### Executive/Council Action Form (ECAF)

**ITEM TITLE:**

Motion 22-440, approving and authorizing the County Executive to execute a Critical Area Site Plan (Swanson Road Bridge)

**DEPARTMENT:** Public Works

**ORIGINATOR:** Clarissa Barrett

**EXECUTIVE RECOMMENDATION:** Ken Klein (approved 10/10/22)

**PURPOSE:** This Critical Area Site Plan complies with requirements of the Critical Area Study (03/2007) in connection with the Swanson Road Bridge #80 Replacement Project, filed with Snohomish County Public Works under Survey #3471. Mitigation was required per Chapter 30.62A SCC (Fish and Wildlife Habitat Conservation Areas.)

**BACKGROUND:** The Swanson Road Bridge #80 Replacement Project was approved for construction by the Snohomish County Council in June 2007. As part of the regulatory permitting process, a Critical Area Study (03/2007) was required in order to construct the project. The Study and Plan called for a designated protection site that would be left permanently undisturbed in a substantially natural state. Parcel #31060900302500 was chosen as the compensatory mitigation site for the project’s impacts to critical areas. The project was completed in June 2010. Permanent protection of this mitigation site requires approval by the Snohomish County Council and recording of a Critical Area Site Plan with the County Auditor.

**FISCAL IMPLICATIONS:**
