

MASTER GARDENER PROGRAM

CULTIVATING PLANTS, PEOPLE AND COMMUNITIES SINCE 1973

Cultivating Plants, People and Communities since 1973

Our purpose

Mission

Engaging universitytrained volunteers to empower and sustain diverse communities with relevant, unbiased, researchbased horticulture and environmental stewardship education

WSU Extension

Master Gardener Volunteers

Trained by:

WSU faculty and staff online and in person.

Learn to:

Teach research-based horticulture.

Learn to:

Teach environmental stewardship.

Learn :to:

Answer questions and volunteer in communities

WSU Master Gardener Program

Cultivating Plants, People & Communities Since 1973

Become a volunteer mastergardener.wsu.edu

Promotes integrated pest management to minimize polluted runoff.

Clean Water

- Health of people, wildlife and ecosystems
- We all have a role to play
- Sustainable landscapes using IPM strategies

Promotes water-wise gardening and landscaping practices to conserve water

Water Conservation

- Water conservation benefits people, agriculture and the environment.
- We all have a role to play in saving water.

Design low water landscapes.

Teach landscaping principles to reduce the risk of loss due to wildfire. Wildfire Preparedness

- Impact of wildland fires on the ecosystem, in the WUI, and on our communities.
- We all have a role to play.
 - Work together with neighbors, create a plan.

Promotes sustainable techniques for growing local food to improve individual and community health and wellness.

Local Food

- Benefits of local food on individual and community wellness
- We all have a role to play
 - Techniques for growing fruits and vegetables

Teach ways to help native bees and other pollinators thrive in home and community landscapes.

Pollinators

- Pollinators are responsible for 1 in every 4 bites of food we eat
- We all have a role to play in pollinator conservation
- Pollinators support plant diversity

Teach ways to create resilient landscapes that are adapted to our changing climate.

Climate Change

- Our changing climate has an impact on people, wildlife and ecosystems
 - We all have a role to play
 - Techniques for home landscapes

Promote stewardship of diverse ecosystem through invasive species management, native species conservation and restoration in landscapes.

Plant Biodiversity

- Plant biodiversity supports species survivability
- We all have a role to play
 - Techniques for protecting biodiversity

Encourages building healthy soils to prevent depletion and ensure the long-erm viability of local food security and natural resources.

Soil Health

- Importance of healthy soils
- We all have a role to play
- Techniques for preserving and improving soil

Seeks to increase access to plants, greenspaces and public landscapes to benefit the health and well-being of all communities.

Nearby Nature

- Being in the natural world has proven health and wellness benefits
- Right trees and plants in
 the home landscape have
 health and wellness benefits
 - We all have a role to play.

SnoCo-Extension Master Gardeners

290 volunteers 20,673 hours served

Valued at \$777,925 annually.

SnoCo Community Impact in 2022

- 407 plant clinic events visited by 5041 members of the public
- 28 Classes offered to the public with 2530 attendees
- 1468 youth attended classes, workshops, demonstrations or field tours.
- 11,523 pounds of produce donated to local food banks

Number of questions answered in each Program Priority

- 250 Climate Change
- 2176 Nearby Nature
- 796 Clean Water
- 344 Water Conservation
- 1060 Local Food

- 791 Plant Biodiversity
- 40 Wildfire Preparedness
- 1104 Soil Health
- 618 Pollinators

Community Partnerships

- Surface Water Management's Natural Yard Care program and RainScaping program.
- City of Everett's Natural Yard Care program
- Solid Waste Division's Household Hazardous Waste program
