Austin, prices have increased by 56%, from \$198,950 to \$310,850 (in 2017 dollars), compared to a nationwide average increase of 25%. Sources: ZHVI All Homes (SFR, Condo, Co-op) Time Series (\$), <https://www.zillow.com/research/data/#median-home-value>
31. "Accessory Dwelling Units Amendment." Salt Lake City Planning Division. <http://www.slcgov.com/sites/default/files/documents/planning/2016/ADU%20Initiative.pdf>
32. Additionally, zoning changes will be necessary because ADUs are actually prohibited in most areas of the city. See "Growing SLC: A Five Year Housing Plan: 2017-2021." Salt Lake City Housing and Neighborhood Development. Draft February 2017. [http://www.slcdocs.com/hand/Housing\\_plan\\_short.pdf](http://www.slcdocs.com/hand/Housing_plan_short.pdf)
33. About 35% of respondents neglected to enter the survey ID that allowed us to identify their home city, making it challenging to determine response rate by city. We were not able to determine the distribution of these respondents, so in estimating the response rate, we assumed that the distribution of these respondents with unknown geographies was the same as those with known geographies.

34. Most (80%) of the incomplete surveys came from respondents with unknown geographies.
35. Because the economies of the US and Canada are so similar and intertwined, and because their respective currencies have at times been at parity, in this report we simply lump US and Canadian dollar figures together for simplicity and ease of comparison. See Ryan Macdonald, "Do Relative Canada/U.S. (United States) Prices Equate to the Exchange Rate?," January 2012, Statistics Canada, Economic Insights No. 003, Catalogue no. 11-626-X.
36. Source: RS Means, <http://learn.rsmeans.com/rsmeans/models>
37. Although the survey did not ask about situations in which the main house is rented and the ADU is occupied by the landlord, several respondents volunteered that this was their situation.
38. Several respondents noted in the comments that they rent via Airbnb, but did not select the short-term rental response option because they did not realize it was the same thing. Thus, the 12% figure may be a slight underestimate.

## APPENDIX B: SURVEY METHODOLOGY

### Compiling addresses of ADUs

#### Portland

Portland did not have a complete list of addresses with ADUs. However, there is an online database of building permits issued as far back as 2000. This provided a substantial share of the city's total permitted ADUs as they were only legalized a few years earlier. (Our interviewees told us that permit issuances were far lower in the earliest years.) This database allowed us to select building permits issued for ADUs since 2000. We found 1,569 addresses with ADU permits.

#### Seattle

Seattle also did not have a complete list of addresses with ADUs. However, the city released a report about backyard cottages that has addresses of homes with backyard cottages that received permits from 2011 to 2014. In addition, the city has a similar online database to Portland's from which we were able to get building permits issued for any type of ADU from 2012 to November 2016. We put these samples together and removed the duplicate addresses. This led us to have a total sample frame of 426 addresses with ADUs from Seattle.

#### Vancouver

City staff from Vancouver sent us a list of all ADUs permitted between 2011 and 2015, separating them into a list of addresses for secondary suites (attached ADUs) and a list of addresses for laneway homes (detached ADUs). There were 1,371 laneway suites and 2,573 secondary suites. In Vancouver, laneway homes are given a separate address from the main house, rather than being called "unit b" or something similar, as was the case for ADUs in Portland and Seattle. We were able, however, to find the main house addresses for these secondary suites. Additionally, in Vancouver it is possible to have one of each type of ADU, laneway house and secondary suite, on the same residential property, so some addresses have both a laneway home and secondary suite. Thus, we created a list of 423 addresses with both a laneway home and secondary suite, 2,158 homes with only a secondary suite and 922 homes with only a laneway suite.

### Creating samples

After compiling the addresses for the cities, we had to create samples. Wanting to get a consistent number of results among the cities, we decided to send equally sized samples to each city. Our budget allowed us to send postcards to more addresses than we had for Seattle, so we decided to send postcards to every address we had for Seattle — 426 — and to then send an equal number of postcards to Vancouver and Portland. This allowed us to send 713 postcards to each of those two cities. Given the unique conditions of the data for each city, we were able to stratify our samples somewhat. Portland offered an interesting split of permitting in early 2010 when the city decided to waive many of the development fees. Thus, we took two samples of addresses: i) up to and including March 2010 and ii) those from April 2010 and later. There were only 344 total addresses from the earlier time period, which is less than the 713 postcards we could send, so we sent postcards to all of those addresses and sent slightly more, 369, to the addresses that got permits in April 2010 and later. Finally, we did a similar split for Vancouver, sending about a third of the 713 postcards each to the three groups of addresses we made. So, we sent 238 postcards to addresses with only a secondary suite, 238 postcards to addresses with only a laneway house, and 237 postcards to addresses with both.

For the sake of simplicity in keeping track of these addresses, we issued each address a four-digit ID number with the first digit corresponding to the city. Survey respondents were asked to enter their code when taking the survey. This allowed us to remove the addresses whose occupants had already responded to the online survey from the second and third mailings of postcards.

## Sending the postcards

With the samples in place, we sent out the postcards in three rounds: from December 2016 to January 2017 in Portland and Seattle, and January to February 2017 in Vancouver. Postcards were addressed to the ADU Homeowner.

## Returned postcards

Approximately 8% (148) of the postcards were undeliverable. These were evenly distributed between Portland and Seattle. Just one postcard was returned from Vancouver, but this low total may be due to policies that limit returns across international borders. In Seattle, 1/3 were returned and most of the remainder because there was “no such number.” In Portland, 20% were vacant, almost 30% were “no such number,” and the remainder were “undeliverable as addressed.” These delivery problems may have occurred at addresses where the permitted ADUs had never actually been built. To calculate the response rate, we subtracted the returned postcards from the denominator.

## Responses by year completed

Figure B1. Number of Responses by Year ADU Completed, All Three Cities (n=215).

# The ABCs of ADUs

**AARP** is the nation's largest nonprofit, nonpartisan organization dedicated to empowering people 50 or older to choose how they live as they age. With nearly 38 million members and offices in every state, the District of Columbia, Puerto Rico and the U.S. Virgin Islands, AARP strengthens communities and advocates for what matters most to families: health security, financial stability and personal fulfillment. The AARP Livable Communities initiative works nationwide to support the efforts by neighborhoods, towns, cities, counties, rural areas and entire states to be livable for people of all ages.

# Welcome! Come On In

**AARP surveys consistently show that the vast majority of people age 50 or over want to remain in their homes and communities as they age rather than relocate**

We know from surveys by AARP and others that a majority of Americans prefer to live in walkable neighborhoods that offer a mix of housing and transportation options and are close to jobs, schools, shopping, entertainment and parks.

These preferences — coupled with the rapid aging of the United States’ population overall and decrease in households with children — will continue to boost the demand for smaller homes in more compact neighborhoods.

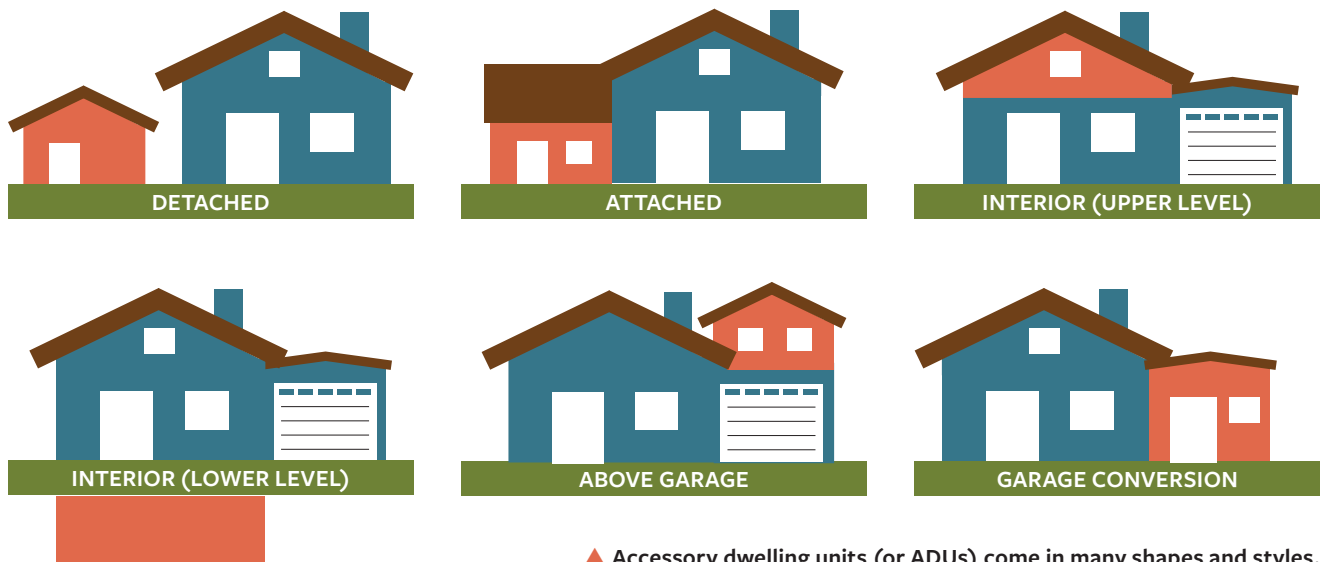

**As small houses or apartments that exist on the same property lot as a single-family residence, accessory dwelling units — or ADUs — play a major role in serving a national housing need.**

This traditional home type is reemerging as an affordable and flexible housing option that meets the needs of older adults and young families alike.

In fact, in the 2018 AARP Home and Community Preferences Survey, people age 50-plus who would consider creating an ADU said they’d do so in order to:

- provide a home for a loved one in need of care (84%)
- provide housing for relatives or friends (83%)
- feel safer by having someone living nearby (64%)
- have a space for guests (69%)
- increase the value of their home (67%)
- create a place for a caregiver to stay (60%)
- earn extra income from renting to a tenant (53%)

Since ADUs make use of the existing infrastructure and housing stock, they’re also environmentally friendly and respectful of a neighborhood’s pace and style. An increasing number of towns, cities, counties and even states have been adapting their zoning or housing laws to make it easier for homeowners to create ADUs.

▲ Accessory dwelling units (or ADUs) come in many shapes and styles.

**The ABCs of ADUs** is a primer for elected officials, policymakers, local leaders, homeowners, consumers and others to learn what accessory dwelling units are and how and why they are built. The guide also suggests best practices for how towns, cities, counties and states can include ADUs in their mix of housing options.

# ADUs Come in Many Shapes and Styles

**ADUs are a family-friendly, community-creating type of housing the nation needs more of**

Although many people have never heard the term, accessory dwelling units have been around for centuries (see page 6) and are identified by many different names. To be clear about what’s being discussed:

- An ADU is a small residence that shares a single-family lot with a larger, primary dwelling
- As an independent living space, an ADU is self-contained, with its own kitchen or kitchenette, bathroom and sleeping area
- An ADU can be located within, attached to or detached from the main residence
- An ADU can be converted from an existing structure (such as a garage) or built anew
- ADUs can be found in cities, in suburbs and in rural areas, yet are often invisible from view because they’re positioned behind or are indistinct from the main house
- Because ADUs are built on single-family lots as a secondary dwelling, they typically cannot be partitioned off to be sold separately
- An ADU can provide rental income to homeowners and an affordable way for renters to live in single-family neighborhoods
- An ADU can enable family members to live on the same property while having their own living spaces — or provide housing for a hired caregiver
- Unlike tiny houses (see page 17), ADUs are compact but not teeny, so they’re a more practical option for individuals, couples and families seeking small, affordable housing
- For homeowners looking to downsize, an ADU can be a more appealing option than moving into an apartment or, if older, an age-restricted community
- ADUs can help older residents remain in their community and “age in place”

CREATIVE COMMONS

▲ Accessory dwelling units show up in neighborhoods throughout the country — and even in pop culture. One example: In the sitcom *Happy Days*, Fonzie (right) rented an above-garage ADU from the Cunningham family in 1950s-era Milwaukee, Wisconsin.

## ADUs are also known as ...

Although most local governments, zoning codes and planners in the United States use the term *accessory dwelling unit* or *ADU*, these small homes and apartments are known by dozens of other names. The different terms conjure up different images. (Who wouldn’t rather live in a “carriage house” than in an accessory or “ancillary” unit?) Even if you’ve never heard of accessory dwelling units or ADUs, you have likely heard of — and perhaps know the locations of — some of the home types noted at right.

▲ Renting out this 350-square-foot garage-conversion ADU in Portland, Oregon, helps the property owner, who lives in the lot’s primary residence, pay her home mortgage.

- accessory apartment
- alley flat
- back house
- backyard bungalow
- basement apartment
- carriage house
- coach house
- garage apartment
- granny flat
- guest house or cottage
- in-law suite
- laneway house
- mother-daughter house
- multigenerational house
- ohana unit
- secondary dwelling unit
- sidekick

PHOTO AND LIST FROM ACCESSORYDWELLINGS.ORG

Since ADUs can be created in many different shapes and styles, they're able to fit discreetly into all sorts of communities, including suburban subdivisions, row-house streets (either with or without back-alleys), walkable town or urban neighborhoods — and, of course, large lots and rural regions.

◀ A **DETACHED ADU** (aka DADU) is a stand-alone home on the same lot as a larger, primary dwelling. Examples include backyard bungalows and converted outbuildings.

Location: Portland, Oregon | Photo by David Todd

▶ An **ATTACHED ADU** connects to an existing house, typically through the construction of an addition along the home's side or rear. Such units can have a separate or shared entrance.

Location: Davidsonville, Maryland | Photo by Melissa Stanton, AARP

◀ A **GARAGE ADU** makes use of an attached or detached garage by converting the space into a residence. Other options involve adding a second-story ADU above a garage or building a new structure for both people and cars.

Location: Portland, Oregon | Photo by Radcliffe Dacanay

An **INTERNAL ADU** is created when a portion of an existing home — an entire floor, part of a floor, or an attic or basement — is partitioned off and renovated to become a separate residence.

▶ Access to an **UPPER-LEVEL ADU** can be provided through a stairway inside the main home or directly from an exterior staircase. This 500-square-foot ADU sits atop a 1,900-square-foot primary dwelling.

Location: Portland, Oregon | Photo by Eli Spevak, Orange Splot LLC

▲ A **LOWER-LEVEL ADU** is typically created through the conversion of a home's existing basement (provided that height and safety conditions can be met), during construction of the house, or (see page 7) as part of a foundation replacement and house lift.

Location: Portland, Oregon | Photo by Derin Williams

# ADUs Are Good for People and Places

Communities that understand the benefits of ADUs allow homeowners to create them

## ADUs are an affordable housing option

- ADUs can generate rental income to help homeowners cover mortgage payments or simply make ends meet. The income provided by an ADU tenant can be especially important for older people on fixed incomes.
- Since the land on which an ADU is built already belongs to the homeowner, the expense to build a secondary residence is for the new structure only. The lot is, in a sense, free.
- ADUs are typically owned and managed by homeowners who live on the premises. Such landlords are less likely to raise the rent once a valued tenant has moved in. Many ADUs are created for family members to reside in for free or at a discounted rate.
- Although market rate rents for ADUs tend to be slightly more than for similarly sized apartments, they often represent the *only* affordable rental choices in single-family neighborhoods, which typically contain no studio or one-bedroom housing options at all.
- Some municipalities are boosting ADUs as part of affordable housing and anti-displacement strategies. Santa Cruz, California (see opposite), is among the cities with programs to help lower-income households build ADUs or reside in them at reliably affordable rents.

## ADUs are able to house people of all ages

- An individual’s housing needs change over time, and an ADU’s use can be adapted for different household types, income levels, employment situations and stages of life.
- ADUs offer young people entry-level housing choices.
- ADUs enable families to expand beyond their primary home.
- ADUs provide empty nesters and others with the option of moving into a smaller space while renting out their larger house or letting an adult child and his or her family reside in it.

## ADUs are just the right size

- Generally measuring between 600 and 1,000 square feet, ADUs work well for the one- and two-bedroom homes needed by today’s smaller, childless households, which now account for nearly two-thirds of all households in the United States.

## ADUs are good for the environment

- ADUs require fewer resources to build and maintain than full-sized homes.
- ADUs use significantly less energy for heating and cooling. (Of all the ADU types, internal ones tend to have the lowest building and operating costs.)

## ADUs are community-compatible

- ADUs offer a way to include smaller, relatively affordable homes in established neighborhoods with minimal visual impact and without adding to an area’s sprawl.
- ADUs provide a more dispersed and incremental way of adding homes to a neighborhood than other options, such as multistory apartment buildings. As a result, it’s often easier to get community support for ADUs than for other housing types.

### Big houses are being built, small houses are needed

**Do we really need more than three times as much living space per person as we did in 1950? Can we afford to buy or rent, heat, cool and care for such large homes?**

YEAR	1950	2017
Average square footage of new single-family homes	983	2,571
Number of people per household	3.8	2.5
Square feet of living space per person	292	1,012

**Fact:** ADUs house more people per square foot of living area than single-family homes do.

SOURCE: NATIONAL ASSOCIATION OF HOME BUILDERS (AVERAGE HOME SIZES); U.S. CENSUS BUREAU (AVERAGE HOUSEHOLD SIZES)

## HOME VISIT #1 Attached ADU Addition

Santa Cruz, California

Size: 500 square feet

AARP

- ▲ The area with the darker roof shingles is the ADU that was added onto the home of Carrie and Sterling Whitley.
- ◀ ▼ The Whitleys' ADU (that's Carrie showing off the front yard's new paths and plantings) has its own entrance on the side of the home and is being rented to the couple's daughter so she can help her elderly parents when needed.

When Carrie and Sterling Whitley bought their house in 1971, they paid less than \$15,000. Nearly 50 years later, similar homes on their street have sold for more than \$1 million.

**THE PROBLEM:** The Whitleys, who are in their 80s, own the house outright and don't want to move. But the financial and physical demands involved in maintaining the house are a challenge.

**A SOLUTION:** To help low-income homeowners age 62 or older live independently and keep their homes, the Monterey Bay affiliate of Habitat for Humanity and the City of Santa Cruz launched My House My Home: A Partnership for Aging-in-Place. The pilot program builds accessory dwelling units so older homeowners can downsize into a new, aging-friendlier home and earn rental income from their original house. Or such homeowners can remain in their house and rent out the new, smaller residence. Participating homeowners are required to charge an affordable rental rate.

**REALITY CHECK:** When the Whitleys' project broke ground in April 2017, they were the first homeowners to receive an ADU through the program, which worked with them to design the ADU as an addition to their existing home. Since the dwelling was built with accessibility features, Carrie and Sterling know they can downsize into it if they ever need to. Until then, their daughter, Brenda, resides in the addition.

**REAL LIFE:** "I'm right next door to my parents in case they need me or need any help," Brenda says.

*Design: Historic Sheds | Builder: Historic Sheds | Cost to build: \$158,000 in 2017 (not including volunteer labor) | Photos by Michael Daniel | Article adapted from Where We Live: Communities for All Ages (AARP 2018)*

**ADU ADVICE:** With an attached ADU, privacy between the two residences can be achieved by locating the ADU bedroom(s) and bathroom(s) as far as possible from the main house. Providing the ADU with its own yard or outdoor space is helpful too.

# ADUs Are an American Tradition

**While today's interest in ADUs may be new, the housing type is centuries old**

Early settlers often built a small home to live in while constructing their larger, primary house nearby.

When farming was a source of survival for most of the nation's households, families routinely constructed additional homes on their land when needed.

People with wealth and acreage regularly populated their lands with secondary mansions and ancillary buildings independent of the main estate house.

In fact, until the 20th century, people with land built as many homes as they wished. There were few or no zoning rules, municipal services or infrastructure (utilities, roads, schools, trash collection, first-responders) to consider.

A historic precedent for the modern day accessory dwelling unit is the "carriage house," or "coach house." Originally built for horse-drawn carriages, the structures associated with grander homes were frequently large enough to double as living quarters for workers and stable hands.

Decades later, in response to housing shortages and economic needs, many surviving carriage houses were

converted into rental homes. By becoming landlords, the owners gained income from their otherwise unused outbuildings.

Automobile garages have a similar history. Some were originally built with a housing unit upstairs. Over time, many garages were converted (often illegally or under zoning codes no longer applicable today) into small homes when the spaces became more valuable for housing people than vehicles.

With the rise of suburban single-family home developments following World War II, ADUs practically ceased to be built legally in the United States. Then as now, residential zoning codes typically allowed only one home per lot, regardless of the acreage and with no exceptions. Attached and detached garages occupied yard space that might otherwise have been available for ADUs.

Some cities, including Chicago, grandfathered in pre-existing ADUs — but only if the residences remained consistently occupied. In Houston's historic and trendy Heights neighborhood, old and new garage apartments are common and desired.

But elsewhere, even in rural areas with ample land, property owners are often prohibited from creating secondary dwellings. Many communities today don't allow new ADUs, even if they did in the past — and even if ADUs currently exist there. (Countless units in single-family homes or yards are technically illegal or are allowed simply because they were created when such residences had been legal.)

ADUs began making a comeback in the 1980s as cities explored ways to support smaller and more affordable housing options within single-dwelling neighborhoods. In 2000, in response to a growing demand for ADU-supportive guidelines, AARP and the American Planning Association partnered to release an influential model state act and local code for ADUs.

More recently, there's been renewed interest at the state and local levels (see page 8) in legalizing and encouraging the creation of ADUs, driven by the increasingly high cost of housing and, in some places, the belief that homeowners with suitable space shouldn't be so restricted in the use of their property.

▼ **This carriage house containing a one-bedroom, one-bath ADU above a two-car garage sits behind a six-level, Gilded Age, Hoboken, New Jersey, townhome that was built in 1883. The dual residence property was on the market in 2018 for \$5 million.**

## HOME VISIT #2

# Garage Apartment ADU

Denver, Colorado

**Size:** 360 square feet

▲ The apartment above the garage can be reached from inside the garage or from an exterior side entrance accessed from the yard it shares with the primary residence.

“I see our ADU as something very similar to a student loan,” says Mara Owen. “It’s something you invest in the future with. It was cheaper than buying a house for Mom, and it lets her have independence. It’s great knowing we can check in on her whenever.”

**AH-HA MOMENT:** Owen, her partner, Andrew, and their three dogs were sharing a one-bedroom, one-bath house with her mother, Diane. When Owen learned that ADUs were allowed in the city, she decided the best way to get more space for her small home’s many residents would be to remove their “leaky and defunct” garage and build a new two-car garage with an apartment above it.

**WISE ADVICE:** “Get a really great builder and architect,” says Owen. “Interviewing architects was similar to a first date. It’s not just who you feel connected with. That’s important, but get to the values. It’s a niche market, so see if you can find someone who has built ADUs before, because ADUs are a little different.”

**FUTURE PLANS:** The stairs to Diane’s apartment are wide enough for a stair lift, if it’s ever needed. The roof was built at the correct slope for the eventual installation of solar panels.

*Design: Hive Architecture | Builder: Hive Architecture | Cost to build: \$167,000 in 2016 | Photo by Mara Owen | Article adapted from “ADU Case Studies” by Lina Menard on AccessoryDwellings.org. Visit the website to read about and see photographs of more ADU projects.*

## HOME VISIT #3

# Basement ADU

Portland, Oregon

**Size:** 796 square feet

The transformation of this colorful Victorian was both a preservation and expansion project.

**TEACHING MOMENT:** “Here’s a very welcome breath of fresh air, especially in the face of so much gentrification that is going on in Portland!” declared Mark Lakeman, principal of Communitecture, an architectural, planning and design firm, about the pictured remodel. Writing on his company’s website, he says the project provides a lesson in how to “adapt and reuse our precious historic houses so they can accommodate more people while also providing more income to support the existing home.”

**HOW’D THEY DO IT?** To add a basement rental unit, engineers lifted the house. The resulting ADU is roughly four feet underground and four feet above.

▲ By lifting the house and digging beneath it, designers, engineers and builders turned a two-story, single-family home into a three-story, multifamily residence.

**THE ACHIEVEMENT:** Adds Lakeman: “Unlike the seemingly pervasive method of simply tearing down existing buildings so that new, giant ones can be built, this approach achieves upgrades in energy efficient living places and adds density while retaining the continuity of our beloved historical urban environment.”

*Design: Communitecture | Home Lift: Emmert International | Builder: Tom Champion | Cost to build: \$125,000 in 2015 | Photos by Communitecture (before) and Chris Nascimento (after)*

# The Time Is Now

## Rules for ADUs continue to evolve and frequently differ from one town to the next

Some communities allow almost any home to be set up with an ADU — so long as size limits, property line setbacks and placement caveats in relation to the primary dwelling are met.

Other communities start with those basic standards and then layer on extra requirements (see page 14) that can make it challenging to create an ADU.

Municipalities nationwide have been relaxing their restrictions against ADUs, and some states have been encouraging their creation by requiring communities to allow them.

- In 2017, California required all of its cities and counties to allow ADUs so long as the property owner secured a building permit. In Los Angeles, Mayor Eric Garcetti has said ADUs could provide the city with a needed 10,000 housing units. He’s touted ADUs as a “way for homeowners to play a big part in expanding our city’s housing stock and make some extra money while they’re at it.”
- That same year, a New Hampshire law established that local zoning codes had to allow ADUs nearly everywhere single-family housing was permitted. The change stemmed in large part from the frustration of builders who couldn’t construct the type of amenities, such as backyard cottages and garage apartments, that their clients desired.
- Oregon requires cities and counties of certain sizes within urban growth boundaries to allow ADUs in all single-family neighborhoods.
- As of 2019, major cities that allow ADUs include Anchorage, Alaska; Atlanta, Georgia; Austin, Texas; Denver, Colorado; Honolulu, Hawaii; Houston, Texas; Philadelphia, Pennsylvania; Phoenix, Arizona; Seattle, Washington; and Washington, D.C. Communities in Massachusetts, Kentucky, Illinois, Indiana and Oregon have sought advice from AARP and Orange Spout about revising their zoning codes to allow ADUs.

► **The unique floor plan of this single-family Maryland farmhouse allows for a first floor residence (accessed through the door on the right) and an upper-level ADU that can be reached through the entrance at left.**

### To Encourage ADUs

#### LOCAL OFFICIALS can ...

- allow all ADU types (detached, attached, interior)
- simplify the building permit process for ADUs
- waive or reduce permit and impact fees
- let garages be converted into ADUs without requiring replacement off-street parking
- allow a second ADU if one of the homes on the property meets accessibility standards

#### COMMUNITY PLANNERS can ...

- adopt simple, flexible but nondiscretionary ADU rules about setbacks, square footage and design compatibility with the primary dwelling

#### LENDERS can ...

- work with homeowners to finance the construction of ADUs by using renovation loans

#### ADVOCATES can ...

- organize tours of completed ADUs in order to inform and inspire the community
- educate homeowners, real estate agents, architects and builders about local zoning regulations and the permit process

#### REAL ESTATE AGENTS can ...

- educate themselves and their clients about rules for the construction of ADUs

#### LOCAL MEDIA can ...

- report on how and why homeowners build ADUs

PHOTO BY MELISSA STANTON, AARP

## HOME VISIT #4

### Internal ADU (Main Level)

**Portland, Oregon**

**Size:** 220 square feet

Even small homes can have enough space for an ADU. An underused main floor bedroom in this 1.5-story, 1,500-square-foot bungalow was transformed into a studio apartment.

**AH-HA MOMENT:** According to Joan Grimm, who owns the home with Rita Haberman: “What we were looking for in terms of a community and aging in place was right under our noses. Remove a fence and create a shared open space. Build a wall and create a second dwelling unit. It doesn’t have to be complicated.”

**REAL LIFE:** “Creatively carving out an ADU from the main floor of our house saved on design and construction costs,” Grimm adds. “It provides an opportunity for rental income, with no significant compromise to the livability of our home.”

▲ The steps and side entrance (top) lead to the studio apartment ADU, which was crafted out of an existing space. The covered porch to the right leads to the primary residence. The ADU contains a kitchen, small dining and living area, sleeping area, bathroom and laundry area.

*Design: Rita Haberman | Builder: RS Wallace Construction | Cost to build: \$55,000 in 2015 (with some work done by the homeowners)  
Photos courtesy Billy Ulmer | Article adapted from “ADU Case Studies” by Lina Menard on AccessoryDwellings.org*

## HOME VISIT #5

### Internal ADU (Lower Level)

**Portland, Oregon**

**Size:** 795 square feet

“We were looking for a way to live in our house for the rest of our lives and to generate at least some income in the process,” Robert Mercer and Jim Heuer wrote for the program guide of the annual Portland ADU Tour when their home was part of the lineup. “An ADU offers the possibility of caregiver lodging in the future or even a place for us to live while we rent out the main house if we get to the point where we can’t handle the stairs any longer.”

**THE SOUND OF SILENCE:** Internal ADUs often require that soundproofing insulation be installed between the primary dwelling and the accessory unit that’s below, above or beside it. In Portland, the building code for duplex residences requires a sound insulation rating of at least STCC45. To property owners thinking about a similar ADU setup, the duo advise: “Think about how you live in your home and

▼ The door to the right of the garage leads to a ground-floor ADU with windows along the back and side walls. The upper-level windows seen below are part of the main residence.

how having downstairs neighbors will change what you can and can’t do with your space and what investment you are prepared to make in sound insulation.”

**AN ADDED BONUS:** “We are pleased that we have been able to provide more housing density on our property and still be in keeping with the historic character of our home.”

*Design: DMS Architects | Builder: Weitzer Company | Cost to build: \$261,000 in 2016 | Photo by Melissa Stanton, AARP | Article adapted from the 2017 ADU Tour project profiles on AccessoryDwellings.org*

# Bringing Back ADUs

The reasons for creating or living in an ADU are as varied as the potential uses

ADUs are flexible. Over time, a single ADU might be used in many ways as an owner's needs and life circumstances change. Following are just a few reasons why ADUs are created and by whom:

**EMPTY NESTERS** can build an ADU and move into it, then rent out the main house for supplemental income or make it available to their adult children.

**FAMILIES WITH YOUNG CHILDREN** can use an ADU as housing for a nanny or au pair or even a grandparent or two, who can then help raise their grandkids and be assisted themselves as they age.

**INDIVIDUALS IN NEED OF CARE** can reside in an ADU to be near family members, or they can use the ADU to house a live-in aide. (In fact, ADUs can be an affordable and more comforting alternative to an assisted-living facility or nursing home.)

**HOME BUYERS** can look forward to the rental income from an ADU to help pay their mortgage or finance home improvements, especially in expensive housing markets.

**HOME-BASED WORKERS** can use an ADU as their office or workshop.

**HOMEOWNERS** can use an ADU for guests or as housing for friends or loved ones who:

- aren't yet financially independent, such as new high school or college graduates
- need temporary housing due to an emergency or while renovating their own home
- have disabilities but can live independently if family reside nearby

▲ The zoning code in Evanston, Illinois, permits accessory dwelling units, creating an opportunity for the owners of this 1911 home with an outbuilding in the backyard.

## Planning and Paying for ADUs

Most new homes are built by developers, entire subdivisions at a time. Apartments are also built by pros.

But ADUs are different.

Although ADUs are occasionally designed into new residential developments, the vast majority are created by individual homeowners after they move in. In other words, ADUs are usually created by enthusiastic and motivated *amateurs*.

An ADU may present the ultimate chance for a do-it-yourselfer to build his or her small dream home. More often, homeowners bring in a combination of architects, designers and construction contractors to do the work, much as they would for a home addition or major kitchen remodeling. The local municipality's planning department can provide guidance on the rules for ADUs and information about what permits, utility connections and fees are involved.

ADUs aren't cheap, and they are often the most significant home improvement project a homeowner will undertake.

Although internal ADUs can sometimes be built for about \$50,000, new detached ADUs often exceed \$150,000. Most ADUs are financed through some combination of savings, second mortgages, home equity lines of credit and/or funds from family members (sometimes a relative who ends up living in it).

In some areas, the cost of building an ADU can be recouped after a few years of renting it. If that's the plan, it's worth estimating the expenses versus the potential income before undertaking an ADU project.

A few cities, nonprofits and start-ups are experimenting with creative financing options that could put ADUs within reach for more homeowners and their families, as well as prospective renters.

## HOME VISIT #6 Detached ADU (One-Story)

Decatur, Georgia

**Size:** 800 square feet

When Walt Drake decided to downsize, his son Scott purchased his dad's house for himself and his family and built a detached ADU (or DADU) for Walt.

“From not finding what we wanted for Dad, we decided to create it,” says Scott. “Neighborhoods built in the 1920s have carriage houses. Building an ADU was a modern day version of something people have been doing on their property in this area for a hundred years.”

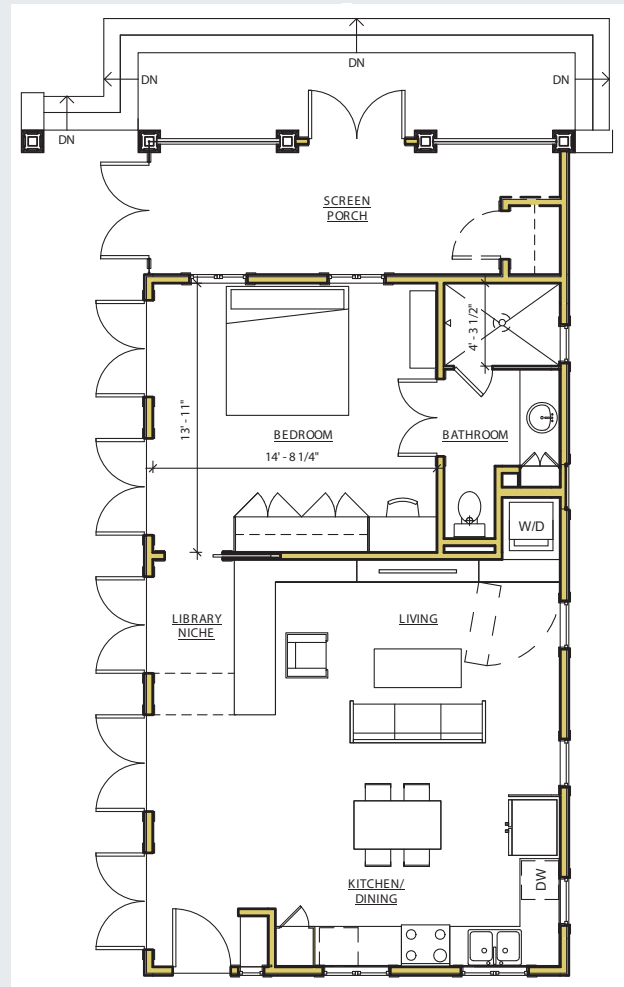

**NEAR AND FAR:** “We wanted the houses to be separate and to feel like we're each on our own property, but we're there for each other,” says Scott.

**AGING-FRIENDLY:** Building the ADU meant Walt didn't have to sell his home and leave his neighborhood. “He was able to keep his own stuff and turn over what he didn't need to us,” says Scott. “It kept my dad in place, which I think was important.”

**FUTURE PLANS:** Scott says the ADU is “serving its intended purpose” but that someday down the road it could be used as a long- or short-term rental. “The ADU could turn into lots of different things over the course of its lifetime.”

*Design: Adam Wall, Kronberg Wall | Builder: Rob Morrell | Cost to build: \$350,000 in 2014 | Photo by Fredrik Brauer | Floor plan by Kronberg Wall Architects | Article adapted from “ADU Case Studies” by Lina Menard on AccessoryDwellings.org*

▲ Walt Drake's Southern-style, one-bedroom ADU has an outdoor, wraparound porch that can be accessed without using steps. The design is in keeping with other buildings in the neighborhood.

# ADUs Are Age-Friendly Housing

## New-construction ADUs can be created with “universal design” features

An “age-friendly” home has a zero-step entrance and includes doorways, hallways and bathrooms that are accessible for people with mobility differences. Garage conversions (such as the one pictured on page 2) are among the easiest and least expensive ADU solutions for aging in place since they’re preexisting structures and generally have no-step entries. To learn more about making a home aging-friendly, download or order the *AARP HomeFit Guide* at [AARP.org/HomeFit](http://AARP.org/HomeFit).

### HOME VISIT #7

## Detached ADU (Two-Story)

**Seattle, Washington**

**Size:** 800 square feet

Evelyn Brom’s plan was to build a backyard cottage and rent it out. She would keep living in her two-bedroom home.

**AH-HA MOMENT:** As the design developed, Brom realized that *she* wanted to live in the stunning wood-and-glass ADU. It was a good decision. A week before moving in, Brom was laid off from her job.

**REAL LIFE:** The \$3,000 a month Brom receives in rent for the main house (which is occupied by a three-generation family) provides a needed income. “Being laid off has made this arrangement a lifesaver,” Brom says. If the stairs in the cottage ever become too hard to navigate, she can move back into her original one-story house and rent out the cottage instead. “Now I have options,” she says.

▲ There’s a powder room, open kitchen and living room on the first floor, with a bedroom and bathroom upstairs.

◀ Although Brom’s property is only 0.13 acres, it’s large enough to accommodate two homes, a patio, a lawn and a garage. A slatted wood fence with a gate divides the space between the two houses and provides privacy.

*Design: Chrystine Kim, NEST Architecture & Design | Builder: Ian Jones, Treebird Construction | Photo by Alex Hayden | Cost to build: \$250,000 in 2014*  
 Article adapted from *Where We Live: Communities for All Ages* (AARP 2018)

## HOME VISIT #8

# Detached Bedroom

**St. Petersburg, Florida**

**Size:** 240 square feet

Bertha and her son John talked about someday buying a house with a mother-in-law suite. “Then one day someone came along and wanted my house, so I up and sold it,” she explains. “But that left me homeless. I asked John if I could build a small house in his backyard and he agreed.”

**CREATIVE THINKING:** A detached bedroom is a permanent, accessory structure that, unlike ADUs, lacks a kitchen. But that’s what makes these cabin-like homes more affordable to build than many ADUs and even tiny houses.

**WHAT’S INSIDE:** Bertha’s home contains a sleeping and living area and a full bathroom. “I paid for the little house and it’s on my son’s property. So I figured, if I’m cooking I can do it at my son’s house,” she says. (Her laundry is also done at his house.)

▲ A detached bedroom, which contains a bathroom but no kitchen, can provide housing for a loved one or serve as a home office or guest cottage.

**REAL LIFE:** “Having access to my son’s house makes it livable. Otherwise, I personally would not be happy. It’s very comforting to know that John is close by. Hopefully this will be my home forever.”

*Design: Historic Sheds | Builder: Historic Sheds | Cost to Build: \$50,000 in 2017 | Photo by Historic Sheds | Article adapted from “ADU Case Studies” by Lina Menard on AccessoryDwellings.org*

## A Sustainable and Sunny ADU

Tired of living in a house with so many walled off and dark spaces that the sun couldn’t shine in, the home’s owners built and moved into the bright, airy, modern and very accessible ADU they created in their yard. (The original, larger home has become a rental.) The ADU is located within a conservation district and was constructed using sustainable materials and environmentally friendly techniques. One such feature is the deck trellis, which allows light in while diffusing the heat of the afternoon sun.

▲ Although this ADU has only 721 square feet of living space, there is room enough for two bedrooms.

*Design: Propel Studio | Builder: JLTB Construction | Photo by Josh Partee | Cost to build: \$185,000 in 2017 | Article adapted from “ADU Case Studies” by Lina Menard on AccessoryDwellings.org*

# Practical Solutions for ADUs

## Local laws can both allow and appropriately control the creation of accessory dwellings

There are more than 19,000 cities, 16,000 towns and 3,000 counties in the United States. Regulations about ADUs are typically written or adopted at the local government level.

Where it's legal to build ADUs, homeowners still need to follow rules about where it can be done, how tall they can be, how many square feet they can contain, what they can look like and how they can be used. These rules can be found in the local zoning code.

Over the past few decades it has become clear that there's a balance to strike between the strictness of ADU regulations and how often ADUs get built.

For instance, after Portland, Oregon, relaxed its ADU rules in 2010 and waived impact fees (a savings of up to \$12,000), the number of ADUs built there increased from about 30 per year between 2000 and 2009 to practically one ADU a day in 2015.

Changes in California's ADU laws allowed Los Angeles to achieve an even more dramatic increase, going from 80 permit applications in 2016 to nearly 2,000 in 2017. Allowing both an ADU and a "Junior ADU," or JADU — an interior ADU of 500 square feet or fewer — on properties in Sonoma County were among the urgent

policies adopted in the wake of Northern California's many devastating fires.

Meanwhile, in many jurisdictions, well-intentioned but burdensome rules can stymie the creation of ADUs. ADU-related zoning codes should be restrictive enough to prevent undesirable development but flexible enough that they actually get built.

When a community is worried about a potentially undesirable outcome, it can — and many do — craft regulations to prevent particular building types, locations or uses. A city concerned about the environmental impact of new structures might prohibit placing detached ADUs in precarious locations, such as on steeply sloping lots. Communities wary of ADUs becoming, for instance, off-campus student housing could establish occupancy rules.

Every community has its own priorities and concerns, and there's a wide enough range of regulatory controls that communities can write appropriate ADU rules.

This inherent flexibility in the form and function of ADUs allows them to pass political muster and get adopted in a wide range of places. (See page 16 for more about uses and rules.)

### Rules that discourage ADUs

- ADU-specific regulations that don't also apply to primary dwellings (e.g., owner-occupancy requirements)
- complex design compatibility criteria and approval steps
- off-street parking requirements beyond those required for the primary dwelling
- restrictions that limit ADUs to certain geographic areas, particular zoning categories or to large lots
- caps on square footage relative to the primary house that make it easy to add an ADU to a large home but hard or impossible to add one to a small home

**TRADING SPACES:** An ADU is always the smaller of two dwellings on a property, but it's possible for an existing home to become the ADU when a larger house is built and becomes the primary dwelling.

### Are ADUs allowed in your community?

**Find out by calling the office in charge of land use and permits or stopping by in person. You can also search for and read the zoning code through the local government's website.**

- If ADUs are allowed, ask what conditions, permit needs and impact fees apply.
- If ADUs are not allowed in your community and you want them to be, ask an elected official or the local department of zoning and planning for information about how the codes can be updated. Then get organized and start advocating!

# Creating (or Understanding) an ADU Zoning Code

**The ADU section of a community’s zoning code needn’t be overly complicated. It just needs to establish clear, objective and fair rules for the following:**

**1. A Definition:** A good zoning code clearly defines its terminology. Here, for example, is a useful outline for what, in the real world, is a very fluid term: “An ADU is a smaller, secondary home on the same lot as a primary dwelling. ADUs are independently habitable and provide the basic requirements of shelter, heat, cooking and sanitation.”

**2. The Purpose:** This is where the code describes key reasons a community allows ADUs. They should:

- increase the number of housing units while respecting the style and scale of single-dwelling development
- bolster the efficient use of existing housing stock and infrastructure
- provide housing that’s affordable and respond to the needs of smaller, changing households
- serve as accessible housing for older adults and people with disabilities

**3. Eligibility:** Who can build an ADU and on what type of property? A statement in this part of the code clarifies that an ADU can be placed only on a “residentially zoned, single-family lot.” (Some communities provide lot size standards, but many don’t.)

**4. Creation:** This is where the code sets out how an ADU can be built. For instance: “An ADU may be created through new construction, the conversion of an existing structure, as an addition to an existing structure or as a conversion of a qualifying existing house during the construction of a new primary dwelling on the site.”

**5. Quantity:** Most municipalities that permit ADUs allow one per lot. Vancouver, British Columbia; Sonoma County, California; and Tigard, Oregon, are among the few that allow two per lot (typically one internal and one external). Some communities also allow duplexes or townhomes to have ADUs, either in the backyard or on the ground floor.

**6. Occupancy and Use:** A code should state that the use-and-safety standards for ADUs match those that apply to the primary dwelling on the same property. (See page 17 for more about ADU uses.)

**7. Design Standards:**

- **Size and height:** A zoning code might specify exactly how large and tall an ADU is allowed to be. For instance, “an ADU may not exceed 1,000 square feet

or the size of the primary dwelling, whichever is smaller.” Codes often limit detached ADUs to 1.5 or 2 stories in height. (An example of that language: “The maximum height allowed for a detached ADU is the lesser of 25 feet at the peak of the roof or the height of the primary dwelling.”)

- **Parking:** Most zoning codes address the amount and placement of parking. Some don’t require additional parking for ADUs, some do, and others find a middle ground — e.g., allowing tandem parking in the driveway and/or on-street parking. (See page 16 for more about parking.)
- **Appearance:** Standards can specify how an ADU’s roof shape, siding type and other features need to match the primary dwelling or neighborhood norms. Some codes exempt one-story and internal ADUs from such requirements. (See page 16 for more about making sure that ADUs fit into existing neighborhoods.)
- **Entrances and stairs:** Communities that want ADUs to blend into the background often require that an ADU’s entrance not face the street or appear on the same facade as the entrance to the primary dwelling (unless the home already had additional entrances before the ADU was created).

**8. Additional Design Standards for Detached ADUs:**

- **Building setbacks:** Many communities require detached ADUs to either be located behind the primary dwelling or far enough from the street to be discreet. (A code might exempt preexisting detached structures that don’t meet that standard.) Although this sort of rule can work well for neighborhoods of large properties with large rear yards, communities with smaller lot sizes may need to employ a more flexible setback-and-placement standard.
- **Building coverage:** A code will likely state that the building coverage of a detached ADU may not be larger than a certain percentage of the lot that is covered by the primary dwelling.
- **Yard setbacks:** Most communities have rules about minimum distances to property lines and between buildings on the same lot. ADUs are typically required to follow the same rules.

Visit [AARP.org/ADU](https://www.aarp.org/adu) to see examples of ADU zoning codes from selected cities.

# ADU “Hot Topics”

**As communities allow ADUs or update existing zoning codes and rules to be more ADU-friendly, they inevitably wrestle with some or all of the following issues:**

## Adding ADUs to neighborhoods

Recognizing that ADUs may represent a new housing type for existing neighborhoods, communities often write special rules to ensure they'll fit in well. These guidelines typically address visual compatibility with the primary dwelling, appearance from the street (if the ADU can be seen) and privacy for neighbors.

Rules that help achieve these goals include:

- height and size caps mandating that ADUs be shorter and smaller than the primary dwelling
- requirements that detached ADUs be behind the main house or a minimum distance from the street
- mandates that the design and location of detached ADUs be managed the same way as other detached structures (e.g., garages) on the lot
- design standards for larger or two-story ADUs so they architecturally match the primary dwelling or reflect and complement neighborhood aesthetics
- encouragement for the creation of internal ADUs, which are often unnoticed when looking at the house

Each community can strike its own unique balance between strict rules to ensure that ADUs have a minimal impact on neighborhoods and more flexible rules that make them easier to build.

▼ A top floor ADU can be a suitable rental for a student or someone who travels a lot for work. ADU expert Kol Peterson grew up in a home with an attic ADU that was usually rented to law school students. “They had to walk up the primary house’s interior stairs in order to access the affordable attic unit,” he writes in *Backdoor Revolution: The Definitive Guide to ADU Development*. “Over the years that each of them lived there, the tenants became parts of our family.”

## Providing places to park

ADU regulations often include off-street-parking minimums on top of what’s already required for the primary dwelling. Such rules can prevent homeowners from building ADUs if there’s insufficient physical space to accommodate the parking. However, additional parking often isn’t needed.

Data from Portland, Oregon, shows that there are an average of 0.93 cars for each ADU, and that about half of all such cars are parked on the street. With fewer than 2 percent of Portland homes having ADUs (the highest percentage in the country), there is about one extra car parked on the street every six city blocks. This suggests that any impacts on street parking from ADUs are likely to be quite small and dispersed, even in booming ADU cities.

More-realistic parking rules might:

- require the creation of new parking only if the ADU displaces the primary dwelling’s existing parking
- waive off-street-parking requirements at locations within walking distance of transit
- allow parking requirements for the house and ADU to be met by using some combination of off-street parking, curb parking, and tandem (one car in front of the other) parking in a driveway

## Dealing with unpermitted ADUs

It’s not uncommon for homeowners to convert a portion of their residence into an ADU in violation (knowingly or not) of zoning laws or without permits.

Such illegal ADUs are common in cities with tight housing markets and a history of ADU bans. One example is New York City, which gained 114,000 apartments between 1990 and 2000 that aren’t reflected in certificates of occupancy or by safety inspections.

Some cities have found that legalizing ADUs, simplifying ADU regulations and/or waiving fees can be effective at getting the owners of illegal ADUs to “go legit” — and address safety problems in the process.

## Allowing and Restricting Uses

Communities get to decide whether to let ADUs be used just like any other housing type or to create special rules for them. Some municipalities take a simple approach, regulating ADUs just as they do other homes. So if a home-based childcare service is allowed to operate in the primary dwelling, it is also allowed in an ADU. Conversely, communities sometimes adopt ADU-specific regulations in order to avoid undesirable impacts on neighbors. Examples include:

### Limiting short-term rentals

ADUs tend to work well as short-term rentals. They're small and the owner usually lives on-site, making it convenient to serve as host. However, if ADUs primarily serve as short-term rentals, such as for Airbnb and similar services, it undermines the objective of adding small homes to the local housing supply and creating housing that's affordable.

In popular markets, short-term rentals can be more profitable than long-term ones, allowing homeowners to recoup their ADU expenses more quickly. In addition, short-term rentals can provide owners with enough income that they can afford to occasionally use the ADU for friends and family.

A survey of ADU owners in three Pacific Northwest cities with mature ADU and short-term rental markets found that 60 percent of ADUs are used for long-term housing as compared with 12 percent for short-term rentals.

Respondents shared that they "greatly value the ability to use an

ADU flexibly." For instance, an ADU can be rented nightly to tourists, then someday rented to a long-term tenant, then used to house an aging parent. ADUs intended primarily for visiting family are sometimes used as short-term rentals between visits.

Cities concerned about short-term rentals often regulate them across all housing types. If there are already rules like this, special ones might not be needed for ADUs. An approach employed in Portland, Oregon, is to treat ADUs the same except that any financial incentives (such as fee waivers) to create them are available only if the property owner agrees not to use the ADU as a short-term rental for at least 10 years.

### Requiring owner-occupancy

Some jurisdictions require the property owner to live on-site, either in the primary house or its ADU. This is a common way of addressing concerns that absentee landlords and their tenants will allow homes and ADUs to fall into disrepair and negatively impact the neighborhood.

Owner-occupancy rules are usually implemented through a deed restriction and/or by filing an annual statement confirming residency. Some cities go further, saying ADUs can be occupied only by family members, child- or adult-care providers, or other employees in service of the family.

Owner-occupancy requirements make the financing of ADUs more difficult, just as they would if applied to single-family homes. But as ADUs have become more common, owner-occupancy restrictions have become less so, which is good. Such requirements limit the appraised value of properties with ADUs and reduce options for lenders should they need to foreclose.

Enforcing owner-occupancy laws can be tricky, and the rules have been challenged in courts, sometimes successfully. However, according to a study by the Oregon Department of Environmental Quality, more than two-thirds of properties with ADUs are owner-occupied even without an owner-occupancy mandate.

## While not technically ADUs, tiny houses can serve a similar purpose

▶ Because tiny houses — such as the 100-square-foot "Lucky Penny," pictured — are built on a trailer with wheels rather than on a fixed foundation, they are typically classified as recreational vehicles (RVs) rather than permanent residences. Although tiny homes are usually smaller than 400 square feet, many of them do contain a kitchen and bathroom.

ABOVE-GARAGE ADU

DETACHED-BEDROOM ADU

DETACHED ADU

- An accessory dwelling unit is a small residence that shares a single-family lot with a larger primary dwelling.
- As an independent living space, an ADU is self-contained, with its own kitchen or kitchenette, bathroom and living/sleeping area. (Garage apartments and backyard cottages are each a type of ADU.)
- ADUs can enable homeowners to provide needed housing for their parents, adult children, grandchildren or other loved ones.
- An ADU can provide older adults a way to downsize on their own property while a tenant or family member resides in the larger house.
- Since homeowners can legally rent out an ADU house or apartment, ADUs are an often-essential income source.
- ADUs help to improve housing affordability and diversify a community's housing stock without changing the physical character of a neighborhood.
- ADUs are a beneficial — and needed — housing option for people of all ages.

**CENTRAL PUGET SOUND  
GROWTH MANAGEMENT HEARINGS BOARD  
STATE OF WASHINGTON**

1000 FRIENDS OF WASHINGTON,	)	<b>Case No. 04-3-0018</b>
	)	
Petitioners,	)	
	)	<i>(1000 Friends IV)</i>
v.	)	
	)	
SNOHOMISH COUNTY,	)	<b>FINAL DECISION and ORDER</b>
	)	
Respondent.	)	
	)	
	)	

---

***SYNOPSIS***

*On March 31, 2004, Snohomish County adopted Ordinance 04-021 amending its regulation concerning accessory dwelling units (ADUs).<sup>1</sup> The Snohomish County Uniform Development Code (UDC), adopted in December of 2002, allowed attached and detached “accessory apartments” in rural areas under certain conditions but excluded the use of mobile or manufactured homes as ADUs anywhere in the County. Ordinance 04-021 amended the regulations concerning ADUs on lots of 200,000 square feet (4.7 acres) or larger to allow the use of mobile or manufactured housing as detached new structures and to modify size and compatibility restrictions. Petitioner challenges the Ordinance as increasing rural density in violation of the GMA.*

*The Board finds that the amendments to the ADU standards as applied to lots smaller than 10 acres promote “dwelling unit density that fails to protect rural lands and rural character” (Legal Issue #1). The Board therefore grants the petition in part and remands to the Respondent for action consistent with this decision.*

**I. BACKGROUND<sup>2</sup>**

**A. GENERAL**

On March 31, 2004, the Snohomish County Council adopted Ordinance 04-021 amending Snohomish County’s development regulations concerning accessory dwelling apartments. On June 14, 2004, 1000 Friends of Washington (**1000 Friends** or

<sup>1</sup> Snohomish County’s Code does not use the common term Accessory Dwelling Unit but rather uses the term “Accessory Apartments.” County Response, at 3 (fn.3).

<sup>2</sup> See Appendix A for more detail regarding the procedural history of this matter.

**Petitioner**) filed a Petition for Review (**PFR**) challenging Snohomish County's (**County** or **Respondent**) action.

During June and July of 2004, the Board issued the Notice of Hearing, conducted the Prehearing Conference and issued the Prehearing Order (**PHO**). The PHO set the schedule and established the legal issues to be decided by the Board.

On August 3, 2004, the Board received Petitioner's Motion for Summary Judgment (**1000 Friends Motion**) and Snohomish County's Motion to Dismiss (**County Motion**). Following a hearing by telephone conference call, the Board dismissed both motions without prejudice subject to further briefing and argument at the Hearing on the Merits.

The prehearing briefing received is referenced in this Final Decision and Order (**FDO**) as: Prehearing Brief of 1000 Friends of Washington (**1000 Friends PHB**), Snohomish County's Motion to Dismiss and Prehearing Brief (**County Response**), and Reply Brief of 1000 Friends of Washington (**1000 Friends Reply**). In these briefs and in oral argument, 1000 Friends renewed its motion for summary judgment and the County renewed its motion to dismiss.

On November 1, 2004, the Board held a Hearing on the Merits (**HOM**) at the Board's offices in Suite 2470, 900 Fourth Avenue, Seattle, Washington. Board Members Margaret A. Pageler, Presiding Officer, Edward G. McGuire, and Bruce C. Laing were present for the Board. Petitioner was represented by Ken Lederman of Riddell Williams P.S. Respondent was represented by Snohomish County Deputy Prosecuting Attorney Jason Cummings. Board externs Julie Taylor and Jessica Clawson also attended. Court reporting services were provided by J. Gayle Hays, of Byers & Anderson, Inc. The hearing convened at 10:00 a.m. and adjourned at approximately 11:00 a.m. The Board did not order a transcript of the HOM.

## **II. PRESUMPTION OF VALIDITY, BURDEN OF PROOF AND STANDARD OF REVIEW**

Petitioner challenges Snohomish County's amendment of development regulations for accessory dwelling apartments, as adopted by Ordinance No. 04-021. Pursuant to RCW 36.70A.320(1), Ordinance No. 04-021 is presumed valid upon adoption.

The burden is on Petitioner, 1000 Friends of Washington, to demonstrate that the actions taken by the County are not in compliance with the requirements of the GMA. RCW 36.70A.320(2).

Pursuant to RCW 36.70A.320(3), the Board "shall find compliance unless it determines that the action taken by [the County] is clearly erroneous in view of the entire record before the board and in light of the goals and requirements of [the GMA]." For the Board to find Snohomish County's actions clearly erroneous, the Board must be "left with the

firm and definite conviction that a mistake has been made.” *Dep’t of Ecology v. PUD 1*, 121 Wn.2d 179, 201 (1993).

Pursuant to RCW 36.70A.320(1) the Board will grant deference to the County in how it plans for growth, consistent with the goals and requirements of the GMA. The State Supreme Court has stated, “Local discretion is bounded, however, by the goals and requirements of the GMA.” *King County v. Central Puget Sound Growth Management Hearings Board*, 142 Wn.2d 543, 561, 14 P.3d 142 (2000). Division II of the Court of Appeals further clarified, “Consistent with *King County*, and notwithstanding the ‘deference’ language of RCW 36.70A.3201, the Board acts properly when it foregoes deference to a county’s plan that is not ‘consistent with the requirements and goals of the GMA.’” *Cooper Point Association v. Thurston County*, 108 Wn.App. 429, 444, 31 P.3d 28 (2001).

In affirming the *Cooper Point* court, the Supreme Court recently stated:

Although we review questions of law *de novo*, we give substantial weight to the Board’s interpretation of the statute it administers. *See Redmond*, 136 Wn.2d at 46. Indeed “[I]t is well settled that deference [to the Board] is appropriate where an agency’s construction of statutes is within the agency’s field of expertise...”

*Thurston County v. Western Washington Growth Management Hearings Board*, 148 Wn.2d 1, 15, 57 P.3d 1156 (2002).

### **III. THE CHALLENGED ACTION AND PREFATORY NOTE**

On March 31, 2004, Snohomish County adopted Ordinance 04-021 amending its regulation concerning accessory dwelling units. The Snohomish County Uniform Development Code (**UDC**), adopted in December, 2002, had allowed attached and detached “accessory apartments” in rural areas with certain floor area restrictions and compatibility requirements but had excluded the use of mobile or manufactured homes as ADUs anywhere in the County.<sup>3</sup> For lots of 200,000 square feet (4.7 acres) or larger, Ordinance 04-021 created an exception allowing the use of mobile or manufactured housing as detached ADUs and modifying floor area restrictions and compatibility requirements.<sup>4</sup>

---

<sup>3</sup> The 2004 amendments were in response to a citizen complaint about the prohibition against use of a mobile or manufactured home as a detached “mother-in-law” apartment on his 15-acre lot in the rural area. County Response, Ex.18.

<sup>4</sup> A mobile home is defined in the County Code as “a manufactured home that is a structure, transportable in one or more sections, which in the traveling mode, is eight body feet or more in width and forty body feet or more in length, or, when erected on site, is three hundred twenty or more square feet, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to the required utilities, and includes the plumbing, heating, air conditioning, and electrical systems contained therein.” SCC 30.91M.150, 1000 Friends Motion, Ex 1.

Petitioner challenges the Ordinance as increasing the rural density in violation of the GMA. Petitioner relies largely on Board precedents which set standards for rural density to prevent sprawl and which establish that allowing freestanding ADUs in the rural area effectively doubles the allowable density.

Respondent contends that the petition is an untimely challenge over which the Board has no jurisdiction. Alternatively, respondent argues that the Board should dismiss because Petitioner's case is not properly articulated in its statement of legal issues. If the Board reaches the merits of the issue, Respondent urges the Board to deny the petition because the Ordinance complies with the GMA.

In this Final Decision and Order, the Board addresses first the Respondent's motion to dismiss for lack of jurisdiction. The Board concludes that the Petitioner's challenge is timely and that the Board has jurisdiction to decide the case on the merits.

The Board then addresses the substantive development regulation amendment at issue. The Board finds that the amendment to the ADU regulations that allows manufactured homes<sup>5</sup> as detached new structures on lots of less than 10 acres in the rural area promotes "dwelling unit density that fails to protect rural lands and rural character" (Legal Issue #1). However, the Board finds that Petitioner fails to meet its burden of proof with respect to invalidity (Legal Issue #2). The Board therefore grants the petition in part, denies it in part, and remands to the Respondent for action consistent with this decision.

#### **IV. BOARD JURISDICTION**

##### *Position of the Parties*

Snohomish County challenges the Board's jurisdiction on the grounds that the petition was not timely filed pursuant to RCW 36.70A.290. The County's core argument is that allowance of detached ADUs in the rural area was established in the codification of the County's UDC in 2002 and thus the time to challenge the provision has long passed. County Response, at 10. The County's theory is that because Ordinance 04-021 did not amend *where* detached ADUs are allowed but only *when* such units are permitted, the amendment cannot be challenged. *Id.*, at 8.

1000 Friends responds that Ordinance 04-021 substantively amended the County's development regulations. Inasmuch as the petition challenges specific amendments, it is timely. 1000 Friends PHB, at 2.

---

<sup>5</sup> The Board notes that SB 6593 (Chapter 256, Laws of 2004) effective July 1, 2005, creates new requirements for city and county regulation of manufactured housing. Neither Petitioner nor Respondent cited this statute to the Board. We decline to speculate on its application when it becomes effective.

Applicable Law

RCW 36.70A.290(1) and (2) provide as follows:

(1) All requests for review to a growth management hearings board shall be initiated by filing a petition that includes a detailed statement of issues presented for resolution by the board....

(2) All petitions related to whether or not an adopted comprehensive plan, development regulation, *or permanent amendment thereto*, is in compliance with the goals and requirements of this chapter...must be filed within sixty days after publication by the legislative bodies of the county or city. (*Emphasis supplied*)

Board Discussion

The Board's jurisdiction is limited; the Board has "no jurisdiction to review substantive issues of an ordinance previously adopted and not challenged within the timeframe of the Act, *when those issues remain unchanged and unamended.*" *Guy Parsons et al., v. Mason County*, WWGMHB Case No. 00-2-0030 (Order Granting Dispositive Motion, November 27, 2000) at 3, *emphasis supplied*.<sup>6</sup>

Here the County's development regulations allowing detached ADUs have been substantively amended to allow mobile or manufactured housing, previously prohibited everywhere, to be constructed on lots of 200,000 square feet or more. RCW 36.70A.290(2) is clear that "permanent amendments" to previously adopted development regulations are subject to Board review. In other words, when an ordinance amends or expands portions of an existing development code, the *amendment* is subject to appeal within sixty days of publication. 1000 Friends PHB, at 8.<sup>7</sup>

Petitioner here makes timely challenge to an ordinance "amending the development standards" for ADUs. At the Prehearing Conference, the Legal Issue was restated as follows:

*Legal Issue #1: Does adoption of Ordinance 04-021, amending the development standards for Accessory Dwelling units (allowing for the construction of detached dwelling units on lots 200,000 square feet or larger), fail to comply with RCW 36.70A.020(2), RCW 36.70A.020(1), RCW 36.70A.020(9), RCW 36.70A.070(5), RCW 36.70A.110(1) when the*

---

<sup>6</sup> See also *Montlake Community Club v. Hearings Board*, 110 Wn. App. 731, 738-39, 43 P. 3d 57 (2002); *Torrance v. King County*, CPSGMHB Case No. 96-3-0038 (Order Granting Dispositive Motion, March 31, 1997) at 4.

<sup>7</sup>Citing *Tupper v. City of Edmonds*, CPSGMHB 03-3-0018 (Order on Dispositive Motions, December 3, 2003) at 8; *1000 Friends v. Chelan County*, EWGMHB 04-1-0002 (Order on Dispositive Motions, June 10, 2004).

*ordinance allows for dwelling unit density that fails to protect rural lands and rural character?*

The Board reads this legal issue as a challenge to the County's substantive amendment of its development regulations for ADUs. The substance of the amendment applicable to detached dwelling units on lots of 200,000 square feet or more is the exception for mobile or manufactured homes, which are allowed nowhere else in the ADU regulations.

The County's attempt to frame the petition as an untimely challenge to the preexisting regulation is not well founded. While the time for challenge of the original ADU rules is long past, that doesn't deprive the Board of jurisdiction to review new legislation to the extent that it may expand and increase a previously-unchallenged inconsistency with the GMA. The County's reliance on *Montlake Community Club v. Hearings Board*, 100 Wn.App. 731, 738-39, 43 P.3d 57 (2002) is misplaced. County Response, at 11. In *Montlake* the Board ruled, and the Court of Appeals agreed, that previously adopted and unchallenged development standards could not be challenged when those standards were applied to a new sub-area plan. Here, by contrast, the scope of the development standards are themselves substantively amended.

The Board finds that it has jurisdiction of a timely challenge to Snohomish County's development regulation amendments which change standards for ADU development on lots 200,000 square feet (4.7 acres) or larger.

### Conclusion

The Board finds that the Petitioner's PFR was timely filed, pursuant to RCW 36.70A.290; Petitioner has standing to appear before the Board, pursuant to RCW 36.70A.280(2)<sup>8</sup>; and the Board has subject matter jurisdiction over the challenged ordinance, which amends the County's development regulations, pursuant to RCW 36.70A.280(1)(a). Respondent's motion to dismiss is **denied**.

## **V. LEGAL ISSUES AND DISCUSSION**

### **LEGAL ISSUE NO. 1**

The Board's PHO set forth Legal Issue No. 1:

*Legal Issue #1: Does adoption of Ordinance 04-021, amending the development standards for Accessory Dwelling units (allowing for the construction of detached dwelling units on lots 200,000 square feet or larger), fail to comply with RCW 36.70A.020(2), RCW 36.70A.020(1), RCW 36.70A.020(9), RCW 36.70A.070(5), RCW 36.70A.110(1) when the*

---

<sup>8</sup> See 1000 Friends Motion, Ex. 6.

*ordinance allows for dwelling unit density that fails to protect rural lands and rural character?*

### **Applicable Law and Discussion**

#### **Position of the parties**

Petitioner argues that allowing mobile or manufactured homes as detached ADUs on rural lots increases density and alters the rural character. Petitioner relies on Growth Management Board precedents establishing that preservation of rural character requires a density of no more than one dwelling unit per five acres in the rural area, citing *Friends of the San Juans, et al. v. San Juan County (San Juan)*, WWGMHB Case No. 03-2-003c (Final Decision and Order, April 17, 2003); *Peninsula Neighborhood Association v. Pierce County (PNA II)*, CPSGMHB Case No. 95-3-0771 (Final Decision and Order, March 20, 1996); *Yanisch v. Lewis County (Yanisch)*, WWGMHB Case No. 02-2-0007c (Final Decision and Order, December 4, 2002). Petitioner notes that this Board and the Western Board have applied this standard to preclude detached ADUs on lots of less than 10 acres in the rural area, citing *PNA II* and *San Juan*. Petitioner invites this Board to rule as a matter of law that Snohomish County's amendments to its ADU regulations "double the allowable density" in the rural area. 1000 Friends PHB, at 21.

Snohomish County responds that its preexisting regulations allowed detached ADUs on large lots in rural zones and that therefore the amendments allowing manufactured homes do not increase allowable rural density. County Response, at 22-23. Alternatively, the County contends that the restrictions and conditions written into Ordinance 04-021 will ensure that rural character is protected as manufactured-home ADUs are developed. *Id.*, at 20-22.

#### **Applicable law**

RCW 36.70A.020(2) and (4)

Planning Goals. The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040...

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low density development...

(4) Housing. Encourage the availability of affordable housing to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

RCW 36.70A.110(1)

Each county that is required or chooses to plan under RCW shall designate an urban growth area or areas within which urban growth shall be encouraged and outside of which growth can occur only if it is not urban in nature....

RCW 36 70A.400

Accessory apartments. Any local government, as defined in RCW 43.63A.215,<sup>9</sup> that is planning under this chapter shall comply with RCW 43.63A.215(3).

RCW 43.63A.215 (1) and (3)

(1) The department [CTED] shall, in consultation with the affordable housing advisory board created in RCW 43.185B.020, report to the legislature on the development and placement of accessory apartments. The department shall produce a written report by December 15, 1993<sup>10</sup> which... (b) Makes recommendations to the legislature designed to encourage accessory apartments in areas zoned for single-family use...

(3) Unless provided otherwise by the Legislature, by December 31, 1994, local governments shall incorporate into their development regulations, zoning regulations, or official controls the recommendations contained in subsection (1) of this section. The accessory apartment provisions shall be part of the local government's development regulations, zoning regulation, and official control. To allow for local flexibility, the recommendation shall be subject to such regulations, conditions, procedures, and limitations as determined by the local legislative authority.

Board Discussion

1. Harmonizing the ADU requirement with the goal of preventing sprawl. RCW 43.63A.215(4)(b) requires that counties planning under the GMA make provision for ADUs. The apparent purpose of this legislation is to support the housing goals of the GMA – housing affordability, variety, and preservation. RCW 36.70A.020(4). The legislation offers no guidance on how to harmonize the ADU requirement with other goals and requirements of the GMA, particularly the goals of preventing sprawling, low-density development and protecting rural character. RCW 36.70A.020(2); RCW 36.70A.030(14).

The Petitioner correctly recognizes that the GMA emphasizes the importance of rural lands and rural character, demanding protection of rural lands through a comprehensive

---

<sup>9</sup> “Local governments” include counties required to plan under GMA. RCW 43.63A.215(4)(b).

<sup>10</sup> The Department produced a Model Ordinance, Accessory Dwelling Unit Ordinance and Study (Washington State Department of Community Development, January 1994). Neither party to the present appeal has referenced the Department's standards or guidance.

plan's "Rural Element." RCW 36.70A.011. To protect the rural element of a comprehensive plan, a county must control rural development, assure visual compatibility with the surrounding rural area, reduce inappropriate conversion of rural land into sprawl, protect critical areas, and prevent conflicts with the use of separately designated lands. RCW 36.70A.070(5)(c); *John Diehl v. Mason County*, 94 Wn.App. 645,655, 972 P.2d 543 (1999); *Butler v. Lewis County*, WWGMHB 99-2-0027c (Final Decision and Order, June 30, 2000).

Precedents from both this Board and the Western Washington Growth Management Hearings Board,<sup>11</sup> focusing on rural parcels of less than 10 acres, have used the distinction between *attached* ADUs and *detached* (freestanding new structures) to harmonize the ADU requirement with the goals of preventing low-density sprawl and protecting rural character.<sup>12</sup>

This Board examined Pierce County's ADU regulations in *Pierce County Neighborhood Association v. Pierce County (PNA II)*, Case No. 95-3-0071 (Final Decision and Order, March 11, 1996) and concluded:

Construction of a detached new ADU on a parcel smaller than 10 acres is generally prohibited because it would effectively allow two freestanding dwelling units. The effect would necessarily be one freestanding dwelling on a lot smaller than 5 acres, which the Board has previously held to constitute urban growth. Regardless of the size of the rural lot, ADUs attached to the main residence or a conversion of a detached existing structure (e.g., a garage) in close association with the primary residence would not constitute new urban growth.

*Id.*, at 22.

A similar issue was addressed more recently by the Western Board in Lewis County. In *Yanisch v. Lewis County (Yanisch)*, WWGMHB Case No. 02-2-0007c, (Final Decision and Order, December 11, 2002), the Western Board said: "We have consistently found that densities greater than 1 unit per five acres are not rural densities." The Western Board found that ADUs could be allowed in Lewis County as internal or attached units on single family lots of five acres or less. However, the Board ordered Lewis County to remove from the Lewis County Code the provisions that permitted detached ADUs on lots that did not contain the basic underlying rural density.

---

<sup>11</sup> To our knowledge, the Eastern Washington Growth Management Hearings Board has not considered this issue.

<sup>12</sup> *Alpine Evergreen et al. v. Kitsap County (Bremerton/Alpine)*, CPSGMHB Case No. 95-3-0039c (Order Rescinding Invalidity in *Bremerton* and Final Decision and Order in *Alpine*, February 8, 1999), at 40, cited in County Response, at 19, is not on point. The issue in *Bremerton/Alpine* was not rural density but whether allowance for ADUs must be factored into a County's land capacity allowance.

The most thorough and recent review of this issue is in *Friends of the San Juans, et al. v. San Juan County (San Juan)*, WWGMHB Case No. 03-2-0003c (Final Decision and Order, April 17, 2003). While the *San Juan* decision involves some facts unique to the guesthouse industry in the San Juan Islands, this Board finds the underlying analysis of the impact of ADUs as detached new structures in the rural area is persuasive.

At argument, we asked the County to explain how a freestanding ADU differs from a single-family residence. The County responded that an ADU is limited in size to no more than 1,000 square feet. So, we asked, how is a freestanding ADU different from a single family residence of 1,000 square feet? The County responded that there are certain site limitations that would apply to an ADU, although the County also conceded that the site limitations may be waived. Other than size and potential site restrictions, the County acknowledged that a freestanding ADU is not *structurally* distinguishable from a single-family residence, since single ownership of the ADU and the main residence is not a structural characteristic.

We conclude that a freestanding ADU is a separate dwelling unit and has all the structural characteristics of a dwelling unit, whether it is owned by the owner of a principal residence or not. Also in areas where residential use is allowed in rural lands, allowing a freestanding ADU with a principal residence on lots of less than ten acres creates a density of greater than one dwelling unit to five acres. Densities of greater than one dwelling unit to five acres are not rural densities. Both this [Western] Board and the Central Board have consistently said that densities of more than one unit per five acres constitute urban growth<sup>13</sup>....Therefore, allowing freestanding ADUs together with a principal residence on lots of less than ten acres in rural areas constitutes inappropriate urban growth in a rural area.

Consistent with our previous decisions, we find that [San Juan County] Ordinance 21-2002 as it pertains to internal and attached ADUs in Rural Residential designations is consistent with the GMA and fulfills the County's obligations to provide for ADUs in rural single-family neighborhoods pursuant to RCW 43.63A.215. However, we continue to find that a freestanding ADU should be considered as one dwelling unit. The effect of not counting a freestanding ADU as a dwelling unit would

---

<sup>13</sup> The Eastern Washington Growth Management Hearings Board has reached the same conclusion. "With one narrow exception, this Board has consistently found that anything under 5-acre lots is urban." *City of Moses Lake v. Grant County*, EWGMHB Case No. 99-1-0016 (Order on Remand, April 17, 2002), at 3. See also *John Diehl v. Mason County*, *supra*, at 656 (residential density of one dwelling unit per 2.5 acres is consistent with urban, not rural, development and allows for urban growth outside of the UGA in violation of GMA).

be the equivalent of permitting one dwelling unit on a lot of less than 5 acres in a rural area.

*Id.*, at 25-26.

2. Snohomish County's 2004 ADU amendments. The County's stated purpose in adopting the 2004 amendments to its ADU standards was to increase ease, flexibility and affordability of developing detached ADUs in the rural area by allowing mobile homes and exempting them from compatibility and floor area requirements. *See* 1000 Friends Motion, Ex. 2 [Index 5].<sup>14</sup> However, by crafting its manufactured housing exception for lots of 4.7 acres (200,000 square feet) or larger, rather than for lots of 10 acres (430,000 square feet) and more, the County in effect allows more than one dwelling unit per five acres, thus increasing and expanding an inconsistency with the GMA.<sup>15</sup>

Snohomish County acknowledged the risk of increased rural density and negative impact on rural character in a November 12, 2003, letter from Chief Planning Officer Linda Kruller to the Snohomish County Planning Commission. 1000 Friends Motion, Ex. 3 [Index 4]. Single-wide manufactured homes are typically larger than the 850 square foot floor area maximum allowed for detached ADUs, according to County staff. *Id.*, at 2. With manufactured homes there is less flexibility to meet the requirements for exterior compatibility with existing structures on the property. *Id.*, at 3. Affordability and faster construction timeframes will increase take-up of this housing type. *Id.*, at 2.

According to the Planning Officer:

- There is concern that the proposed amendments relaxing the size and compatibility standards for accessory apartments on 200,000 square foot or larger lots *may increase the potential for further development of rural lands*. The proposed amendments allow the use of a more affordable housing type that has a faster construction timeframe. These factors may make it easier and more appealing to develop accessory apartments on large lots. There is concern that without review for compatibility to the surrounding house type, *rural character would be modified*.
- Another concern was raised regarding the potential of the amendments to *increase rural density*. One housing unit per five acres was considered a maximum rural density by the Eastern Washington Growth Hearings

---

<sup>14</sup> The County Council made the following findings:

1. The development standards for detached accessory apartments in SCC 30.28.010 and SCC 30.91A.050 are overly restrictive as applied to residential parcels 200,000 square feet or larger

2. Allowing increased flexibility for the establishment of accessory apartments will further the Growth Management Act's affordable housing goal set forth in RCW 36.70A.020(4). . .

1000 Friends Motion, Ex. 7 [Index 28], at 4.

<sup>15</sup> The concerned citizen whose letter apparently launched the County's action lives on a 15-acre lot. Ex. 18.

Board Case, City of Moses Lake v. Grant County. Other Hearings Board orders have indicated that freestanding accessory apartments must comply with the maximum allowed density projections of comprehensive plans.... [W]ithout size restrictions, the proposed amendments may promote greater interest in developing accessory apartments as large as some existing homes in the rural area. As noted earlier, the *affordability and fast construction timeframe associated with mobile homes may increase interest in this type of development beyond the use intended* by accessory apartments. Staff has suggested that this allowance *might counteract the Countywide Planning Policies* and General Policy Plan policies related to the reasonable measures that guide the majority of residential development to urban areas....

- It has also been suggested that the elimination of the compatibility provision in SCC 30.28.010(5) on 200,000 square foot or larger lots allowed by the proposed amendment in SCC 30.28.010(11) *might hinder the protection of rural character*. Protection of the visual landscapes and compatibility is important in rural areas and is required under the Growth Management Act and the comprehensive plan General Policy Plan Goals.

*Id.*, at 2-3 (*emphasis supplied*).

In these three paragraphs the County planning staff succinctly posed the GMA concerns created by adding manufactured housing as an allowable new freestanding ADU on rural lots of less than 10 acres: the amendment increases development of rural lands, thereby modifying rural character through increased density, increased size of rural dwellings, faster and cheaper development, lack of visual and compatibility standards, and incompatibility with County Comprehensive plan policies directing growth to urban areas.

How did the County planners propose to solve these GMA concerns?

Staff proposed revisions to the draft ordinance (1) requiring that a manufactured-home ADU be “subordinate” to and smaller than the primary existing home and (2) requiring screening (i.e., landscaping) to address compatibility issues. Ex 3 [Index 4], at 3. Under the 2002 ADU provisions, detached ADUs were strictly controlled for size and compatibility. An “Accessory Apartment – Detached” could not exceed “40 percent of the floor area of the single family dwelling unit to which it is accessory, or 850 square feet, whichever is less.” Ex. 1, Table, SCC 30.28.010(1). In the amended version of SCC 30.28.010, a “mobile home” constructed as an “Accessory Department – Detached” can exceed that size so long as its floor plan is less than the primary existing home. As the Petitioners note, under this ordinance two essentially equivalent freestanding structures could be built on a rural lot of less than five acres. 1000 Friends PHB, at 22.

County staff proposed that screening requirements and neighborhood compatibility would be addressed through administrative conditional review as set forth in SCC 30.43A.100. County Response, at 20-22, Ex. D. In the conditional review process a permit may only be issued if the application complies with the comprehensive plan and is compatible with the subject property and the immediate vicinity. *Id.* However, the conditional review provisions are broadly general, with no criteria specific to protection of rural character.

The final adopted Ordinance 04-021 incorporated the revisions proposed by the planning staff. 1000 Friends Motion, Ex. 7 [Index 28].

The Board finds that the staff proposals and the Ordinance as adopted fail to “reduce the inappropriate conversion of rural land into low density development.”<sup>16</sup> RCW 36.70A.020(2). Manufactured-home ADUs as freestanding new structures on lots of less than 10 acres create a density of more than one unit in five acres. The Board finds nothing in the subordination requirement or the conditional use process to persuade it to abandon its established precedents. As the Board stated in *PNA II*, “Regardless of the size of the rural lot, ADUs attached to the main residence or a conversion of a detached existing structure (e.g., a garage) in close association with the primary residence would not constitute new urban growth.” *Id.*, at 22. However, by adding manufactured homes on lots of less than 10 acres, the County permits a growth level in rural areas that the Growth Management Hearings Boards have consistently found to constitute sprawl.

### **Conclusion**

The Board finds that Ordinance 04-21, amending the County’s development standards for ADUs, **fails to comply** with the Growth Management Act’s requirement to protect rural lands and rural character [RCW 36.70A.070(5)], so far as the amendments add manufactured homes as allowable freestanding ADUs on lots smaller than 10 acres. The Board therefore **remands** this matter to Snohomish County.

### **B. LEGAL ISSUE NO. 2**

The Board’s PHO set forth Legal Issue No. 2:

*Legal Issue #2: Does adoption of Ordinance 04-021 substantially interfere with the goals of the Growth Management Act?*

### **Applicable Law and Discussion**

RCW 36.70A.302(1)(b) does not authorize the Board to make a determination of invalidity unless it is convinced that the continued validity of a comprehensive plan or

---

<sup>16</sup> The record does not indicate whether the County considered solving GMA concerns by revising the draft ordinance to apply the manufactured home exception to lots of 10 acres or more.

development regulation would substantially interfere with the fulfillment of the Act's goals.

The County's record contains no information concerning the number or extent of rural lots subject to the amended development standard; the number or estimate of existing ADUs in the rural area, attached or detached; or the anticipated increase in rural ADU development likely to result from the allowance for manufactured homes. The County points to a one-page checklist that characterizes the likely impact on overall housing capacity in the entire county as "insignificant," County Response, at 19<sup>17</sup>, in contrast to the staff report that discussed the possibility of increased rural development. 1000 Friends Motion, Ex. 3 [Index 4].

1000 Friends, for its part, argues that the case must be decided as a matter of law, based on controlling Board precedents. Petitioner therefore has supplied no numbers, either to this Board or in its submission to the County Council,<sup>18</sup> that demonstrate penetration rates of ADUs in rural areas, whether attached or detached, stick-built or manufactured. Petitioners have placed no facts in the record indicating that new manufactured-home ADUs are likely to be constructed on lots of less than 10 acres in significant numbers in the interim, degrading rural character, before the County can bring its regulations into compliance.

On this point, the present case is in sharp contrast to *San Juan, supra*, where the record included a detailed analysis of ADU utilization. On those facts, the Western Board found substantial interference with Goal 2 of the GMA and entered an order of invalidity.

### **Conclusion**

Given the recode before the Board, the Board **declines** to enter a determination of invalidity.

---

<sup>17</sup> Index 13, "Analysis of Building and Land Use Regulation Effects on Housing and Jobs," which concludes, "since accessory apartments account for a very insignificant portion of the county's housing starts, the proposal will not contribute significantly to overall housing capacity."

<sup>18</sup> 1000 Friends Motion, Ex. 6.

## VI. ORDER

Based upon review of Ordinance 04-021, the County's code provisions, the GMA, case law, prior Orders of this Board and the other Boards, the PFR, the briefs and exhibits submitted by the parties, having considered the arguments of the parties, and having deliberated on the matter, the Board ORDERS:

1. Snohomish County's adoption of Ordinance 04-021 was **clearly erroneous** in amending the County's development regulations to expand provisions for new freestanding ADUs on rural lots of less than 10 acres.

2. The Board **remands** Ordinance 04-021 to the County with direction to take appropriate legislative action to bring the challenged portion of the legislation into compliance with the goals and requirements of the Act. The remand period extends until the Board finds compliance.

3. The Board sets the following Compliance Schedule:

- By no later than **March 14, 2005**, the County shall take appropriate legislative action to bring the challenged portion of its ADU regulations into compliance with the goals and requirements of the GMA as interpreted and set forth in this Final Decision and Order (**FDO**).
- By no later than **March 21, 2005**, the County shall file with the Board an original and four copies of a Statement of Actions Taken to Comply (**SATC**) with the GMA, as interpreted and set forth in this FDO. The SATC shall attach copies of legislation enacted in order to comply and may indicate what portions of the legislation respond to the issues laid out in the FDO. The County shall simultaneously serve a copy of the SATC, with attachments, on Petitioner. By this same date, the County shall file a **Remand Index**, listing the procedures and materials considered in taking the remand action.
- By no later than **March 28, 2005**, the Petitioner may file with the Board an original and four copies of Comments on the County's SATC. Petitioner shall simultaneously serve a copy of its Comments on the County.
- By no later than **April 4, 2005**, the County may file with the Board an original and four copies of the County's Reply to Comments. The County shall simultaneously serve a copy of such Reply on Petitioner.

Pursuant to RCW 36.70A.330(1), the Board hereby schedules the **Compliance Hearing** in this matter for **2:00 p.m. April 18, 2005** at the Board's offices. If the parties so stipulate, the Board will consider conducting the compliance hearing telephonically. If the County takes legislative compliance actions prior to the March 14, 2005 deadline set

forth in this Order, it may file a motion with the Board requesting an adjustment to this compliance schedule.

So ORDERED this 13<sup>th</sup> day of December 2004.

CENTRAL PUGET SOUND GROWTH MANAGEMENT HEARINGS BOARD

Margaret A. Pageler  
Board Member

Note: This order constitutes a final order as specified by RCW 36.70A.300 unless a party files a motion for reconsideration pursuant to WAC 242-02-832.

## APPENDIX A

### PROCEDURAL BACKGROUND

#### A. GENERAL

On June 14, 2004, the Central Puget Sound Growth Management Hearings Board (the **Board**) received a Petition for Review (**PFR**) from 1000 Friends of Washington (**1000 Friends** or **Petitioners**). The matter was assigned Case No. 04-3-0018 and is hereafter referred to as *1000 Friends IV*. Board Member Margaret Pageler was the Presiding Officer (**PO**) for this matter. Petitioner challenges Snohomish County's (**Respondent** or **County**) adoption of Ordinance 04-021 amending Snohomish County's development regulations concerning accessory dwelling apartments (**ADUs**). The basis for the challenge is noncompliance with the Growth Management Act (**GMA** or the **Act**) in amendments concerning ADUs in the rural area.

On July 16, 2004, the Board received a Notice of Association of Counsel associating Kenneth L. Lederman and the law firm of Riddell Williams P.S. as co-counsel for Petitioner in this action.

On June 17, 2004, the Board issued a Notice of Hearing; on July 19, 2004, the Board held the Prehearing Conference; and on July 21, 2004, the Board issued a Prehearing Order (**PHO**) setting the schedule and legal issues for this case.

On July 19, 2004, the Board received Snohomish County's Index to the Record.

#### B. DISPOSITIVE MOTIONS

On August 3, 2004, the Board received Snohomish County's Motion to Dismiss (**County Motion**) with five attachments and Petitioner's Motion for Summary Judgment (**1000 Friends Motion**) with seven attachments. Later on August 3, 2004, the Board received Snohomish County's Expedited Motion to Strike Petitioner's Motion for Summary Judgment. On August 4, 2004, the Board received the Response Memorandum of 1000 Friends of Washington in Opposition to Expedited Motion to Strike.

On August 4, 2004, the Board held a telephone conference with the parties to hear argument on the motion to strike. On August 6, 2004, the Board issued its Order on Motions, suspending the motions calendar in this case and dismissing the dispositive motions of both parties without prejudice.

#### C. BRIEFING AND HEARING ON THE MERITS

On September 13, 2004, the Board received the Prehearing Brief of 1000 Friends of Washington (**1000 Friends PHB**). On October 5, 2004, the Board received Snohomish County's Motion to Dismiss and Prehearing Brief (**County Response**).

On October 7, 2004, the Board received a Stipulation to Continue Briefing Schedule, submitted jointly by Petitioner and Respondent, requesting the Board to excuse the tardy filing of the County Response as a legal messenger's error and to extend the briefing schedule by one day.

On October 11, 2004, the Board issued its Order Continuing Briefing Schedule.

On October 12, 2004, the Board received the Reply Brief of 1000 Friends of Washington (**1000 Friends Reply**).

On November 1, 2004, the Board held a Hearing on the Merits (**HOM**) at the Board's offices in Suite 2470, 900 Fourth Avenue, Seattle, Washington. Board Members Margaret A. Pageler, Presiding Officer, Edward G. McGuire, and Bruce C. Laing were present for the Board. Petitioner was represented by Ken Lederman of Riddell Williams, P.S. Respondent was represented by Snohomish County Deputy Prosecuting Attorney Jason Cummings. Board externs Julie Taylor and Jessica Clawson also attended. Court reporting services were provided by J. Gayle Hays, of Byers and Anderson, Inc. The hearing convened at 10:00 a.m. and adjourned at approximately 11:00 a.m. The Board did not order a transcript of the HOM.

**18A.37.120 Accessory Dwelling Unit (ADU).**

- A. The establishment of an ADU shall be subject to the following general requirements:
  - 1. One ADU shall be allowed per lot of record as an accessory use in conjunction with any detached single-family structure in all zones. ADUs shall not be permitted on lots created under Chapter 18J.17 PCC, Small Lot Design. ADUs shall not be included in density calculations.
  - 2. An ADU shall be converted to another permitted use or shall be removed if one of the two dwelling units is not owner occupied.
  - 3. An ADU shall be permitted as a second dwelling unit attached to, or detached from, the principal dwelling.
  - 4. A detached ADU may be any dwelling permitted in the applicable land use classification.
  - 5. New construction of a detached ADU or conversion of an existing detached structure to an ADU shall not be permitted within the required front, side, or rear yard setback. An exception to the required rear yard setback may be allowed if the rear yard abuts an alley.
  - 6. If an ADU is created by constructing a new detached structure, the building height of the ADU shall not be greater than the principal dwelling's building height, unless the ADU is above a detached garage.
- B. **Size.** An ADU shall be no greater than 1,000 square feet when located in an Urban Growth Area. When located outside an Urban Growth Area, the size may increase to 1,250 square feet.
  - 1. The following areas shall be counted when calculating the size of an ADU: any area with a ceiling height of 7 feet or more; all bathroom and basement areas with a ceiling height of 6 feet, 8 inches or more; and any areas with sloped ceilings where 50 percent of said area has a ceiling height of 5 feet or more.
  - 2. When calculating the square footage of an attached ADU, all measurements shall be taken from the interior walls.
  - 3. When calculating the square footage of a detached ADU, all measurements shall be taken from the exterior walls and shall include each level of the structure, excluding only the garage, covered porches, and any levels not accessed by a permanent stairway structure.
- C. **Design.** The following standards shall apply when the separation between the principal dwelling and proposed accessory dwelling is less than 100 linear feet:
  - 1. The entrance to an attached ADU shall not be directed toward any front yard unless utilizing an existing doorway.
  - 2. Detached ADUs shall be no closer to the front lot line than the front edge of the principal dwelling. This provision shall not apply to waterfront lots regulated pursuant to Title 18S PCC, Development Policies and Regulations – Shorelines.
  - 3. **Parking.** One off-street parking space shall be required for the ADU in addition to

off-street parking required for the principal dwelling pursuant to PCC 18A.35.040, Off-Street Parking.

- D. **Application.** Any owner occupant seeking to establish an ADU shall apply for approval in accordance with established procedures. These procedures shall include:
1. The owner occupant shall apply for a Building Permit for an ADU. A complete application form must demonstrate that all size thresholds and design standards are met.
  2. An affidavit affirming that the owner will occupy the principal dwelling or the ADU and agreeing to all the general requirements as provided in this Section is required.
  3. Prior to issuance of Building Permits, the owner occupant shall record a notice on the property title acknowledging the existence of the ADU with the Pierce County Auditor. Such notice shall be in a form as specified by the Department and shall include as a minimum:
    - a. The legal description of the property which has been approved for an ADU;
    - b. The applicability of the restrictions and limitations contained in this Section;
    - c. A copy of the County-approved floor/site plan; and
    - d. The property owner's signature on the notice, which shall be notarized prior to recording the notice.

(Ord. 2016-33 § 2 (part), 2016; Ord. 2016-14s § 2 (part), 2016; Ord. 2013-45s4 § 3 (part), 2015)

**CITY OF SEATTLE**

**ORDINANCE \_\_\_\_\_**

**COUNCIL BILL \_\_\_\_\_**

..title

AN ORDINANCE relating to land use and zoning, amending Sections 23.44.011, 23.44.014, 23.44.017, 23.44.020, 23.44.041, 23.45.545, 23.84A.002, 23.84A.032, 23.84A.038, and 23.86.007 of the Seattle Municipal Code to remove barriers to the creation of attached and detached accessory dwelling units and add a floor area ratio requirement in certain single-family zones.

..body

WHEREAS, the City Council adopted Resolution 31547 in September 2014, directing the Department of Planning and Development to explore policy changes that would increase the production of attached accessory dwelling units and detached accessory dwelling units, including regulatory changes, incentives, marketing, and promotion; and

WHEREAS, the Housing Affordability and Livability Agenda (HALA) Advisory Committee made recommendations in July 2015 to the Mayor and City Council, including Recommendation SF.1a to remove code barriers to accessory dwelling units and backyard cottages by removing the parking requirement, removing the owner-occupancy requirement, allowing a single lot to have both an attached and detached accessory dwelling unit, and making minor modifications to existing development standards for detached accessory dwelling units; and

WHEREAS, the City Council adopted Resolution 31609 in September 2015, declaring its intent to consider strategies to increase the availability of affordable housing in Seattle, outlining an overarching policy framework and timeline for the Mayor’s HALA recommendations, and establishing the Council Work Plan for HALA Recommendations, which included Strategy (h) to remove barriers to the development of detached and attached accessory dwelling units; and

1 WHEREAS, attached accessory dwelling units have been allowed on single-family lots since  
2 1994, and detached accessory dwelling units have been allowed on single-family lots  
3 since 2010, subject to certain development standards; and

4 WHEREAS, since 2010 only approximately 700 detached accessory dwelling units have been  
5 constructed, accounting for less than one percent of eligible single-family lots;  
6 NOW, THEREFORE,

7 **BE IT ORDAINED BY THE CITY OF SEATTLE AS FOLLOWS:**

8 Section 1. Section 23.44.011 of the Seattle Municipal Code, enacted by Ordinance  
9 125791, is amended as follows:

10 **23.44.011 Floor area in ((RSL)) single-family zones**

11 A. Gross floor area. In ((RSL)) single-family zones, gross floor area includes exterior  
12 corridors, breezeways, and stairways that provide building circulation and access to dwelling  
13 units or sleeping rooms. Balconies, patios, and decks that are associated with a single dwelling  
14 unit or sleeping room and that are not used for common circulation, and ground-level walking  
15 paths, are not considered gross floor area.

16 B. Floor area ratio (FAR) limits.

17 1. The FAR limit on lots developed with a single-family dwelling unit as the  
18 principal use in SF 5000, SF 7200, and SF 9600 zones, is 0.5, except that lots with less than  
19 5,000 square feet of lot area can include up to 2,500 square feet of total chargeable floor area.

20 The applicable FAR limit applies to the total chargeable floor area of all structures on the lot.

21 2. The FAR limit in RSL zones is 0.75. The applicable FAR limit applies to  
22 the total chargeable floor area of all structures on the lot.

1 C. The following floor area is exempt from FAR limits:  
2 1. All stories, or portions of stories, that are underground.  
3 2. All portions of a story that extend no more than 4 feet above existing or  
4 finished grade, whichever is lower, excluding access.

5 3. In SF 5000, SF 7200, and SF 9600 zones:  
6 a. Any floor area contained in an accessory dwelling unit;  
7 b. Either up to 500 additional square feet of floor area in any  
8 accessory structure that is not a detached accessory dwelling unit, or up to 250 square feet of  
9 floor area in an attached garage.

10 ~~((3))~~ 4. ~~((Fifty))~~ In RSL zones, 50 percent of floor area contained in  
11 structures built prior to January 1, 1982, as single-family dwelling units that will remain in  
12 residential use, regardless of the number of dwelling units within the existing structure, provided  
13 the exemption is limited to the gross square footage in the single-family dwelling unit as of  
14 January 1, 1982.

15 D. In SF 5000, SF 7200, and SF 9600 zones, additions to a single-family dwelling  
16 unit existing on the effective date of the ordinance introduced as Council Bill 119544 may  
17 exceed the FAR limit in subsection 23.44.011.B.1 if the addition adds floor area equal to or less  
18 than 20 percent of the floor area that existed on the effective date of the ordinance introduced as  
19 Council Bill 119544. Only one addition to any single-family dwelling unit may be exempted  
20 under this subsection 23.44.011.D.

21 Section 2. Section 23.44.014 of the Seattle Municipal Code, last amended by Ordinance  
22 125791, is amended as follows:

23 **23.44.014 Yards and separations**

1 \* \* \*

2 C. Exceptions from standard yard requirements. No structure shall be placed in a  
3 required yard except as follows:

4 1. Garages. Garages may be located in a required yard subject to the  
5 standards of Section 23.44.016.

6 2. Certain accessory structures in side and rear yards

7 a. Except for detached accessory dwelling units, any accessory  
8 structure that complies with the requirements of Section 23.44.040 may be constructed in a side  
9 yard that abuts the rear or side yard of another lot, or in that portion of the rear yard of a reversed  
10 corner lot within 5 feet of the key lot and not abutting the front yard of the key lot, upon  
11 recording with the King County Recorder's Office an agreement to this effect between the  
12 owners of record of the abutting properties.

13 b. Except for detached accessory dwelling units, any detached  
14 accessory structure that complies with the requirements of Section 23.44.040 may be located in a  
15 rear yard, provided that on a reversed corner lot, no accessory structure shall be located in that  
16 portion of the required rear yard that abuts the required front yard of the adjoining key lot, nor  
17 shall the accessory structure be located closer than 5 feet from the key lot's side lot line unless  
18 the provisions of subsections 23.44.014.C.2.a or 23.44.016.D.9 apply.

19 c. A detached accessory dwelling unit may be located in a rear yard  
20 subject to the requirements of subsection 23.44.041.C.

21 3. A principal residential structure or a detached accessory dwelling unit may  
22 extend into one side yard if an easement is provided along the side or rear lot line of the abutting  
23 lot, sufficient to leave a 10-foot separation between that structure and any principal structure or

1 detached accessory dwelling unit on the abutting lot. The 10-foot separation shall be measured  
2 from the wall of the principal structure or the wall of the detached accessory dwelling unit that is  
3 proposed to extend into a side yard to the wall of the principal structure or detached accessory  
4 dwelling unit on the abutting lot.

5 a. No structure or portion of a structure may be built on either lot  
6 within the 10-foot separation, except as provided in this Section 23.44.014.

7 b. Accessory structures, other than detached accessory dwelling units,  
8 and features of and projections from principal structures, such as porches, eaves, and chimneys,  
9 are permitted in the 10-foot separation area required by this subsection 23.44.014.C.3 if  
10 otherwise allowed in side yards by this subsection 23.44.014.C. For purposes of calculating the  
11 distance a structure or feature may project into the 10-foot separation, assume the property line is  
12 5 feet from the wall of the principal structure proposed to extend into a side yard and consider  
13 the 5 feet between the wall and the assumed property line to be the required side yard.

14 c. No portion of any structure, including any projection, shall cross  
15 the property line.

16 d. The easement shall be recorded with the King County Recorder's  
17 Office. The easement shall provide access for normal maintenance activities to the principal  
18 structure on the lot with less than the required (~~5-foot~~) 5-foot side yard.

19 4. Certain additions. Certain additions to an existing single-family structure,  
20 or an existing accessory structure if being converted to a detached accessory dwelling unit may  
21 extend into a required yard if the existing single-family structure is already nonconforming with  
22 respect to that yard. The presently nonconforming portion must be at least 60 percent of the total  
23 width of the respective facade of the structure prior to the addition. The line formed by the

1 existing nonconforming wall of the structure is the limit to which any additions may be built,  
2 except as described in subsections 23.44.014.C.4.a through 23.44.014.C.4.e. Additions may  
3 extend up to the height limit and may include basement additions. New additions to the  
4 nonconforming wall or walls shall comply with the following requirements (Exhibit A for  
5 23.44.014):

6 a. Side yard. If the addition is a side wall, the existing wall line may  
7 be continued by the addition except that in no case shall the addition be closer than 3 feet to the  
8 side lot line;

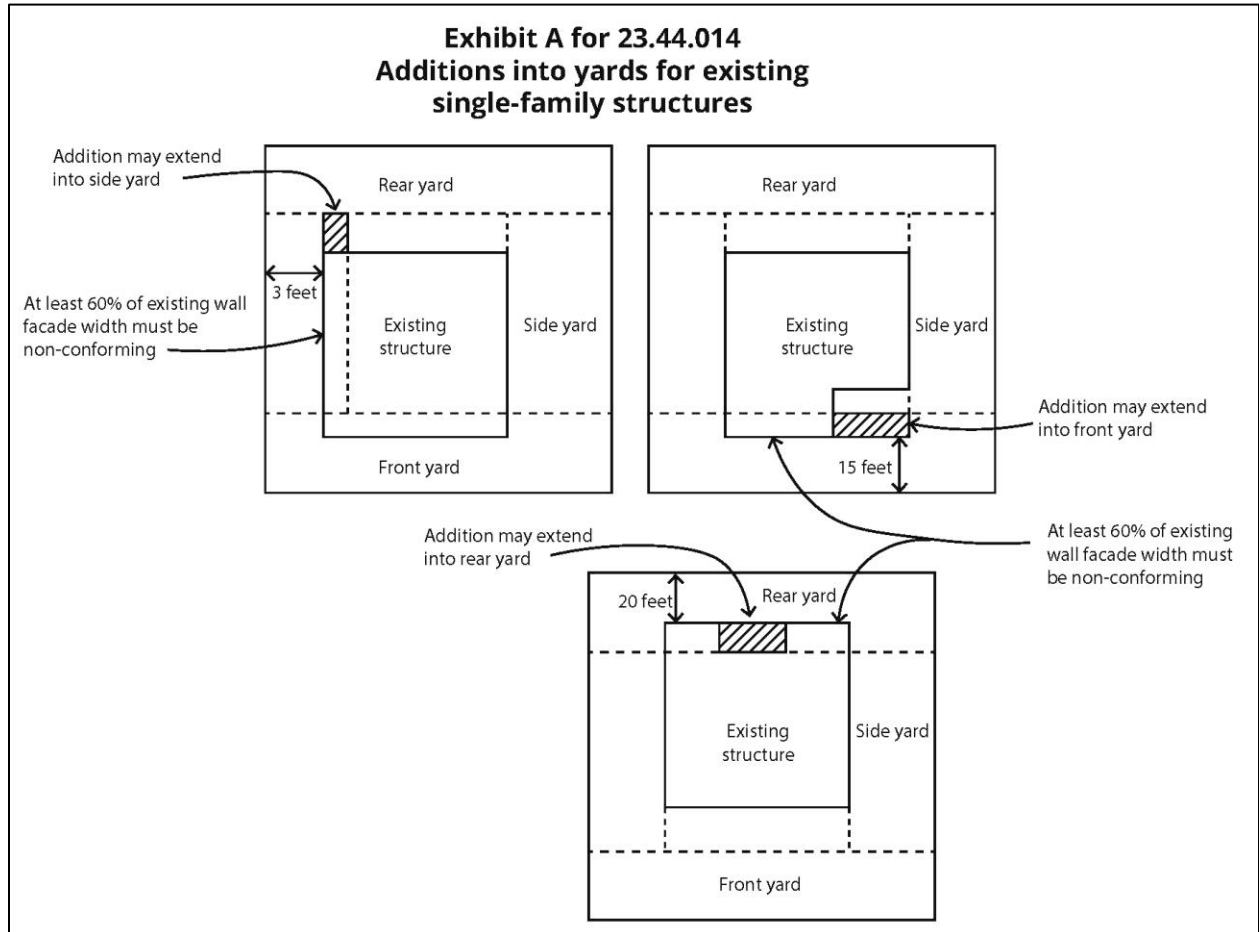

9 b. Rear yard. If the addition is a rear wall, the existing wall line may  
10 be continued by the addition except that in no case shall the addition be closer than 20 feet to the  
11 rear lot line or centerline of an alley abutting the rear lot line;

12 c. Front yard. If the addition is a front wall, the existing wall line may  
13 be continued by the addition except that in no case shall the addition be closer than 15 feet to the  
14 front lot line;

15 d. If the nonconforming wall of the single-family structure is not  
16 parallel or is otherwise irregular, relative to the lot line, then the Director shall determine the  
17 limit of the wall extension, except that the wall extension shall not be located closer than  
18 specified in subsections 23.44.014.C.4.a, 23.44.014.C.4.b, and 23.44.014.C.4.c.

19 e. Roof eaves, gutters, and chimneys on such additions may extend  
20 an additional 18 inches into a required yard, but in no case shall such features be closer than 2  
21 feet to the side lot line.

1 **Exhibit A for 23.44.014**  
2 **Additions into yards for existing single-family structures**

3  
4 5. Uncovered porches or steps. Uncovered, unenclosed porches ((=)) or steps  
5 may project into any required yard, if each component is no higher than 4 feet above existing  
6 grade, no closer than 3 feet to any side lot line, and has no horizontal distance greater than 6 feet  
7 within the required yard. For each entry to a principal structure, one uncovered, unenclosed  
8 porch and/or associated steps are permitted in the required yards.

9 6. Certain features of a structure. Unless otherwise provided elsewhere in  
10 this Chapter 23.44, certain features of a principal or accessory structure, except for accessory  
11 dwelling units, may extend into required yards if they comply with the following:

1 a. External architectural details with no living area, such as  
2 chimneys, eaves, cornices, and columns, may project no more than 18 inches into any required  
3 yard;

4 b. Bay windows are limited to 8 feet in width and may project no  
5 more than 2 feet into a required front, rear, and street side yard;

6 c. Other projections that include interior space, such as garden  
7 windows, may extend no more than 18 inches into any required yard, starting a minimum of 30  
8 inches above finished floor, and with maximum dimensions of 6 feet in height and 8 feet in  
9 width;

10 d. The combined area of features permitted by subsections  
11 23.44.014.C.6.b and 23.44.014.C.6.c may comprise no more than 30 percent of the area of the  
12 facade.

13 7. Covered unenclosed decks and roofs over patios. Covered, unenclosed  
14 decks and roofs over patios, if attached to a principal structure or a detached accessory dwelling  
15 unit, may extend into the required rear yard, but shall not be within 12 feet of the centerline of  
16 any alley, or within 12 feet of any rear lot line that is not an alley lot line, or closer to any side lot  
17 line in the required rear yard than the side yard requirement of the principal structure along that  
18 side, or closer than 5 feet to any accessory structure. The height of the roof over unenclosed  
19 decks and patios shall not exceed 12 feet. The roof over such decks or patios shall not be used as  
20 a deck.

21 8. Access bridges. Uncovered, unenclosed access bridges are permitted as  
22 follows:

1                           a.       Pedestrian bridges 5 feet or less in width, and of any height  
2 necessary for access, are permitted in required yards, except that in side yards an access bridge  
3 must be at least 3 feet from any side lot line.

4                           b.       A driveway access bridge is permitted in the required yard abutting  
5 the street if necessary for access to parking. The vehicular access bridge shall be no wider than  
6 12 feet for access to one parking space or 18 feet for access to two or more parking spaces and of  
7 any height necessary for access. The driveway access bridge may not be located closer than 5  
8 feet to an adjacent property line.

9                           9.       Barrier-free access. Access facilities for the disabled and elderly that  
10 comply with Washington State Building Code ((-)) Chapter 11 are permitted in any required  
11 yard.

12                          10.       Freestanding structures and bulkheads

13                           a.       Fences, freestanding walls, bulkheads, signs, and similar structures  
14 6 feet or less in height above existing or finished grade, whichever is lower, may be erected in  
15 any required yard. The 6-foot height may be averaged along sloping grade for each 6-foot-long  
16 segment of the fence, but in no case may any portion of the fence exceed 8 feet. Architectural  
17 features may be added to the top of the fence or freestanding wall above the 6-foot height if the  
18 features comply with the following: horizontal architectural feature(s), no more than 10 inches  
19 high, and separated by a minimum of 6 inches of open area, measured vertically from the top of  
20 the fence, are permitted if the overall height of all parts of the structure, including post caps, is  
21 no more than 8 feet. Averaging the 8-foot height is not permitted. Structural supports for the  
22 horizontal architectural feature(s) may be spaced no closer than 3 feet on center.

1                           b.       The Director may allow variation from the development standards  
2 listed in subsection 23.44.014.C.10.a, according to the following:

3                                           1)       No part of the structure may exceed 8 feet; and

4                                           2)       Any portion of the structure above 6 feet shall be

5 predominately open, such that there is free circulation of light and air.

6                           c.       Bulkheads and retaining walls used to raise grade may be placed in  
7 any required yard when limited to 6 feet in height, measured above existing grade. A guardrail  
8 no higher than 42 inches may be placed on top of a bulkhead or retaining wall existing as of  
9 February 20, 1982. If a fence is placed on top of a new bulkhead or retaining wall, the maximum  
10 combined height is limited to 9 1/2 feet.

11                           d.       Bulkheads and retaining walls used to protect a cut into existing  
12 grade may be placed in any required yard when limited to the minimum height necessary to  
13 support the cut. If the bulkhead or retaining wall is measured from the low side and it exceeds 6  
14 feet, an open guardrail of no more than 42 inches meeting Building Code requirements may be  
15 placed on top of the bulkhead or retaining wall. If the bulkhead or retaining wall is 6 feet or less,  
16 a fence may be placed on top up to a maximum combined height of 9.5 feet for both fence and  
17 bulkhead or retaining wall.

18                           e.       If located in shoreline setbacks or in view corridors in the  
19 Shoreline District as regulated in Chapter 23.60A, structures shall not obscure views protected  
20 by Chapter 23.60A, and the Director shall determine the permitted height.

21                           11.       Decks in yards. Decks no higher than 18 inches above existing or finished  
22 grade, whichever is lower, may extend into required yards.

1                   12.     Mechanical equipment. Heat pumps and similar mechanical equipment,  
2 not including incinerators, are permitted in required yards if they comply with the requirements  
3 of Chapter 25.08. Any heat pump or similar equipment shall not be located within 3 feet of any  
4 lot line. Charging devices for electric cars are considered mechanical equipment and are  
5 permitted in required yards if not located within 3 feet of any lot line.

6                   13.     Solar collectors. Solar collectors may be located in required yards, subject  
7 to the provisions of Section 23.44.046.

8                   14.     Front yard projections for structures on lots 30 feet or less in width. For a  
9 structure on a lot in an SF 5000, SF 7200, or SF 9600 zone that is 30 feet or less in width,  
10 portions of the front facade that begin 8 feet or more above finished grade may project up to 4  
11 feet into the required front yard, provided that no portion of the facade, including eaves and  
12 gutters, shall be closer than 5 feet to the front lot line (Exhibit B for 23.44.014), and provided  
13 further that no portion of the facade of an existing structure that is less than 8 feet or more above  
14 finished grade already projects into the required front yard.

- 1 **Exhibit B for 23.44.014**
- 2 **Front yard projections permitted for structures on lots 30 feet or less in width**

3

1                   15.     Front and rear yards may be reduced by 25 percent, but no more than 5  
2 feet, if the site contains a required environmentally critical area buffer or other area of the  
3 property that cannot be disturbed pursuant to subsection 25.09.280.A.

4                   16.     Arbors. Arbors may be permitted in required yards under the following  
5 conditions:

6                   a.       In any required yard, an arbor may be erected with no more than a  
7 40-square-foot footprint, measured on a horizontal roof plane inclusive of eaves, to a maximum  
8 height of 8 feet. Both the sides and the roof of the arbor shall be at least 50 percent open, or if  
9 latticework is used, there shall be a minimum opening of 2 inches between crosspieces.

10                  b.       In each required yard abutting a street, an arbor over a private  
11 pedestrian walkway with no more than a 30-square-foot footprint, measured on the horizontal  
12 roof plane and inclusive of eaves, may be erected to a maximum height of 8 feet. The sides of the  
13 arbor shall be at least 50 percent open, or if latticework is used, there shall be a minimum  
14 opening of 2 inches between crosspieces.

15                  17.     Stormwater management

16                  a.       Above-grade green stormwater infrastructure (GSI) features are  
17 allowed without yard restrictions if:

18                           1)     Each above-grade GSI feature is less than 4.5 feet tall,  
19 excluding piping;

20                           2)     Each above-grade GSI feature is less than 4 feet wide; and

21                           3)     The total storage capacity of all above-grade GSI features

22 is no greater than 600 gallons.

- 1                                   b.     Above-grade GSI features larger than what is allowed in  
2 subsection 23.44.014.C.17.a are allowed within a required yard if:
- 3                                   1)     Above-grade GSI features do not exceed ten percent  
4 coverage of any one yard area;
- 5                                   2)     No portion of an above-grade GSI feature is located closer  
6 than 3 feet from a side lot line;
- 7                                   3)     No portion of an above-grade GSI feature is located closer  
8 than 20 feet from a rear lot line or centerline of an alley abutting the rear lot line; and
- 9                                   4)     No portion of an above-grade GSI feature is located closer  
10 than 15 feet from the front lot line.

11                                18.     A structure may be permitted to extend into front and rear yards as  
12 necessary to protect exceptional trees and trees over 2 feet in diameter pursuant to Section  
13 25.11.060.

14                                D.     Additional standards for structures if allowed in required yards. Structures in  
15 required yards shall comply with the following:

- 16                                1.     Accessory structures, attached garages, and portions of a principal  
17 structure shall not exceed a maximum combined coverage of 40 percent of the required rear yard,  
18 except that a detached accessory dwelling unit may cover an additional 20 percent of the rear  
19 yard provided that the increased rear yard coverage does not require removal of any exceptional  
20 trees or trees over 2 feet in diameter measured 4.5 feet above the ground. In the case of a rear  
21 yard abutting an alley, rear yard coverage shall be calculated from the centerline of the alley.

Accessory Dwelling Units

1                   2.     Any accessory structure located in a required yard shall be separated from  
2 its principal structure by a minimum of 5 feet. This requirement does not apply to terraced  
3 garages that comply with subsection 23.44.016.C.9.b.

4                   3.     Except for detached accessory dwelling units, ~~((in subsection~~  
5 ~~23.44.041.B,))~~ any accessory structure located in a required yard shall meet both the following  
6 standards:

7                   a.     A maximum height of 12 feet; and

8                   b.     A maximum size of 1,000 square feet in area.

9                   4.     Any detached accessory dwelling unit located in a required yard is subject  
10 to the requirements of subsection 23.44.041.C.

11                                           \* \* \*

12                   Section 3. Section 23.44.017 of the Seattle Municipal Code, enacted by Ordinance  
13 125791, is amended as follows

14 **23.44.017 Density limits**

15                   A. In SF 5000, SF 7200, and SF 9600 zones, only one single-family dwelling unit is  
16 allowed per lot, except that ((an))up to two accessory dwelling units may also be approved  
17 pursuant to Section 23.44.041, and except as approved as part of an administrative conditional  
18 use permit under Section 25.09.260, a clustered housing planned development under Section  
19 23.44.024, or a planned residential development under Section 23.44.034.

20                                           \* \* \*

21                   Section 4. Section 23.44.020 of the Seattle Municipal Code, enacted by Ordinance  
22 125791, is amended as follows:

23 **23.44.020 Tree requirements**

1           A.     Tree requirements in SF 5000, SF 7200, and SF 9600 zones

2                    1. Trees sufficient to meet the following requirements shall be provided

3 when single-family dwelling units are constructed:

4                           a.     For lots over 3,000 square feet, at least 2 caliper inches of tree per  
5 1,000 square feet of lot area.

6                           b.     On lots that are 3,000 square feet or smaller, at least 3 caliper  
7 inches of tree.

8                    2. Trees sufficient to meet the following requirements shall be provided

9 when a new structure, or an addition to an existing structure, containing an accessory dwelling  
10 unit is constructed:

11                           a. For lots that do not contain the minimum number of caliper inches  
12 of tree required by subsection 23.44.020.A.1 at the time a permit application is submitted for any  
13 number of accessory dwelling units, at least 2 caliper inches of tree shall be planted;

14                           b. For lots that contain the minimum number of caliper inches of tree  
15 required by subsection 23.44.020.A.1 at the time a permit application is submitted for any  
16 number of accessory dwelling units, no new trees are required.

17                    ((2)) 3.     The minimum number of caliper inches of tree required may be  
18 met by preserving existing trees, planting new trees, or by a combination of preservation and  
19 planting. The preservation or planting of trees in the right-of-way may be counted, provided that  
20 they are approved by the Director of Transportation.

21                    ((3)) 4.     Submerged land shall not be included in calculating lot area for  
22 purposes of either the tree preservation option or tree planting option.

1 ((4)) 5. Tree measurements. Trees planted to meet the requirements in this  
2 subsection 23.44.020.A shall be at least 1.5 inches in diameter. The diameter of new trees shall  
3 be measured (in caliper inches) 6 inches above the ground. Existing trees shall be measured 4.5  
4 feet above the ground. When an existing tree is 3 to 10 inches in diameter, each 1 inch counts as  
5 1 inch toward meeting the tree requirements in this subsection 23.44.020.A. When an existing  
6 tree is more than 10 inches in diameter, each 1 inch of the tree that is over 10 inches shall count  
7 as 3 inches toward meeting the tree requirement.

8 ((5)) 6. Tree preservation plans. If the tree preservation option is chosen, a  
9 tree preservation plan must be submitted by a certified arborist and approved. Tree preservation  
10 plans shall provide for protection of trees during construction according to standards  
11 promulgated by the Director.

12 7. The owner of the subject lot shall ensure that the trees planted remain  
13 healthy for at least five years after inspection by the City and be responsible for replacing any  
14 trees that do not remain healthy after inspection by the City.

15 \* \* \*

16 Section 5. Section 23.44.041 of the Seattle Municipal Code, last amended by Ordinance  
17 125791, is amended as follows:

18 **23.44.041 Accessory dwelling units**

19 A. ((Accessory dwelling units, general provisions)) General provisions. The Director  
20 may authorize an accessory dwelling unit, and that dwelling unit may be used as a residence,  
21 only under the following conditions:

1                   1.     Number of accessory dwelling units allowed on a lot

2                    a.     In an SF 5000, SF 7200, or SF 9600 zone, a lot with or proposed

3 for a principal single-family dwelling unit may have (~~no more than one~~) up to two accessory

4 dwelling units, provided that the following conditions are met:

5                             1)     Only one accessory dwelling unit may be a detached

6 accessory dwelling unit; and

7                             2)     A second accessory dwelling unit is allowed only if : (1)

8 the applicant makes a commitment that the new principal structure or the new accessory structure

9 containing a detached accessory dwelling unit will meet a green building standard and shall

10 demonstrate compliance with that commitment, all in accordance with Chapter 23.58D. A

11 second accessory dwelling unit that is proposed within an existing structure does not require the

12 structure to be updated to meet the green building standard; or (2) if the second accessory

13 dwelling unit is a rental unit affordable to and reserved solely for “income-eligible households,”

14 as defined in Section 23.58A.004, and is subject to an agreement specifying the affordable

15 housing requirements under this subsection approved by the Director of Housing to ensure that

16 the housing shall serve only income-eligible households for a minimum period of 50 years. The

17 monthly rent, including basic utilities, shall not exceed 30 percent of the income limit for the

18 unit, all as determined by the Director of Housing, and the housing owner shall submit a report to

19 the Office of Housing annually that documents how the affordable housing meets the terms of

20 the recorded agreement. Prior to issuance, and as a condition to issuance, of the first building

21 permit for a project, the applicant shall execute and record a declaration in a form acceptable to

22 the Director that shall commit the applicant to satisfy the conditions to establishing a second

23 accessory dwelling unit as approved by the Director.

1                                    b.        In an RSL zone, each principal dwelling unit may have no more  
 2 than one accessory dwelling unit.

3                                    2.        In the Shoreline District, accessory dwelling units shall be as provided in  
 4 Chapter 23.60A; where allowed in the Shoreline District, they are also subject to the provisions  
 5 in this Section 23.44.041.

6                                    ~~((3.—The owner(s) of the lot shall comply with the owner occupancy  
 7 requirements of subsection 23.44.041.C.~~

8                                    4)) 3.    Any number of related persons may occupy each unit ~~((in a single family  
 9 dwelling unit))~~ on a lot with ((an)) one or more accessory dwelling units.~~((; provided that, if))~~ If  
 10 unrelated persons occupy ((either-)) any dwelling unit, the total number of persons occupying  
 11 ((both)) all dwelling units may not altogether exceed eight if there is one accessory dwelling unit  
 12 on the lot. If two accessory dwelling units exist on the lot, the total number of unrelated persons  
 13 occupying all units may not altogether exceed 12.

14                                    ~~((5.—All accessory dwelling units are required to meet the development  
 15 standards in Table A for 23.44.041, unless modified in subsection 23.44.041.B:~~

<b>Table A for 23.44.041 Development standards for all accessory dwelling units</b>	
a. Maximum gross floor area	<del>Attached accessory dwelling units are limited to 1,000 square feet, including garage and storage area.<sup>1</sup> Detached accessory dwelling units are limited to 800 square feet, including any garage and storage area provided in the same structure as the accessory dwelling unit, but excluding areas below grade, measured as set forth in Section 23.86.007.</del>
b. Entrances	<del>In SF 5000, SF 7200, and SF 9600 zones, only one entrance to the structure may be located on each street-facing facade of the dwelling unit.<sup>2</sup></del>
Footnotes to Table A for 23.44.041: <sup>1</sup> The gross floor area of an attached accessory dwelling unit may exceed 1,000 square feet only if the portion of the structure in which the accessory dwelling unit is located was in existence as of June 1, 1999, and if the entire accessory dwelling unit is located on one level, except that a garage for the accessory dwelling unit may be located on a different level. <sup>2</sup> More than one entrance may be allowed if: a) two entrances on the street-facing facade	

**Table A for 23.44.041  
Development standards for all accessory dwelling units**

~~existed on January 1, 1993; or b) the Director determines that topography, screening, or another design solution is effective in de-emphasizing the presence of a second entrance.))~~

1                   4.       In an SF 5000, SF 7200, or SF 9600 zone, accessory dwelling units are  
2 subject to the tree requirements in subsection 23.44.020.A.2.

3                   ~~((6)) 5.       ((Except on lots located within areas that are defined as either an~~  
4 ~~urban center or urban village in the City’s Comprehensive Plan, one off street parking space is~~  
5 ~~required for the accessory dwelling unit and may be provided as tandem parking with the parking~~  
6 ~~space provided for the principal dwelling unit.))~~ No off-street parking is required for accessory

7 dwelling units. An existing required parking space may not be eliminated to accommodate an  
8 accessory dwelling unit unless it is replaced elsewhere on the lot. ~~((Except for lots located in~~  
9 ~~either Map A for 23.54.015, University District Parking Impact Area, or Map B for 23.54.015,~~  
10 ~~Alki Area Parking Overlay, the Director may waive the off-street parking space requirement for~~  
11 ~~an accessory dwelling unit if:~~

12                   a.       — The topography or location of existing principal or accessory  
13 ~~structures on the lot makes provision of an off-street parking space physically infeasible; or~~

14                   b.       — The lot is located in a restricted parking zone (RPZ) and a current  
15 ~~parking study is submitted showing a utilization rate of less than 75 percent for on-street parking~~  
16 ~~within 400 feet of all property lines of the site.))~~

17                   B.       Attached accessory dwelling units. Attached accessory dwelling units are subject  
18 to the following additional conditions:

1                    1. The gross floor area of an attached accessory dwelling unit may not  
 2 exceed 1,000 square feet, excluding garage area, unless the portion of the structure in which the  
 3 attached accessory dwelling unit is located existed as of December 31, 2017.

4                    2. In an SF 5000, SF 7200, or SF 9600 zone, only one entrance to the  
 5 structure may be located on each street-facing facade of the structure, unless multiple entrances  
 6 on the street-facing facade existed on January 1, 1993, or unless the Director determines that  
 7 topography, screening, or another design solution is effective in de-emphasizing the presence of  
 8 an additional entrance.

9                    ~~((B)) C.~~            ~~((Accessory))~~ Detached accessory dwelling units. ~~((, detached, additional~~  
 10 ~~provisions. The Director may authorize a detached))~~ Detached accessory dwelling units ~~((;~~  
 11 ~~and that unit may be used as a residence, only under the conditions set forth in subsection~~  
 12 ~~23.44.041.A and))~~ subject to the following additional conditions:

13                    1. Detached accessory dwelling units are required to meet the additional  
 14 development standards set forth in Table ~~((B))~~ A for 23.44.041.

<b>Table <del>((B))</del> <u>A</u> for 23.44.041</b>	
<b>Development standards for detached accessory dwelling units<sup>1,2</sup></b>	
a. Minimum lot size	<del>((4,000))</del> <u>3,200</u> square feet

((m. Number per lot	Only one detached accessory dwelling unit is allowed on a lot.))				

**Table ((B)) A for 23.44.041**  
**Development standards for detached accessory dwelling units<sup>1,2</sup>**

Footnotes to Table ((B)) A for 23.44.041

<sup>1</sup> The Director may allow an exception to standards a through f ((~~g~~)) and h ((~~i, and j~~)) through k pursuant to subsection ((~~23.44.041.B.3~~)) 23.44.041.C.2, for converting existing accessory structures to a detached accessory dwelling unit, including additions to an existing accessory structure.

<sup>2</sup> The Director may allow an exception to standards i and j if the exception allows for the preservation of an exceptional tree or a tree over 2 feet in diameter measured 4.5 feet above the ground.

~~((<sup>2</sup>)) <sup>3</sup> For lots that do not meet the lot depth requirement ((~~g~~)) but have a greater width than depth and an area greater than 5,000 square feet, a detached accessory dwelling unit is permitted, provided the detached accessory dwelling unit is not located in a required yard.~~

~~((<sup>3</sup> The exceptions from standard yard requirements in subsection 23.44.014.C.6.a shall also apply.))~~

<sup>4</sup> External architectural details with no living area, such as chimneys, eaves, cornices, and columns, may project no closer than 3 feet from any lot line. Bay windows are limited to 8 feet in width and may project no closer than 3 feet from any lot line. Other projections that include interior space, such as garden windows, must start a minimum of 30 inches above the finished floor, have a maximum dimension of 6 feet in height and 8 feet in width, and project no closer than 3 feet from any lot line.

~~((<sup>4</sup>)) <sup>5</sup> If the lot line is adjacent to an alley and a detached accessory dwelling unit includes a garage with a vehicle entrance that faces the alley, the garage portion of the structure may not be located within 12 feet of the centerline of the alley.~~

~~((<sup>5</sup>)) <sup>6</sup> On a reversed corner lot, no detached accessory dwelling unit shall be located in that portion of the required rear yard that abuts the required front yard of the adjoining key lot.~~

~~((<sup>6</sup>)) <sup>7</sup> Features such as chimneys, antennas, and flagpoles may extend up to 4 feet above the maximum allowed height.~~

~~((<sup>7</sup> Detached accessory dwelling units on lots that have a width greater than 40 feet up to 50 feet may be built to the maximum height limit applicable in the column for lots greater than 50 feet when the detached accessory dwelling unit is located on a lot with a rear lot line that is adjacent to an alley.))~~

<sup>8</sup> Projections that accommodate windows and result in additional interior space, including dormers, clerestories, and skylights, may extend no higher than the ridge of a pitched roof permitted pursuant to row k if all ((~~of~~)) conditions of subsection 23.44.012.C.3 are satisfied.

<sup>9</sup> Any structure with a green roof or other features necessary to meet a green building standard, as defined by the Director by rule, may extend up to 2 feet above the maximum allowed height.

<sup>10</sup> Open railings that accommodate roof decks may extend 4 feet above the base structure height limit.

1 **Exhibit A for 23.44.041**

2 **Additional roof pitch height and base height limit**

3

1                   2.       Conversion of accessory structures. An existing accessory structure that is  
2 not located in a required front yard, or that is located in a front yard where Section 23.40.030 or  
3 23.40.035 applies, may be converted into a detached accessory dwelling unit if the structure  
4 complies with the minimum standards set forth in Sections 22.206.010 through 22.206.140 of the  
5 Housing and Building Maintenance Code and with the Seattle Residential Code, if work  
6 requiring a permit is performed on the structure or has previously been performed without a  
7 permit. ~~((The))~~ To allow the conversion of an existing accessory structure, the Director may  
8 allow an exception to one or more of the development standards for accessory dwelling units  
9 contained in ~~((subsection 23.44.041.A.5 and))~~ standards a through f, and h ~~((, i and j))~~ through k,  
10 listed in Table ~~((B))~~ A for 23.44.041, provided the conversion does not increase the structure’s  
11 nonconformity with the standard. ~~((and))~~ An existing accessory structure may be converted if the  
12 applicant can demonstrate that the accessory structure ~~((was constructed))~~ existed prior to ~~((June~~  
13 ~~1, 1999))~~ December 31, 2017, as an accessory structure. If an accessory structure ~~((constructed))~~  
14 existing prior to ~~((June 1, 1999))~~ December 31, 2017, was replaced to the same configuration in  
15 accordance with the standards of Section 23.42.112, then the replacement structure also qualifies  
16 for conversion under this subsection 23.44.041.C.2. For purposes of this subsection  
17 23.44.041.C.2, the term “conversion” means either keeping the accessory structure intact or  
18 removing and rebuilding the accessory structure, provided that any expansion or relocation of the  
19 accessory structure complies with the development standards for detached accessory dwelling  
20 units.

21                   ~~((C. — Owner occupancy~~

22                   1. — Requirement. An owner with at least a 50 percent interest in the property  
23 ~~must occupy either the principal dwelling unit or the accessory dwelling unit for six or more~~

1 ~~months of each calendar year as the owner's permanent residence. The Director may waive this~~  
2 ~~requirement for up to three years if a letter is submitted that provides evidence to the Director~~  
3 ~~showing good cause why the requirement for owner occupancy should be waived. Good cause~~  
4 ~~may include job dislocation, sabbatical leave, education, or illness.~~

5           2. ~~Violation. If an owner is unable or unwilling to fulfill the requirements of~~  
6 ~~subsection 23.44.041.C.1, the owner shall remove those features of the accessory dwelling unit~~  
7 ~~that make it a dwelling unit. Failure to do so will constitute a violation of this Title 23 and the~~  
8 ~~owner will be subject to penalties pursuant to Sections 23.90.018, 23.90.019 and 23.90.020.~~

9           3. ~~Covenant recording. Prior to issuance of a permit establishing an~~  
10 ~~accessory dwelling unit, the owner(s) shall sign under oath and record in the King County~~  
11 ~~Recorder a covenant by the owner(s) to the City of Seattle stating that the owner(s) agree to~~  
12 ~~restrict use of the principal and accessory dwelling units in compliance with the requirements of~~  
13 ~~this subsection 23.44.041.C and notify all prospective purchasers of those requirements. Falsely~~  
14 ~~certifying to the terms of the covenant or failure to comply with the terms of the covenant is~~  
15 ~~subject to penalties pursuant to Sections 23.90.018, 23.90.019 and 23.90.020.~~

16           ~~The covenant shall run with the land and be binding upon the property owner,~~  
17 ~~his/her heirs and assigns, and upon any parties subsequently acquiring any right, title or interest~~  
18 ~~in the property. The covenant shall be in a form prescribed by the Director that includes the legal~~  
19 ~~description of the principal use lot. The property owner(s) shall return the original covenant with~~  
20 ~~recording stamp to the Department before the building permit for the accessory dwelling unit is~~  
21 ~~issued.~~

22           4. ~~Covenant release. At the request of a property owner and after an~~  
23 ~~inspection finding that an accessory dwelling unit has been removed from the owner's property,~~

1 ~~the Department shall record a release of any previously recorded covenant for that accessory~~  
2 ~~dwelling unit.))~~

3 D. Single-family status unaffected. A single-family lot with any number of accessory  
4 dwelling units shall be considered a single-family ((residence)) dwelling unit for purposes of  
5 rezone criteria (Section 23.34.011).

6 Section 6. Section 23.45.545 of the Seattle Municipal Code, last amended by Ordinance  
7 125791, is amended as follows:

8 **23.45.545 Standards for certain accessory uses**

9 \*\*\*

10 I. In LR zones, accessory dwelling units are allowed((;)) in single-family, rowhouse and  
11 townhouse units, as follows:

12 1. One accessory dwelling unit is allowed for each single-family, rowhouse, or  
13 townhouse unit that is a "principal unit."~~((;))~~ A "principal unit" is a dwelling unit that is not an  
14 accessory dwelling unit.

15 2. ~~((The owner of a principal unit shall comply with the owner occupancy~~  
16 ~~requirements of subsection 23.44.041.C.~~

17 ~~3.))~~2. The height limit for a detached accessory dwelling unit is 20 feet, except  
18 that the ridge of a pitched roof on a detached accessory dwelling unit may extend up to 3 feet  
19 above the 20-foot height limit. All parts of the roof above the height limit shall be pitched at a  
20 rate of not less than 4:12. No portion of a shed roof is permitted to extend beyond the 20-foot  
21 height limit.

22 ~~((4))~~3. The maximum gross floor area of an accessory dwelling unit is 650 square  
23 feet, provided that the total gross floor area of the accessory dwelling unit does not exceed 40

1 percent of the total gross floor area in residential use on the lot or unit lot, if present, exclusive of  
2 garages, storage sheds, and other non-habitable spaces.

3 ~~((5))~~4. An accessory dwelling unit shall be located completely within the same  
4 structure as the principal unit or in an accessory structure located between the single-family,  
5 rowhouse, or townhouse unit and the rear lot line.

6 ~~((6))~~5. The entrance to an accessory dwelling unit provided within the same  
7 structure as the principal unit shall be provided through one of the following configurations:

- 8 a. Through the primary entry to the principal unit; or
- 9 b. Through a secondary entry on a different facade than the primary entry  
10 to the principal unit; or
- 11 c. Through a secondary entry on the same facade as the primary entry to  
12 the principal unit that is smaller and less visually prominent than the entry to the principal unit,  
13 and does not have a prominent stoop, porch, portico or other entry feature.

14 ~~((7))~~6. Exterior stairs. Exterior stairs providing access to an accessory dwelling  
15 unit may not exceed 4 feet in height, except for exterior stairs providing access to an accessory  
16 dwelling unit located above a garage.

17 ~~((8))~~7. Parking. Parking is not required for an accessory dwelling unit.

18 ~~((9))~~8. In the Shoreline District, accessory dwelling units in single-family,  
19 rowhouse, and townhouse units shall be as provided in Chapter 23.60A, and where allowed in  
20 the Shoreline District, ~~((they))~~ are also subject to the provisions in this subsection 23.45.545.I.

21 J. Urban farms are subject to the standards in Section 23.42.051 and the conditional use  
22 requirement in subsection 23.45.504.C.8.

1 Section 7. Section 23.84A.002 of the Seattle Municipal Code, last amended by Ordinance  
2 125791, is amended as follows:

3 **23.84A.002 “A”**

4 \* \* \*

5 “Atrium, shopping.” See “Shopping atrium.”

6 “Attached accessory dwelling unit.” See “Residential use.”

7 “Automobile wrecking yard.” See “Solid waste management, Salvage yard,” under  
8 “Utility.”

9 \* \* \*

10 Section 8. Section 23.84A.032 of the Seattle Municipal Code, last amended by Ordinance  
11 125603, is amended as follows:

12 **23.84A.032 “R”**

13 \* \* \*

14 “Residential use” means any one or more of the following:

15 1. “Accessory dwelling unit” means one or more rooms that:

16 a. ~~((are))~~ Are located within ~~((an owner occupied))~~ a principal  
17 dwelling unit ~~((;))~~ or within an accessory structure on the same lot as ~~((an owner occupied))~~ a  
18 principal dwelling unit;

19 b. ~~((meet))~~ Meet the standards of Section 23.44.041, ~~((or))~~ Section  
20 23.45.545, or Chapter 23.47A, as applicable;

21 c. ~~((are))~~ Are designed, arranged, and intended to be occupied by not  
22 more than one household as living accommodations independent from any other household; and

23 d. ~~((are))~~ Are so occupied or vacant.

1                    2.        “Attached accessory dwelling unit” means an accessory dwelling unit that  
2 is within a principal dwelling unit.

3                    ~~((2))~~ 3.        “Adult family home” means an adult family home defined and  
4 licensed as such by ~~((The))~~ the State of Washington in a dwelling unit.

5                    ~~((3))~~ 4.        “Apartment” means a multifamily residential use that is not a  
6 cottage housing development, rowhouse development, or townhouse development.

7                    ~~((4))~~ 5.        “Artist’s studio/dwelling” means a combination working studio  
8 and dwelling unit for artists, consisting of a room or suite of rooms occupied by not more than  
9 one household.

10                   ~~((5))~~ 6.        “Assisted living facility” means a use licensed by ~~((The))~~ the State  
11 of Washington as a boarding home pursuant to RCW Chapter 18.20~~((;))~~ that contains at least two  
12 assisted living units for people who have either a need for assistance with activities of daily  
13 living (which are defined as eating, toileting, ambulation, transfer ~~((f))~~ (e.g., moving from bed to  
14 chair or chair to bath), ~~((;))~~ and bathing) or some form of cognitive impairment but who do not  
15 need the skilled critical care provided by nursing homes. See “Assisted living unit.”

16                   ~~((6))~~ 7.        “Carriage house” means a dwelling unit in a carriage house  
17 structure.

18                   ~~((7))~~ 8.        “Carriage house structure” means a structure within a cottage  
19 housing development, in which one or more dwelling units are located on the story above an  
20 enclosed parking garage at ground level that either abuts an alley and has vehicle access from  
21 that alley, or is located on a corner lot and has access to the parking in the structure from a  
22 driveway that abuts and runs parallel to the rear lot line of the lot. See also “Carriage house.”

Accessory Dwelling Units

LEG Accessory Dwelling Units ORD  
D7

1                    ~~((8))~~ 9.            “Caretaker’s quarters” means a use accessory to a non-residential  
2 use consisting of a dwelling unit not exceeding 800 square feet of living area and occupied by a  
3 caretaker or watchperson.

4                    ~~((9))~~ 10.            “Congregate residence” means a use in which rooms or lodging,  
5 with or without meals, are provided for nine or more non-transient persons not constituting a  
6 single household, excluding single-family dwelling units for which special or reasonable  
7 accommodation has been granted.

8                    ~~((10))~~ 11.            “Cottage housing development” means a use consisting of cottages  
9 arranged on at least two sides of a common open space or a common amenity area. A cottage  
10 housing development may include a carriage house structure. See “Cottage,” “Carriage house,”  
11 and “Carriage house structure.”

12                    ~~((11))~~ 12.            “Detached accessory dwelling unit” means an accessory dwelling  
13 unit in an accessory structure.

14                    ~~((12))~~ 13.            “Domestic violence shelter” means a dwelling unit managed by a  
15 nonprofit organization, which unit provides housing at a confidential location and support  
16 services for victims of domestic violence.

17                    ~~((13))~~ 14.            “Floating home” means a dwelling unit constructed on a float that  
18 is moored, anchored, or otherwise secured in the water.

19                    ~~((14))~~ 15.            “Mobile home park” means a tract of land that is rented for the use  
20 of more than one mobile home occupied as a dwelling unit.

21                    ~~((15))~~ 16.            “Multifamily residential use” means a use consisting of two or  
22 more dwelling units in a structure or portion of a structure, excluding accessory dwelling units.

1                    ~~((16))~~ 17.        “Multifamily residential use, low-income disabled” means a  
2 multifamily residential use in which at least 90 percent of the dwelling units are occupied by one  
3 or more persons who have a handicap as defined in the Federal Fair Housing Amendments Act  
4 and who constitute a low-income household.

5                    ~~((17))~~ 18.        “Multifamily residential use, low-income elderly” means a  
6 residential use in which at least 90 percent of the dwelling units are occupied by one or more  
7 persons 62 or more years of age who constitute a low-income household.

8                    ~~((18))~~ 19.        “Multifamily residential use, low-income elderly/low-income  
9 disabled” means a multifamily residential use in which at least 90 percent of the dwelling units  
10 (not including vacant units) are occupied by a low-income household that includes a person who  
11 has a handicap as defined in the Federal Fair Housing Amendment Act or a person 62 years of  
12 age or older, as long as the housing qualifies for exemptions from prohibitions against  
13 discrimination against families with children and against age discrimination under all applicable  
14 fair housing laws and ordinances.

15                    ~~((19))~~ 20.        “Nursing home” means a use licensed by ~~((The))~~ the State of  
16 Washington as a nursing home, which provides full-time convalescent and/or chronic care for  
17 individuals who, by reason of chronic illness or infirmity, are unable to care for themselves, but  
18 that does not provide care for the acutely ill or surgical or obstetrical services. This definition  
19 excludes hospitals or sanitariums.

20                    ~~((20))~~ 21.        “Rowhouse development” means a multifamily residential use in  
21 which all principal dwelling units on the lot meet the following conditions:

22                    a.        ~~((each))~~ Each dwelling unit occupies the space from the ground to  
23 the roof of the structure in which it is located;

LEG Accessory Dwelling Units ORD  
D7

- 1                                    b.        ~~((no))~~ No portion of a dwelling unit, except for an accessory
- 2 dwelling unit or shared parking garage, occupies space above or below another dwelling unit;
- 3                                    c.        ~~((each))~~ Each dwelling unit is attached along at least one common
- 4 wall to at least one other dwelling unit, with habitable interior space on both sides of the
- 5 common wall, or abuts another dwelling unit on a common lot line;
- 6                                    d.        ~~((the))~~ The front of each dwelling unit faces a street lot line;
- 7                                    e.        ~~((each))~~ Each dwelling unit provides pedestrian access directly to
- 8 the street that it faces; and
- 9                                    f.        ~~((no))~~ No portion of any other dwelling unit, except for an attached
- 10 accessory dwelling unit, is located between any dwelling unit and the street faced by the front of
- 11 that unit.

12                                    ~~((21))~~ 22.        “Single-family dwelling unit” means a detached principal structure

13 having a permanent foundation, containing one dwelling unit, except that the structure may also

14 contain ~~((an))~~ one or two attached accessory dwelling units where expressly authorized pursuant

15 to this Title 23. A detached accessory dwelling unit is not considered a single-family dwelling

16 unit for purposes of this Chapter 23.84A.

17                                    ~~((22))~~ 23.        “Townhouse development” means a multifamily residential use

18 that is not a rowhouse development, and in which:

- 19                                    a.        ~~((each))~~ Each dwelling unit occupies space from the ground to the
- 20 roof of the structure in which it is located;
- 21                                    b.        ~~((no))~~ No portion of a dwelling unit occupies space above or below
- 22 another dwelling unit, except for an attached accessory dwelling unit and except for dwelling
- 23 units constructed over a shared parking garage; and

1 c. ~~((each))~~ Each dwelling unit is attached along at least one common  
2 wall to at least one other dwelling unit, with habitable interior space on both sides of the  
3 common wall, or abuts another dwelling unit on a common lot line.

5 Section 9. Section 23.84A.038 of the Seattle Municipal Code, last amended by Ordinance  
6 125792, is amended as follows:

7 **23.84A.038 “T”**

8 \* \* \*

9 “Tree, exceptional” means a tree designated as such per Chapter 25.11.

10 “Triplex” means a single structure containing three ~~((3))~~ dwelling units, none of which  
11 is an accessory dwelling unit authorized under Section 23.44.041.

12 Section 10. Section 23.86.007 of the Seattle Municipal Code, last amended by Ordinance  
13 125791, is amended as follows:

14 **23.86.007 Floor area and floor area ratio measurement**

15 \* \* \*

16 D. Pursuant to subsections 23.44.011.C, 23.44.018.A, 23.45.510.D, and  
17 23.47A.013.B, and Section 23.48.020, for certain structures in ~~((RSL))~~ single-family,  
18 multifamily, commercial, and Seattle Mixed zones, portions of a story that extend no more than 4  
19 feet above existing or finished grade, whichever is lower, are exempt from calculation of gross  
20 floor area. The exempt gross floor area of such partially below-grade stories is measured as  
21 follows:

- 1                    1.        Determine the elevation 4 feet below the ceiling of the partially below-
- 2                    grade story, or 4 feet below the roof surface if there is no next floor above the partially below-
- 3                    grade story;
- 4                    2.        Determine the points along the exterior wall of the story where the
- 5                    elevation determined in subsection 23.86.007.D.1 (~~above~~) intersects the abutting corresponding
- 6                    existing or finished grade elevation, whichever is lower;
- 7                    3.        Draw a straight line across the story connecting the two points on the
- 8                    exterior walls; and
- 9                    4.        The gross floor area of the partially below-grade story or portion of a
- 10                    partially below-grade story is the area of the story that is at or below the straight line drawn in
- 11                    subsection 23.86.007.D.3, excluding openings required by the Building Code for egress. (See
- 12                    Exhibit B for 23.86.007.)

\* \* \*

14                    Section 11. The Seattle Department of Construction and Inspections (SDCI) shall report

15                    annually for five years after implementation to the Planning, Land Use and Zoning Committee,

16                    or its successor committee, on citywide accessory dwelling unit permit activity. The report shall

17                    be delivered to the City Council by no later than June 30 of the following calendar year, with the

18                    first report due on June 30, 2021, and the final report due on June 30, 2025. This annual report

19                    shall include detailed information on all attached and detached accessory dwelling unit (ADU)

20                    permits issued and all permits finalized, including:

- 21                    A.        The number of permits issued to construct ADUs and the number of permits
- 22                    finalized over the previous five-year period. This should include the number of permits issued and

1 finished for a second ADU and details on whether the second ADU was constructed in a new  
2 structure or through conversion of or an addition to an existing structure;

3 B. The number of permits issued for ADUs that were associated with the  
4 redevelopment of a single-family lot that included demolition of a principal single-family  
5 dwelling unit;

6 C. A map that shows the location and dispersion of both attached and detached  
7 accessory dwelling units, including the number and location of lots that have two ADUs;

8 D. For each detached accessory dwelling unit permit issued, the report shall state the  
9 height, gross floor area, total square footage of the lot where the detached accessory dwelling  
10 unit is located, and total lot coverage of all structures on the lot;

11 E. Information on the number of short-term rental operator licenses issued by the  
12 Department of Finance and Administrative Services (FAS) that authorizes short-term rental use  
13 in an ADU. In addition, the City Council requests that SDCI work with FAS to develop this  
14 information and identify recommendations, as appropriate, for modifications to the regulations  
15 governing short-term rental use. If the report reveals that a significant number of accessory  
16 dwelling units are being used solely as short-term rentals, the City Council intends to impose  
17 additional restrictions or a prohibition on short-term rental use in accessory dwelling units; and

18 F. The number of ADU permits that have included the addition of new off-street  
19 parking spaces. In addition, SDCI shall report on parking-related impacts, if any, that have been  
20 identified by the City as a result of new ADUs in an area. This should include a recommendation  
21 on any modifications the City Council should consider to the off-street parking requirements for  
22 accessory dwelling units, including geographic specific recommendations.

1           G.     By July 1, 2022, SDCI and the Office of Planning and Community Development  
2 (OPCD) shall conduct a voluntary survey of ADU owners and occupants to collect descriptive  
3 statistics of owners and occupants of ADUs. This shall include information on the use, size,  
4 financing, rent charged, ownership, design, and construction of ADUs built in Seattle, and  
5 general demographic information of ADU owners and occupants. Any information collected  
6 must be in compliance with applicable legal limitations. OPCD and SDCI shall provide a report  
7 to the Planning, Land Use and Zoning Committee, or its successor committee, on the survey  
8 results. In addition, OPCD and SDCI shall report on challenges to constructing ADUs identified  
9 through the survey results and recommend changes to address identified challenges.

10           Section 12. The City Council requests that the Seattle Department of Construction and  
11 Inspections develop a process to ensure that, at the time a permit to construct an accessory  
12 dwelling unit is issued, property owners are provided educational materials about becoming a  
13 landlord, including applicable state and local laws about landlord obligations and the rights of  
14 renters. In addition, SDCI shall notify those property owners of any available trainings for  
15 landlords.

16           Section 13. The City Council requests that the Seattle Department of Construction and  
17 Inspections (SDCI) develop an amnesty program for accessory dwelling units that were  
18 constructed without permits. The program shall permit owners of accessory dwelling units  
19 constructed without a permit to come forward during a certain time period and legalize their  
20 units without penalty. SDCI shall develop standards that will not discourage owners from  
21 seeking legalization of the units voluntarily, including identifying the potential for flexibility  
22 from Land Use Code and Building Code standards that would simplify and reduce the cost of  
23 legalizing these units while ensuring that the accessory dwelling units are safe and habitable.

1           Section 14. The City Council requests that the Office of Housing (OH) reports to the  
2 Council by September 1, 2020, on the outcomes and lessons learned from the pilot program that  
3 authorizes loans to low-income homeowners who want to create additional habitable space or an  
4 accessory dwelling unit on their property. In addition, OH shall provide recommendations on the  
5 potential for expanding this program, or creating a new program, to offer financial support to any  
6 homeowner who enters into an agreement to offer the ADU as a rent- and income-restricted unit.

7           Section 15. The Council requests that the Seattle Department of transportation consider  
8 opportunities to increase access to public bicycle parking areas in single-family zones.

9           Section 16. Section 1 of this ordinance shall take effect and be in force on March 1, 2020.

**Ordinance No. 12- 2007**

**Ordinance to Amend Ordinance 7-2006 Regarding Detached Accessory Dwelling Units on Rural Parcels Smaller than Five Acres in Size to Comply with Orders of the Growth Management Hearings Board**

WHEREAS, on June 8, 2006, Ordinance 7-2006 was adopted to amend San Juan County Code sections pertaining to accessory dwelling units (ADUs) with the purpose of bringing San Juan County into compliance with an order of the Western Washington Growth Management Hearings Board (Growth Board); and

WHEREAS, on February 12, 2007, the Growth Board ruled in its Compliance Order and Final Decision and Order that “The only provision of the amendments that the Board has found noncompliant is SJCC 18.40.240(G)(4)”; and

WHEREAS, the Growth Board’s February 12, 2007 Compliance Order and Final Decision and Order states that:

The regulations that permit a detached ADU to be constructed or converted in a nonconforming rural lot of less than 5 acres (SJCC 18.40.240(G)(4)) fail to comply with RCW 36.70A.070(5) by expanding the structural intensity in rural zones beyond that which is set out in the County comprehensive plan and/or is inconsistent with the GMA....SJCC 18.40.240(G)(4) also creates urban growth in rural zones and promotes sprawl, thus not complying with RCW 36.70A.110(1) and RCW 36.70A.020(2)

; and

WHEREAS, the County Council desires to take a narrow approach to the Growth Board’s Order and bring SJCC 18.40.240(G)(4) into compliance with the Growth Management Act; and

WHEREAS, on May 18, 2007, the Planning Commission held a public hearing on the proposed ordinance; and

WHEREAS, on May 30, 2007, notice of a Council public hearing was published in the official newspapers; and

WHEREAS, on June 19, 2007, the Council held a public hearing on this matter.

NOW, THEREFORE, IT IS ORDAINED AS FOLLOWS:

Section 1. San Juan County Code §18.40.240 and Ordinance 7-2006 are hereby amended to read as follows:

**18.40.240 Accessory dwelling units (ADUs).**

The following standards apply to all accessory dwelling units:

A. Accessory Dwelling Unit. Where not otherwise prohibited by this code, only one attached or detached accessory dwelling unit is permitted on any lot for which this code allows a

principal residence as the principal use of the lot; provided, that all of the requirements of this section are met, except where the applicable density for that lot allows for additional residences. Each detached accessory dwelling unit shall be counted as a separate dwelling unit for density calculations, except when allowed pursuant to an ADU permit.

- B. A detached ADU is permitted in the Eastsound urban growth area, the Lopez Village urban growth area and in all activity center land use districts, except island center district, on any lot that allows a principal residence as the principal use of the lot. Each ADU in these areas shall not be counted in density calculations.
- C. Subject to the provisions of this section, a detached ADU is permitted in the following land use districts: RFF, RR, RGU, AG, and FOR.
- D. An accessory dwelling unit is prohibited in the rural industrial, rural commercial, natural, and conservancy land use districts.
- E. An accessory dwelling unit is prohibited on parcels in the island centers district per SJCC 18.30.030 Table 3.1, footnote 13.
- F. The following standards apply to all accessory dwelling units:
  - 1. Size. An accessory dwelling unit permitted subsequent to the adoption of this section shall not exceed 1,000 square feet in living area as defined in SJCC 18.20.120.
  - 2. Parking. At least one additional off-street parking space shall be provided for the accessory dwelling unit in addition to the parking required for the principal residence.
  - 3. Driveway and Utilities. An accessory dwelling unit shall use the same driveway, septage/sewer system, and water system as the principal residence.
  - 4. Ownership. An accessory dwelling unit must be owned by the owner of the principal residence.
  - 5. Permits. Every new accessory dwelling unit will require a building permit. Every conversion of an existing structure to an accessory dwelling unit must meet all the requirements of this section and will require a building permit. Any additions to an existing building shall not exceed the allowable lot coverage or encroach onto setbacks. The size and design of the ADU shall conform to applicable standards in the building, plumbing, electrical, mechanical, fire, health and any other applicable codes.
- G. The following standards apply to all detached accessory dwelling units:
  - 1. ADU Permit. Every new detached accessory dwelling unit and every conversion of an existing structure to a detached accessory dwelling unit that does not meet the density requirement of the parcel on which it will be located shall require an "ADU permit." No more than one ADU permit shall be issued to a property owner in any calendar year. The fee for an ADU permit shall be the same as that for stormwater review. Prior to issuing any ADU permit, the applicant must submit for approval a site plan showing that the accessory dwelling unit and principal residence will meet the requirements of this section.
    - a. Within land use districts located inside of the boundaries of activity centers and urban growth areas, there is no restriction on the number of permits for detached accessory dwelling units.
    - b. Outside of the boundaries of activity centers and urban growth areas, the number of detached ADU permits in any calendar year shall not exceed 12 percent of the total

- number of building permits for new principal residences issued for the previous calendar year outside the boundaries of activity centers and urban growth areas. Two of that 12 percent (10 percent new, two percent conversions) of the permits released in any one year shall be restricted for the conversion of existing accessory structures that have legally existed for no less than five years. ADU permits shall be issued on a first come/first served basis under procedures established by the administrator. No unassigned ADU permits shall carry forward to the next year.
2. Distance. The maximum distance between the closest vertical walls of the main house and any detached accessory dwelling unit shall be no more than 100 feet. If the 100 foot dimension would result in a greater impact, the administrator may allow up to 150 feet separation.
  3. Location. Locate every new detached ADU and its utilities and driveway to avoid or minimize intrusion on the most sensitive open-space features of the site, including but not limited to:
    - a. Existing orchards, meadows and pasture areas;
    - b. Ridgelines and contrasting edges between landscape types unbroken by structures;
    - c. Rolling, open or steep open slopes; and
    - d. Critical areas.
  4. Parcel Size.
    - a. There is no minimum parcel size for a detached ADU in urban growth areas and activity centers. A detached ADU is not permitted on parcels less than one acre in size except in urban growth areas and activity centers.
    - b. A detached ADU is not permitted on parcels less than: (1) five acres in size in any rural district, (2) ten acres in size in the agricultural district, and (3) twenty acres in size in the forest district. A detached ADU on parcels larger than one acre and smaller than five acres, except in urban growth areas and activity centers, is permitted with the following restrictions:
      - i. One garage building and/or one accessory dwelling unit, each of which covers no more than 1,000 square feet of land area and each of which is no taller than 24 feet above existing grade as measured along a plumb line at any point.
      - ii. A combination of these uses in a single story structure no larger than 2,000 feet of land area and no taller than 16 feet above existing grade as measured along a plumb line at any point where either the garage building and/or accessory building unit do not exceed 1,000 square feet.
      - iii. A combination of these uses in a two-story structure no larger than 2,000 feet of total gross floor area, and no taller than 24 feet above existing grade as measured along a plumb line at any point where either the garage building and/or accessory building unit do not exceed 1,000 square feet.
    - c. The minimum parcel size for the construction of a detached accessory dwelling unit is five acres for any parcel with waterfront, 10 acres for parcels located in the agricultural district, 20 acres for parcels located in the forest district, and one acre for all parcels located in a rural land use district. This restriction does not apply to parcels located in urban growth areas or activity centers.

5. **Sequence of Construction.** Either the accessory dwelling unit or the principal residence may be built first. Regardless of the sequence of construction, every detached accessory dwelling unit must comply with the requirements of this section. When the principal residence is constructed after the ADU, the applicant must show that the structure indicated as the accessory dwelling unit was constructed according to all applicable requirements in effect at the time the building permit was issued for the accessory dwelling and the accessory dwelling unit does not exceed 1,000 square feet of living area.

**Section 2. Savings Clause.**

This ordinance shall not affect any pending suit or proceeding; or any rights acquired; or liability or obligation incurred under the sections amended or repealed; nor shall it affect any proceeding instituted under those sections. All rights and obligations existing prior to adoption of this ordinance shall continue in full force and effect.

**Section 3. Severability.**

If any provision of this ordinance or its application to any person is held invalid, the remainder of this ordinance and the application to other persons or circumstances shall not be affected. Remaining sections of the ordinance shall be interpreted to give effect to the spirit of the ordinance prior to removal of the portions declared invalid.

**Section 4. Effective Date.**

This ordinance shall take effect and be in full force and effect ten days after adoption by the County Council.

ADOPTED this 19th day of June 2007.

**COUNTY COUNCIL**

**SAN JUAN COUNTY, WASHINGTON**

**14.16.710 Accessory dwelling units.**

(1) Requirements for Accessory Dwelling Units. One accessory dwelling unit is permitted as accessory to an existing single-family dwelling; provided, that the following requirements are met, except as may be further restricted by the connection limitation in SCC 14.16.920, Similk Beach LAMIRD:

(a) Owner Occupancy. Either the principal unit of the single-family dwelling or the accessory dwelling unit must be occupied by an owner of the property or an immediate family member of the property owner.

(b) No more than 1 family shall be allowed to occupy an accessory dwelling unit.

(c) Subdivision. Accessory dwelling units shall not be subdivided or otherwise segregated in ownership from the principal unit of the single-family dwelling, unless allowed by the zoning.

(d) Size and Scale. The square footage of the accessory dwelling unit shall be the minimum allowed by the building code and a maximum of 900 square feet excluding any garage area; provided, however, the square footage of the accessory dwelling unit shall not exceed 50% of the total square footage of the principal unit of the single-family dwelling excluding the garage area as it exists or as it may be modified.

(e) Location. The accessory dwelling unit may be attached to, included within the principal unit of the single-family dwelling, or located in a detached structure. All requirements of the International Building Codes regarding fire separation shall be met.

(i) No recreational vehicle, including park model trailers, shall be allowed as an accessory dwelling unit.

(ii) Any accessory dwelling unit included within a primary residence shall have no interconnected interior spaces.

(iii) All accessory dwelling units shall contain provisions for eating, sleeping, cooking and sanitation.

(f) Entrances. The principal unit of the single-family dwelling containing the accessory dwelling unit shall have only 1 obvious entrance visible to the street except where more than 1 entrance existed on or before adoption of the ordinance codified in this Section.

(g) Additions. Additions to an existing structure or newly constructed detached structures created for developing an accessory dwelling unit shall be designed consistent with the existing roof pitch, siding and windows of the principal dwelling unit.

(h) Parking. Three off-street parking spaces shall be provided for the combination of the main and

accessory dwelling units.

(i) Application. The property owner shall apply for an accessory dwelling permit with Skagit County Planning and Development Services.

(j) Recording Requirements. Approval of the accessory dwelling unit shall be subject to the applicant recording a document with the Skagit County Auditor prior to approval which runs with the land and identifies the address of the property, states that the owner(s) or an immediate family member must reside in either the principal dwelling unit or the accessory dwelling unit at least six months per year, includes a statement that the owner(s) will notify any prospective purchasers of the limitations of this Chapter, and provides for the removal of the accessory dwelling unit by the current owner if any of the requirements of this Chapter are violated.

(k) Elimination/Expiration. Elimination of an accessory dwelling unit may be accomplished by the following:

(i) The owner shall obtain either a demolition permit or a change of use permit.

(ii) The owner shall record a certificate with the Skagit County Auditor's Office stating that the accessory dwelling unit no longer exists on the property and that a final inspection has been performed by Skagit County Planning and Development Services. (Ord. O20170006 § 1 (Att. 1); Ord. O20070009 (part); Ord. R20020194 § 7; Ord. 17938 Attch. F (part), 2000)

## Zoning Code 2018 Update

You may have heard that there is a new zoning code for the City of Walla Walla. You heard right! City Development Services staff formulated a new Comprehensive Plan that was adopted in June 2018 by City Council.

Our new zoning code which implements the goals and policies of the Comprehensive Plan was adopted by City Council on December 19, 2018, with an effective date of January 2, 2019.

This document is intended to be a high-level guide to the changes that are outlined fully in Ordinance 2018-53. Please consult City staff or the ordinance for additional detail.

### The Changes

- Neighborhood Residential (RN) zone replaces former R-60, R-72, and R-96 zones
  - RN does not have a minimum lot size or lot dimensions
  - RN setbacks are 20 feet from front and rear property lines, 5 feet from either side (these are the same as former R-60 and R-72)
  - RN maximum lot coverage (how much of the lot can be covered with roofed structures, including home, garage, covered porches, sheds, etc) is 50%
  - RN maximum height is 35 feet (no change)
  - RN established a minimum density of 4 units per net acre (minus any critical areas and buffers and right of way to be dedicated)
  - RN allows for the development of: single-family homes, duplexes, triplexes, fourplexes, townhomes, and cottage housing
    - Cottage housing means multiple detached dwelling units that share common areas
    - Cottage homes may not be larger than 1000 square feet
- Accessory Dwelling Unit (ADU) standards were relaxed
  - Maximum size of 800 square feet (no longer dependent on home size)
  - Removed owner occupancy requirement
  - Removed neighbor comment requirement for detached ADUs
  - ADUs are allowed only for single-family homes
- Multifamily Residential (RM) development potential was increased
  - Established density requirements with a minimum of 20 units per acre and maximum of 75 units per acre
  - Lot coverage for RM increased to 65%
  - Building height for RM increased to 60 feet
- Standalone multifamily development in Highway Commercial (CH) zone was made easier
  - Level II review (administrative) instead of Level III (public hearing)
- Parking code requirements were reduced
  - Bicycle parking requirement increased to ten percent of parking stalls
  - Reductions of the number of required stalls made easier to grant
  - Parking table stall requirements decreased for specific commercial uses

- Residential parking requirements based on specific use (all standards are per unit):
  - 2 stalls for single family residential
  - 2 stalls for duplex
  - 1.5 stalls for multifamily
  - 1 stall for studio apartment
  - 1 stall for ADU
  - 1 stall for cottage home
- Added connectivity requirement for new residential developments
  - Minimum block length is 200 feet, maximum length is 600 feet
  - Maximum block perimeter is 1,400 feet
- Restrictions on use of new cul-de-sacs except when environmental or topographical constraints, existing development patterns, etc preclude street extension
  - When cul-de-sacs are allowed, an access way at the end of the cul-de-sac to provide pedestrian and cyclist access to adjacent developable land is required
  - Maximum length for cul-de-sacs increased to 600 feet
- Private lanes are not allowed for developments of more than 9 lots, may not connect 2 public streets, and may only provide access to 9 units of housing or less
  - Private lanes may be up to 600 feet long
  - Private lanes which access 5 or more units shall provide sidewalks on one side
- Updated the Urban Planned Community zone – mixed use zone (new definitions and requirements rather than using the County’s standards)
- Landscaping requirements clarified
  - Street frontage landscaping required for redevelopments
- Fences on corner lots no longer require a setback on the secondary front yard side
- Adaptive Reuse of Nonresidential Buildings in Residential Zones
  - Limited to major and minor arterials and collector streets
  - Only for existing buildings, not new construction
  - Level II use – no hearing
  - Limited kinds of uses
    - Medical/dental offices
    - Convenience stores
    - Professional offices
    - Retail bakeries/coffee shops
    - Florists
    - Seamstress/tailor/similar

## FAQs!

**Q:** Can I build a duplex? Is this lot big enough or zoned right for a duplex?

**A:** Yes! Duplexes are allowed in all residential zones. Be sure to meet setback, lot coverage, height, and parking requirements.

**Q:** Can I have a tiny home?

**A:** If it is site-built, yes. We do not currently allow for tiny homes built on wheels as they do not meet Washington State Building Codes.

**Q:** How many units can we put on this lot? How many lots can we split this lot into? What can I do with this lot?

**A:** It depends! The flexibility of the new zoning code means that it will depend on what will be a good fit for the neighborhood. Minimum density, setbacks, lot coverage, height and parking requirements must be met.

**RCW 43.63A.215****Accessory apartments—Development and placement—Local governments.**

(1) The department shall, in consultation with the affordable housing advisory board created in RCW **43.185B.020**, report to the legislature on the development and placement of accessory apartments. The department shall produce a written report by December 15, 1993, which:

(a) Identifies local governments that allow the siting of accessory apartments in areas zoned for single-family residential use; and

(b) Makes recommendations to the legislature designed to encourage the development and placement of accessory apartments in areas zoned for single-family residential use.

(2) The recommendations made under subsection (1) of this section shall not take effect before ninety days following adjournment of the 1994 regular legislative session.

(3) Unless provided otherwise by the legislature, by December 31, 1994, local governments shall incorporate in their development regulations, zoning regulations, or official controls the recommendations contained in subsection (1) of this section. The accessory apartment provisions shall be part of the local government's development regulation, zoning regulation, or official control. To allow local flexibility, the recommendations shall be subject to such regulations, conditions, procedures, and limitations as determined by the local legislative authority.

(4) As used in this section, "local government" means:

(a) A city or code city with a population that exceeds twenty thousand;

(b) A county that is required to or has elected to plan under the state growth management act; and

(c) A county with a population that exceeds one hundred twenty-five thousand.

[ **1993 c 478 § 7.**]
