**Parks & Trails Plan**

Everett Parks, Recreation & Open Space Plan

FINAL February 2022

**4.2.I Park Minimum Guidelines**

Each park should be improved over time to achieve minimum standards to meet community needs and to provide consistent and sustainable management and maintenance. The minimum guidelines are meant to be considered during park concept planning or as individual improvements are proposed. The guidelines are advisory since site analysis and public engagement would produce information that best influence each park's future.

***Neighborhood***

Neighborhood Parks are intended for frequent and convenient access to basic recreation activities and opportunities. They typically serve neighborhoods within walking distance of a half mile. Neighborhood parks provide passive, multiuse space, with opportunities for active recreation consistent with site conditions and compatibility. This may include areas such as multi-use fields and courts, play equipment, trails, picnic areas, and open space. Neighborhood parks provide open space values. They are less suited for longer stays, heavily programmed activities, or larger rental or permit-required spaces. These parks prioritize open space over parking and encourage visitation through pedestrian and bike networks. Since these parks serve the immediate neighborhood, they typically do not have restrooms.

- Open and accessible landscape for unstructured activity, play, and respite
- Pathways between elements and to safely enter and exit the park
- Simple seating where appropriate and accommodating
- Seating and picnic tables
- Basic maintenance, care, and landscape improvements

**Where feasible and appropriate in their contexts, parks falling into this typology should consider:**

- Sports and fitness accommodations, surfacing and equipment
- Open playfields
- Community gardens
- Dog park for properties with at least half acre available
- Picnic shelters
- Trash receptacles, and leash and scoop dispensers, where applicable, consistent with the Garbage Service Plan and Pack it In Pack it Out initiative
- Conservancy and nature park protections
- Natural or low-intervention areas and green space, and pesticide-free areas
- Irrigation
- Use of green stormwater infrastructure approaches
- Universal design of park facilities

Because of the intent and goals for neighborhood parks they should **limit** where appropriate:

- Off street parking
- Restrooms
- Horticultural programs and plantings that do not have a committed maintenance program or sponsor

## Pesticide Free Parks

---

Integrated Pest Management (IPM) seeks to limit chemical means to control pests. Instead IPM focuses on pest prevention and uses pesticides only as needed. Examples of pest prevention include: careful plant selection, using mulch to reduce weeds and build soil health, and hand weeding and other non-chemical techniques. Park agencies including Everett have IPM programs; Everett's IPM program is dated and is ready for update. Some departments have an IPM coordinator.

Some park systems offer pesticide free parks that are maintained without the use of registered pesticides. If it becomes necessary to apply pesticides, the site is clearly posted before, during and after the application to notify users. At the time of this writing, Seattle has limited the use of pesticides and has identified 22 parks that are pesticide free. MetroParks Tacoma has designated 8 pesticide free parks.

Everett's minimum park guidelines in this chapter reference use of a regularly updated IPM program and designated pesticide free areas where feasible.
