Subject: Professional Services Agreement CC03-26 with Rhythm Engineering, LLC.

Scope: This agreement would allow the Department of Public Works to obtain traffic counting data collection equipment and online support services.

Duration: Execution through February 28, 2029.

Fiscal Impact: Current Year Multi-Year N/A

Funds for this contract are included in the Road Fund 2025-2026 adopted budget.

EXPEND	2025	2026	Amount
10250610123109 Technology Supplies		\$180,675.60	\$180,675.60
REVENUE	2025	2026	Amount
Road Fund 102		\$180,675.60	\$180,675.60

Authority Granted: Approves and authorizes the County Executive to sign the Agreement for Professional Services with Rhythm Engineering, LLC, in an amount not to exceed \$180,675.60.

Background: The County issued an RFP for support services and equipment repairs of traffic and pedestrian data collection devices. Four firms responded to RFP-25-0416RB-S. Rhythm Engineering, LLC was selected through established federal, State and County policies and practices.

County Public Works currently uses equipment and devices to measure traffic and pedestrian volumes. This equipment is out of date, and the manufacturer is no longer available to service the needs or repairs.

The proposed contract would allow Public Works to obtain traffic data collection equipment and online support services.

Action Requested: For the Council to move the motion to GLS on April 15, 2026, for consideration.
