Buffer width may be increased from the 50-foot standard due to topographic, vegetative or wildlife habitat features which would logically suggest a wider buffer.

- ____(7) Sites within an urban area which would serve as a buffer between residential development and tracts of land in excess of five acres which are designated on an adopted comprehensive plan for commercial or industrial development:
- ____(a) Where the site area is covered by stands of trees in excess of 20-feet in height, and,
 - ____(b) Where the ground vegetation creates a visual separation of at least 50-feet between the residential tracts of land and the commercial or industrial lands, or;
 - ____(c) Where the topographic features of the site form a physical separation from the abutting commercial or industrial lands by reason of gull or ravine or similar land condition.
- ____(8) Areas that would safely provide either public vehicular or pedestrian access to public bodies of water:

- ____(a) Where there are several varieties or species of flora, fauna, or both present on the site making it desirable for educational study, or;

- ___(b) Where there are habitats or species of plant life which are considered rare, sensitive, threatened or endangered by an authority recognized by the county, **or**:
- ___(c) Where there is or are recognized landmarks present on the site which provide visual reference and orientation for surrounding terrain (would include major promontories and rock formations but would exclude mountain forms and ranges), **or**;
- ___(d) Where there are historic or archeological features on the site of at least fifty years of age, which would have value to future generations due to the uncommon nature or rare representation of past times and events.
- _____(12) Areas located adjacent to public parks, public trails or other public lands which would materially add to or enhance the recreational opportunities of that facility:
- ___(a) Where such a site would constitute a logical extension of the park or other public lands including provisions for public use but has been excluded principally by lack of funds, **or**;
- ___(b) Where the site would provide additional public access to such lands during the duration of its open space classification, **or**;
- ___(c) Where the site contains unique features of recreational value which if public use of the site were allowed would expand the variety of recreational opportunities contained in the park or public land, **or**;
- ___(d) Where the site would act as a buffer between the park and surrounding development.
- _____(13) Areas which contain or abut managed or monitored wildlife preserves or sanctuaries, arboretums or other designated open space and which will enhance the value of those resources:
- ___(a) Where the open space designation would encompass a minimum of 10 acres in land area, **and**:

- ___(c) Where the site area can be distinguished from surrounding land due to the unusualness of the vegetation or the animal life inhabitants.
- ___(14) Wetland areas of at least 1/4 acres in size. Associated wetland buffers of 50-feet may also be included. The wetland buffer width may be increased from the 50-foot standard due to topographic, vegetative or wildlife habitat features which would logically suggest a wider buffer.
- ___(15) Areas which lie adjacent to scenic highways which if not designated as open space would otherwise be subject to pressures for intense development:
- ___(a) Where such highways have been designated by a city, the county or the state as scenic, and;
- ___(b) Where at least one-half of the total site lies within 200 feet of the highway, and;

- ___(16) Undeveloped areas, five acres and larger which are not within the 100 year flood plain, suitable for agricultural pursuits which may not currently be devoted to such use:
- ___(a) Where the comprehensive land use plan or the agricultural preservation plan designates the site as suitable for agricultural development, or;
