

Lake Roesiger Invasive Species Service Charge - Ordinance

Sectional Analysis

Section 1 – Amends the title of an existing service charge for aquatic plant control to clarify that it is for Lake Goodwin and Lake Shoecraft.

Section 2 – Adds a new service charge for aquatic plant control on Lake Roesiger. Properties will be charged as follows.

Lake Front	\$170/parcel
Shared Lakefront	\$35/parcel
Off Lake	\$20/parcel

The service charge will be in effect from January 1, 2023 through December 31, 2027. Funds collected through this service charge are to be used solely for Lake Roesiger aquatic invasive species plant management.

Section 3 – Repeals SCC 25.20.060, service charges for lake management on Lake Stevens as it is obsolete due to the annexation of Lake Stevens (the body of water) to the City of Lake Stevens.

Section 4 through 7 – Technical amendments throughout Chapter 25.20 Snohomish County Code. Throughout this chapter there are references back to specific sections. The amendments made in sections 4 through 7 updated these references by changing the language from listing each section to a generic statement. There is no impact with this change, other than cleaning up code.
