ITEM TITLE:

Motion 24-233, approving and authorizing the County Executive to sign Sub-Award Agreement with Adopt A Stream Foundation to implement portions of the Floodplains By Design Phase III Grant..body

DEPARTMENT: Conservation & Natural Resources/Surface Water Management

ORIGINATOR: Connie Price/Darcey Hughes

EXECUTIVE RECOMMENDATION: Lacey Harper

PURPOSE: To approve Sub-award agreement with Adopt A Stream Foundation to implement portions of the Community Floodplain Solutions - Phase 3 Implementation Grant (SEAFBD-2325-SnCoCN-00046).

BACKGROUND: The Washington Department of Ecology (ECY) awarded a Floodplains by Design grant (SEAFBD-2325-SnCoCN-00046) to Snohomish County, Surface Water Management Division for the Community Floodplain Solutions (CFS) - Phase 3 Implementation. Phase 3 of CFS is focused on implementing the projects that were designed and permitted as part of Floodplains by Design (FbD) funding for Phases 1 and 2, but also continue the development of a pipeline of new projects in the Snohomish Watershed. It is a cooperative effort between many partners aimed at working collaboratively to increase ecological function; reduce impact to local infrastructure from flooding and sediment transport; protect and enhance farmland productivity; and improve water quality and recreational opportunities in the community. Subawardees under this grant agreement include Tulalip Tribes, Snohomish Conservation District, Washington Farmland Trust, Adopt A Stream Foundation (AASF), and Ducks Unlimited. This ILA would pass through \$100,000 in grant funds to AASF for the implementation of the Al Borlin Side Channel Feasibility Project, which will investigate the feasibility of creating side channels on the Skykomish River and Woods Creek for the

purpose of benefiting Chinook and other salmonids within the City of Monroe's Al Borlin Park.
