An HSSIII position was added for 2023 while the current HSSIII is still working, and the new HSSIII is being added with a pre-approved FTE position number. This will resolve the issue of having the current supervisor's position in the 2023 appropriation

NEW0426R	New Position	HUMAN SERVICES SPECIALIST II	239	1.000	02	6	\$5,862.14	\$72,094	\$31,585
					03	6	\$6,153.55		

This position is funded entirely with Grant funds from ECEAP. It is necessary to meet programmatic needs. Management is budgeting starting at Step 2 as that is where most candidates experience level has been.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** 102 - Admin Operations Expenditure Adjustment

**Package ID #:** 106

**Category:**

**Description:** This package reflects adjustments to the Administrative Operations (AO) Division non-capital base budget.

Sub program areas include Management, General Services, Training, Transfers Out, Interfund Transfers (preloads), Debt Service, and Public Works Assistance Fund loan program.

**Justification:** Notable budget items and changes include:

- 1) Reclassification of a half time Office Assistant I (employee graduated from County Supported Employment Program) to a full time Office Assistant II (Regular FTE). The budget for this reclass is included in Priority Package 117.
- 2) \$300,000 for first year of Climate Change Decision Support Tool updates and/or replacement project. A grant submittal in 2022 is pending. The total grant submittal is \$875k for a multi-year project. The local match is only anticipated to be around \$50k if awarded.
- 3) New contract for Automatic Vehicle Location (AVL) licenses and equipment. The existing AVL contract is approaching expiration and an RFP is planned in 2022 for a new contract. This may include implementation costs and new equipment.
- 4) Continued services and annual dues for Kronos timekeeping and Aurigo construction management software systems.
- 5) \$750,000 in anticipated Public Works Assistance Fund loan payouts to awarded cities. Loan payouts are dependent upon timing of loan awards, contract execution, and project progress/completion.
- 6) Staff training identified by PW DEI Strategic Plan and County Office of Social Justice.

### **SUMMARY EXPENDITURE/REVENUE/FTE BY FUND:**

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** 102 - Engineering Services Expenditure Adjustments

**Package ID #:** 107

**Category:**

**Description:** This package reflects adjustments to the Engineering Services (ES) Division non-capital base budget. The non-capital base budget is higher than the prior year by approximately 17%. This is largely driven by an increase to reimbursable services construction, which is entirely reimbursed by the customer.

The largest component of the ES division budget is for the ACP - Annual Construction Program (CIP Priority Package 110).

Adjustments have been entered into the following program areas:

- 1) Operations Program
- 2) Maintenance Program
- 3) Capital Program (CIP Package 110)
- 4) Reimbursable Program
- 5) FTE changes

**Justification:** 1) The Operations Program budget is mostly flat from the prior year.

The request for technology includes hardware upgrades, software licenses and renewals (such as Autodesk, Trimble, Leica, Gint, Visio, Bluebeam, etc.).

The request for machinery and equipment includes an additional vehicle for the construction team, and standard survey and geo-tech equipment replacements.

2) The Maintenance Program budget is mostly flat from the prior year. Budget is included for UBIT inspections (under bridge inspection truck) and diving payments to WSDOT. There is a backlog of this work from prior years.

3) The Capital Program (ACP) budget is reflected in CIP Priority Package 110. The ACP is expected to utilize about 50% of ES staff time, consultants, interns, and other County staff to deliver a historically large capital program.

4) The Reimbursable Program budget is increasing from the prior year from an expense standpoint. This is driven by an increase to construction costs for Alderwood Wastewater District (AWWD) and Silver Lake Wastewater District (SWWD), associated with some larger road construction projects. ES continues to provide many reimbursable services to other County divisions, County departments, and outside agencies.

5) The reallocation of FTEs throughout the ES division budget is based on staffing needs to deliver planned programs and projects.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** 102 - Road Maintenance Expenditure Adjustments

**Package ID #:** 108

**Category:**

**Description:** This package reflects adjustments to the Road Maintenance (RM) division non-capital base budget.

The overall RM division budget has increased in 2023 by approximately 5%. This is driven by higher annual ER&R equipment and fuel costs, as well as increased costs for maintenance materials based on recent usage and pricing trends. The pricing for materials (e.g., asphalt, concrete, rebar, excavated materials, steel, and fuel) have increased around 10% to 20% over the last year, during an ongoing time of high inflation.

Another notable change is six (6) new FTEs requested in a separate priority package to form two new RM NPDES maintenance crews (Priority Package 140). This work will largely be funded by the Surface Water Management division of CNR. Sufficient funding and demand for services is anticipated indefinitely for these additional crews to maintain compliance with NPDES mandates.

An allocation of costs across RM programs is related to an annual shift in work plans. The 2023 budget request includes levels of staffing, equipment, and materials necessary to deliver the core maintenance activities, some ACP capital construction work, and some reimbursable services for other County departments and outside agencies.

Adjustments have been entered into the following areas:

- 1) Operations Program
- 2) Maintenance Program
- 3) Capital Program (CIP Package 110)
- 4) Reimbursable Program
- 5) Employee Labor Allocation

**Justification:** 1) The Operations Program budget is made up of the Facilities and Training sub programs:

The Facilities sub program provides budget to maintain the RM division's wide array of facilities, which are necessary to operate the Maintenance, Capital, and Reimbursable programs.

Arlington Shop: Ongoing upkeep efforts at the existing Arlington Shop until the site can be re-developed.

Old Snohomish Shop property: Ongoing professional services for environmental cleanup and legal services at the Snohomish Shop site, to obtain a No Further Action designation from the Department of Ecology (DOE), and to coordinate with the remediation on the private source property. This includes consultant services to potentially sell or lease the property.

Sand Hill Pit replacement property: The Sand Hill Pit property was sold in 2020 and has been replaced with a new site at a better logistical location in the Granite Falls area. The new property will require site improvements to become fully operable (Priority Package 158).

The Training sub program budget is on par with the prior year. Training for RM workers is necessary to maintain a productive and safe work environment.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** 102 - Road Maintenance Expenditure Adjustments

**Package ID #:** 108

**Category:**

2) The Maintenance Program budget has increased from the prior year. The Maintenance Program is made up of six sub programs, including Roadway/Roadside, Storm Drainage, Structures, Traffic & Pedestrian, Noxious Weed, and Maintenance Overhead. These are the primary functions of the RM division. The Maintenance Program budget accounts for about 80%-90% of the total RM division budget annually. Most of the costs are made up of labor, equipment, and materials to maintain the unincorporated Snohomish County roads system. Also, included is budget capacity for response to small or mid-sized emergency events such as flood and snow fights.

As part of the 2023 budget request, Noxious Weeds is being moved to Surface Water Management in the CNR department. Road Fund will continue to pay for services in the Roads right-of-way through a reimbursable services agreement with SWM.

3) The Capital Program is tied to the County Forces budget in the Annual Construction Program - ACP (CIP Package 110).

4) The Reimbursable Program budget is flat from the prior year. However, it is significantly higher than prior year actuals which have been limited due to staffing shortages. Reimbursable services fluctuate annually based on available staffing and demand from other PW divisions, County departments, and cities/local agencies. The RM division balances its reimbursable workload with its county roads system maintenance responsibilities. This Reimbursable Program can be better delivered with the requested two new RM NPDES maintenance crews.

5) FTEs and Extra Help have been reallocated among the various program activities to more accurately reflect where efforts will be focused. Budget increases and decreases reflect changes in allocation of labor and commensurate adjustments to equipment and/or materials to assure staff will have the resources available to complete their required tasks.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** 102 - TES Expenditure Adjustments

**Package ID #:** 109

**Category:**

**Description:** This package reflects adjustments to the Transportation & Environmental Services (TES) Division non-capital base budget. The (non-capital) budget (operations, maintenance, and reimburseable) is slightly higher than prior year, with minimal change requests.

Adjustments have been entered into the following areas:

- 1) Salaries & Benefits
- 2) Supplies/technology/equipment
- 3) Professional Services and Consultant
- 4) FTEs

**Justification:** Adjustments have been entered into the following areas:

- 1) Salaries & Benefits
- 2) Supplies/technology/equipment
- 3) Professional Services and Consultant
- 4) FTEs

### JUSTIFICATION

1) Salaries and benefits are distributed to the appropriate programs and subprograms to reflect the anticipated work to be accomplished in 2023.

2) The supplies budget includes expenses for general office, technology, and maintenance supplies. There is an increase of \$266k from the prior year for replacement of old signal controllers, conflict monitors, and other annual upgrades and replacements to traffic signal technologies and equipment.

3) The professional services and consultant budget includes services for continued planning for light rail, the 8-year Comprehensive Plan update, and transportation studies for concurrency analysis. Consultant is included to support more environmental work on capital projects for other County departments. Budget is also included for Urban Core Infrastructure financing.

4) Two (2) new FTEs are requested for 2023 (See Priority Package 392).

### SUMMARY EXPENDITURE/REVENUE/FTE BY FUND:

Expenditures Package Summary		
FUND	102	\$2,246,484
<b>TOTAL - EXPENDITURES</b>		<b>\$2,246,484</b>

FTE Change Summary			
FUND	102	CHANGE	18.000
<b>TOTAL - FTE CHANGES</b>			<b>18.000</b>

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** CIP - Capital

**Department:** 06 Public Works

**Short Name:** 102 - Road Fund Transportation Improvement Program

**Package ID #:** 110

**Category:** Roads

**Description:** The Annual Construction Program (ACP) is updated each year along with the six-year Transportation Improvement Program (TIP) to specify the transportation capital program in accordance with the adopted Comprehensive Plan, which sets the stage for future land use and growth through 2035. To meet the needs of an estimated 238,000 new residents, the ACP & TIP provides for new and/or enhanced capital improvements to create a viable arterial network.

The 2023 ACP and capital road fund expenditure budget includes construction of large grant-funded transportation improvements including 36th Ave W/35th Ave W and Index Galena Rd flood repair. In addition, the capital program continues to invest in pavement preservation, ADA, safety, and non-motorized programs. The 2023 ACP continues to stretch and leverage local Road Fund dollars, with \$1.64 in grant funds for every \$1 of Road Fund.

### 2023 PROGRAM COMPONENTS

This package describes the capital road construction program and provides staffing support, consultant and contract services necessary to design, acquire right-of-way (R/W), and construct \$43 million in capital improvement projects. These projects will provide for a safe, efficient transportation system that meets the growing needs of Snohomish County residents and businesses.

The 2023 capital program consists of \$7.2 million in Preliminary Engineering (PE), which is the basic design work needed to develop projects. PE also accounts for dollars spent through the environmental permitting process, as well as for public review of projects. \$6.4 million will be devoted to R/W acquisition for new and expanded roadways. R/W dollars are also spent on land needed for drainage/detention areas and environmental mitigation sites. Approximately \$24.1 million will be spent on construction by contract and \$1.3 million by County Forces on smaller scale projects. \$4.0 million will be for construction engineering and inspection needed to ensure projects are built as designed and traffic flow and safety throughout the work zones are maintained.

A. ENGINEERING & STUDIES (\$255,000). This category funds preliminary project planning and specialized reviews directly associated with the ACP projects needed to ensure transportation infrastructure meets the County's growing needs.

B. PAVEMENT PRESERVATION AND REHABILITATION PROGRAM (\$6,575,000; 75% grant funded). Snohomish County uses a Pavement Management System, which provides a systematic approach to lengthen roadway life by timely preservation and maintenance. When road reconstruction is warranted, these projects fall under this category along with the associated ADA ramp upgrades. Additionally, implementation of the County's ADA Transition Plan is budgeted here.

C. NON-MOTORIZED/TRANSIT/HIGH OCCUPANCY VEHICLE (\$1,042,000; 32% grant funded). This category funds projects to improve pedestrian and multi-modal connections along major roadways and in growing urban areas. Projects seek to improve walking conditions along popular routes between schools, transit stops, and residential and commercial areas. Safer walking conditions make it easier for citizens to take

**Package ID #:** 110

**Category:** Roads

advantage of alternative modes to driving. Well-planned connections promote an area's vitality and sense of community. This category includes the County's payments to Community Transit for the Curb the Congestion program.

D. TRAFFIC SAFETY/INTERSECTIONS (\$8,312,000; 19% grants, 36% mitigation). These projects provide safety improvements to spot locations, which are designed to improve traffic flow and eliminate hazards. Projects include adding turn lanes, neighborhood traffic calming devices, traffic signals, guard rail installation, and road bank stabilization projects. This category also includes the Index Galena Road and Goodman Creek Culvert flood repair projects.

E. CAPACITY IMPROVEMENTS (\$19,361,000; 30% grants, 30% mitigation). Projects in this expenditure category are designed to increase vehicle carrying capacity on the County road system. The projects provide satisfactory levels of service to meet transportation system concurrency requirements identified in the Transportation Element of the County's Comprehensive Plan. Where warranted, capacity projects add travel lanes along corridors and improve major intersections. New roadway alignments are also included in this category. Generally, these projects include bike lanes, sidewalks, landscaping and illumination. 36th Ave W/35th Ave W, 43rd Ave SE, and Alderwood Mall Parkway are included in this category.

F. BRIDGE REPLACEMENT & REHABILITATION (\$2,388,000; 43% grant funded). This category funds replacement and rehabilitation of deficient County bridges. Bridge projects are identified through federal and state bridge condition inspection findings and the County's Annual Bridge Condition Report.

G. DRAINAGE (\$5,102,000; 32% grants, 57% SWM). Drainage projects improve and preserve drainage infrastructure on the County road system. These projects lie within County road right of way, are an integral part of the road system, and are necessary to maintain and preserve system condition. A component of this category is replacement of culverts under County roads that are currently fish blockages. The Mann Rd and Ben Howard Rd Improvements project is included in this category.

**Justification:** The capital program strongly addresses all four purchasing strategy components and the goal of providing reasonable and predictable travel times. These strategy components include:

IMPROVE ROAD SAFETY: The ACP supports this goal by constructing projects to improve traffic flow and reduce hazards. Such projects are found primarily in Category D.

MANAGE, MAINTAIN AND CONSTRUCT ROADS: The ACP addresses this objective through its comprehensive focus on all types of County infrastructure, from roadways to bridges. Category B reflects continued investment in the County's pavement management system to assure that the ~1,600 miles of roads are resurfaced on a schedule that protects them from deterioration which would result in more extensive and expensive reconstruction later. Category F features continued improvement to the County's bridges; while Category G addresses County road right-of-way drainage issues, an integral part of the road system and necessary to maintain and preserve system condition.

PLAN TO AVOID DELAYS: Spending in the ACP implements construction of transportation improvements identified through the County's Comprehensive Plan and the Transportation Needs Report. Many of the projects in the capital program add roadway capacity by adding travel lanes, bicycle and pedestrian facilities,

and operational improvements such as turn lanes and signals. Category E showcases the capacity improvements needed to maintain transportation concurrency and to remain in compliance with Comprehensive Plan and GMA goals.

ENCOURAGE ALTERNATIVES: Planned capital improvements in Category C encourage alternative modes of travel by providing interconnected bicycle and pedestrian facilities. These non-motorized components are also constructed on bridge and core urban projects where funding allows.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** 192 - Traffic Mitigation Fund Expenditure Adjust

**Package ID #:** 111

**Category:**

**Description:** This package reflects transfers from Transportation Mitigation Program Fund 192 to County Road Fund 102 to support the Transportation Annual Construction Program (ACP) and six (6) year Transportation Improvement Program (TIP).

Traffic impact mitigation payments are imposed as conditions of approval upon development applications in accordance with the County's traffic mitigation ordinance, SCC Chapter 30.66B. Generally, payments are made prior to building permit issuance. These funds are placed in interest-bearing accounts in the Transportation Mitigation Fund (Fund 192) and held until transferred to the County Road Fund (Fund 102) to offset expenditures on eligible transportation improvement projects.

By statute, funds must be spent on eligible projects within ten (10) years or returned to the property owner. The use of mitigation funds is programmed in the Annual Construction Program for Transportation (ACP) and in the Six Year Transportation Improvement Program (TIP), which are prepared by the Public Works Department and adopted by County Council. Mitigation funds are also being utilized for Transportation Demand Management Programs.

**Justification:** Public Works estimates fee collection revenue over the TIP's six-year period, and factors these estimates, together with existing use of available fund balance, into the revenues available for transportation projects.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** 402 - Solid Waste Expenditure Adjustments

**Package ID #:** 112

**Category:**

**Description:** This package reflects adjustments to the Solid Waste Management Division (Solid Waste) non-capital base budget.

The overall Solid Waste budgeted revenue has decreased by 6% from the 2022 budget. This is due to the proceeds from a large property sale budgeted in 2022. Budgeted expenses are increasing 10.5%. This is largely driven by consumer price index related to the waste export disposal contract and added headcount to match increases in service demands. As a result, the division is anticipating using fund balance in 2023.

This package contains revisions to employee positions and/or step dates.

**Justification:** Corrected Position and Step Dates:

The Highline information that was uploaded into BDT only captured the base position for some employees who work in bid shifts. Employees in bid shifts may change multiple times throughout the year, whenever there is a shift rebid. Rather than re-class employee positions depending on the bid shift, any employee working in a higher grade is put in a temporary upgrade, via a Payroll Record Change (PRC). The corrected position and step changes were necessary to capture the correct salaries and benefits costs to fully fund Solid Waste labor for 2023.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** CIP - Capital

**Department:** 06 Public Works

**Short Name:** 402 - Solid Waste Capital Improvement Program

**Package ID #:** 113

**Category:** Solid Waste

**Description:** This package includes the 2023 portion of the 6-year Capital Improvement Plan (CIP) for the Solid Waste Division (SWD).

The 2023 Capital Program includes:

- ARTS Tipping Floor Repair (\$885K)
- ARTS Scale house HVAC Improvements (\$125k)
- NCRTS Transfer Station Feasibility Study (\$50k)
- NCRTS Leachate System Improvements (\$215k)
- Dubuque Drop Box Planning & Design (\$125k)
- Sultan Drop Box Asphalt Overlay (\$50k)
- ESS Bldg M Upper Roof Replacement (\$300k)
- ESS Remote Sensor Standardization (\$420k)
- ESS Bldg K Retrofit/Bldg M Replacement (\$825k)
- MRW Floor Refinishing (\$125k)
- Vactor Facility Improvements (\$725k)
- Intermodal Facility Property Security Improvements (\$50k)
- CWOC Culvert Replacement (\$250k)
- CWOC Telecom Relocation (\$125k)
- Equip - EV Yard Goat (upgrade from diesel 2 ea) (\$250k)
- Equip - Diesel Yard Goat Buyback (training/spare) (\$25k)
- Equip - Semi-truck (line truck 2 ea) (\$340k)
- Equip - Diesel-electric Loader for CWRTS (\$350k)
- Equip - Upsize Excavator for SWRTS (\$100k)
- Scale Automation Software RFP / Procurement (\$275k)
- Sisco Landfill Closure Design/Permitting (\$125k)
- Contingency funding for unanticipated repair (\$350k)

**Justification:** ARTS Tipping Floor Repair - The tipping floor at ARTS is 20 years old. During it's life sections of the floor have been replaced multiple times. Due to excessive wear and local sections being repaired, the overall slope of the floor is out of spec, causing water to pond and be tracked out of the building. This project will mill the floor down just above the structural rebar, then apply a hardened concrete overlay that will return the floor to its original slope and durability.

ARTS Scale House HVAC Improvements - The HVAC system in the ARTS scale house is outdated and obsolete. Many parts are not available and the system has had significant failures including a fire in the HVAC system. This project will remove and replace the system with an energy efficient heat pump and ducts to all three buildings.

NCRTS Transfer Station Replacement Feasibility Study - NCRTS was commissioned in 1988, and at that time was a state-of-the-art transfer station. Although still functional, the station is not properly designed or sized to handle current customer counts and tonnage. Other significant design flaws include the lack of any surge capacity, and poorly designed environmental handling of stormwater and leachate. This study will determine the feasibility of replacing the transfer station on existing property, thereby eliminating the need for a siting

---

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

	<b><u>Package Type</u></b> CIP - Capital	<b><u>Department:</u></b> 06 Public Works
<b><u>Short Name:</u></b>	402 - Solid Waste Capital Improvement Program	<b><u>Package ID #:</u></b> 113
<b><u>Category:</u></b>	Solid Waste process.	

NCRTS Leachate System Improvements - The County recently received a NOV for the leachate effluent that flows into the City of Arlington's wastewater treatment system. The leachate system is not designed to treat and/or reduce contaminant concentrations to the city's standards. This project will retrofit and/or install new equipment capable of meeting the cities IWDP requirements.

Dubuque Drop Box Planning and Improvements - The Dubuque Drop Box has not had a substantial upgrade since it was built in 1974. Since that time, this portion of unincorporated Snohomish County has seen substantial growth. For the past several years, the Dubuque Drop Box has lacked adequate capacity and queuing to serve the residents and businesses that rely on it to dispose of their solid waste and recycling materials. This project will design a facility that will handle the East County growth for the next 40 years.

Sultan Drop Box Asphalt Overlay - The asphalt at the Sultan Drop Box is in poor condition and requires a mill and overlay. This project will establish a smooth durable asphalt surface to ensure the safety of staff and customers, and the proper flow of stormwater.

ESS Bldg M Upper Roof Replacement - This is phase 2 of replacing the 22-year old roof on Bldg M at CWOC. This project will remove and replace the upper metal roof, gutters, insulation, and vapor barrier.

ESS Remote Sensor Standardization - The Environmental Services Section of Solid Waste is responsible for the operation, monitoring, and reporting of various environmental collection and treatment systems throughout the County. Many of these systems are using technology that is outdated and obsolete, making it increasingly difficult to ensure compliance with regulatory permits. This project will replace this technology with new systems that are more energy efficient and reliable, ensuring environmental compliance at SW facilities.

ESS Bldg K Retrofit/Building M Replacement - The Cashiering Section of Solid Waste work out of Bldg M at CWOC, a very old triple wide mobile home that has numerous structural and mechanical issues. This building will need to be demolished in place, as it has no resale value. The Division has spare space in the warehouse section of Bldg M. This project will design and construct office space in Bldg K to relocate the staff from building M.

MRW Floor Refinishing - The Moderate Risk Waste Facility in the McDougal Bldg processes hazardous chemicals and commodities for safe disposal. The concrete floor must have a durable impervious finish to maintain a safe, environmentally sound work environment. The existing floor finish is failing due to excessive wear. This project will remove the existing floor finish and install a new durable floor finish.

Vactor Facility Improvements - The Vactor Decant Facility at CWOC is over capacity and requires additional floor space, decant bins, and grit storage. This facility directly supports the County municipal and industrial NSPDES requirements. This project will design and construct additional capacity to provide disposal service for County and Private vactor trucks that maintain stormwater infrastructure throughout Snohomish County.

Intermodal Facility Property Security Improvements - Lots 7 & 9 at the Riverside Business Park located in Everett WA are owned by Snohomish County. These lots are adjacent to Lot #8, which is also owned by Snohomish County where it operates an intermodal facility, placing solid waste onto trains. Lot # 8 is secured

---

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** CIP - Capital

**Department:** 06 Public Works

**Short Name:** 402 - Solid Waste Capital Improvement Program

**Package ID #:** 113

**Category:** Solid Waste

with a fence that is maintained by the current lessee Republic. This project will secure Lots 7 & 9 which are currently subject to trespassing and homeless encampments.

CWOC Culvert Replacement - Surface Water and Engineering Services identified failing culverts in Garden Creek. These crossing are utilized by Road Maintenance and Solid Waste. This project will remove and replace culvert #2, located on the west side of the closed Cathcart Landfill.

CWOC Telecom Relocation - Numerous telecom and telemetry connections are made in the aging Bldg M. As Bldg M will be demolished when new office space is created in Bldg K, the telecom currently located in Bldg M will need to be relocated locally in a new structure. This project will construct a small building to house the important telecom equipment that is used locally by the Vactor Decant Facility and CWRTS.

Equip - EV Yard Goat (upgrade from diesel 2 each) - The remaining 2 diesel powered yard goats are nearing the end of useful life, the Division would like to replace with EV yard goats similar to those in use at ARTS and SWRTS. These funds will pay for the difference in price between a diesel unit and an EV unit.

Equip - Diesel Yard Goat Buyback (training/spare) - The Division would like to keep 1 diesel yard goat as a backup in the event an EV unit is down for maintenance. This unit will also be used as a training unit for new hires and refresher training.

Equip - Semi-truck (line truck 2 ea) - The Division requires additional semi-trucks to move the increasing volume of commodities. These funds will purchase 2 heavy duty diesel semi-trucks with a GVWR of 105,500 lbs.

Equip - Diesel-electric Loader for CWRTS - The Division will need to replace a rental unit with an ER&R asset to process MSW at the Cathcart Way Recycling and Transfer Station. King County reported success using the hybrid diesel electric units which have less emissions than standard diesel loaders. These funds will purchase a diesel-electric loader.

Equip - Upsize Excavator for SWRTS - During the recent piling of refuse at SWRTS, the Division discovered that the current excavator is undersized for this type of work. These funds will pay for upgrading to a larger unit when replaced by ER&R.

Scale Automation Software RFP / Procurement - The current scale automation contract expires in 2023 and cannot be extended. It is anticipated that multiple vendors may bid on this service, these funds will pay for the new scale automation system.

Sisco Landfill Closure Design/Permitting - As part of a settlement agreement, the County will use restricted third-party funds to pay for closure of the Sisco Landfill in accordance with state and local regulations. The Division is in the final stages of acquiring land associated with the Sisco Landfill. The Division is working with Ecology to move the Sisco Landfill from the MTCA VCP process to an Agreed Order in order to permit, design and perform final closure of the landfill. These funds will pay for consulting and legal fees to assist the Division with permitting and design.

Contingency funding for unanticipated repairs - Funding to support repairs for unanticipated equipment failures.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** CIP - Capital

**Department:** 06 Public Works

**Short Name:** 188 - Arlington Operations Center

**Package ID #:** 114

**Category:** Roads

**Description:** The Road Maintenance Division (Road Maintenance) operates from two locations: the Arlington Shop and the Cathcart Way Operations Center, maintaining approximately 1,600 road miles and 202 bridges. Road Maintenance has approximately 70 full time staff based at the Arlington Shop and 110 staff based at Cathcart, with high levels of seasonal staff added during summer months. Road Maintenance provides day-to-day maintenance and small project construction services. It is also an important emergency responder for flooding, landslides, opening roads for utilities, and other emergency services. The Arlington Shop serves the north county (RM District 1), which has approximately 562 road miles. It also is the location of the Bridge Crew, which maintains all the County's 205 bridges.

The Fleet Services Division, Facilities and Fleet, operates an equipment maintenance shop at the Arlington Shop site with a staff of eight mechanics, one supervisor, and one storekeeper. The shop repairs and maintains the trucks and heavy equipment used by the road crews at Arlington. The shop also repairs and maintains Solid Waste trucks equipment and performs urgent repairs on Sheriff's vehicles. Fleet Stores purchases and maintains an inventory of material and supplies that support the road crews, including guardrail, bridge timbers and components, drainage structures and culverts, and other supplies.

The proposed Arlington Operations Center project will provide approximately 15,000 square feet of staff office and meeting space. The project will include a redevelopment plan for the Arlington Shop site, including the eventual replacement of the ER&R Maintenance Shop (construction for ER&R shop not included in this CIP request), to be completed in a later phase as funding is available.

This package requests in 2023 to hire consultants for the Phase 1 improvements which include design and construction of the new administrative/crew building, utility and stormwater improvements, and remediation of contaminated soil.

The Arlington Operations Center project has a planning level cost estimate of \$34.9 million over life of the project. This priority package requests \$2,755,000 for consultant design work and preliminary construction in 2023. Funding for this redevelopment project is proposed by a combination of Road Fund revenue generated from the sale of various properties, \$1 million contribution from Fleet/ER&R, and non-voted construction bonds.

**Justification:** Arlington office and staff facilities consist of a modular office building that needs significant repair and is too small to serve current crew size. The vehicle storage facilities are deficient for the number and size of vehicles, and some of the existing structures are requiring demolition. The facilities are old, dilapidated, and beyond their useful life. Material storage is deficient for today's permitting requirements, and what does exist needs enlargement over their existing size. The overall site is lacking several features for safety, security, and is inefficient for current operations.

Through preparation of the Public Works Continuity of Operations Plan (COOP) and participation in the 2016 Cascadia Rising Exercise, it has become clear that uninterrupted operation of both Road Maintenance facilities (Arlington & Cathcart) is necessary for emergency response and recovery during a major earthquake or other disaster event. In contrast to Arlington, the Cathcart Way Operations Center is built on consolidated glacial till, has modern steel construction, back-up generators and a secure fueling station. The Arlington Shop site is located on some unconsolidated sands, gravels, and silts that would be prone to liquefaction in a seismic event.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

**Package Type** CIP - Capital

**Department:** 06 Public Works

**Short Name:** 188 - Arlington Operations Center

**Package ID #:** 114

**Category:** Roads

Analysis has shown that an earthquake in the M7.0 to M9.0 range on either the Cascadia Fault or South Whidbey Island Fault could result in ground settlement of up to 7-inches causing the Arlington Shop to be potentially compromised. In response to this risk, it is recommended that the existing shop site be redeveloped to be resilient with proper building foundations, parking, and driveways that will survive the seismic liquefaction for continued operation after such an event.

The Arlington Shop is identified in the COOP plan as an alternate work location for Fleet's other two shops (Cathcart and McDougall). The McDougall Shop is vulnerable in an earthquake due to the unreinforced concrete block wall construction. McDougall is the location where law enforcement and other emergency vehicles (DEM, Medical Examiner, Animal Control, SERS, etc.) are serviced and repaired. In an emergency that closes McDougall, it is critical to be up and running at another shop as quickly as possible to support law enforcement and emergency responders. If McDougall and the existing Arlington Shop were unusable at the same time, as could happen in a major earthquake, Fleet would not have the capacity to service these vehicles.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** PW - Position Reclassifications

**Package ID #:** 117

**Category:**

**Description:** This package describes pending position reclassification activity for the Public Works Department. It provides budget authority to fund potential position reclassifications (those proposed, submitted, union appealed, and/or currently undergoing HR review).

All associated cost estimates are allocated under the appropriate personnel cost contingency line item for each Public Works division.

**Justification:** Pending/Proposed Reclassifications:

The costs below represent impacts to salaries and estimated benefits of pending reclassifications. These are for classification change requests submitted to Central Human Resources and pending Executive review.

### **SUMMARY EXPENDITURE/REVENUE/FTE BY FUND:**

<b>Expenditures Package Summary</b>		
FUND 102		\$113,477
FUND 402		\$227,398
<b>TOTAL - EXPENDITURES</b>		<b>\$340,875</b>

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** CIP - Capital

**Department:** 06 Public Works

**Short Name:** PW - Admin W Space Improvements

**Package ID #:** 118

**Category:** Roads

**Description:** This budget request is for office and workspace improvements to the Admin West building on the 5th floor to create an efficient, attractive, and modern office space conducive to greater collaboration and to better accommodate the PW hybrid workforce.

**Justification:** Public Works staff on the 5th floor West relocated to Admin Building from the Everett Wall Street building approximately 17 years ago. At that time, minimal upgrades were made to office furniture and cubicle walls other than transferring the existing workspaces from the old building. These workspaces (cubicles and furniture) are past their useful lives (estimated to have over 30 years of use). It is an ideal time to modernize this work area to enhance work productivity in the digital era and hybrid workforce.

Project scope:

Records cleanup - on site paper records and files will be cleaned up and disposed or archived depending on records retention requirements. Cleaning up physical records will free up significant floor space.

Consolidation of Solid Waste Management from 4th Floor to 5th Floor.

Cubicle/workspace replacements - the updated workspaces will be slightly smaller due to less storage needs with most work now done electronically. Converting cubicles to smaller sized workspaces and reducing quantity by ~30% will free up significant floor space.

Move two (2) supply/mail/copier rooms onto designated floor space. This will free up two (2) rooms to become offices for Solid Waste Management moving onto the 5th floor.

Using the floor space gains, create 5 - 7 small focus rooms. These focus rooms will be enclosed by glass walls and will provide a drop-in quiet workspace where 1-2 staff can go partake in a digital meeting, take a call, have a one-on-one meeting, etc. This will be an important element to supporting a hybrid workforce.

Using the floor space gains, create 4 - 6 small teaming spaces on the floor where staff can work or collaborate, have discussions, brainstorm using a white board, etc. Because of the smaller workspaces, it creates the need for more open floor spaces for staff.

Other changes - necessary wiring upgrades, flooring, painting, lighting, and equipment for new conference rooms/focus rooms/co-labs, etc.

The total project cost estimate is \$1.5 million. This is a long-term investment (~25+ years) and spread out over the life of its usage calculates to approximately \$60,000 per year. A sizeable return on investment is expected through efficiency gains for 80-100 staff located in this work area. There will be savings associated with reducing Public Works leased space by moving Solid Waste off the 4th floor. Public Works sees great value in having staff on site at least part time. The updated work area will make it worthwhile and effective for staff to work in the office.

The total budget request is for \$750k in 2023 since half the work should be completed in the 2022 fiscal year.

## Snohomish County 2023 Budget - Department Request Priority Package Detail

---

**Package Type** Standard

**Department:** 06 Public Works

**Short Name:** 102 - RM NPDES Maintenance Crew

**Package ID #:** 140

**Category:**

**Description:** The Public Works Road Maintenance (RM) division is requesting six (6) new FTEs to accommodate the increasing workload regulated by the Department of Ecology (DOE) National Pollutant Discharge Elimination System (NPDES). The six new FTEs represent two additional RM NPDES crews, with each three-person crew consisting of one Class 5 Crew Chief and two Class 1 Laborers.

This budget request also includes two new vehicles (F450 and F550) to the Road Maintenance equipment fleet.

**Justification:** Two RM NPDES crews are requested to meet the needs of a rapidly growing Snohomish County, and to better balance workload between growing demand for surface water and road maintenance work activities. Significant increases in regulated facilities and functions related to NPDES compliance work is causing staffing shortages to road maintenance and road safety functions. RM must adapt to meet the growing demands of all priority functions and maintain the ability to respond to work requests in a timely manner. The new RM NPDES crews will better address the growing needs of the Surface Water Management (SWM) facility maintenance and water quality programs, while also allowing better balance of labor distribution in the overall Road Maintenance program.

RM NPDES crews are a primary resource for DOE regulated maintenance programs, which is funded by a combination of SWM fees and by County Road Fund. NPDES and drainage facility maintenance work has increased significantly since 2009, with another jump in 2022 following the recent incorporation of private drainage facilities into the public maintenance program. RM staffing has not increased in proportion to the increase in the workload over time, with current FTE staffing at the same levels as a decade ago. In recent years, seasonal worker staffing has proven unsteady and has been unreliable for staffing these types of regulated programs. Recently, RM has been performing rolling program shutdowns to ensure some level of work in all RM program areas.

With the added RM NPDES crews, the time delay between SWM facility inspections and maintenance work can be reduced from nearly one year to the desired response time of less than two months. This will help avoid future failures of the NPDES Phase 1 permit. Additionally, increased staffing levels will free up necessary resources to improve response time and increase work in the roads right-of-way including concrete, air saw, traffic markings, and vegetation maintenance.

Sufficient funding and service needs exist in the Surface Water Management division of CNR to support this package. The additional Road Fund expenditures will partially be offset by a reduced Road Maintenance seasonal program.

### **SUMMARY EXPENDITURE/REVENUE/FTE BY FUND:**
