I support the letter submitted to the County Council by Futurewise. Their recommendations would change the Recommended Countywide Planning Policies for Snohomish County, Ordinance No. 21-059. The policy changes will help increase equity, reduce pollution, protect the environment, protect people and property, and increase affordable housing.

Thank you

Dear County Council,

Just a quick note in support of the proposed countywide Planning Policies, ordinance 21-059. The proposed changes represent the values that our community holds dear, including justice and diversity, and advances the sustainability of human occupation of these originally tribal lands.

Thanks,
Don and Paula Dillinger
