BETWEEN

THE STATE OF WASHINGTON DEPARTMENT OF ECOLOGY

AND

SNOHOMISH COUNTY - FACILITY AND FLEET SERVICES

This is a binding Agreement entered into by and between the state of Washington, Department of Ecology, hereinafter referred to as “ECOLOGY,” and Snohomish County - Facility and Fleet Services, hereinafter referred to as the “RECIPIENT,” to carry out with the provided funds activities described herein.

GENERAL INFORMATION

Project Title:	Snohomish County Campus Parking Garage- 48 Level 2 Chargers Fleet/Public
Total Cost:	\$1,400,000.00
Total Eligible Cost:	\$100,000.00
Ecology Share:	\$100,000.00
Recipient Share:	\$0.00
The Effective Date of this Agreement is:	04/01/2024
The Expiration Date of this Agreement is no later than:	06/30/2025
Project Type:	Level 2 electric vehicle charging equipment

Project Short Description:

Snohomish County is requesting grant assistance with upgrading outdated charging Electric Vehicle Supply Equipment in County parking garage. The project will include expansion of current charging network and installation of modern charging stations. This will be mixed use of fleet vehicles overnight and public access/ employee workplace charging during business hours.

Project Long Description:

The current infrastructure in the Snohomish County parking garage consists of 12 charging stations, which, unfortunately, are old and failing, and faces limitations in terms of power availability for expansion. Recognizing the growing demand for electric vehicle (EV) charging services, our grant request aims to address this issue by undertaking a comprehensive project to revamp the existing charging infrastructure. This endeavor will not only enhance the garage's electric vehicle charging capacity but also transform it into an intelligent and efficient network of chargers to meet the needs of a rapidly

evolving market.

The proposed project encompasses several critical components to accomplish its objectives. Firstly, it necessitates the removal of the existing charging stations, a crucial step to create the necessary space and electrical capacity for the new system. The process will also involve the installation of new conduit, wiring, service panels, and transformers, which are all essential elements to ensure a robust and safe electrical infrastructure for EV charging.

In addition to these fundamental upgrades, the project will incorporate an Energy Management System (EMS). The EMS will play a pivotal role in optimizing energy utilization and ensuring efficient distribution of power to the charging stations. This is not only a green initiative to reduce energy waste but also a cost-effective approach to operating the EV charging network.

Furthermore, compatibility with the Open Charge Point Protocol (OCPP) 1.6 or a later version is a cornerstone of this project. OCPP compatibility ensures that the charging stations can seamlessly communicate with various charging networks and service providers, enhancing user accessibility and convenience. It also future-proofs the system, making it adaptable to emerging technologies and industry standards, thereby prolonging its utility.

Beyond the immediate concerns, the project will encompass electrical engineering enhancements aimed at future-proofing the garage's electrical infrastructure. This forward-thinking approach recognizes the inevitable growth in EV adoption and the need for ongoing expansion and improvements in charging facilities. By investing in electrical upgrades, we ensure that the garage is well-prepared to accommodate higher power requirements, as well as incorporate new technologies and innovations as they arise, ultimately offering a sustainable and adaptable solution.

In summary, the grant request seeks funding to undertake a substantial project in the Snohomish County parking garage. This endeavor involves the removal and replacement of the existing charging stations, the installation of necessary electrical infrastructure, the implementation of an Energy Management System, and the integration of OCPP compatibility. It will also include electrical engineering enhancements for future-proofing the facility to meet the increasing demand for electric vehicle charging services. The project aims to not only enhance the EV charging capacity in Snohomish County but also to demonstrate a commitment to sustainability, innovation, and progress in the realm of electric mobility. Your support will be instrumental in bringing this vision to life, benefiting the local community, and contributing to a more sustainable and electrified future.

Overall Goal:

- Reduce emissions from transportation in communities susceptible to higher levels of environmental health risk factors
- Increase access across the state to level 2 charging at businesses, multi-unit dwellings, government owned properties, and other places where residents of Washington spend at least 1-4 hours

ECOLOGY reserves the right to terminate this Agreement if RECIPIENT fails to commence work on the project funded within four (4) months after the effective date of this Agreement, or by any date mutually agreed upon in writing for commencement of work, or the time period defined within the Scope of Work.

In the event the RECIPIENT unjustifiably fails, in the opinion of ECOLOGY, to perform any obligation required of it by this Agreement, ECOLOGY may refuse to pay any further funds, terminate in whole or in part this Agreement, and exercise any other rights under this Agreement.

Despite the above, the RECIPIENT shall not be relieved of any liability to ECOLOGY for damages sustained by ECOLOGY and the State of Washington because of any breach of this Agreement by the RECIPIENT. Non-Allocation of Funds. ECOLOGY's ability to make payments is contingent on availability of funding. In the event funding from state, federal or other sources is withdrawn, reduced, or limited in any way after the effective date and prior to the completion or expiration date of this Agreement, ECOLOGY, at its sole discretion, may elect to terminate the Agreement, in whole or part, or renegotiate the Agreement, subject to new funding limitations or conditions. ECOLOGY may also elect to suspend performance of the Agreement until ECOLOGY determines the funding insufficiency is resolved. ECOLOGY may exercise any of these options with no notification or restrictions, although ECOLOGY will make a reasonable attempt to provide notice.

In the event of termination or suspension, ECOLOGY will reimburse eligible costs incurred by the RECIPIENT through the effective date of termination or suspension. Reimbursed costs must be agreed to by ECOLOGY and the RECIPIENT. In no event shall ECOLOGY's reimbursement exceed ECOLOGY's total responsibility under the Agreement and any amendments.

d) In Event of Termination

All finished or unfinished documents, data studies, surveys, drawings, maps, models, photographs, reports or other materials prepared by the RECIPIENT under this Agreement, at the option of ECOLOGY, will become property of ECOLOGY and the RECIPIENT shall be entitled to receive just and equitable compensation for any satisfactory work completed on such documents and other materials.
